EMINENT GEOLOGIST SPEAKS.

During the fourth period Tuesday morning Dr. Bailey Willis head of the departments of Mining, Metallurgy and Geology of Leland Stanford, Jr., University, spoke to the faculty and students concerning mining and geology.

Dr. Willis, who graduated from Columbia University in 1879, followed geologic work that has given him a wide and varied experience in all parts of the world. He was chief geologist of the United States Geological Survey for a number of years, was in charge of the Argentine Geological Survey for three years, and headed the Carnegie Institute Expedition into China. He is the author of a large number of scientific articles, particularly prominent among which is his treatise on the "Mechanics of Appalachian Structure." He supervised the making of the latest geologic map of the United States, and the "Index to the Stratigraphy of North America." Lately he has been on the House inquiry for the Peace Conference, studying Latin-American questions. This present trip thru the Middle West is for the purpose of visiting engineering and mining schools, with the view of observing their teaching methods, and of applying the best ones at Stanford. His itinerary includes: University of Minnesota, University of Chicago, Michigan College of Mines, Missouri School of Mines, and Colorado School of Mines.

Dr. Willis very clearly explained that mining engineering and geology may be divided

ADMISSION TO ST. PAT'S BALL.

In order to insure good conduct and order at St. Pat's Ball the Junior Class has adopted a definite plan concerning admittance. According to this plan **No One** without a ticket will be admitted. In former years tickets have been issued, but the presentation of same has not been required. But this year they are absolutely necessary, and under no consideration will any one be admitted without them.

These tickets will not be sold, but are **Free to Every One**. These tickets may be secured from any Junior. But only after having purchased a St. Pat's Ribbon on Tag Day, March 4, 1919.

The purchaser of the ribbon will be given tickets in any reasonable quantity. These tickets will have your name on them, and will not be transferable. In addition, they will have the name of Junior presenting them.

St. Patrick has decreed that Tuesday, March 4th, shall be Tag Day, and he commands all of his loyal subjects to have the cash in hand.

Julius C. Marshall, '13, was in Rolla Monday. He is drilling for oil in the Burkburnett district of Texas.

R. S. Weimer, '18, 2nd Lieut. Engineers, is on the work of building and maintaining hospitals in France. He does not expect to return until next year.

Arnold George Baker, '07, is 1st Lieutenant 417 Engineers, attached to Headquarters at Camp Humphreys, Va.

COACH LEMKE, OF CENTRAL WESLEYAN WOULD ADMIT MINERS TO M. I. A. A.

Coach W. J. Lemke, of Central Wesleyan College, proposes to champion a number of changes at the spring meeting of the Missouri Inter-Collegiate Athletic Association in May, which he admits may make him unpopular with a few members of the Association, but which he contends are needed. Lemke claims that the time is at hand when there shall be a readjustment for the good of the Association.

First of all, he will urge that the Rolla Miners and the Warrensburg Normals be admitted as members of the organization. It is known that several schools will oppose this move vigorously.

"If we can get Warrensburg and Rolla into the conference the southern end of the conference will be able to get a square deal in schedule matters. Three years ago Coach Dennie of the Miners learned to his dismay that the school's application had failed to secure the necessary two-thirds vote. Seven were for admitting the Rolla team, and four voted against it. There certainly is no valid reason for keeping them out any longer. Westminster of Fulton, Central of Fayette, Central Wesleyan of Warrenton and Drury and the Springfield Normals will then be in a position to schedule games so that the long jumps to Springfield can be split, especially when teams of this section are unable to get games with teams of the north-

Continued on Page Five.

CONCERNING J. B. FAST.

Dear Sir:

Several weeks ago I sent you a photograph of my son, Lieut. Joseph B. Fast, (R. A. F.) a former student at your school, and also some particulars pertaining to his career since enlisting in the army in April, 1917. I trust that you have received the same.

I should like to have the picture returned, and would be pleased to receive some copies of the Miner containing any article regarding my son.

In the last three weeks some very disquieting rumors have reached us regarding Joseph, but which, I am happy to say, have not been officially confirmed. In answer to my cabled inquiries if there is any truth to the rumors that my son had been killed in an airplane accident, have been advised by the Air Ministry that no casualty had been reported at their office. Am, however, having the matter thoroughly investigated, as we have not heard from our boy in five weeks. We always heard from him promptly every week or so, except during the time when he was so severely injured towards the end of the war.

Wishing you success with edition of the 1919 Rollamo, and hoping to have some good news for you regarding my son, I remain,

Yours very truly,
DAVID FAST,
5336 Winthrop Ave.

Lieut. Earl Smith, of the 86th (Black Hawk) Division, in France, arrived in Rolla this week, and is the guest of his aunt, Mrs. E. G. Harris. He was mustered out of the service at Camp Dodge, Iowa, and is en route to Little Rock, Ark., to visit his mother. Earl, who graduated from M. S. M., expects to return to Rolla and take some work at M. S. M.

FRESHMAN.

Two weeks more, and we become very verdent from the eyebrows up, for then we don that emblem symbolic of that state when everything is yet to be learned. (By the way, they cost fifty cents; doesn't that allowance check go in a hurry around St. Pat's?). Then only six weeks from that time we bedeck ourselves in that garment which speaks for itself, to say that we have been thru the trials and tribulations of the first year at college, and are now ready to profit by our experience to the detriment of the class of '23, that is, a pair of khaki trousers.

If Prof. Dunlap could only realize that the very audible yawns heard now and then in chemistry lectures are the product of much night work seeking after the ever-elusive theory he would not object so much to them.

Some Frosh are making quite a name for themselves as "fus-sers." No picture show is devoid of a contingent of "Beau Brummels" from our class. In some few cases it is becoming chronic. We wouldn't mention names, but Wolverton nearly stays "dressed up" now, and it wouldn't surprise us if he were to come to Qual. Lab. in that shape just to get an early start in the evening.

There will be a class meeting in the early part of next week. So far there has not been a class meeting where the attendance has been anything like what it should be. The matters of floats for St. Pat's, green caps, and kindred subjects are of interest to every man in the class. If it is going to cost him a dollar for his part in the float he should want to know how that dollar is to be spent. The same applies for the other matters. Let every man be present at this meeting.

SOPHOMORE.

As Shakespeare said, when he was facing the bold, bad lion, "All is not cold that shivers."

Angry Prof.: "Do you think this class is a joke, young man?"

Guy: "No, sir; I'm not laughing at the class."

Why should any of you ask for more time off, or complain about having so much to do. Figure this out for yourself: 365 days in the year; 204 days for sleep and play, 14 days' vacation, 104 Saturdays and Sundays, 30 days of noon hours, 13 half holidays, and 3 Jewish holidays, making a total of 365 days that you spend in idleness. Yes, we admit that a sailor is not dishonest in the winter, simply because he "stands on a cold deck."

Remember, fellows, St. Pat's is only two weeks off, so don't waste any valuable time. We had an excellent bunch of floats in the parade last year, and it is up to us to keep our good reputation by doing the same this year.

Dean: "How many times do I have to tell you not to do that?"

Mundt: "I'll bite; how many."

Lieut. Booker of the R. O. T. C.: "Now let me show you the manual of arms."

Fair Maiden (indignantly): "Indeed I won't."

A mimeograph sheet was found on the campus the other day. Thinking it might be of future use to some of ye fellow students we present it here verbatim:

R. O. T. C. Military Hygiene.

Answer the first part of each question Yes or No, and answer second part briefly. Every educated person should know the simple rules of health.

1. Do you wash your face once a day? Why is this a

habit?

2. Do you sleep with the cat? Does this make the cat restless?

3. Do you use alcoholic beverages? If so, tell us where you get them!

4. Do you comb your hair? How does this affect the Peace Conference?

5. Do you use habit-forming drugs? Tobacco, studying, or girls?

6. Do you like R. O. T. C. drill? Why don't you like it?

Hollingshead: "I want some alcohol."

Druggist: "Pure grain?"

Hollingshead: "No; liquid."

'22: "Where do you stop in St. Louis?"

'21: "At nothing."

In the midst of it all one brilliant Soph springs this:

Soph: "Can I be hopeful of this course?"

Prof: "Young man, always hitch your wagon to a star."

Soph: "I'll do better than that; I'll sit next to one."

"I say, Socrates, did you ever notice that the girls with pretty ankles get the least mud on their skirts?"

LOST.

One Karl Booker, student, lost one picture of his fair beloved, and suffered anguish until he found it in his note book adorned with poetic wit. Now he suffers with greater anguish, for a formidable opponent has appeared upon the horizon of his happiness. We are informed that the cloud is one Edwin Slover, who is successfully competing with "Book" for the picture and the girl.

EDITORIAL.

Some good discussion was launched at the Mass Meeting Friday, but wholly considered, the results of the meeting were nil.

ROLLAMO DANCE.

A good floor, good music, and plenty of girls made the Rollamo dance held last evening in Jackling Gymnasium a success from both the viewpoint of the dancers, who surely enjoyed themselves to the utmost, and from the viewpoint of the Board, because the primary purpose of the dance was accomplished. No Miner who was present at the dance last evening will regret seeing the Rollamo Board advertising another such one before the close of this term.

LOST—A MEMORIAL.

The Miner wishes to call attention to the fact that on the third floor of Jackling Gymnasium there is a tablet in memory of Howard Askew, a football man killed in an automobile accident in St. Louis. Although many students will doubt that there exists such a memorial, it may be found after searching diligently in all the corners and along the walls. If it is the wish of the school to leave the tablet in its present place, why not furnish each student and visitor who enters the building with a pamphlet, giving a full description as to how the place may be located? Without such a means of discovery the memorial might as well be put in the Registrar's vault, where the dust would not accumulate on it so fast.

The foremost object of a memorial is to call one's attention to the fact that there are those who have done something for us worthy of remembrance. If, then, we wish to remember Askew for his athletic work, let's move the tablet into a more prominent and more fitting place, and not hide it in an out-of-the-way corner, as though we wanted to forget rather than remember.

INTER-CLUB AND FATER-NITY BASEBALL.

"In spring a young man's fancy turns to baseball." That's changing it a little; nevertheless the Sigma Nu fraternity has a silver baseball cup donated by Allison whose ownership has never been decided. The present holders won it in 1916. In order to retain the trophy an organization must win it two years in succession. During 1917-18 no series was played—c'est la guerre." Now that the war is over, let's show a little pre-war "pep," and start the ball rolling.

**MINING ASSOCIATION
SMOKER.**

The Missouri Mining Association held a smoker and lecture in the Mining Lecture room of Norwood Hall Wednesday evening. Mr. Paul R. Cook, '07, described his mining experiences in South and Central America. As Mr. Cook had seen mining in some of the out-of-the-way places of the world, and was familiar with the many difficulties that are encountered when one is isolated from the outside world, he presented a talk that was indeed interesting. Then, too, he described those methods of mining, milling and smelting that had been used at the places that he had worked. One of the startling remarks of

his talk was his description of the difficulties that are encountered in the extremely mountainous regions in transporting heavy pieces of machinery, and in that connection mentioned that the very heavy sections of equipment had to be snaked over the mountains with block and tackle and man power. The native customs, labor difficulties, and unusual climate were the other elements of his talk. Many questions were asked about the various details of his experience. Prof. Forbes reminded the men of the advantages of applying for membership in the A. I. M. E., and of the dinner in St. Louis Saturday evening of the A. I. M. E. Prof. Clayton spoke of the former activities of the Association and made some very valuable suggestions in reference to the Mining Association. It was also decided to resume the former practice of presenting the members of the Association with certificates of membership. Smokes were served during the talks, and after them refreshments were served in the surveying room where an open discussion of the various points mentioned in the talks were conducted.

ST. PAT'S.

Time is rapidly bridging the gap between the present and the big event of the year. This week will see the starting of the final preparations for what is hoped to be the biggest celebration ever held in Rolla, and during the next twelve days things will hum with activities in making ready for the Patron Saint of the Engineers. It is rumored that many new features will be added to this occasion, and no little interest has been aroused as to just what these new features are to be. No definite information is available, at least does not seem to be available, at the present time, but soon everything will

be known, for soon the occasion itself will be here, will pass with its many elements of interest and pleasure, and give way to reflection rather than anticipation. Are you one of those who will be able to reflect on having been an integral part in this affair? It is true that the Junior Class are the sponsors of the affair, but it is nevertheless a school affair, and any one who is not taking an active part now is going to feel his lack of interest when others are recounting their part in the arrangements. There is a big chance for everybody to get in and be a part of this celebration—that is what has always characterized it—it is the celebration of every one in Rolla, no one or few in particular. So, if you haven't found your place in the preparations, see some one that has, and find out where you may be of value, for every one is and should be of value in the big celebration.

COACH LEMKE, OF CENTRAL WESLEYAN WOULD ADMIT MINERS TO M. I. A. A.

Continued from Page One.

west end of the circuit. It also would make possible for Cape Girardeau Normal, now virtually isolated from the circuit, to get in on some basketball games with St. Louis teams as filler in."

The admission of the Miners to the M. I. A. A. would give them an opportunity to be matched against teams of their own class, and they would not then to be forced to play such teams as Texas A. & M., Illinois U., Arkansas U. and Oklahoma, all of which are usually far out of the miner's class. It would also give the Miners an opportunity to schedule more games to be played in Rolla, and play more games in a season. Nor would it necessitate

the long journeys hitherto the Miners have been forced to make to schedule games, such as playing one game at College Station, Texas, and the next at Terre Haute, Indiana.

MRS. STUDLEY DONATES CAKE.

A nice large angel food cake, donated to the cause of St. Pat's by Mrs. Cecelia Studley, will be raffled this afternoon. It is a mighty fine cake, in fact, it is one of those cakes whose quality is known before it's baked. The winner will be in unusual luck. Many chances have been sold. We are greatly indebted to Mrs. Studley for the interest she has shown in St. Pat's festivities.

SENIOR.

The Seniors were agreeably surprised Friday morning when Prof. Mann didn't appear for Senior Met. Look out Monday, tho, because Mann likes the "Follies."

"Kit" is going to see the "Follies" next week, and we understand that he has already bought a seat just as near the stage as possible. "Kit," we envy you.

It is understood that one of the Chemistry Seniors in a talk at the Met. and Chem. meeting Thursday night apologized to his audience for the fact that he would not use large technical chemical words, because the Metallurgy men would not be able to understand them. Some one must have been led astray, some of the Met. men say.

The Economic class enjoyed a rest while Prof. Cox was on a trip to Tulsa. S. O. S. again.

Don't forget the class meeting Monday night, March 3, in Met. Building, at 7:00.

The Senior banner for the St. Pat's parade this year is going to be a banner that is certainly worth looking at. It's designer is Charlie Schnaidt.

ST. PAT.

Say! Tell us about this fellow
called "Pat,"
That folks are all talking about,
and all that,
For he is the one fellow the
girls rave about;
That he is some GUY there is
not any doubt.

For wherever you go, and what-
ever you do,
There's something about him
that pop into view;
If you pick up the paper it's
page to peruse,
The first item you see is some
bit of news

About this chap, who is coming
soon;
And I can't quite picture this
foxy buffoon
Who is turning everything up-
side down,
Just simply because he is com-
ing to town.

I hear whisperings among the
wiser ones, too,
And there's a secretive air
about all that they do.
Is this then such a great all-ab-
sorbing event
That every new energy on it
must be spent?

The boys are inviting their
sweethearts to town,
And they are to bring their
masquerade gowns,
For "ST. PAT" has decreed
that not one shall appear
On the ball room floor unless
costumed real queer.

The Juniors I hear take the
matter in hand,
And follow a programme long
ago planned,
In which to raise money to fi-
nance the scheme,
And it is no easy task as at first
it may seem.

And they are some hustlers, as
you will agree.
Now, of course, this is a secret
between you and me:
The boys have their pockets
just plumb full of money;

And I ain't saying this just to
be funny

To show you they're clever they
featured a show
To which the old folks and the
kiddies could go,
A "Movie" unfinished, just like
reading a book
Once you get started, you're
going to look

At the second show, not caring
a whit,
For the man "Tarzan" sure
made a hit.
Now the boys were encouraged
and felt a just pride,
And with the proceeds of these
were quite satisfied.

Then they put on a drama, so
classy and real,
That those who saw it could
scarce help but feel
The spirit of those who helped
in the cause,
And the sacrifice made—before
which we pause.

They are planning to show you
a jolly good time,
While you've nothing to spend,
not even a dime.
The Juniors are paying the bills
as they go,
For they have the coin in their
pockets, you know.

And now the great day is ap-
proaching at last,
Which will simply outclass all
those of the past;
The wish and the stunts of each
student year
On the floats, as they pass, to
you will appear.

So, make all your plans—be
ready at nine,
For ST. PAT will arrive with
his couriers so fine,
To lead the parade, and add
dignity, too,
To all that they hereafter will
do.

Just who this young man, "ST.
PATRICK," will be
Is a mystery as yet unsolved by
me;
There are many conjectures,

and many surmises,
And to some there will be a few
surprises.

But whoever he is, there is nev-
er a doubt
When the proper time comes
we will all find out,
And Kow-Tow to him in rever-
ence that day;
For the honorable ST. PAT
must sure have his way.

He'll knight all the Seniors. and
maybe a Prof.
And the Blarney Stone chican-
ery he'll surely pull off:
He will gladly give all some
kindly advice,
For he now is considered to be
very wise.

And the Queen's identity will
not be revealed,
For this, too, is something
which must be concealed
Till she appear on the floor at
the masquerade ball,
When she is known, honored
and welcomed by all.

Then ST. PAT will crown her,
and she, too, will bow
To his Majesty's Highness;
then all will Kow-Tow.
The grand march, led by ST.
PAT and his Queen
Will open the ball, and by hun-
dreds be seen.

To ST. PATRICK, then, the Pa-
tron Saint of the Engineers,
We commemorate this day, and
have no fears
That "our boys" will add fame
and glory wherever they go,
A fact that has been proven by
many you know.

If you are in doubt as to their
patriotic spirit,
Just look at the Service Flag
and count the stars in it;
And the daring exploits of our
boys in the air
Are known by the Croix de
Guerre crosses they wear.

And the engineers proved that
they were strictly in it
When they built their pontoon
bridges in a minute;

Price for price, grade for grade, there is no better pipe made than a W D C. You can get a pipe with the familiar triangle trade-mark in any size and shape and grade you want—and you will be glad you did it. W D C Pipes are American made and sold in the best shops at \$6 down to 75 cents.

Many have been "cited" for heroic work done,
And that was the way the World War was won.

A few there were that laid down their lives,
And for their country paid the Supreme Sacrifice.

As we celebrate the day we will frown and ponder
Upon the Sacrifice made by our boys over yonder.

(Now this is the story related to me

By one of the Miners, but on the Q. T.

Please don't misconstrue this idle chat,

'Twas only written to honor ST. PAT.)

WHO'S WHO.

Robert Newton Stubbs, society king is said to "dote" on midnight parties for journalistic and less noble purposes.

Little Ed (Eva) Williams, Withers Mill, Mo., very prominent in chemical circles, president of the famous Potash Club, noted for his research work in Electro-Chemistry. originator of the celebrated Potash Smile. Sunday afternoon fussing also included.

J. B. Duga, ex-'18, re-entered M. S. M., and expects to graduate about the middle of the summer term.

One-half the number of diplomas given by the U. S. Government to the Four-Minute Men of this locality went to members of the M. S. M. Faculty. Among those receiving the honors were Dr. J. W. Barley, Dr. W. D. Turner, Prof. Geo. R. Dean and Prof. H. S. Dickerson.

DISTRICT ORDER NO. 41.

Office of the Commandant,
Ninth, Tenth and Eleventh
Naval Districts, Great Lakes,
Illionis, February 21, 1919.

1. Due to a misunderstanding of the status of members of the Reserve Officers Training Corps as established in various educational institutions, the Bureau recently, in reply to inquiries of certain Naval District Commandants, held that members of the Naval Reserve Force could not join the Reserve Officers Training Corps.

2. The Bureau has been informed by representatives of the Army that members of the R. O. T. C. do not enlist in the Army, and are not in the military service. Such being the case, Naval Reservists may join the R. O. T. C.

3. Upon completion of the Reserve Officers Training Corps course of instruction the Bureau will discharge Naval Reservists to enable them to accept a commission in the Army Reserve Corps.

STEPHEN DOHERTY,
Lieutenant Commander, U. S. N., by direction."

FREDERIC B. BASSETT,
Captain, U. S. Navy.

I am sorry to leave Rolla, but I have formed a business connection at Independence, Missouri, where I shall continue to practice optometry. I wish to thank my many friends for their kindness, and trust that they will call on me if at any time they are in the vicinity of my new location.

DR. G. M. LOCKNER.

Prof. E. G. Harris entertained a few friends Monday evening, in honor of his nephew, Earl Smith, who has recently returned from France. Following a game of whist a nice lunch was enjoyed by all present.

VIC. HUGHES MARRIED.

Friends in this city have received the news that V. H. Hughes was married at Tulsa, Okla., last Friday. We were unable to ascertain the name of the young lady in the case. Mr. Hughes graduated from M. S. M. in the class of 1912. He is a member of the firm of Valerius, McNutt and Hughes, Oil Geologists, at Tulsa, Okla. His many Rolla friends wish him and his bride happiness and success.

Prof. and Mrs. G. A. Muilenburg entertained at luncheon Tuesday in honor of Dr. Bailey Willis.

Prof. and Mrs. C. L. Dake entertained a few friends at six o'clock dinner Monday in honor of Dr. Bailey Willis, of Leland Stanford University. There were present Dr. A. L. McRae, H. A. Buehler, Prof. G. A. Muilenburg and Dr. Willis.

EMINENT GEOLOGIST SPEAKS.

Continued from Page One.

into four major branches; that each branch requires somewhat different traits of character in men and that remuneration comes in money and in satisfaction in work accomplished in proportion to what a man puts into his work. The first branch, mining proper—taking the ore out of the ground—requires that a man have mechanical instinct or experience. Men who follow this branch can hope, some day, to be mine superintendents or managers. The second branch, financial and business linked with engineering ability, requires qualities as are embodied in Mr. D. C. Jackling, Charles Schwab, Col. Goethals, and others. The third branch, exploration, necessitates a thorough knowledge of geology, languages and human nature, along with tact, diplomacy and courage. Dr. Willis has largely been engaged in typically exploration work. The fourth branch is purely scientific and research work. It is followed by those men who want to know things that other men have never known. Usually, since men who are interested in research work are not affluent enough to carry on their studies without earning a living, they turn to teaching as a means of accomplishing both ends at the same time.

Undoubtedly Dr. Willis' talk was the most interesting and pointed of all talks heard at M. S. M. for a number of years.

Edwin (Tubby) Stanfield, ex-'20, passed thru Rolla last Sunday. "Tubby" has seen over seventeen months of service in France, lacking only ten days of winning his third gold service stripe. He has been discharged, and was returning to his home at Oronoga, Mo.

MEETING MET. AND CHEM. SOCIETY.

The regular meeting of the Metallurgical and Chemical Society was held in the Metallurgy Building at 7:30 o'clock Thursday evening. Two splendid talks were given on the manufacture of the war gases by Messrs. Goldman and Badollet. After the talks Badollet demonstrated three of the gases by giving each member an opportunity to take a whiff of them, and as a result sneezing almost disrupted the session. The regular lunch was served in the assay laboratory at the close of the meeting. The next regular meeting will be held on the first Thursday following St. Pat's Day.

HAPPENINGS ABROAD.

The Penn State "FROTH" is imbued with its motto spirit, "LET MIRTH PREVAIL."

The SCRIP, from Soldan presents many interesting articles on national and international questions.

The "DESERT VOICE," from Douglas, Arizona, is one of the new members of school publications.

The Central Wesleyan Star present their annual issue.

The Pi Kappa Alpha fraternity gave a very delightful dance at their club house last Friday evening. Mrs. N. A. Kinney was chaperone. The out-of-town guests were Miss Portia Norville, of Beardstown, Ill., Misses Florence McComb, Lula Bray and Jessie Batson, and Lieut. Randolph McComb, of St. James.

Dr. and Mrs. W. D. Turner entertained his industrial class with a six o'clock dinner on Tuesday evening. Those present were: Bash, Goldman, Wilkinson, Krause and Nichols.
