Policy - Scholars' Mine Access and Use

Purpose

The purpose of this policy is to define the parameters of access and use for digital content housed in Scholars' Mine, the institutional repository for the Missouri University of Science and Technology.

Access

All items in Scholars' Mine will have a version of the complete content free to all Missouri S&T communities, with strong encouragement for free to all, with the following exceptions:

- When contract with sponsor prohibits or restricts disclosure for a known period of time.
- When blocked or restricted on a time-limited basis with the understanding that access thereafter becomes unlimited.
- Licensed materials that are placed in the repository and are limited by legal arrangements to specified users.
- When an embargo has been imposed by a recognized authority.

Use

All content in Scholars' Mine is protected by United States Copyright Law. Any use of this content must be in compliance with United States Copyright Law and adhere to all defined licensing and use restrictions. Copyright for most content in Scholars' Mine is held by the author(s) or publisher. Scholars' Mine legally houses and provides access to content through a non-exclusive license agreement with author(s) or when publishers allow content to be housed in an institutional repository.

Some content in Scholars' Mine is licensed under a Creative Commons license agreement. Use of Creative Commons licensed content is dependent upon the terms of the Creative Commons license. The Creative Commons license and any additional use restrictions are clearly defined for each work.

Users may make or use personal copies in print or electronic format as permitted under statutory provisions of copyright law as amended, provided that:

1. The author(s), title and full bibliographic details of the item are cited clearly when any part of the work is referred to verbally or in the written form.
2. A hyperlink/URL to the original Scholars' Mine record for the item is included in any citation of the work.
3. The content is not changed in any way.

Users may not:

1. Sell the whole or any part of an item.
2. Refer to any part of an item without a citation.
3. Amend any item or contextualize it in a way:
 - a. that violated copyright law and any existing license agreement or
 - b. that will impugn the contributor's reputation.
4. Remove or alter the copyright statement on an item.
5. Make a copy of the item for use or distribution on another web site unless allowed by an existing license agreement.

Failure to comply with this policy may result in the infringement of U.S. Copyright law or an existing license agreement. Reported instances of noncompliance with the conditions of access or use are investigated, reported to the content owner and appropriate actions taken.

Policy Review

This policy and the actions and activities associated with it will be evaluated regularly to ensure that implemented strategies continue to support the Library's mission and policies, use resources in a cost-effective manner, and adapt appropriately to address evolving law and technologies. This evaluation will be completed at least once every three years.
