THE MISSOURI MINER.

Missouri School of Mines and Metallurgy, Rolla, Mo.

Vol. 3, No. 11.

Friday, November 24, 1916.

Price 5 Cents.

Texas A. & M. 77, Miners 0.

(Note: The Miner is indebted to Mr. Stoner for the following brief account of the M. S. M.-Texas A. & M. game at College Station, Tex.)

The Miners met the heavy Texas A. & M. team on a good field Friday, Nov. 17. The effect of the heat was noticeable on the Miners. The Miners were outweighed all around. The A. & M. line averaged 190 pounds, and the back field 175 pounds.

A. & M. kicked. Miners return to 30-yard line. Make 30 yards on criss cross, then held for downs. A. & M. makes return to 30-yard line, then first down on a close decision on 20-yard line. A. & M. gets touch-down. Miners kick. A. & M. returns the ball about half the field. A. & M. make consistent gains on smashes to touchdown. Umpire disqualifies White for slugging. Referee sustains his decision upon the protest of A. & M. player and coach.

The excessive weight of the A. & M. team began to tell, and they made gains on nearly every play. Score at quarter: A. & M. 27, Miners 0.

Second quarter was a repetition of line smashes and short end runs. The Miners were forced to kick nearly every time the ball was in their possession. Score at end of half: A. & M. 54, Miners 0.

In the third quarter the Miners were nearest scoring, when by means of two forward passes they had the ball on the A. & M. 20-yard line. A. & M. held, and soon put the ball in Miner territory. A. & M. score field goal. Score end of third quarter: A.

& M. 57, Miners 0.

The last quarter showed the ball in Miner territory most of the time, with the Miners kicking on the fourth down. Score at end of last quarter: A. & M. 77, Miners 0.

Line up at start of game and Miner sub. for 1st half,

Officials:—Referee: Rix (Dartmouth)
Umpire—Hammond (Lehigh). Head-
linesman—Touchstone (Washington.)
Two 15 minute quarters. Two 12 minute quarters.

The following was taken from the Texas A. & M. Battalion a week before the game with the Miners: Wonder what they think now?—"Our game with Rolla Friday is to be a hard fought and evenly matched affair, if Rolla lives up to what she has been doing this season. The Miners last fall staged one of the prettiest exhibitions of football ever seen on Kyle Field, but the Farmers were right that day and won 33 to 3. The Rolla eleven incidentally scored the first hostile points on the Farmers present gridiron."—Texas A. & M. Battalion.

ON TO TULSA—NOV. 30!

According to authentic information, all Miners who will be in Tulsa on Thanksgiving Day, will receive royal treatment at the hands of the Tulsa Alumni. This game, being the Big Game, will be worth going miles to see, and just because the Miners have had the small end of the score rather frequently of late is no indication that the dope bucket can not be overturned in Tulsa.

Win or lose, you can't afford to miss the big banquet after the game. It will be a "joy-fest" right—and no mistake. Two "iron men" will get you "by" the door. A little cooperation will make it an assured success—it will be a success. Come one—Come all!

TIME—NOV. 30, 1916.

PLACE—TULSA, OKLA.

Cross Country Run.

Nov. 25, 1916, 2 P. M.

The start will be made at the Jackling Gymnasium at 2 P. M. Saturday, Nov. 25th, 1916.

Course:

East on 12th St. to Olive St., south one block to Panther's Bluff Road. East 1½ miles to cross road, north to intersection with Rolla-St. James Road, then back to Rolla, finishing on Jackling Field.

Saturday evening, Nov. 11th, Theta Tau held initiation, after which a banquet was served at the Baltimore. The initiates were E. O. Stoner, H. A. Horner, P. D. Kern and E. O. Shriver.

BEAT KENDALL.

Mass Meeting.

Illustrated lecture on Egypt by Dr. Francis Daniels, of the Department of English and Modern Languages. Dr. Daniels covered practically everything pertaining to Egypt. The people were taken up in detail, and the various characteristics of the Arab, the Turk, the Copt, the Nubian, and the Mameluke were pointed out. Dr. Daniels also spent some time on the industries of Egypt, describing minutely the various old-fashioned processes now in vogue in Egypt. Points of interest, including the University, the Museum, the Pyramids, etc., were also touched upon in the lecture. The lecture was splendid, although the most attractive and interesting part was obscured by postage stamps. Come again, Doctor, and tell us about some of the other countries you have visited.

The Babcock & Wilcox Boiler Co. has furnished the Thermo class with their book entitled "Steam." It is a very instructive volume, with many cuts showing the boiler installation of many industrial plants the country over. The formulas derived are the results of practical tests and experiments, this being an improvement over some of the highly theoretical treatises dwelt at length on in most books on this subject. These books were sent free of all charges.

Profs. Duffy and Dake are striving to acquire the grace of Pavlowa at the town dancing academy. Hop to it, Profs., we're for you; it's never too late to learn.

L. C. Skeen writes that he will get back into civilian clothes about Dec. 9th, and expects to arrive in Rolla about the 15th.

All those desiring to go to Tulsa for the Thanksgiving day game should see "Doc" Stoner at once for special rates.

See you in Tulsa November 30.

A Large Reservoir for School of Mines.

A large force of men and teams are busy plowing and scraping the ground and removing trees from the lowplace in the campus back of the ore dressing building, in order to build a large open reservoir, to supply water for the boilers, and for use in the ore dressing laboratory. The soil is being removed and the ground is to be covered with gravel. R. R. Dickerson who is superintending this work says that the water for the reservoir will be supplied from the roofs of the buildings and also from swimming pool. He says that it will be kept pure and fresh all the time and that the reservoir will be a real ornament to the campus and to that part of Rolla. The water will be dammed by the sidewalk that crosses the low place or ravine on the east side of the campus, and it will extend 200 feet. It will in reality be a small lake. Mr. Dickerson says that everything will be done to make it a place of beauty. It will be a fine place for skating during the winter and during the summer the water will be drained off and the reservoir thoroughly washed out and cleaned.

Freshman Column.

Sherman visited "Jimtown" Saturday.

Myer was seen in "The City of Hills" (Newburg) Saturday and Tuesday. Wonder what the attraction is?

The Freshman football squad is practicing daily and will be in fine condition for the battle-royal with the Sophs. The team will not be picked until the day before the game, so come out everyone whether you have played before or not. You may make a place on the team.

Boyle's Law, Revised:—

The number of letters a Freshman writes to his girl "back home" varies inversely as the length of the time he has been in Rolla.

The freshmen who left chem. lab. before three-thirty Tuesday are to be congratulated. They did not have to work a problem.

O. W. Steele, ex-'17, is the proud papa of a 10-pound boy, born at Dallas, Texas. Congratulations, Opie.

N. B. Larsh, M. McCarthy, H. Weiser, P. D. Wilkinson.

JUNIOR COLUMN.

Collecting class dues: Decker: Murph, are you an independent now?

Pat: No, I am a Mucker, and always will be.

A round head.

Lecturer on character analysis. Bill Reber: What characteristic would you look for in choosing a wife?

Lecturer: A woman who goes to church.

Bill: Well, that's what I've been doing for the past 3 years.

Henschel: Are they going to charge for the Soph-Fresh game?

Junior: Sure, we expect to charge, all right.

Pop Shriver: We know you have guts enough, alright.

Ribbons, 10 cents. Yes, thank you.

Prof. Frame: How many atoms in a gram of hydrogen?

Mike Shanfeld: Oh, er-er-er about 1700.

Prof.: No, you are way off. There are, I believe it is 6×10^{23}

Second Lyceum Number.

The Musical Entertainers will appear as the second number of the Lyceum Course, being given under the auspices of the Y. M. C. A., on Friday evening, Nov. 24, at 8:30 P. M., at Parker Hall. The cast includes three rare artists in Miriam Downe, Bonnie Brooks and Eve Anderson. Their program will be of a musical and reading nature.

From reports and newspaper clippings of the performances of this company in other towns, the performance Friday should be one of the most entertaining that has ever been given in Rolla.

R. A. Bingham, '11, is installing and operating a Cottrell smoke treating apparatus for the Balbach Smelting and Refining Co., at Newark, N. J.

Willard P. Taylor, ex-'04, is proprietor of Taylor's Assay Office, 110 E. 9th St., Joplin, Mo.

THE MISSOURI MINER.

George P. Woodhall Killed.

George P. Woodhall, while doing some engineering work for the Utah Copper Co., near Salt Lake City, Utah, last week, was instantly electrocuted by coming in contact with a live electric wire. Mr. Woodhall, whose home was in Denver, graduated from the School of Mines in the class of 1903. He was later united in marriage with Miss Alma Ray, daughter of Mr. and Mrs. Geo. W. Ray, who then resided in Rolla.

The following account, taken from a Salt Lake City paper, was sent to us by Mrs. G. W. Ray:

George P. Woodhall, 38 years of age, who resided with his wife and three children at 2 Louise apartments, and who was employed by the Utah Copper Company as a civil engineer, was instantly killed by the current from a live electric wire while making a survey near the big pit of the company yesterday at Bingham.

According to word received in Salt Lake, Mr. Woodhall's assistant threw a survey chain over a live wire. The electricity traveled along the chain and struck Mr. Woodhall. The assistant is said to have been only slightly injured.

Mr. Woodhall was born in Chicago. His early life was spent in Denver. For six years he was employed by the Oregon Short Line railroad as a civil engineer. A few years ago he returned to Denver, and he was appointed state engineer of Colorado. Thirteen months ago he returned to Salt Lake, and was employed by the Utah Copper Company.

Besides a widow and three children, Anie, George and Ray, he is survived by his father, George P. Woodhall, who lost another son in the Spanish-American war.

In writing to us Mrs. Ray said that Mr. Woodhall's remains were taken to Denver, and funeral services were conducted from St. Stephens Church, of which he was vestryman, and the pallbearers were from the vestry of that church. Many Rolla friends sympathize with the relatives in their bereavement.

Elsie Jones, " 'Twas Ever Thus," Saturday night.

The assay office and equipment of the late A. W. Hare, '75, at Aspen, Colo., can be purchased at a bargain.

Edward P. Dwyer, 95, is manager of the zinc ore purchasing department of the Empire Zinc Co., Joplin, Mo.

Less than a week until the turkey gets the axe. Those of us who are not going home are trying to borrow axes. However, the hard part will be to find the turkey.

After the lecture Tuesday a number of the studs made a rush for mirrors. Most of them discovered that they have square heads.

Previous to the Soph-Varsity scrimmage Tuesday night, there was plenty of Freshman money, pies, cigars and other collateral in sight. Now it has been withdrawn from the curb market in front of the post office.

The Junior Class tried to create the impression that it was studious and hard working, by working an hour over time on a quiz Wednesday afternoon. This is the first time the Juniors have tried anything of that nature, and as it is a good example for under-classmen the Juniors should be commended for it. No. The door was not locked.

The dancing school seems to be rather popular, judging from the number of students on the outside trying to look in.

The geology department is running in opposition to the Rollamo by giving two picture shows in one week. The hero of Wednesday's picture was Stalagmite. He is short, stout, and according to one of the audience, "Built from the ground up."

A hot time in the old town next Tuesday night. Another Rollamo. Those who went to the last one had such a good time that they demanded this dance. It is to be a masque affair, and a number of us are truly thankful, as it gives us an equal chance.

The Rollamo dance coming just before vacation affords an excellent opportunity to begin to say good-bye to her.

A new society is being formed by some of the students. Its name is the "Art and Thimble

Club." For a motto it has, "More Beer and Wider Sidewalks." The colors of this organization are Blue (Ribbon) and Green (River). Its mascot is an Old Crow. Initiation will take place during Thanksgiving vacation.

Football Dope.

The team came back from the Texas A. & M. game with comparatively few bruises and no hospital list. All admit that the Texans were a hard, clean bunch of football players, who could make any team go some to beat them.

It is only a week before the big Kendall game and then comes the ringing down of the football curtain. The boys are polishing up a few plays and, incidentally, learning some new ones. Every man will go into the Kendall game in good physical condition, and all of them are going to fight it out to the finish.

A practice scrimmage with the first team and the Sophomore Class teams furnishing the entertainment, was the card for last Tuesday. At the end of four short quarters the Sophs. were ahead, 18-12. Aid, Burgeson, and Larsh starred for the Sophs. Costly fumbles robbed the Varsity of chances to score.

NOTICE!

Next week's Miner will be out by next Wednesday noon. All copy **MUST** be in by Tuesday A. M. Get busy! Turkey Day Number.

In Memoriam.

WALTER HOWARD ASKEW.

A year ago, Walter H. Askew was killed in St. Louis, by being thrown against a tree when an automobile in which he was riding skidded into the curbing. Askew's death was one of the saddest incidents during the 1915-16 school term. His deeds and pleasant personality are still vividly in our minds, even if his body has long been laid to its eternal resting place.

SENIOR COLUMN.

The Metallurgical Society of the School of Mines and Metallurgy effected a permanent organization last Tuesday evening. The following officers were elected: T. P. F. Walsh, President; H. A. Horner, Vice President; and C. L. Epperson, Secretary and Treasurer. An Executive Committee, consisting of Professors Mann and Clayton, Horner, Epperson and T. P. F. Walsh, chairman, was elected to draft a constitution and to make all necessary arrangements for a successful year. The next meeting of the Society will be held in the near future.

P. B. Shotwell, ex-'17, is at present employed in the assaying department of the Calumet and Arizona Copper Co., at Bisbee, Ariz.

After listening to the lecture last Monday on the nine fundamentals of character, we now understand why a certain effeminate, pompedoured, peroxidized blonde Senior shows a remarkable lack of ambition.

Jack Krebs is working in the sampling department of the Copper Queen Mining Co., at Bisbee, Ariz. Jack, being low on finances, humbly requests that the Senior who owes him a dollar send same to him at once.

An unconfirmed report from an apparently unreliable source has reached this paper that Clem Hippard has finished assaying.

Abe Lew Kaplan, "Jinks," who is working in Collinsville, Okla., was robbed last Sunday night. From reports it appears that "Jinks" was thoroughly cleaned out.

E. L. Beyer, '16, formerly with the Missouri Valley Bridge and Iron Co., of Leavenworth, Kans., is now with James Stewart and Co., of New York City. He is located at Glassboro, N. J., in charge of the outside work of erecting a glass factory.

BEAT KENDALL.

How I Found Things in Mexico.

By Raoul Chavez.

(Concluded.)

I was pleased to find, however, a number of Mexicans who have been educated in the United States and who understand and like the American people. They appreciate Pres. Wilson's patience with Mexico which has cost him so many tirades in the American Press and thoroughly understand the altruistic principles which guide him. These Mexicans are doing their best to combat the existing prejudice and are striving in every way to foster and cultivate closer relations with the United States who they claim should be Mexico's best friend. They are striving to expand the knowledge of the Spanish language throughout the United States and that of English throughout Mexico, and several of their members, who I fortunately met, were particularly pleased when I told them of the importance that is given to the Spanish language in practically every school in the United States. This element has to strive against the damages and politicians already referred to, and also against the indifference of the North American himself; his failure to understand the Mexican character and temperament, his ignorance of the history, geography and language of the people who are so close to him, and if I must say it, his patronizing attitude toward any one living south of the Rio Grande. He probably does not mean to be so, but unconsciously he is, and the contemptuous references made by the majority of the American press when speaking of their neighbors surely does not endear them to Mexicans. Europe has a strong foothold in Mexico commercially and this is due to the adaptability of the European to Mexican customs and his ability to speak the language of the people with whom he has to do business; his ability to mix in the social life of the country; his willingness to do business the way the Mexi-

can wants it done, and to manufacture for him articles suited to the needs of his trade, instead of trying to force him to buy as is usually done by American manufacturers, articles suited alone for North American usage.

All this I have so far said brings us to the point which I wish to make in this article; that is, that the great secret to secure a billion dollars worth of ore, plata, y otros metales, now within the mountains of Mexico, together with a large export business, is to endeavor to do away with the mutual prejudice and misunderstanding now existing between the two countries (and this applies to the whole of South America). Mexico wants foreign capital and foreign enterprising to develop its countless resources. It was the large inflow of foreigners which made the present United States and Argentine, and a similar inflow would be welcome by most thinking Mexicans. This immigration is due to come into Mexico; it should be composed mostly of North Americans, and of course, of American Engineers.

For those of you who go into the land of the "blanca plata," before you cast your dice into the Rio Grande, learn something about Mexico, its people, customs and very especially their language, and you will find them friendly, pleasing, and very hospitable.

RAOUL CHAVEZ.

Ohio Banishes Small Caps.

This year's crop of freshmen at Ohio U. will not be compelled to wear the "postage stamp" variety of caps. Instead they will have a full-sized uniform cap, thus relieving them of the humiliation of wearing a small boys' cap.—Ex.

The Sophomore Class showed real joy by having the goal posts on Jackling Field wrapped with the colors of M. S. M and Drury.

See you in Tulsa November 30.
