Price 5 Cents.

## Texas A. & M. 33, Miners 3.

(NOTE.—The Miner wishes to thank Capt. Joe Wilson and Mr. Bob Lyons for their notes on this game; they are impartial and extraordinarily clear.)

According to all accounts, the team surely received a defeat, but the hospitality shown by the Texans more than took away the sting thereof. The boys were shown a royal time from the minute of their arrival until the moment of departure. Nothing was left undone to insure a real welcome. This kind of spirit will go a long way towards insuring pleasant and profitable athletic relations between the two schools in the future. Texas A. & M., we take off our hats to you.

On the evening before the game a big mass meeting of Texas students was held. Capt. Wilson, Imlay and Kiskaddon spoke before the assembly, and were given a round of applause.

The day of the game was hot, and that, together with the fact that our men were outweighed, especially in the line, had a large bearing on the big score rolled up by the A. & M. Jim Gregory, old M. S. M. man of other days, was there, having traveled 150 miles by automobile, to witness the battle.

Extracts from Mr. Lyons' notes covering the most important plays, would sound something like this:

Rolla kicks to Texas. Texas immediately kicks again to Rolla, and Imlay opens up with a 30-yard run around end. Garrity, A. & M. left end, recovers a Miner fumble and races 40 yards to a touchdown. Goal kicked. M. S. M. 0, Texas A. & M. 7.

Texas kicks off, and Dover returns it 10 yards. Imlay no gain; Kelly for 4 yards; another yard for Miller. Miners kick, and

Texas returns 10 yards. Texas makes another first down, and then kick to Imlay, who returns the ball 10 yards. Kelly makes 4 more, but Miners are forced to kick. McCartney, Imlay and Miller make some good gains, and finally work the ball down to a point from where Wilson place kicks a goal. Score: M. S. M. 3, Texas A. & M. 7.

After several attempts, by both teams, at carrying the ball, time is called for the first quarter.

In the second quarter Texas did most of the advancing with the ball. It was a slow but sure march to the second touchdown. The goal was missed. Score, M. S. M. 3, Texas A. & M. 13.

Texas again kicks to the Miners, and a 15-yard penalty finally forced the Miners to kick. A. & M. proceeds to make short gains by line plunging, but lose the ball after making several first downs. Krause replaces Bock. Kelly and Imlay make good gains, only to give up the ball again when distance is missed by less than a foot. Texas fails at carrying the ball, and it is the Miners' ball when time is called for first half. Score. M. S. M. 3, Texas A. & M. 13.

Texas soon took possession of the ball after the Miners had received the kick-off. They registered a touchdown on line plays, mostly. Their gains were snort, but consistent. Score, M. S. M. 3, A. & M. 20.

Tommy Dawson replaces McCartney. Miller takes the next kick-off, and makes 15 yards before being tackled. Tommy for 5, "Kelly" 6 more. A. & M. intercept a Miner pass, and kick again on the second down. Imlay breaks away for 20 yards, and throws a scare into the Texas rooters. He cleared the en-

tire secondary defense, and only the fleet Texas quarterback overtook him. "Kelly" plugs the line for 4 yards. A Miner pass fails, and it's the A. & M.'s ball. A terrific battle was necessary before the Texans could go over for another score. Their downs were barely made, and the Miners were fighting like demons. A successful forward flip paved the way to another score. Goal is kicked. M. S. M. 3, A. & M. 27.

Heman receives the next kick-off when time is called for the fourth quarter.

Miller and Dawson did most of the lugging for the Miners, Tommy once getting away for a long run of 40 yards. The Miner backfield was holding its own against the heavy Texas backs. Texas again resorts to line plunging, which nets them small gains, but every little bit helps, so they eventually pounded their way to another touchdown. The kick-out was missed. M. S. M. 3, A. & M. 33.

Kis injured his ankle, which necessitated his retirement in favor of Raible. The Miners lose the ball again, after Imlay had made some progress with it. Texas makes some long end runs and the ball is in their possession when time is called. Final score, M. S. M. 3, Texas A. & M. 33.

### The line-up:

Miners, 3.	Texas A. & M., 33.
Dover, Heman.....	R. E. Kendrick
Brandenburger.....	R. T. Crow
Nevin.....	R. G. Rylander
Wilson, (O). .....	C. Rogers
Bock, Krause.....	L. G. Wilson
Askew.....	L. T. Settegast
Bruce, Lyons.....	L. E. Garrity (O)
McCartney, Dawson. R. H. B.....	Gilfillan
Miller.....	F. B. Rollins
Imlay.....	L. H. B. Collins
Kiskaddon, Raible.....	Q. B. Litterest
Officials. Moore, (Vanderbilt), umpire;	
Moise (Sewanee), referee; Firth (Chicago),	
field judge.	

*Continued on Third Page.*

### Senior Notes.

H. H. Vogel, '16, has returned from a three weeks trip to Mine LaMotte, where he was assisting Marion L. Thomas, ex-'02, mining engineer, 71 Broadway, New York City, in making a report on the Mine LaMotte property. C. A. Burdick, '10, 74 Broadway, New York City, was also assisting Thomas in this investigation.

Jack Krebs' mustache has disappeared. Jack would like to appeal to his friends to refrain from asking particulars.

Jimmie Allen is as busy again as ever after having been confined to his room by illness for several days.

### Football Notes.

The bunch came back from Texas A. & M. with few bumps, and less excuses than is usually the case under similar conditions. They agreed that they bumped up against a good team, and all of 'em, to the man, were loud in their praises of Texas sportsmanship and hospitality.

The writer knows that the bunch were outweighed, approximately ten pounds per man, that the weather was exceedingly warm, and that the boys put up a tough fight. They all got back, so what's the use of crepe, and "I told you so" stuff. Unfortunately, Kis received a badly twisted ankle, which may keep him out of a game or so, but we all hope for a quick recovery.

The old steam roller (Kelly patent) may be missing fire of late, but she's still in running condition. When the team faces the Kirksville Bonesetters we anticipate a victory, and if the same "pep" is evident that permeated the stands at the Springfield game, the bunch will demonstrate to us that our confidence was well placed.

Stay with 'em, everybody, and we'll see the old "Miner spirit" developed as it has never before been developed. That is the true sportsmanship that wins out.

Miner spirit: Askew to Imlay, when score stood 14-3 against us: "Come on, Jack, they are just even with us. Let's go!"

### List of Paid Subscriptions

To the Miner received up to Wednesday, Oct. 27, 1915:

B. W. Adams, Rolla.  
L. Barker, Rolla.

Home. Sweet Home.  
Sept. 24, 1915.

My Dear son:—  
I received your letter about that awful fire in Rolla, and am so much relieved to know that you escaped with only a few bruises and the loss of your clothes, books, instruments, etc.

Just as soon as you get located, be sure and have B. H. RUCKER write fire insurance to cover everything you have, and if you can spare the amount from your allowance, you ought to take out a little life insurance also.

Yours affectionately,  
A. OTHER.

## Texas A. & M. 33, Miners 3.

*Continued from First Page.*

Houston Post Special.

Imlay was the fastest man ever seen on the Texas grid, and while the score looks one-sided, the game was clean and hard fought from start to finish. Capt. Garritty and Rollins, of the A. & M., and Imlay, of the M. S. M., were the outstanding stars.

## Junior Column.

All members of the Junior Class who are eligible to membership in the Mining Association and have not taken advantage of the opportunity to join, should do so without delay. This organization offers an opportunity to know of the mining profession in actual practice; and after spending two years in studying mining, surely one ought to know what his studies may lead to. "Funny Old Engineers" we would be if we had no other ideas of mining, metallurgy, and such, than those which we get thru our class work. The cost is but \$1.00 per year; so there is no reason why we should not all belong. Mr. Kluge, the newly elected treasurer is now ready to receive the dues. Those who have already joined and have not paid their dollar are requested to do so.

P. S. Splendid talks and good smokes at every meeting.

Our college education and influence is beginning to show up in some of our members. Kaplan has joined the ranks of fussers, and Ambler is continuing in the good work. It is also reported that J. K. Walsh has been seen

with company, taking a walk along the Frisco right-of-way recently. After study comes recreation.

Shipley and Raible were among those present at the wedding of Frank Cody, '10, which was held at St. James last week. We can depend upon Doc to be on the firing line every time.

Kaplan, Greenburg, and other members of the Junior Class are planning to spend the week end at Meramec Spring. Eats will be the predominant feature of the party. An inspection of the spring from a geological standpoint will be the other feature.

Huff and Langdon are now doing some practical mining work at Aurora, Nev. Huff intends to be with us at the beginning of the second semester. "Torchy" Langdon is seriously thinking of coming back to school next Sept. At present both are holding positions of responsibility.

## Notice.

There will be a meeting of the Student Council at 1 P. M. Saturday, Oct. 30, in the reading rooms of Parker Hall. All officers of each class are requested to be present.

## Pipe and Bowl Dance.

Pipe and Bowl gave their first informal dance of the season in honor of their new members, J. G. Wilson and W. H. Kamp, in Johnson's Hall on Wednesday evening. After several dances, a delightful luncheon was served. The hall was decorated with the club colors, and a number of pennants and banners.

**THE MISSOURI MINER**

**Lines to a Persistent Fusser.**

If Louis Kaplan will show the same dogged persistency in his studies that he does with the ladies, we are sure he will make a great engineer; one that will move mountains, stop volcanoes, and make rivers run up grade. In fact, he will surmount all obstacles. We are only judging from observations taken the other evening while attending the weiner roast. We felt sorry for the young lady, and don't see how she could "barrett," that is, bear the persistency. It would have taken a transit in the hands of a Senior to get all the angles that he described in keeping the other fellows away. By the look on his face you would have thought he was viewing the passage of a heavenly body over a meridian, through the field of a telescope. It was that look that probably saved him from a wrinkeling, but the fellows hated to mar the heavenly expression of his face. Our heart and sympathy are with you, Kaplan, and we truly and sincerely hope that you will live through it, for we feel that should you succumb to this attack the world would lose a great and persistent man, one whose loss would be felt for generations to come.

**LOCALS.**

M. H. Thornberry of the M. S. M. Experiment Station and D. A. Lyon of the Bureau of Mines, Washington, D. C., were in Bonne Terre, and Flat River, Mo., this week finding out how the Experiment Station can help the lead district in saving ore by the flotation process.

Reid Henson and A. Roy Jackson were guests of the Kappa Alpha fraternity during the past week.

Ira W. McConnell, formerly Professor of Civil Engineering in the Missouri School of Mines and Metallurgy, later in charge of some of the largest irrigation projects in the west, and now with Stone and Webster Company, engineers and bankers, of Boston, Mass., stopped over between trains last Saturday to renew old acquaintances.

Thomas Ashburner, Marquette Building, Chicago, western representative of the Babcock-Wilcox Co., manufacturers of the Babcox-Wilcox Safety Water Tube Boiler, has presented to each member of the junior class in Themo, with the compliments of the company, a copy of "Steam". This is a book of 330 pages handsomely printed and contains a large amount of valuable data. Needless to say the book is highly appreciated by the juniors.

A telegram was received in Rolla Monday stating that Mrs. John W. Bodman, of Chicago, died suddenly Sunday night. Mrs. Bodman came to Rolla as the bride of Professor W. W. Garrett. After Professor Garrett's death she served as librarian for the School of Mines. In 1912 she married John W. Bodman, '10, and is survived by her husband and two children.

Professor Copeland left Rolla Tuesday. He will make a trip to London and then return to America. He is expected to be back in Rolla early in 1916.

The Sigma Nn fraternity en-

Students Always Welcome.

### Sophomore Column.

Most of our classmen attend-  
ed the Lyceum show last Thurs-  
day. None of us succeeded in  
eloping with the little Irish girl.

"Wanted, twenty escorts for a  
wiener roast. Apply to R. O.  
Shriver." Twenty, plus a little  
"dx" applied, and spent a very  
pleasant evening last Friday.  
Our class was represented by Ep-  
person, Lawrence, Bardsley, Val-  
entine, Massey and Halley.

Wednesday evening our Presi-  
dent called a class meeting to  
discuss pending and current busi-  
ness. The Springfield trip mo-  
tion mentioned in last issue is  
still under investigation. The  
committee is working hard, and  
may be able to give some definite  
report in the near future. A  
school club suggestion was put  
before the meeting for discussion.  
Some very good talks were made  
by men who had had experience  
with such organizations in other  
institutions of learning. So far  
as the social side of the matter  
was concerned, it met with the  
approval of those present, but  
when it came to the financial  
side of the question it was de-  
cided too large a task for the  
student body. This proposition  
can, however, be put thru on an-  
other basis, it was decided.

Mr. Clark reports that class  
dues are coming in very slowly.  
Remember November 1st.

It is reported that Doennecke  
was seen with a young lady the  
other evening. We failed to  
learn her name, but hereafter we  
hope to keep better track of him.

Who was your friend on the  
train Monday night, Larry?

We heard that Golick made his  
de-butt into society last Saturday  
night.

Everybody out to the Varsity  
game Friday.

### A. I. M. E. Meeting.

The fall meeting of the Ameri-  
can Institute of Mining Engineers  
will be held in Joplin the 29th  
and 30th of this month. Some  
of the Rolla members who will  
attend, are, G. H. Cox, C. R.  
Forbes, D. H. Radcliffe, J. L.  
Head and C. G. Stifel, of the  
School of Mines, and H. A.  
Buehler of the Bureau of Geology  
and Mines. It is expected this  
meeting will be well attended,  
and plans are being made for  
large reception.

**Talks by a Freshie's Roommate.**

**JUST A CHAT.**

How's the world treating you, old roommate? Seldom, you say? Well, listen here, that's pretty fair for a Freshman, but I've known 'em to have their solar plexus massaged for less than that.

Where's that blessed pipe of mine? Got strong and walked off, eh? Well, just for that I'll cadje your Tux, sit on that nice pretty pillow which that friend of yours gave you, and enjoy myself.

Heard from home lately? Sure; trust the "old folks at home" for loyalty; they surely are faithful at remembering how lonesome even the bravest of students become at times. I know you might say you're not, etc., but listen here, wouldn't you like to go back home, just for a day?

But speaking of letter writing, how often do you write home? I don't mean to a one particular party who sent you the candy or pillow top, to whom you devote about three-fourths of the time you reserve for "Descript," I mean, how often do you write to your Dad or Mother? Humph! I thought so,

You like to get mail from them, en, especially when the envelope is well padded with a blue slip that any enterprising bank will O. K. Yes, old roommate, but just think how they like to hear from you. I know you're not the "darling of their hearts," and all that, but there's something more involved, there's a question of duty.

Yes, you might fool 'em into thinking that you're too busy with school work to write, but, then, look how much more they

might be disappointed at your grades! No; I don't think it's a sign of weakness, homesickness or mollycoddleism. It's no more than right. You owe it to them.

Say, hand me your Tuxedo. Thanks. Now a match. Much obliged.

I noticed you weren't out for practice tonight. What's the matter? Yep, you're right in a way, old timer, this may be an "off" year for M. S. M. football. Didja ever notice, after a year or couple of years of prosperity there's always a relapse? After nearly every "bumper" crop there's a season of poor harvests? And in the same way, after an unusually glorious season of football there occurs a season less brilliant. It's a sort of reaction, I suppose,—just can't be doped out,—but that's what seems to be on deck at present.

No, don't start your crabbing. Nobody's to blame, unless, old roommate, it's yourself and every other student. I don't mean to say that you are responsible for present conditions in themselves. No! Rather, you ought to see that conditions improve.

Lookahere, if, after every bumper crop there is a failure the following year, then it follows that very probably, after every failure there ought to be another successful season. On the same principle, we ought not to whine and deplore the state of affairs, but, rather, increase our "pep," and upon the ashes of defeat build a new and better piledriver of victory.

Don't blame the Coach; he's doing his best. Don't knock the Faculty, for being too strict in making a player keep up his studies. Don't blame anybody! Wake up, yourself. Stick it out

**Phone 168.**

the rest of the season. Don't be a quitter. I guess I'll go nuts on the subject, but believe me, there's nothing like "Pep." Now, "pep" doesn't always mean, "All right, fellows, Rah! Rah! Rah!" Most of the time it means grit, sand, pluck and perseverance. If some of the upper classmen see fit to be afraid of the season ahead of them, don't follow them; think for yourself.

Now, on the other hand, let's be frank. If there's anything wrong with the team, why not say so. If the Coach doesn't seem to coincide with your views, if the Faculty are too embarrassing in their demands, what have we a Student Council for?

Say, we've rambled from letter writing down to football, so if you'll let me cadje a little more Tuxedo,— You say it's all gone? Well, let's turn in. I'm sleepy as — Good night! Set the alarm for seven. Adios!

**MINERS, LISTEN!**

'Tis many occasions you'll have this winter to buy a box of fine chocolates. Now, if I could see you face to face, do you know what I'd do? I would try to impress you with the fact that in purchasing TEN BROEK'S you get the 80-cent quality for 50 cents. Candy eaters who know, and who have tried TEN BROEK'S, tell me it is the best chocolate sold in Rolla. It comes in halves, 1s and 2s.

Act. I Two matadors and a  
bull.

Act. II One matador and a  
bull.

Act. III Bull.  
(Curtain.)

What kind of a sport is  
"Deck"?

Well he claps at the moving  
picture show.

The Freshmen grades for Oct.  
with few exceptions, are said to  
be very satisfactory. All the  
football men are up, and the  
whole class is working hard.

Just to show how much un-  
known talent there is; Moore has  
developed into a soloist. He has  
a strong voice, great endurance,  
and with his present persever-  
ance he will undoubtedly become  
well known.

Oscar Deckmeyer has given up  
playing, and now whistles par-  
dies. His repertoire of all the  
latest songs is very good. For  
further information, or an exhibi-  
tion see "Oscar"

Last week while en route for  
St. James, Prey and Eulick spent  
several hours in Bourbon. But  
don't hold it against them, it  
wasn't their fault.

A letter from R. H. B. Butler,  
'09, written from Barcelona,  
Spain, tells that he was resident  
in Brussels when the war broke  
out; was held a prisoner by the  
Germans for six-weeks; escaped,  
but sacrificed all his possessions.  
His many talents are now being  
applied under high pressure in  
war service. Although the war  
hit our old friend "Reggie" hard.  
If any of our readers need a re-  
minder to identify R. H. B. they  
need only to look over the  
sketches in Rollamo of 1909.  
Permanent Address—"Kirhley-  
mead", Herman Hill S. Wood-  
ford, Essex, England.

Seal: this 30th day of September, 1915.	
O. M. KNAPP,	
Notary Public.	
My commission expires Jan. 30, 1919.	

## Alumni Association.

### TO THE ALUMNI:

Your committee met at 4 P. M. Monday, October 25, 1915, and counted the ballots received for officers of the Alumni Association. The men given below received a majority of votes in each instance, and are, therefore, declared duly elected to their respective offices. Much interest has been manifested by the Alumni. In one instance the loser was only one vote behind the winner, and in another only two votes separated the winner and the loser.

Respectfully,

V. H. GOTTSCHALK, '98.

F. B. POWELL, '06.

D. H. RADCLIFFE, '13,

Committee.

### Officers M. S. M. Alumni Association 1915-16.

	President,	
D. C. Jackling, '92,	-	Hobart Bldg., San Francisco, Calif.
	Vice-President,	
R. E. Hoffman, '05,	-	Atlas Portland Cement Co., Hannibal, Mo.
	Secretary-Treasurer,	
G. H. Cox, '14,	-	Professor of Geology M. S. M., Rolla, Mo.
	Advisory Committee,	
H. G. S. Anderson, '08,	-	410 Eddy St., San Francisco, Calif.
J. A. Garcia, '00,	-	McCormick Bldg., Chicago, Ill.
L. E. Garrett, '01,	-	Associate Professor of Mathematics, M. S. M., Rolla, Mo.
R. F. Rucker, '06,	-	Aluminum Ore Co., East St. Louis, Ill.

### Alumni News.

J. M. Dougherty, ex-'08, is at Lake City, Fla.

E. Wander, '10, is doing experiment work on high explosives for the Equitable Power Co., East Alton, Ill.

Herbert F. Rogers, '99, is superintendent, Provident Chemical Works, St. Louis.

Geo. L. Olmsted, '01, is in Joplin, Mo.

Lynton, Hatch and Collins had to skip across the border last week when Villa captured Cananea, Mexico.

L. A. Delano, '04, is mill superintendent, B. F. Murphy, '10, is mine captain, and L. B. Pringle, chemist for the St. Joseph Lead Co., Bonne Terre, Mo.

D. P. Hynes, '08, with H. L. Hollis, Chicago, says he is busy studying up the metallurgy of tungsten and will soon be treat-

ing tungsten ores in the Chicago plant.

The Kirksville Democrat gives an account of the new water works at that place, installed by C. V. Downing, ex-'15, who is City Engineer of Kirksville, Mo.

K. V. Moll, '04, during his visit to Rolla last week, was struck by the many changes in school since his day. Mr. Moll, who still holds the record 100-yard dash, was particularly interested in the possibilities in athletics due to the splendid facilities for training afforded by Jackling Field and the new "gym".

He gave a little account of the first field day at M. S. M. The competitors, in order to get a field for the meet, spent four days in clearing the race track at the Fair grounds of scruboak.

E. B. Thornhill, '08, Metallurgical Engineer, Buffalo Mines Co., Ltd., Cobalt, Ontario, Can-

ada, read a paper before the American Institute of Mining Engineers at the San Francisco meeting, Sept. 16, 1915.

Albert H. Fay, '02, mining engineer, Bureau of Mines, Washington, D. C., is on the program of the Pan-American Scientific Congress to be held in Washington, December 27, 1915, for a paper on "Mine Accidents."

D. I. Hayes, '12, is superintendent of the Treynza Mines at Benton, Wis.

H. H. Nowlan, '13, is with Valerius, McNutt and Hughes at their branch office in Billings, Montana.

J. C. Finagin, Jr., '14, with the Detroit Copper Co., Morenci, Arizona, writes that J. C., III, has a fine chest and shoulders and is a candidate for captain of the Miners football team in 1935.

Herbert A. Roesler, '03, with the Vinegar Hill Zinc Co., of Platteville, Wis., announces the birth of a son, Herbert Stuart, September 14, 1915.
