THE MISSOURI MINER.

(137)

Missouri School of Mines and Metallurgy, Rolla, Mo.

Vol. 4, No. 1.

Friday, September 14, 1917.

Price 5 Cents.

RULES FOR GREEN CAP DAY SEPT. 17, 1917.

Sophomore-Freshman Fight.

Place, on campus, in front of Chemistry Building.

Time: 9.00 A. M.

All spectators must keep off the field.

Regulations.

The fight shall last until one class is tied.

A man is considered tied, and is out of the fight when hands and feet are tied, and he is carried off the field.

The Faculty shall take charge of the men carried off the field, to see that they do not re-enter the fight.

The Judges shall be the members of the Senior Class and the following members of the Junior Class: Bruce, Krause, Scott, Marston, Scruby, Wilkinson.

The remaining Juniors shall rope off the field and patrol the side lines during the fight.

The Judges shall carry the tied men off the field.

In case the Freshmen win, they will be escorted to Heller's Clothing Store by the upper classmen.

Paddles shall not be over the following dimensions: 3 feet by 3 inches by $\frac{3}{8}$ -inch, soft wood.

The rope shall be $\frac{1}{4}$ -inch clothes line.

None will be allowed to wear hard-soled shoes in the fight.

Strangle holds, toe holds, scissors and Nelsons are barred. Any man caught using any of these holds will be put out of the fight.

No hard substances shall be carried in the pockets.

Ceremonies will be started by H. Smith Clark.

Signed:

STUDENT COUNCIL, '17.

Miners Attract Attention.

From the latest issue of "The Missouri Miner" we note that the Missouri School of Mines has answered nobly to the call for service in battle. The number of former students enlisted and commissioned in the army does honor to this school. The young engineers of England, Australia, Canada and South Africa have done splendid work in the war; those of the United States will maintain the record of our profession.

Training for Engineering Work.

"Engineering is a mode of thinking. Any man who considers his problems without prejudice, who clearly discerns facts from opinions, essentials from non-essentials; who searches continually for new truths and better methods; who is not controlled by precedent; who constructs analytically,—is an engineer. His field may be medicine, law, architecture, agriculture, mining, merchandising, machine design, chemical research or salesmanship.

Each of these fields requires its peculiar tools—mathematics, physics, drawing, history, materials, knowledge of materials, etc. It is evident that the process of fitting one's self for a job requires two things:

1. Mental training, to develop right habits of thinking.

2. Special information to be used as tools.

It is more important for the student to get the former, for with it the latter will readily be acquired all through the experiences of practical life. * * *

—R. Dooley, of the Westinghouse Co.

(Read the entire article by

Mr. Dooley in The Electric Journal, September, 1917, page 33.—Editor.)

ATTENTION, FRESHMEN!

The following traditions of M. S. M. must be observed by the Class of 1921:

1. All freshmen must be out of the city limits of Rolla Sunday evening, Sept. 16, 1917, by 7 o'clock.

2. All freshmen must wear green caps from immediately after the class fight until Thanksgiving morning.

3. All freshmen must lift their green caps when they speak to an upper classman.

4. Freshmen must not be seen with one of the fair sex until given permission by the Class of 1920.

Mass Meeting.

The first mass meeting of the year opened with a large attendance. After awhile the boys got used to their new seats, the Seniors' chests receded to normal, and the business of the meeting began.

Dr. McRae opened the meeting with a short talk, in which he told where the missing men are.

Then the Athletic Association elected F. A. Krause president, G. L. Treifenbach secretary, and F. H. Geib cheer leader.

Coach McConnell gave a short talk, which was right to the point.

Evangelist John M. Linden put across a snappy address, with lots of pep in it.

Prof. and Mrs. R. C. Mann sang a duet.

Betting on the class fight has been very slow this year, due to the fact that the freshmen demand odds.

65269

Camp Funston, Kans.,

Sept. 7, 1917.

Dr. A. L. McRae,

Director Mo. School of Mines,

Rolla, Mo.

Dear Doctor McRae:

As the time for school to start has come again, I feel that as I can't be there myself, I would like to write you a few lines, just to let you know I'm thinking of the old school and the faculty and the fellows.

The new army is coming in every day. I've seen most of the Rolla men who received commissions, since we came back. I saw Forman, who was drafted, and Brazill, who enlisted today. I hear that Golick, Smart, Lyons, Bardsley, and a number of others are in the first call. I was, myself, but had already gotten my commission. Shriver is in Capt. Dennie's company of engineers. Walsh, Terry and I are in the 340th F. A.

This is an immense camp. One can walk a long way, and not nearly cover it.

How many new faculty members have we? I hope the Miner gets out an early edition giving all the things we old men don't know about, the changes that have been made this summer. If you have opportunity, please give my name to the Miner's circulation department, and I'll send the dollar promptly.

I hope there is a large Freshman class enrolled, and that everything runs smoothly. I would certainly like to be there myself.

I would enjoy hearing from you, but knowing you will have a great deal of correspondence just now, I will not feel slighted if I get news thru the Miner only.

Hoping you have a very successful year, and that the old school prospers in every way, I am,

Sincerely yours,

O. E. STONER,

2nd Lieut. F. A., U. S. R., Battery F, 340th F. A., Camp Funston, Kan.

Old Professors Returned.

Professor V. H. Gottschalk, who spent the last year at Chicago University, where he received the degree of Doctor of Philosophy, and Dr. G. H. Cox, who spent last year doing practical geological work in the Oklahoma oil field, have resumed their work in the Missouri School of Mines. The experience gained by each of these professors will be reflected in the instruction given in their respective class rooms.

New Professors.

Rolland S. Wallis, B. S. in E. E., B. S. in C. E., and C. E., Assistant Professor of C. E., Iowa State College, Ames. Iowa, Assistant Professor in Civil Engineering, will look after Railroad Surveying and Drawing.

Henry Horton Armsby, B. S. and C. E., Pennsylvania State College, Professor of Mathematics and Surveying, Wisconsin Mining School, will have Plane Surveying and Materials Laboratory.

William DeGarmo Turner, Ph. D. in Chemistry, University of Chicago, has been elected Assistant Professor of Chemistry.

Howard L. Dunlap, A. M., Ohio State College, recently Instructor in Chemistry, Iowa State University, has been appointed Assistant Professor of Chemistry.

T. T. McConnell, played tackle at Drury, and guard at Purdue. He coached Doane College, Nebraska, one year, and Arkansas two years.

Leo Higley, a former center at St. Louis University, who was out with the boys a short time last spring, will assist Coach McConnell in making one of the best teams M. S. M. has ever had.

The St. Louis Times of September 8th contained a picture of Lieutenant James L. Head, '16, of Ft. Riley, Kansas.

Reserve Corps.**

John T. Keenan, of 100 Grand Avenue, Edgewood, has just received his commission from Washington as Major in the Engineering Section of the Officers Reserve Corps. He is at present awaiting orders for assignment.

Mr. Keenan is one of the Assistant Engineers at work on the new Providence water supply in Scituate. He was born in Lincoln, but his work has carried him into many sections of this country and South America.

He was educated in the University of Missouri, School of Mines. For several years he was connected with the United States Reclamation Service as engineer, resigning that position to take up mining work in Arizona.

For a time he was superintendent of the famous Calumet and Arizona Companies. He was in Mexico at the time of the outbreak of the Mexican revolution, going from there to Santo Domingo, where he arrived the day after the assassination of Ramon Casseras, President of that republic.

He was appointed an assistant engineer on the Providence water supply work in August, 1915. He will remain with the water board until he is assigned for army duty.

E. W. Buskett, '95, is a member of the Campaign Committee of the Joplin Chamber of Commerce.

Geo. B. Wilson, '17, with the Stone and Webster Corporation, Boston, Mass., has been commissioned First Lieutenant in the Engineer Officers Reserve Corps.

Frederick A. Pope, '20, is a Second Lieutenant, Field Artillery O. R. C., Ft. Logan H. Root, Little Rock, Ark.

H. A. Horner, '17, is with the A. S. & R. Co., Omaha, Neb.

Tom L. Gibson, ex-'04, received a commission of Captain in Bat. F., Field Art.

Mr. Geo. A. Easley, '09, sailed August 17th, from New Orleans for LaPaz, Bolivia. Mr. Easley has been in this country for several months purchasing equipment for his tungsten properties.

"Micky" Brazill won fourth place in 220-yard low hurdles on Aug. 31st, at Junior A. A. U. meet at St. Louis.

G. E. Abernathy, '14, is shift boss for the Arizona Binghamton Copper Co., at Stoddard,

Ariz.

James L. Head, '16, is a Second Lieutenant in the E. O. R. C. training camp at Ft. Leavenworth, Kansas.

Edwin R. Stanfield, '20, has enlisted in the 6th Missouri National Guard, and is in training at Ft. Sill, Okla.

F. R. Heman, ex-'17, is at Spirit Lake, Ia.

E. A. Lynn, '19, is drillman with the Desloge Lead Co., at Desloge, Mo.

E. R. Needles, '14, is with Harrington, Howard and Ash, consulting engineers, Kansas City, Mo.

Norman William Raible, ex-'12, is in the draft.

L. Ludwick, '14, is in the O. T. C., Ft. Sheridan, Ill.

Harry A. Ambler, '17, is in 4th Co., 14th P. T. R., Ft. Sheridan.

Scoville E. Hollister, '13, has accepted a position as resident manager with the Leviathan Mines of Yucca, Arizona.

Francis N. Flynn, ex-'96, has accepted a position with the Consolidated Mining & Smelting Company in Canada, Trail, B. C.

Professor C. L. Dake, of the Geology Department, has been elected a member of the American Institute of Mining Engineers.

L. R. Scheurer, '18, L. C. Skeen, '18, and M. L. Terry, '18, have been elected junior members of the American Institute of Mining Engineers.

Mr. W. George Waring, of Webb City, Missouri, an authority on the ores in Southeast Missouri, has a paper to be read at the American Institute of Mining Engineers in St. Louis on the Zinc Ores of the Joplin District, Their Composition, Character, and Variation.

L. A. Delano, '04, Mill superintendent of the St. Joseph Lead Company, Bonne Terre, Missouri, has a paper on the Milling

Practice of the St. Joseph Lead Company, in the September Bulletin of the American Institute of Mining Engineers. This paper will be read and discussed at the meeting in St. Louis October 8 to 13.

Capt. E. S. McCandliss is adjutant First Battalion 314th Regiment of Engineers, Ft. Riley, Kansas.

F. E. Dennis is Captain Co. C, 314th Regiment of Engineers, Ft. Riley, Kansas.

Jefferson D. Wright, ex-'17, Lieutenant of Engineers, was sent to France in August.

Andrew J. S. is chemist American Metals Co., Blackwell, Okla., with his wife and children, visited Rolla and the School of Mines the first of September.

J. J. Brown, '05, is in business at Blackwell, Okla.

Joe Cole, Harry Zieseniss, Huston Taylor, Lawrence Casselman, Fred Deckmeyer, W. F. Lottman, J. H. Klyman, M. S. Badollet were the M. S. M. contingent working for the Aluminum Ore Co., East St. Louis, this summer.

Miss Tiffany Appointed Assistant Librarian.

Miss Ethel Tiffany, of Clinton, Mo., has been appointed Assistant Librarian at the School of Mines, to fill the vacancy caused by the resignation of Miss Stella Westlake.

Miss Tiffany has studied at the DeKalb, Ill., Normal School, and at the Library School at Chautauqua, N. Y. She has had various experience in library work, being at present the organizer for the Missouri State Library Commission. She comes to M. S. M. from Macon, Mo., where she has just organized and opened the new Public Library.

Dodder—"What stone is your birth-stone, Plodder?"

Plodder—"Grindstone."—O-B Bulletin.

Camp McClellan, Sept. 9, 1917.
Dear Mr. Editor:

I have found a few spare moments, so I will endeavor to write you a few lines to let you understand that, altho I am not back at school in person, my thoughts wander back to M. S. M. every once in a while.

I was called to the colors on July 25, and have been working for Uncle Sam ever since. We mobilized at Roanoke, Va., and after staying there from Aug. 11 until Sept. 5, we departed for Camp McClellan at Anniston, Alabama, arriving here on Sept. 7.

At the present time I have two things in view: getting into an engineering organization, or being appointed to go to Fort Sill, Okla., as an observer with the aeroplane section. One man from this regiment is to go up there, and he must be a college man, have some knowledge of electricity, and practical knowledge of gas engines, as well as practical photography. I was recommended by my Captain, and if it goes thru I expect I will go to Fort Sill within the next 30 days.

Altho some of us may not be able to come back to school and be seniors this year, nevertheless here is one that is coming back in 19—(?), if some Hun doesn't make a sifter out of my hide.

Send me the Miner, and when I get a salary of \$30 I will send you \$1.50.

Hoping all the Miners a successful year, I remain, as ever,
LESLIE C. SKEEEN, ex-'18,
Care of Co. H, 2nd Va. Inf., Camp McClellan, Anniston, Ala.

Jacob C. Stroup, ex-'14, and Richard J. Stroup, '18, have joined the U. S. Navy.

The Senior Class will be able to act almost as one man this year.

We notice that there are several "Roses among the thorns" in school this semester.

New Books Added to the Library During the Summer.

PRODUCTION OF LEAD JAN- UARY 1 TO JUNE 30, 1917.

Good Increase Shown by United States Geological Survey's Mid-Year Report.

The United States Geological Survey, Department of the Interior, has undertaken a midyear canvass of lead production, the results of which have just been tabulated by C. E. Siebenthal. For convenience of comparison half the corresponding quantities for the 12 months of 1916 are inclosed in brackets. The output of domestic desilverized lead, excluding desilvered soft lead for the first six months of 1917, was 152,231 short tons (158,235), the output of domestic soft lead, including desilverized soft lead, was 124,292 tons (117,879) and the output of lead produced from foreign ores and bullion was 29,539 tons (9,453.)

In view of the scarcity of lead, the increase in lead of foreign origin is very encouraging. The greater part came from Mexico. According to the records of the Bureau of Domestic and Foreign Commerce, the total lead imported in the first six months of 1917 was 30,629 tons (17,665) of which 22,507 tons came from Mexico (12,099), and 4,569 tons came from Canada (3,153). The exports of domestic lead amounted to 29,241 tons (50,283) and of foreign lead 6,066 tons (4,940). The lead used in articles exported with benefit of drawback was 3,270 tons (2,585). Thus the total exports of lead were 38,577 tons (57,808). Disregarding stocks, the apparent consumption of lead in this country in the six months was 268,952 tons (230,587.)

The production of new antimonial lead was 7,822 tons (12,019), and of secondary antimonial lead 1,959 tons (2,065). The output of secondary pig lead by regular ore smelters was 7,578 tons (5,548.)

The average outside spot price of lead during the six months

period was 9.9 cents a pound, as against 6.9 cents in 1916.

Fort H. G. Wright, N. Y.,
Aug. 30, 1917.

The Missouri Miner,
Rolla, Mo

Gentlemen:

Owing to the fact that I have been called into active service with the Army, and, as a consequence, will be unable to attend school this year, I hereby tender my resignation as Editor-in-Chief of The Missouri Miner.

I hope that the paper and the school will have a successful and prosperous year.

Yours very sincerely,
T. P. WALSH,
2d Lt. C. A. O. R. C.

Freshmen Should Examine 1917 Rollamo Annual.

Edw. Kahlbaum, treasurer of the Rollamo, has announced that there are still 72 copies of the 1917 Rollamo annual unsold. Part of these have been ordered, but so far no money has been sent for payment. In order that the accounts of the 1917 Rollamo Board can be cleared up, 40 copies must be sold to the students, alumni, and their friends. The remaining 32 copies will then be sold to the School of Mines for distribution in the various academic schools over the country.

Freshmen are especially urged to procure a copy of the school annual that they may acquaint themselves with the various organizations of the college. Alumni should be reminded that the 1917 edition contains a well written history of the school since its establishment. Either write to Edw. Kahlbaum, or see him in the registrar's office in regard to procuring a copy.

Some of the Sophs, mistaking Goldsmith for a freshman, took him out and were about to put him thru the usual rites when they found their mistake. Poor Goldy always was misunderstood.

Good Work.

Relative to the M. S. M. bulletin on blended Portland Cement, by Professor E. S. McCandliss, the following letter from the Editor of "Concrete," a monthly magazine published at Detroit, Mich., shows that the experimental work done at the Missouri School of Mines is practical and up-to-date.

"The writer has a letter from Mr. R. H. Tatum, secretary Maxted and Knott, Ltd., High St., Hull, England asking if we can send them information bearing on the subject of sand-cement. Your bulletin on that subject comes in the nick of time to satisfy their request. Won't you mail them a copy and oblige us and them."

"We girls had hardships when we camped out. Only one drinking glass among five girls."

"Horrors!"

"And only one mirror."

"Good-night!"—O-B Bulletin.

"Women of Hell," Name Given to Scotch, St. Louis Boy Says.

The following letter is from Wayman Crow, a member of the class of '19, at the Missouri School of Mines. He was a member of the Kappa Alpha fraternity:

"The Women of Hell" is the name the Germans have given the Scottish troops because of their skirts (kilts) and "plain, good, old-fashioned nerve," according to Private Wayman Crow of the Twelfth Engineers Regiment, who has written to his grandmother, Mrs. Phillip A. Crow, 4423 Forest Park boulevard, the account of the scenes attending the celebration of the American troops' arrival in England.

The letter follows:

IN CAMP ENGLAND.

Dear Grandma: Just a little note, as I am pretty tired after the big day. The American troops marched under arms thru the streets of London, and were reviewed before Buckingham Palace by His Majesty, the King and the Queen. Also passed the American Embassy and Ambassador Page.

Had lunch within the Palace grounds, and a fine reception in all ways. We were royally treated and received, and considering that this is the first time since William the Conqueror, 1066, that foreign troops marched in that city under arms, and that our company led the procession, only preceded by the royal band and a Scottish Bagpipe Corps, I feel that we were highly honored.

I saw the "Life Guard" in high black boots, close-fitting white breeches, red coat and high hat with plumes, which you possibly remember.

We were also well fed at their expense and trouble, even down to a cake of chocolate, which these people call "sweetmeats."

If I get an opportunity and am paid will surely invest some of

my money in a trip back again. Will try to send you paper with an article about us.

Am feeling fine, and hope conditions in the next stopping place will be as good as these.

England has fine soldiers. The "tommy," Australians, and Canadians are not surpassed for a point of efficiency. The Scottish troops have won a name among the Germans because of their skirts (kilts) and plain, good, old-fashioned nerve, of "the Women of Hell." Appropriate. Eh, what?

The "tommies," according to all information, are unsurpassed for good fighting.

There were several cinema machines, so watch out for the pictures showing King George V. reviewing American troops in London.

Hope you get most of my letters, and I'll write often, so if any are not lost you'll hear regularly.

With love to Aunt Lillie and dad and yourself. Affectionately,

WAYMAN.

In a recent army transfer from Ft. Riley, Kans., to Fort Cody, Deming, New Mexico., five M. S. M. men were affected, all commissioned officers, who are: Geo. Burnet, Captain; C. C. Bland, 1st Lieutenant; C. A. Peterson, 2d Lieutenant; M. C. Lucky, 2d Lieutenant; and H. P. Lawrence, 2d Lieutenant.

"Why are you asking for help? Haven't you any close relatives?"

"Yes. That's the reason why I'm appealing to you."—O-B Bulletin.

Bystander—"I suppose you would like to take a ride without worrying about tires and the like?"

Motorist (fixing puncture)—"You bet I would."

Bystander—"Well, here's a car-ticket."—O-B Bulletin.

STUDENT ENROLLMENT.
