THE MISSOURI MINER.

Missouri School of Mines and Metallurgy, Rolla, Mo.

Vol. 4, No. 11.

Friday, November 23, 1917.

Price 5 Cents.

JUST OUTCLASSED.

The Rolla Miners were outclassed by the Drury Panthers last Saturday, November 17, on Drury Field, and lost by a 26-0 count. The game was hard fought thruout, and the Springfield people say it was the best exhibition offered there this year.

The score indicates a one-sided affair, but such was not the case, because our boys fought as tho their lives depended on the outcome. No one man of the Miner team starred. "Kid" Wilson had an off day, and showed poor headwork on many plays, and couldn't seem to handle punts. But as this is the "Kid's" first year of college football these mistakes must be overlooked.

The winning of this game by Drury puts the two schools even in football honors, as each school has won 10 games and tied two since the first game was played in 1893.

The team came back from Springfield in good shape, and are practicing faithfully for the last game of the season, which will be with Rose Polytechnic at Terre Haute, Indiana Thanksgiving. If we can defeat this Hoosier team, it will be a big feather in our cap, as they held Washington to the close score of 7-0 earlier in the season.

How It Looks On Paper.

Drury received the kickoff and Grossenheider carried the ball to his 35-yard line. After making their first downs twice, the Panthers were forced to kick, and Rolla recovered the ball on their own 20-yard line. Drury held for downs, and regained the ball. The Panthers advanced the ball

Engineer Regiments for Special Service.

In reply to an inquiry addressed to the Office of the Chief of Engineers, U. S. Army, Mr. Wheeler, the Librarian, has received the following information in regard to Engineer Regiments for special forms of service overseas.

The special Engineer Regiments are:

10th, Forestry Service.

11th, Standard Gauge Railway Service, (Construction Department.)

12th, 13th and 14th, Railway Operation Service.

15th, 16th 17th and 18th, Standard Gauge Railway Service, (Construction Department)

19th, Standard Gauge Railway Service, (Mechanical and Supply Department.)

20th, Forestry Service.

21st, Light Railway Service, (Construction.)

22nd, Light Railway Service, (Operation.)

23rd, Road Service (Highway)

24th, Engineer Supply Service

25th, General Construction Service.

26th, Water Supply Service.

27th, Mining Service.

28th, Quarry Service.

29th, Surveying and Printing Service (Topographic.)

30th, Gas and Flame Service.

31st, Standard Gauge Railway Service (Operation and Maintenance Department.)

32nd, Standard Gauge Railway Service, (Operation and Maintenance Department.)

33rd, General Construction Service.

34th, Engineer Supply Service

35th, Railway Shop Service.

401st, An Army Ponton Park. The majority of the special

The Meeting of the Chemical and Metallurgical Society.

On Monday evening at 8 o'clock Professor Clayton called to order the first regular meeting of the newly combined Chemical and Metallurgical Society. The meeting was divided into three parts. The first part might be styled a technical session; the second part was a business session; and the third, altho the last, was to the majority of those present the most important, as it was a luncheon.

The technical session consisted of three well prepared talks. The first talk, "Notes on Electrolytic Zinc Plant at Great Falls," was given by M. W. Shanfeld. This talk was interesting to all, since the electrolytic production of zinc on a large scale is something of only recent years in metallurgy. The next talk was given by Dr. Turner, and he chose as his subject, "The Diffusion of Gases." He certainly laid this difficult subject so clearly before the society that no one had the least trouble in grasping his talk. The last talk was given by Prof. Mann, on "The Production and Prices of Zinc." An exposition on this timely subject cleared our minds as to the causes of the recent fluctuations in the prices of zinc. There were several other talks scheduled, but since it was getting late, Prof. Clayton decided it best to begin the business end of the evening's program.

Before beginning the second part of the program, all of the faculty members present withdrew, and allowed the student members alone to conduct this part of the meeting. Henry Doennecke was appointed temporary chairman, and he immediately put in order the motion to elect the President of the Soci-

Continued on Page Six.

Cotinued on Page Three.

ety. H. S. Clark was then chosen to hold this office. Following Mr. Clark's election, Ben Nichols was elected Vice-President, and E. D. Wilson was elected Secretary-Treasurer.

The last and most important part of the meeting took place across the hall from "Doc." Thornberry's office. Here the faculty members of the Society gave a luncheon for the student members. (Let it be here understood that the faculty members did not refuse to help eat the lunch.) The luncheon consisted of three or four kinds of the very best sandwiches that could be made, coffee and smokes. The coffee was served in casseroles, the sugar and cream for the coffee were served respectively in beakers and wash bottles, and the sandwiches were served in pans used for panning gold. It was lucky that Hoover was not present, for there were more eats than the men could possibly stow away.

L. J. Zoller, '18, who has been with Valerius, McNutt & Hughes since last May, expects to return to school the second semester.

Word was received this week from George Clayton, stating that he has not enlisted in the 23rd Engineering Regiment, as had been his intention when he left school. Instead, he has applied for aviation, and at present is at his home at Hannibal, Mo., awaiting to hear from his application.

Lloyd D. James, '17, is with the J. V. N. Dorr Company, 17 Battery Place New York City. He is superintending the installation of Dorr machinery at the Merrimac Chemical Co. plant, Woburn, Mass.

J. Chas. Miller, '16, is with the Geological Department of the H. L. Doherty Co., at Wooster, Ohio, but expects to be transferred to the Bartlesville, Okla., office in a few days.

J. A. ALLISON

Remember Fellows Christmas is Pretty Near Here. Better Get Busy And Have Some Kind of a Little Gift Laid Away.

ALLISON, THE JEWELER

General Orders No. 4.

Office of the Commandant,
November 21, 1917.

On and after Thursday, November 22, any man reporting for drill not in proper uniform will be reported absent.

Uniform will consist of hat, blouse, trousers, leggings and tan shoes. White collars will be required on days for which ceremonies are scheduled. On other days they may be worn or not, as desired.

Gloves may be worn at all drills if desired, and may be of any kind or color, except that gauntlet gloves will not be allowed.

Officers and sergeants may substitute the regulation olive-drab flannel shirt for the blouse if they desire, except on days for which ceremonies are scheduled, when the blouse and white collar will be required. Black neckties must be worn with the flannel shirt.

By order of Colonel Muilenburg.

H. H. ARMSBY,
Major, Chief of Staff.

W. H. Seamon, Jr., ex-'19, manager of the Metals Mining Co., Tar River, Okla., has gone to Deming, New Mexico, the company having sold its Oklahoma properties.

Byron L. Ashdown, '16, writes that he visited Old Point Comfort to see his classmates, Hop-pock, Lumaghi, and McNely, but they were at Norfolk on a leave of absence. He states he will try his luck again.

Join my class in Shorthand and Typewriting... Lessons given during the day or evenings at Judge Bland's office. Rates, \$5.00 per month.

Engineer Regiments for Special Service.

Continued from Page One.

Engineer Regiments have been
filled to the extent permitted by
present conditions, or the organi-
zation of them has not been
started; but it is expected in a
short time to recruit for these
particular units, either for an in-
itial organization, to raise them
to maximum strength, or for re-
placement purposes. Applicants
desiring to enlist in them, who
have their names listed in the
office of the Chief of Engineers
will be communicated with at
the proper time.

The Special Engineer Regi-
ments now open for enlistment
are:

20th, (Forestry) Col. W. A.
Mitchell, Camp American, Uni-
versity, Washington, D. C.

23rd, (Highway) Col. E. N.
Johnston, Camp Meade, Admir-
al, Md.

24th, (Supply and Shop) tem-
porarily attached to 26th. Note.
A Camouflage company is at-
tached to the 24th Engineers.

25th, (General Construction),
Col. Wilbur Willing, Camp Dev-
ens, Ayer, Mass.

26th, (Water Supply) Col. E.
J. Dent, Camp Dix, Wrightstown
N. J.

27th, (Mining), temporarily
attached to 23rd.

28th, (Quarry), temporarily
attached to 23rd.

30th, (Gas and Flame), Major
E. J. Atkisson, Camp American
University, Washington, D. C.

Further information in regard
to the organization of these reg-
iments, or the requirements for
enlistment insurance, family al-
lowance, etc., may be obtained
at the desk in the Library.

SENIOR COLUMN.

"John Francis" has been work-
ing hard all week with his
school work. The cause for all
this has proved to be three beau-
tiful pictures of "the future Mrs.
F. H. G."

Joe Cole has been elected tem-
porary chairman, and George
Mellow temporary secretary of a
committee composed of Rolla cit-
izens and the Student Y. M. C.
A.

Word has been received from
H. T. Herivel, who is back at
work again in Morenci, Ariz.

A new system of grading has
been instituted in Economic Ge-
ology. Your grade varies in-
versely as the amount of prep-
aration you make.

JUNIOR COLUMN.

They say that one Junior had
a vain search. His partners sent
him to get a contour line, but he
said that he couldn't find any.

Three of our class are rookies
in military. Let's try to have
our entire squad out there Mon-
day night.

Six St. Louis U. dental stu-
dents were caught bumming to
their Rose Polytechnic football
game. They were arrested.

As a result of going over to
the office and looking at their
listing, one or two fellows are
deciding that they are Sopho-
mores. Moral: Everybody stay
away from the office, for there is
great danger.

"Cupe" Lottman's suburban
jaunts are to come to a close
soon, "cause" the Folks are to
move cityward.

Another man is working for
the U. S. Deckmeyer enlisted in
the aviation department of the
Signal Corps some time ago. He
has now been called to report at
Kansas City. "Deck" will make
a good aviator, but we will lose a
good business manager for the
Athletic Association. "Deck's"
the man that can put humor into
anything, even school life, and
we hate to see him go.

THE MISSOURI MINER.

A weekly paper published by the Students, in the interest of the Alumni, Students and Faculty of the Missouri School of Mines and Metallurgy, Rolla, Mo.

Entered as second class matter April 2, 1915, at the post office at Rolla, Missouri, under the Act of March 3, 1879.

SOPHOMORE COLUMN.

"Cat" Hume, who was injured while practicing for football last week, has been confined to his bed for the past week.

Some of the Sophomores were very much angered Wednesday night when Prof. Dean did not appear on the scene to give them a Calculus quiz.

The Quant. Class evidently does not waste much time talking, for the gas has been so weak for the last month that they could not work.

Howall seems to be the only "gun" in Physics this year. He had the privilege of working the impossible problem for the F. M.'s and S. I.'s Wednesday.

Many of the Sophs who live in the near vicinity are beginning to think of the Thanksgiving turkey, and the girl they left behind.

One of the time-worn traditions which fate decrees that the

Sophs are powerless to uphold, has been broken. The Freshmen wear khakis on the streets of Rolla unmolested.

A Message to College Students.

(From the Patriotic News Service of the National Patriotic Societies.)

The defeat of the German autocracy is not only the task of armies and navies, but of every one who believes in the principles of democracy. It is not alone our soldiers and sailors who are fighting Germany, but every true American should also be doing what he can to bring about a speedy victory.

Young men and women in our American universities and colleges will soon be playing a very real part in our national life. You are preparing yourself now for future usefulness. You should remember always that first duty is to the nation, and that you will find your highest personal success in public service.

The fact that your country is at war imposes on you a double duty to study as hard as possible, and to make yourself as valuable economically as you can. Live up to your duty as well as the men in the trenches are living up to theirs.

Yours sincerely,

P. P. CLAXTON,

Head of the U. S. Dept. of Education.

Lieut. Frank P. Dickson, Jr., is Assistant Camp Quartermaster at Camp Funston.

The Art and Thimble Club announces the pledging of Sepia Tatting and Crayon Knitting. Initiation will be held during the Thanksgiving vacation.

The Vampire: Do you ever need sympathy? Don't you ever feel a longing for tenderness?

The Victim: Uh, huh. When I order a steak.

Of Interest to Mining Men.

Washington, November 11.—Any person in the United States found with explosives in his possession after November 15, and who does not have a license issued by the Federal Government showing the purpose for which the explosives are to be used, will be at once arrested and fined up to \$5,000, or sent to prison for one year. If the circumstances warrant, the person may be fined \$5,000, and in addition given the year in prison.

This is the principal clause in a war measure passed by the last Congress which is now being put into effect by the Bureau of Mines, Department of the Interior, which bureau has been charged with its enforcement. Francis S. Peabody, of Chicago, a well-known coal operator familiar with the use of explosives, large amounts of which are used in the coal mining industry, has been appointed by Secretary of the Interior Lane to act as assistant to the Director of the Bureau of Mines, Van H. Manning, in the enforcement of the law. Under the law, the Director of the Bureau is empowered to utilize the services of all United States officers and all police officers of the states, including the city police forces, county sheriffs deputies, constables, and all officers in any way charged with police duties. The police of the cities have already been organized for this work, headed by a committee of chiefs of police in the big cities, of which Major R. W. Pullman, superintendent of police of Washington, D. C., is chairman. The police are not only to look after the enforcement of the law, but are also to make thorough investigations of all dynamite outrages and fires in factories and warehouses, and to make their reports to the Director of the Bureau of Mines.

Persons apprehended in plots to blow up factories and bridges will be turned over to the authorities for prosecution under Federal or State laws. Most states

have specially severe punishments for these crimes. New York has an extreme penalty of twenty-five years imprisonment for the placing of dynamite with intent to blow up property. The penalty provided in this Federal war measure is merely to cover the illegal possession of explosives.

The law provides that every one who handles explosives must have a license. The manufacturer, the importer and the exporter must have licenses issued by the Bureau of Mines in Washington. The seller of explosives and the purchaser of explosives must also have licenses, these to be issued generally by county clerks, or other local officers who are authorized to administer oaths. There will be at least one licensing officer in each county, and more agents will be designated if the county is sufficiently large to warrant it. If a state has laws providing for a system of licensing persons manufacturing, storing, selling or using explosives, the state officials authorized to issue such state licenses shall be designated as federal licensing agents; also city officials qualified to issue city explosives licenses will be given authority to issue federal licenses. A federal license will not relieve any person from securing licenses required under state laws and local ordinances.

In each state there will be appointed a state explosives inspector, who will represent the Bureau of Mines in the administration of the law within the state.

Only citizens of the United States or of countries friendly to the United States and the Allies may so obtain licenses.

Contractors, mining companies, quarrymen and others using large quantities of explosives, which are handled by employes, may issue explosives to their employes only through those employes holding a license, called a foreman's license.

The purchaser of dynamite, in obtaining a license, must state

definitely what the explosive is to be used for, and will be held accountable for its use as stated, and the return of any explosives that may be left.

With the strict enforcement of this law, the Federal authorities hope to prevent explosives falling into the hands of evilly-disposed persons, and to put a stop to all further dynamite plots.

What the War Has Done for the Man Just Out of College.

Last spring and early summer there were a number of positions open with large mining and engineering companies. But in almost every case the employer asked for two or more years of practical experience. In fact, he demanded experience, and not a college degree. But since September the man just out of college has been given his chance. In the last couple of months numerous companies have advertised for "graduates of civil and mining colleges." Another company asks for "live young men with technical education." The question of experience is no longer all-important. The college graduate can not step into a position where he can use his technical knowledge without first having to serve for several years as a common laborer.

This is the day of the college graduate, and has been brought about by the war. The College Man must and will show that he is fitted for the trust now placed in him.

The Difference Between Dollars and Ideas.

You have a dollar.
I have a dollar.
We swap.
Now you have my dollar,
And I have yours.
We are no better off.
You have an idea.
I have an idea.
We swap.
Now you have two ideas,
And I have two ideas.
That's the difference.

—Kansan.

JUST OUTCLASSED.

Continued from Page One.

20 yards, but lost it when Rolla intercepted a pass on the Rolla 13-yard line. The Miners punted on their first down. Drury was again forced to kick, and Rolla recovered the ball on their own three-yard line. Drury was penalized 15 yards for holding.

Drury was again forced to kick, and Rolla recovered the ball on their 7-yard line. Rolla was held for downs, and forced to kick. Drury returned the ball to Rolla's 35-yard line, from where Williams made a 30-yard pass to Neville, who ran 8 yards for a touchdown. Grossenheider kicked goal. Drury was in possession of the ball on Rolla's 48-yard line when the quarter ended.

The Panthers were forced to kick in the opening of the second quarter, and Rolla carried the ball to their own 28-yard line. Aided by a 5-yard penalty that was given to Drury, the Miners made the only two first downs that they made during the game, and were unable to advance any further. Drury recovered the Rolla punt on the Drury 15-yard line. The Panthers made their yards for back-field in motion. Drury made their first downs, but was again forced to kick on the fourth down. Rolla completed an 8-yard pass, but lost the ball again on downs. Drury regained the ball on the 50-yard line. Williams went through for 7 yards, Egdorf for 9 yards, and Windle for 15 yards, which placed the ball on the Rolla 15-yard line in Drury's possession at the end of the first half.

Drury received in the second half, and Williams carried the ball to his 35-yard line, where the Panthers lost the ball on a fumble. Rolla attempted a pass, but failed. Drury held for downs and Williams went around end for 40 yards on the first down. The Panthers made their downs, but were penalized 5 yards, and forced to kick. Windle returned

the ball to the Rolla 35-yard line. After a series of short gains, Grossenheider was called thru tackle for the next touchdown. Grossenheider failed to kick goal.

Drury received the kick, and Williams carried the ball to his 40-yard line. Drury was forced to punt and Rolla recovered the ball on the Rolla 30-yard line. Rolla was held for downs, and punted to the Drury 35-yard line. By a series of end runs, and one pass, the Panthers advanced the ball 37 yards, but lost the ball when they were held for downs. The quarter ended with the Panthers in possession of the ball on the Miners' 30-yard line.

Drury was held for downs at the opening of the next quarter, and Rolla punted out of danger. Williams went around the end for 14 yards on Drury's first down, and Grossenheider for 7 yards on the second. After several short line plunges, Williams went over for another touchdown, and Grossenheider kicked goal. Drury received the kick, and advanced the ball to the middle of the field, from where Williams and Windle completed a 25-yard pass. Drury attempted another pass, but the ball hit in the Rolla end zone, and the Miners were given the ball on their 20-yard line. Rolla was forced to punt, and the Panthers again completed a 10-yard pass. Williams to Windle. Another pass was tried, but failed.

On the next downs Williams made a 30-yard pass to Tenor, who ran 7 yards for a touchdown. Challender playing in place of Grossenheider, failed to kick goal

FRESHMAN COLUMN.

They are here! The army was out in full dress Thursday afternoon. What joy was in our hearts when we were able to parade around town without our little green caps.

The class has a large squad of men out practicing for the coming game with the Sophs. Coach McConnell gave us a bunch of signals that are bound to defeat the Sophs.

The Freshmen had the best representation of any class at the Drury game last week.

Prof.: Has any one a question on Iodine?

Nighswonger: What's the formula for Idiotic Acid?

Dennison entertained the Tri Betas with some of his wit Sunday afternoon.

Freshman: "I sure would hate to be that woman auditor on No. 9."

Girlie: "I thought an auditor was a man that talked with high sounding phrases."

Firt Lieut. C. C. Bland, now at Deming, New Mexico, has been ordered to France.

A Plant that Grows with the Times

Bevo grew out of our big idea of giving America a soft drink, the like of which no one ever tasted—a true cereal soft drink—nutritious as well as delicious in an entirely new way—and pure.

Scientifically cultivated and finally perfected, Bevo sprang into popularity such as over-taxed even our tremendous facilities.

The result is our new eight-million-dollar Bevo plant—built by public demand—capacity 2,000,000 bottles a day.

You will find Bevo, "The all-year-round soft drink," at all places where refreshing beverages are sold. Families supplied by grocer.

Anheuser-Busch
St. Louis

9U

Bevo - the all-year-round soft drink

Mr. Anton Karte, of the class of '11, was seen about M. S. M. last Saturday, shaking hands and telling jokes with his old friends.

Lieutenant Terry writes that he and several other former M. S. M. men, who are now officers at Camp Funston, will probably be in Rolla during the Thanksgiving holidays.

MINERS!

I just received a shipment of Latest Novelties in Miner Jewelry. Come in and look it over. I will gladly lay anything back and hold it for you for Xmas.
