THE MISSOURI MINER.

Missouri School of Mines and Metallurgy, Rolla, Mo.

Vol. 2, No. 7.

Friday, October 22, 1915.

Price 5 Cents.

M. S. M. 51, S. N. 20.

A big crowd, imbued with a lot of "pep," was present at last Friday's game, which was one of the hardest fought games seen on Jackling Field for some time. The Miners presented a patched line-up, with Imlay, Kiskaddon and McCartney on the bench. From outward appearance the Normalites looked to be a husky, well-balanced aggregation. They outweighed the Miners, and were chuck full of confidence—not to win, but to make a good showing, which they surely did.

Normals kick off, and Wilson makes a 10-yard return. Miners make first down. Brazill sprints around end for 15 yards with good interference. Brandenburg captured a forward pass in the midst of a crowd of Springfield men, and clatters about 25 yards to a touchdown. "Kelly" kicks goal. Score: Miners 7, S. N. 0.

Springfield takes next kick-off. A forward pass is good for 15 yards. Miners recover a fumble, but lose ball again on an intercepted forward pass. Normals make a first down. Dawson "short circuits" a Springfield flip, and runs 45 yards for another score. Miller kicks goal. Miners 14, S. N. 0.

Normals again receive the kick-off, and proceed to march thru the Miner line for several first downs. Five penalties for off-side Miners helped considerably in getting the ball to Miner's 10-yard line, when time is called for quarter.

Springfield's big right half scored on two bucks straight thru our line. Miners 14, S. N. 7.

Miners take next kick-off, and with Miller and Dawson doing most of the lugging, carry the

ball to a position immediately in front of the goal posts, and "Big Joe" sends it squarely between the uprights for a place kick. Miners 17, S. N. 7.

Springfield's line plunging is temporarily stopped by the Miners. Much time is taken out for injuries, Askew and Miller being the victims. Lyons replaces Miller. Dover negotiates 10 yards around end. Miners lose and regain ball. Dover thrown for a loss, and Springfield takes ball. Brazill intercepts a forward pass when time is called for the first half. Score, Miners 17, S. N. 7.

Walsh and Heinz put on a small side show between halves.

In the second half, after receiving the kick-off, the Normals start in with a rush and make several first downs on straight football. The Miner line is leaking badly, but they recuperate and take possession of the ball. On the second play Dover skirts the Normal right end for a 55-yard run, and scores. Goal kicked. Miners 24, S. N. 7.

Massey replaces Bock. Normals again plug our line for short gains, making distance repeatedly. Dawson recovers a forward pass, and it is the Miners' ball. Miners get a big penalty and kick to Springfield safety man, who allows the ball to touch him and roll behind their goal, where Wilson falls on it for a counter. Goal is kicked from a difficult angle. Miners 31, S. N. 7.

Normals receive next kick-off, and insist on the line plunging stuff. Wilson flops a teacher for a 10-yard loss. A beautiful forward pass is successful, and it is Normal's ball on Miner 5-yard line. One buck takes it over.

Imlay's Performance Best of Season on the Gridiron.

St. Louis Republic, Oct. 17, 1915.

BY PARKE H. DAVIS.

New York, Oct. 16.—Football is now in its fourth week. A sufficient number of games therefore, have been played to indicate the trend of tactics and play for the present season. Two features which impress a person who makes a national survey of the sport are the unusually large number of goals from the field, which have been kicked thus far and the extraordinarily important part that is being played by forward passes, both complete and intercepted.

Six games, all of local importance, already have been won by goals from the fields and in twice as many more has the defeated team been enabled thereby at least to score. The games in which a field goal has decided the day were the Princeton-Syracuse, Swarthmore-Bucknell, Villa Nova-Ursinus, Western Reserve-Hiram, Baylor-Howard Payne and Clemons-Tennessee games, the victor in each instance being the first college named in each couplet.

Consistently with the trend of football methods in recent years, the drop-kick still continues to be employed more often than the place-kick in effecting a goal from the field, the ratio thus far being as high as two to one. Only two exceptionally long goals thus far have been achieved. McGucken of Villa Nova, and Lewis of Washington University, have each negotiated a goal from the 45-yard line.

To date only one player has performed the monarch feat,

Talks by a Freshie's Roommate.

WHAT "PEP" WILL DO.

Say, boy, that was sure a nice little bouquet of pep we slipped the team when they left last Tuesday. That's the spirit. That's what we can do, that's what we should do—not one time, but all the time. By gee, old roommate, when No. 3 pulled in, and each one of the roller squad picked up his box and shook hands, and when that old boy, Jimmy, got up on a dray and yelled, "Come on, fellows, all together," and when those huge monstrous bursts of thunderous M, M, M-I-Ns tore loose, why, ya' know how I felt? Just fine! And so did you, and everybody else!

Now, put yourself in the team's place. Aren't they going to fight for old M. S. M? Aren't they going to dig, and buck, and plunge, and plow, all around, under, on top and through their unfortunate opponents? Well, I

guess! See, old top, there's the result of an overflow of enthusiasm, of real college "support the team win or lose" stuff, of real honest good old-fashioned "pep." It makes the team and the other students meet in the same firm heart to heart confidence. If the men lose they know that you will not ride or knock them, that you realize they did their best; and if they win, then, old roommate, then, and only then, do we deserve any of the fruit of their efforts.

Then, too, what effect did that display of "pep" have on the train crew and passengers? Why, I'll bet all of my contingency fee (even before Fred Lane docks it) that there wasn't a man, woman or child on that train that didn't realize that there existed a School of Mines at Rolla. And that is a fundamental principle of advertising. Let the people know who you are, and what you're doing! So, that's the stuff. And that's what we will keep up all through the year, and the next, and so on.

Now, how do you think those pikers feel who never boost school activities, who never indulge in such things as "pep," and who even deign to smile at the real student who is pulling for his school? You know who I mean, old man—those three upper classmen and couple of Juniors who stood on the corner when we had the parade last week. They might think they're ornamental to the school, but useful, well, no! But, maybe they'll brace up—youthful bashfulness will wear off—and, maybe, by the time their upper lips have more scrub oaks, maybe they'll show their pep. The Freshmen may give them the example again!

So, old roommate, that's the result of "pep." Everybody turns out, everybody boosts, and long after we've cashed in, there'll be echoing in these old Ozarks, and even in the furthest corners of the world, thunderous bursts of the real article called "pep." And that's the spirit that'll make Missouri School of Mines the school of "Peppy" Miners, proud of their school, and glad to prove it.

Professor Durward Copeland writes from Singapore, Asia, on August 31, that as it now looks, he will have to return by way of the United States. Speaking of the heat in Singapore, he says, "They make a mistake when they say the sun resides at a place some millions of miles away, it lives here, and always did."

AIR MEASUREMENTS BY PROFESSOR HARRIS.

Bulletin No. 2, Vol. 2, of the School of Mines Technical series has just been issued. The title of the bulletin is "Orifice Measurements of Air in Large Quantities" by Elmo G. Harris, C. E. The results of a large amount of experiment data are given. Professor Harris reaches the conclusion that large orifices can be used to measure the flow of air with the same degree of accuracy as small orifices, and that the methods discussed furnish the best and most accurate methods of measuring the discharge of large fans and blowers.

Dr. G. H. Cox went to Hot Springs, Ark., the early part of this week on business.

M. S. M. 51, S. N. 20.

Continued from First Page.

They fail to kick goal. Miners 31, S. N. 13.

The Normals again succeed in running the ball down to the Miner 10-yard line, where they are held. Dover kicks out of danger, but the big halfback of the Springfield outfit runs it back 25 yards, dodging several tacklers. A forward pass shoves the Normal score up to 19. Goal is kicked. Miners 31, S. N. 20.

Imlay goes in, relieving Brazill. Jack makes 25 yards (the old stuff). Time out for Raible and Dover. Raible replaced at quarter by Dawson, and Heman takes Dawson's place. Jack makes 30 more. Joe adds 10. Jack scores. Wilson kicks goal. Miners 38, S. N. 20.

Normals take kick-off, but fail at the line. Springfield takes out time for injuries. Miners regain ball on fumble. Jack for 25. Heman slips thru Normal team, and gets credit for a touchdown. No goal. Miners 44, S. N. 20.

Normals take kick-off. Normals are penalized. The Miner line has stiffened wonderfully, and hold the heavy Normal rushes. Springfield kicks out of bounds on their own 40-yard line. Miners' ball. Imlay smashes thru for a 40-yard jaunt, crossing goal line for last touchdown. Goal is kicked.

Final score: M. S. M. 51, S. N. 20.

Prof. Dean lost a cane and a hat as Imlay made the last score.

Senior Notes.

Ski, rye, rip, roar,
1-6 Senior.

A meeting of the Senior Class was held in Parker Hall on Friday evening, Oct. 15th. Some minor matters were first disposed of, and the question of the future activities of the class then discussed. Several big class celebrations were proposed, together with other features that should prove to be boosters for the class. The oft-lamented lack of "pep" in student activities was also brought up for consideration. After some well spoken words by members of the class it was unanimously agreed, in a manner entirely in harmony with its past records, that old "16" would not blur its enviable three years' reputation on the home stretch, but that everything possible should be done to revive the old spirit. It was then decided to begin at once by attending the first Rollamo show in a body.

There were a number of absences from the meeting. A few of these may have been excusable, but the majority were not. Wake up, Seniors. Don't forget your obligations to your class and school.

Charlie Gold says he knows of a nice girl in St. James who is lonesome. Don't all speak at once. McCartney has the first chance.

L. A. Turnbull and D. H. Morgan are representing the Engineering Record and Lefax respectively. Louie says that Lefax is nothing more than a copy of a small part of the Record, but Morgan will tell you that one page of Lefax contains more information than Engineering Record and the several other magazines combined. After hearing both sides of the argument, it can be easily seen that the only safe course is to subscribe for them both.

J. D. Fowler, '06, is a member of the firm of Cook & Fowler, civil engineers, of Dallas, Texas.

catching the ball on the kick-off and running through an opposing team the entire length of the field for a touchdown.

This rare feat was achieved by J. Imlay of the Missouri School of Mines, against Illinois. Imlay was the player who, in 1914, scored more points than any other player in the United States. His total for the season was 180.

Pearman Married.

Miss Marie Smith and J. E. Pearman, ex-'17, were married in Carthage, Mo., last Saturday night at the home of the bride.

The bride, who last year was a student at the University, will be remembered as having visited Rolla at commencement of last year.

The groom while a student at the School of Mines played forward and center on the basketball team, and was a member of Kappa Alpha fraternity.

C. E. Petersen, '16, acted as best man, and Gerard H. Cowman, ex-'14, as one of the ushers.

Mr. and Mrs. Pearman will reside in Carthage, where Mr. Pearman is employed by the American Zinc, Lead and Smelting Co.

Sophomore Column.

Drill, transit, boiler plate, Engineers, 1-8.

On Monday evening, October 18th, a meeting of the Sophomore class was held.

Some suggestions were made with reference to the organization of our football team, and Doenneke was delegated to make this team a reality. We are certain that Henry, with the backing of the class, can organize a team sufficient to frighten the "green cappers." Practice every night at four.

Several talks were made as to the feasibility of making the Springfield-Drury trip in a body. This matter, meeting with wide approval, was left in charge of a committee, and will be given consideration at our next meeting.

The class instructed the secretary to send Leon Harrison Goldman, who is in the hospital at St. Louis, a letter of encouragement. We extend our heartfelt sympathy to Mr. Goldman, and hope that he will soon be able to join us.

The secretary reported that three men had paid this semester's class assessment. This resulted in the making and passing of the motion that all class dues be paid on or before November 1st. After that date the names of all delinquents will be posted on the bulletin board until they come across with one simoleon.

Several new yells were put on the board for consideration. We found a place for them in our noodles, and went in a body to the football field, and told the team to give 'em h— down at College City Friday.

Where were all of the Freshmen Monday after school?

Schnaidt told us that his arm was coming along nicely, and he would soon be out to help us play football.

W. R. Cox was caught wandering around Cuba Sunday night about midnight. We thought

Freshman Column.

We hear that Scruby has perfected a new explosive which he intends to offer to the Kaiser. Wonderful, but be neutral, Horace, be neutral.

We understand that Pat Murphy had his squad out for practice. Keep it up, Sophs, we want a little competition.

Bruce, Brazill, Dowd and Krause had quite a job shaking hands before the train left. We all like to shake hands with good men. Keep up the good work. We're proud of you.

We were all surprised to see Heine Kamp still in town Thurs-

day. What's the matter, Kamp, did they stop the trains to College City, or couldn't the fairer sex spare you?

Sept. 13 we put up a fight that surprised every one. We had lots of the old "pep," and we have shown it since at both games, and every other opportunity. So let's go, Freshmen, and do our part in getting rid of these stories about the Miners losing their "school spirit."

Rollamo Picture Show.

Last Saturday evening saw the opening of the Rollamo Picture Show, with the largest crowd on record. Practically all the students, with a large number of faculty and townspeople attended. Two excellent pictures, "The Builder of Bridges", and "Beware the Dog" were shown. Every one expressed his or herself as very well pleased with the show, and inquired whether these two good pictures were just curtain-raisers? To this the Rollamo Board replies that the same quality of films will be shown throughout the season, and at least two feature films each week. It is probable that in the near future the famous Charlie Chapman will be flashed on the screen at Parker Hall.

Some one around school remarked the other day that the people of Rolla felt that the picture show was solely for students and faculty. This impression is entirely erroneous. The Rolla townfolk are cordially invited to attend all the picture shows, as well as other entertainments, in fact, their patronage is respectfully solicited, and the Rollamo Board promises to do all in their power to give them the best entertainment possible.

We understand that Bob Heller and Clyde Reinoehl were unable to return from Salem last Saturday evening because of a heavy rainstorm. Never-the-less they returned Sunday morning without any mud, or any other proof of rain at all on their machine.

We are not Satisfied

WANTED.

A young mining engineer, who has had some engineering experience and is a neat letterer. Apply to C. J. Adami, Gen. Supt., St. Joseph Lead Co., Bonne Terre, Mo.

Mr. Jesse Cunningham, librarian of the School of Mines, is in Joplin this week, attending the annual meeting of the Missouri Library Association, of which body he is president.

C. C. Conover, '12, assistant superintendent, National Zinc Co., Springfield, Ill., has been successful in effecting a considerable saving by a new treatment which he has developed. The company has put in a new mill for this method and finds that it is a money saver.

WANTED.

Every man who is to graduate from a Missouri High School in 1916 to know about the opportunities offered for technical study in the School of Mines and Metallurgy, at Rolla.

Students, Faculty, Alumni and Friends, what suggestions can you offer to accomplish this result?

What is the best method of presenting data relative to the School of Mines and Metallurgy to High School students?

Turn in suggestions and ideas to the office. Yours may be the best.
