Scholars' Mine
Missouri University of Science and Technology

Scholars' Mine, the institutional repository of Missouri S&T, provides digital access to the scholarly and creative works produced by faculty, staff, and students. This digital repository is a service of Missouri S&T Library and Learning Resources.

On 19 Nov 2020 Scholars' Mine reached a new milestone: **five million downloads**. Downloads continue to be robust and the latest million downloads took place in about 7 months. Researchers and other users have downloaded material including theses and dissertations, faculty publications, conference proceedings, research data, university newspapers, alumni magazines and more.

The 5 millionth download was by a user in San Francisco, California: [Design Recommendations for Steel Deck Floor Slabs](#). This publication was one of the ten most downloaded during the past seven months and is the third most downloaded all time in Scholars' Mine. The Center for Cold-Formed Steel Structures conferences and other publications provide valuable information for researchers around the globe.

Highlights of the past seven months in Scholars' Mine include the 2020 annual meeting of INSPIRE-University Transportation Center, Scholarly Productivity Reports of the Department of Civil, Architectural and Environmental Engineering and streaming videos.

- While this year's [INSPIRE-UTC annual meeting](#) was held via zoom due to the pandemic, technical research presentations and student posters were still showcased and videos of the presentations are available in Scholars' Mine.

- Scholars' Mine added CArE [Scholarly Productivity reports](#) for 2012-2019. These annual publications highlight the scholarly work of faculty and students as they work to **Change the World!**.
- Webinars and other videos available for streaming in Scholars' Mine enable further global outreach by Missouri S&T's faculty. Examples include [INSPIRE webinars](#), [EMSE seminars](#), [podcasts](#) and [research data](#).

In 2020 Missouri University of Science and Technology is celebrating the 150th anniversary of its founding and Scholars' Mine has many historical collections of interest including [yearbooks](#), the [alumni magazine](#), the [student newspaper](#) and various [histories of the university](#).

Additional information is included here in supplemental files:

- Top ten publications of the past million downloads
- Top videos streamed during the seven months
- Top page views during the seven months

Enjoy the streaming video which highlights the repository redesign and other features of Scholars' Mine. The video is a creation of Student Team Lead Charles Maddi.
