## MINERS CRUSH CENTRAL WITH LINE SMASHING ATTACK.

### MINERS 19-CENTRAL 6

A faltering Central College line could not stop a fierce Miner attack and the Central Eagles fell before the Miners 6-19. The Eagles scored their lone tally in the first few minutes of play when they gained the advantage f an exchange of punts and followed it with a twenty yard pass.

The Miners took the kick off and immediately proceeded to batter the Central line to a pulp in a long march down the field from their own 35 yard line to a touchdown. The supposedly strong Eagle line was unable to stop Hassler and Thornton in their hard line drivers. Hyland distinguished himself in lugging the ball through a broken field on numerous occasions during the game. He was responsible for the longest run f the game when he took a Central punt on his own 20 yard line and ran it back to the Eagle 25-yard line. Malick was credited with two of the Miner touchdowns when he snared Hassler's passes over the Eagle goal line. Hassler accounted for the Miner's only extra point after touchdown whhen he hit the Eagle line for the necessary gain.

Central staged a desperate comeback in the final period by completing a series of passes in a march down the field but this rally was stopped when Thornton intercepted a pass on the Miner 15-yard line and

## THE WORK OF THE MISSOURI STATE SURVEY COMMISSION.

The Fifty-fifth General Assembly created the Missouri State Survey Commission whose duty it is to make a survey and report of the financial and revenue sources and needs of the state, of the several departments of state government, the condition and needs of the eleemosynary, penal and educational institutions, and the public schools of the state. This Commission of seven members, the Honorable Theo. Gary, Chairman, Senator Wm. R. Painter, Claude B. Ricketts, Allen McReynolds, Representative Langdon R. Jones, Senator Manvil H. Davis, and Fred Naeter, has since about the middle of June engaged in making a thorough and complete surve of the above enumerated state activities, and in this survey had the assistance of experts.

The general purpose of the survey is to find facts as to the condition of Missouri and in view of these facts to recommend to the Governor and General Assembly, if necessary, means of improving conditions. There is no doubt but that the work of the Survey Commission will result in a material advancement of Missouri state government and the welfare and prosperity of the people of Missouri. Its scope is wide enough to insure this.

We are particularly interested, of course, in the educational part of the survey, and still more particularly inthe survey of the School of Mines and Metallurgy. The Director's office has been very busy for the last three months in gathering information for the experts of the Survey. In this Dr. Clair V. Mann has rendered signal assistance. It was the purpose to put on the record of the Survey Commission, once and for all, the facts concerning the School of Mines. It is a well known fact in legal circles that in the trial of a suit, the main thing after all is to get the case on the RECORD for the case is finally decided by the record. We believe that the record for the School of Mines has been made and that future years will bring the

Continued on page eight.

## WESTMINSTSER TO INVADE ROLLA SATURDAY.

The Miners are expected to meet their match when the Blue Jays journey down from Fulton next Saturday. The Westminster crew are determined to wipe out the defeat suffered last year at the hands of the Miners, but the Miners are just as determined to continue their march toward the Missouri College Union championship.

A victory for the Miners Saturday will pave a great deal of the way to the coveted goal. The only remaining hurdle to be taken for success will be Drury.

The Blue Jays have not been scored on this season by a conference team, while they piled up scores like 58 to 0 against Culver-Stockton, 39 to 0 against Tarkio College, and 19 to 0 against Drury. Boyd, Westminster's star quarter-back is expected to cause the Miners much trouble by his fast deceptive plays. The Jays will probably use a passing attack as they have in several of their previous games.

At present the Miners, Westminster, and Missouri Valley are in a triple tie for the lead in the M. C. A. U. conference. If the Miners win Friday there will be a chance for a co-championship shared with Missouri Valley, but if Westminster wins either the Blue Jays or the Missouri squad must fall when the teams meet Nov. 16.

The Miners returned victorious from the conflict with the title-holding Central eleven but have again donned war togs preparatory to giving Westminster the proper kind of entertainment. Several hard scrimmages have taken out all stiffness left over from the Central game and Coach Grant has been, drilling his men on some plays created especially for Westminster''s benefit.

This game is by far the most important game remaining of the Miner schedule, and every Miner should be out to help the team Saturday. Come on. Let's have a victory.

Continued from page one.

Hassler kicked out of the danger zone. The Miners had possession of the ball most of the time while Central failed to make a first down from line plays, making all her gains from passes.

The Miners used straight football throughout the game with very few deceptive plays attempted. The muddy condition of the field evidently hindered the title-holding Central eleven from getting their offensive machine functioning properly. Their passing was ragged and their kicks all fell short, giving the Miners possession of the ball well down in the Eagle territory on several occasions. Hassler had a good day in punting, his kicks averaging nearly 40 yards.

The defeat which the conference title holders suffered at the hands of the Miner aggregation places the Miners well up in the list of contenders for the championship this season. Should the Miners emerge victorious from the clash with Westminster next Friday the only stumbling block to the title is the comparatively weak Drury eleven. Westminster has a long series of victories to her credit with large scores which indicates that the Blue Jays have a scoring punch that is not to be denied. The Miners were not forced to uncover all their deceptive plays in the Central game and these plays should augment their strength materially in the battle with the Blue Jays.

Londrigan injured his shoulder in scrimmage last week and again in the Central game and may not be able to play against Westminster. Schofield's ankle has improved a great deal, and although he was unable to participate in the game with the Eagles, he is expected to be in fine condition for the Blue Jay battle.

**Starting Line-ups:**

| Miners | Position | Central |
|---|---|---|
| Malik | l.e | McGruder |
| Gorenstein | l.t | Welch |
| Lacy | l.g. | Sutton |
| Tomlinson | c | Taylor |
| Defoe | r.g | Lonnes |
| Gibson | r.t | Knight |
| Londrigan | r.e | Rhodes |
| Hyland | l.h | McKinley |
| Kelly | r.h | Lillard |
| Thornton | q.b | Tomlin |
| Hassler | f.b. | Moore |

Score by periods:

| | | | | | |
|---|---|---|---|---|---|
| Miners | 0 | 12 | 7 | 0 | 19 |
| Central | 6 | 0 | 0 | 0 | 6 |

Scoring: Miners, touchdowns, Thornton, Malick (2); try for point, Hassler; line plunge, Central; touchdown, Lillard.

Yards from scrimmage: Miners 236; Central, 33. Passes completed: Miners, 4for 63 yards; Central, 7 for 79 yards. Punts: Miners, 5 for average of 37 yards; Central 3 for average of 25 yards. Penalties: Miners, 6 for 75 yards; Central, 3 for 35 yards. First downs: Miners 14; Central 5.

### THRU THE TRANSIT

Bugs just brought the transit in line with Jack Potter, who suffered defeat at the hands of Dr. Armsby in the matter of remaining as the head of the Senior Council. The Dr. seems to have an educated uppercut.

Squint has gathered the news that the big, big football player doesn't like to be called the "Irish" football player. He wants to be just plain Mr. Cuttler. Squint has acquired the brilliant idea of calling him "Sir Cuttler." Not bad at all, is it?

Love makes the world go round, but that isn't what Bauman says.

### MID-SEMESTER IS NOV. 9TH.

The first half of the fall semester ends November 9. This date is nearly upon us and as it closes we will find many of the freshmen and a few of the sophomores, whose grades do not fit the curve, dropping out. During the past week the members of the faculty have been throwing various and sundry quizes with the sole intent of finding out who among the frosh stay and who leave. As a whole, the grades of the near men seem to be slightly higher than they have been in previous years.

All students are reminded that Saturday is the last day on which courses may be dropped without final F. To those who have been hitting the ball—congratulations. To the men who have not been so fortunate in obtaining a goodly supply f grade points—more power, stay with it, let's go!

### R. O. T. C. BAND MADE TRIP TO FAYETTE.

No small part of the pep and enthusiastic spirit which helped the team to win a glorious victory against a worthy foe, was furnished by the R. O. T. C. Band. Thirty strong, and led by John W. Scott, they journeyed to Fayette last Friday and added music and unlimited spirit to that of the aggregation of rooters which accompanied the team.

The band scored a hit with the Central rooters when it marched before their stands and played the Eagle's Alma Mater.

Without a doubt, the occasion was well supplied with music since Central had three bands upon the field in the big parade.

### MR. FRANCIS B. FOLEY SPEAKS TO MINING AND MET.

The Mining and Metallurgical Association of the Missouri School of Mines, which met Friday, Nov. 1, enjoyed an interesting and instructive talk by Mr. Francis B. Foley on "The Use of Steel in Mining." Mr. Foley is Research Superintendent of the Midvale Steel Co., and is well qualified to discuss subjects pertaining to the use, improvement, and causes of failure of steel.

The principle causes for the failure of steel in industrial work are corrosion, breakage, and wear. Recent experiments have been conducted by the Midvale Steel Company's Research Laboratories for the purpose of investigating the kinds of steel which are most resistant to wear and to find the causes of breakage.

The main body of Mr. Foley's talk was concerned with the results of these experiments and suggesting measures of improvement. His discussion was concentrated on the scientific reasons for the failure of drill steel, and the influence of corrosion and wear upon failure. Numerous suggestions for improvement such as higher carbon steels, better milling and better heat treatment were also discussed in detail.

### KAPPA SIGMA FORMAL.

The annual formal Hallowe'en Dance of the Kappa Sigma Fraternity, Saturday, Nov. 2nd, proved to be one of their best social affairs of the year. The Hallowe'en motif was carried out in the decorations to provide a most attractive entertainment for everyone.

Tall corn stalks lined the walls and reached to a ceiling made of autumn leaves, to produce an artistic picture, characteristic of the season. All the bewitching details appropriate of the occasion were carried out to perfection.

Pumpkins and black cats scattered around the rooms, a huge owl looking on the dancers from his perch, gave an effect of weirdness. The mellowness of the moon, combined with the glowing effect of the fireplace, made the scene even more realistic.

The Varsity Orchestra, inspired with the spirit of the autumn celebration, rendered exceptionally good music. The dance was attended by an unusual number of out-of-town guests. The chaperons for the evening were Mr. and Mrs. Charles L. Woods, Mr. and Mrs. L. T. Hudson, Mr. and Mrs. E. J. Campbell, Prof. and Mrs. F. E. Dennie, and Mr. and Mrs. Beckwith.

Blasting drilled wells
*to increase water supply*
LESSON No. 10 OF THE
BLASTERS' HANDBOOK

VERY frequently wells, even though drilled through known water-bearing strata, will not yield sufficient water. Only a few pores or crevices intersected by the drilling supply any water. Certain blasting methods will open up all of the fissures for a considerable distance in all directions, thereby greatly increasing the supply of water.

But such blasting requires very careful procedure. For instance, questions arise as to the proper depth of the charge; the amount and kind of explosives to load; the methods of loading and firing charges, and other details associated with blasting.

Do you know how to make a "jack squib," or how to prepare a nitroglycerin charge to explode by means of an electric blasting cap, or how to make a dynamite "torpedo?"

The details of a great many blasting operations are fully described and illustrated in the Blasters' Handbook. You will run into some of these operations. Then the Blasters' Handbook will prove to be a friend indeed!

*A copy of the Blasters' Handbook, already used in many of the largest engineering classes, can be obtained free by mailing this coupon.*

## THANKS.

We are indebted to the combination of town merchants, the Long Radio and Telephone Co., and the Lyric Theatre which performed a valuable service last Friday in bringing the Central game to the students play-by-play in the Lyric Theatre. Between halves of the game, part of the picture "Smiling Irish Eyes" was shown. The Miner wishes to express the gratitude of the student body to the Long Radio Co. and the Lyric Theatre for this gratis service.

In connection with the above matter we wish to advise the freshman class that, hereafter when the Lyric Theatre extends such a courtesy as was shown us last Friday afternoon, you are NOT to disregard same by attempting to rush the show in the evening. The upperclassmen stand united upon this policy of fair play.

## A REAL THANKSGIVING

This year we shall have real reason to be thankful on Thanksgiving Day. The hand of fate and the kindly judgment of the faculty have granted that the Friday and Saturday immediately following Thanksgiving Day shall be holidays. This gvies us a Thanksgiving holiday season such as was formerly enjoyed each year and such as is enjoyed by most of the colleges in the country.

Whereas we were considering with distaste, the possibility of presenting arguments for the Thanksgiving vacation in this column, we are now privileged to express the thanks of the student body to the faculty for this consideration.

Now we can descend upon Drury en masse and do justice to our ambitions of taking that annual classic away from them—so that our team, which is the fastest, fight'nest Miner grid combination of years, may close what has been, so far, a successful season, in a final burst of splendor.

## REGARDING CHRISTMAS VACATION

Christmas vacation this year starts at 4:00 p. m. on Thursday, December 19. This is early enough so that any student in school should have time to reach his home before Christmas. Students are hereby notified that no excuses will be issued by this office for absences incurred immediately before Christmas vacation, unless approved by the Director. If you are planning on trying to get away a few days early,—don't.

H. H. ARMSBY,
Student Advisor.

## ON THE SIDE LINES

The Miners had quite a following at the game Friday. It is estimated that a crowd of about one hundred was there to give the "Big Team" support.

The boys got some bad breaks at the beginning of the game, but when they did get going it was just too bad.

It is reported that there is other game down at Fayette besides eagles, namely quali. However, there is a closed season on them.

Hyland made a beautiful run in the third quarter when he returned a Central punt sixty yards. Incidentally, the rest of the team did some excellent blcoking on that play.

Early in the fourth quarter, the Eagles staged quite a rally, but it was soon stopped when they lost the ball on an intercepted pass.

We have to hand it to Central though, they sure are a scrappy bunch. They were fighting just as hard at the final whistle as they were at the beginning of the game.

Oh, the Eagles they fly high in Fayette—that is they did until they got their wings clipped.

Central fans couldn't quite understand how we could gain through their line. That isn't hard to explain though—the Miners were just a

## MORE HIGH LIGHTS OF THE CENTRAL GAME.

It was a small, but intensely enthusiastic, group of Miners that watched the "Golden Wave" clip the tail feathers of the "Eagles". The opening kick-off saw the Miner cheering section calmly seated on the bleachers waiting for action. Then, as the Miner team pulled its first good play of the game, a small cyclon tore out of the stands and up to the wire surrounding the field. As the dust cleared away, it was discovered that it was Capt. Moore, who

had no intention of missing anything. After the next three plays, practically the whole Miner aggregation had followed suit—except the band, which was confined to the stands. But our renowned drum major, "Harke" made up for that in that he saw that there was a burst of music at all critical moments.

The MSM side of the field somewhat resembled a race track due to the activity of Prof. Kershner (closely followed by "Yank" Farrar and "Ted" Baron) in chasing up and down the side line trying to keep on the line of scrimmage. Friendly relations seemed to have been established between the band and our "Major", for when the band was playing, Farrar gave it a chance, and when cheering was to be done, the band was considerately silent. As a result, there was less discord, but the noise was spread over a greater period of time.

During the whole game, Murray was right on the job, and he seemed to get more out of the handful of Miners at the game than could ever be gotten from the usual student attendance at a home game. But then, the Miners were away from home and had to cheer mightily to compete with that co-ed cheering section of Central. And those Central bands! We were almost tempted to transfer to a co-ed school.

### MARTIN JOHNSON'S JUNGLE ADVENTURES SHOWN IN GENERAL LECTURES

The General Lecture Series program for Thursday, Oct. 31, consisted of five reels of motion pictures showing the adventures of Mr. and Mrs. Martin Johnson in Brittish North Borneo.

Mr. and Mrs. Johnson are both explorers, and their journey among the wild tribes and animals abounded with interesting and thrilling experiences. The close-up views of wild animals encountered upon their trip were especially interesting and some were made under the most hazardous of conditions.

Civilization in Borneo is still of the lowest type. In most localities, little or no clothing is worn and the weapons are of the same general type as those used hundreds of years ago. The men are very indolent, all of the work being done by women.

A large part of the picture vividly described a seven weeks trip through the jungle in search of the Tengarra tribe. The men of the tribe are strikingly feminine in appearance and take as much pains in their make up as the average modern woman.

The picture program was quite different from any that have been presented thus far and offered unusual entertainment for those who were present.

# "Eyes" for blind flying!

*Three new G-E contributions to the conquest of the air*

LINDBERGH, flying blind much of the way, hit Ireland "on the nose" as he winged toward Paris. Now, as an aid to air navigation comes the magneto compass, a product of General Electric research, which gives pilots a navigating instrument of extraordinary accuracy

Meanwhile, two other General Electric contributions to aviation have been developed—the electric gasoline gauge and the radio echo altimeter. The ordinary altimeter shows only height above sea level. The radio echo altimeter warns the pilot of his actual distance above ground or water by flashing green, yellow, and red lights on the instrument board.

*Every year hundreds of college-trained men and women enter the employment of General Electric. Research, similar to that which developed "eyes" for blind flying, is one of the many fields of endeavor in which they play an important part.*

### KNUTE K. ROCKNE

"Knute Rockne's first job was in the Chicago Post Office at the handsome salary of five bucks per week," says Jimmy Corcoran in the December issue of College Humor. "I am told by old time employees of the P. O. that Rock could toss a mail sack farther and faster than anyone in the place. One day he asked for a raise. They gave him an extra fifty cents per week, and that's one reason why Knute Rockne went to Notre Dame. The other was that he could sprint and pole vault. He did not go to Notre Dame as a football player, and I will be willing to bet my straw skimmer on that. I have it from one of King Knute's old associates, who will go nameless here (in order to save his hide,) that Rock arrived at the South Bend station with a derby hat, a sweater with a choker collar, a pair of trousers that had given good mileage—and a track suit. You can believe this or not. Still another crony swears that Rock borrowed forty-five dollars to get his first peek at the golden dome of Notre Dame. I wish to be neutral here, although I will state that Rock paid back the forty-five."

"In looking over my favorite boxing guide, I see no record of the mysterious conductor who barnstormed the town of Niles, Michigan, La Porte, Indiana, and way places, polishing off some of the ham-and-eggers of the day. In fact, there may never have been a mysterious conductor; and for fear that some one will accuse this splendid old Norseman of picking up a stray iron lad here and there in his freshman year, I will not place the stamp of fact upon it. Let it go as a rumor."

### BONANZA PLEDGE DANCE

The Bonanza Club inaugurated their first social activity of the season Saturday night, Oct. 26, with their annual pledge dance.

The evening was a "wow" from beginning to end. The pep was inspired by Reeves and his gang of melody makers. They were going good.

The chaperons were Mr. and Mrs. L. T. Hudson, Mr. and Mrs. E. D. Williams, Prof. and Mrs. Goodhue and and Mr. and Mrs. E. R. Tragitt.

Out of town guests were: Misses Jessie Hewitson, Alma Lola Whitney and John Schenk of Springfield, Ill.

The dance was given in honor of R. A. Parker, K. E. Armfield, H. A. Vitt, V. H. Rutzke, R. M. Taylor and C. G. Thornton.

ber 30th to complete its work. The final report will probably not come out for several months afterthat. What procedure will follow after the final report is in the hands of the Governor is at present not determined.

It is of interest that one of the members of the Commission, the Honorable Wm. R. Painter, is a graduate of the School of Mines.

The Commission is sub-divided into committees, one of which, headed by Mr. Allen McReynolds of Carthage, Mo., has for its special work the survey of the University and the School of Mines. Mr. McReynolds made a careful inspection of this institution sometime ago. The educational experts who spent considerable time at the institution were Dr. Donald P. Cottrell, Professor Ray L. Hamon, and Professor H. P. Hammond, now Director of Investigations for the Society for the Promotion of Engineering Education.

We believe that the School of Mines will receive a high standing as an educational institution in the report of the Survey Commission.
By Dr. C. H. Fulton.
