MINERS

vs.

KIRKSVILLE OSTEOPATHS JACKLING FIELD OCT. 4.

LINE-UP FOR TOMORROW'S GAME WITH OSTEOPATHS UNCERTAIN.

Coach Dennie is not putting out any advance dope on tomorrow's game with the Osteopaths; in fact, he says that he has not even made up his mind as to who will start the game. And nothing is known in Rolla concerning the probable strength of Kirksville.

However, the wise ones around school who have been going to Jackling Field to watch football practice are of the opinion that the Miner aggregation will make a good showing. There is fairly good weight and lots of pep in the squad, and this will go a long way toward making a successful season.

Bruce at center, "Juice" Place at tackle, Stephens at end, and Braazill in the backfield, are old letter men from former years, and fairly certain of being in the first line-up, with Hoppock, this year's captain, and the only letter man who played last year. "Kid" Wilson, who made his letter at quarter two years ago, is showing up well in the end position, and may start the game there, unless Coach decides to give Kilpatrick, a new man on the squad, a chance to show his metal.

Of the new men on the squad Buser and Christner at guard,

Continued on Page Three.

BOYER, '17, KILLED IN ACCIDENT.

Word has been received here of the death of Ray V. Boyer, '17, on Sept. 11th, in an automobile accident near his home in Bartlesville, Okla. A truck in which he was riding to one of the plants of the Company for which he worked was hit and smashed by another truck. He was fatally injured, and died in a few hours.

Mr. Boyer came to Rolla in the fall of 1915 from William Jewell College, where he had graduated in 1914. He was among the first to receive a degree in Chemical Engineering. He was employed as a chemical engineer by the Empire Gas Co.

SOCIETY OF CIVIL ENGINEERS BEING ORGANIZED.

Last Friday at the Baltimore Hotel, a splendid banquet was given by Professors McCandliss and Armsby for the students in the Civil Engineering Department. The banquet began at 8 o'clock, and ended at 12, during which time many interesting responses were made by the students to the toastmaster, Prof. McCandliss. The occasion proved the value and benefit, both educationally and socially, of a close association of individuals about to enter the same profession. It culminated in a unanimous appeal for a permanent organization, a movement to secure which is now on foot. Complete organization will probably be finished by next week.

Fred Grotts, '16, is with the Holt Tractor Co., Peoria, Ill.

GOLF MATCH SUNDAY.

Don't forget the golf match at 2 o'clock Sunday afternoon between Stubbs and Thomy. And don't forget that everybody, students and townspeople, whether members of the Athletic Association or not, are invited to watch the play.

Don't forget the Golf Tournament starts Oct. 26th. To qualify you must turn in to Coach Dennie six consecutive 9-hole scores on or before Oct. 19th.

STUDENT COUNCIL ELECTED.

Election of members of the Student Council for the year 1919-1920 was held today at the Mass Meeting, and three Seniors, O. E. Stoner, R. L. Marston and R. N. Stubbs, and two Juniors, K. W. Booker and H. O. Norville, were elected. These men are steady and reliable, and the student body is behind them to a man.

WHAT man doesn't like his pipe? There's nothing whets your smoke desires like seeing a good pipe lying around. Because you know that in it is the only real smoke satisfaction. Your appetite will be doubly whetted if it is a W D C, because in W D C Pipes all the sweetness and mellowness of the genuine French briar is brought out by our own special seasoning process. Then, too, W D C Pipes are good to look at. The designs are pleasing and workmanship perfect. You'll agree with us that our craftsmen are accomplishing their purpose—to make pipes that are without peers in all the world. Ask any good dealer. Be sure and look for the Triangle trademark. It's a guarantee against cracking or burning through.

WM. DEMUTH & CO., NEW YORK
WORLD'S LARGEST MAKERS OF FINE PIPES

STUDENTS TURN OUT WELL FOR CIRCUS.

The student body at M. S. M. certainly did turn out en masse for the Al G. Barnes circus. It was the best circus that ever came to Rolla, and it is doubtful if it ever comes this way again for at least a decade.

Great interest was manifest-

ed in the show, beginning with the unloading from the train, the parade, the performances, and on to the re-loading. Mr. Barnes, Mr. Sands, Mr. Rex de Roselli and Mr. Dawson have certainly worked out and perfected a wonderfully efficient organization.

MINERS
vs.
KIRKSVILLE OSTEOPATHS,
JACKLING FIELD
OCT. 4.

Continued from First Page

Bolt at tackle, Place, O. K., at quarter and Owens in the backfield, are showing up strongly in practice, and it is probable that they will be in line when the whistle blows. "Monk" Mann is a good man from the squad two years ago who will probably get into the game in the backfield.

Let's have the old Miner pep tomorrow, the kind that used to send twenty-five or thirty men to St. Louis or Springfield to out-pep and out-yell ten times their number of rooters. Peppy rooting has helped win many a game, and it always speeds up the playing.

A week from tomorrow comes our first game in the state conference as a member, and we want to show them that we can "eat 'em alive." If you don't want to ride the "blinds" the Frisco still runs lots of freights through Rolla. 'Nuff said.

Coach Dennie has cinched the game with the Southwest Missouri Teachers College (Springfield Normal) and it will be played a Rolla on Nov. 14, 1919. This is the fourth Conference game we have, and fills our 1919 football schedule.

INTER-CLUB-FRAT BASKETBALL SERIES STARTS DEC. 9th.

The Inter-Club and Fraternity basketball committee met with Coach Dennie Wednesday night, and decided to conduct the coming tournament on an elimination plan. Each organization will draw a series number, and these numbers will later be drawn to determine the order of games and the contestants in each. It is hoped that ten teams will enter the tournament making nine games in all.

The five preliminary games will be played before Christmas holidays, the first game being played on Tuesday, December 9, and the remaining four in the two weeks following. The semi-finals and finals will be played immediately after the Christmas vacation.

Every Club and Fraternity is urged to enter a team, and then get out and back it up. Letter men will be allowed to play; therefore, most organizations will have one or more old men in the series. A great deal of the material, however, will have to be drawn from among the newer members, and this, besides furnishing a few weeks of entertainment, should throw some light on the prospect of drawing varsity material from the younger students.

Each organization which contemplates entering a team should appoint a captain immediately. These captains will meet with the committee after mass meeting Oct. 10th to arrange for the drawing of numbers, the allotment of time for practice, and other details of the tournament.

These games promise some fun for the student body after the football season has ended; so it is hoped that each organization will put a team on the floor, and then see that that team has enough support to carry it through the series.

AN APPRECIATION.**The A. L. A. in France.**

"La guerre est finie," and the sooner we forget it the better, but the writer has had something on his chest for a long time, and has seized this first opportunity to get it off. Most of us who were in the A. E. F. knew of the S. A., the K. C. and the Y. M. C. A.; we have praised the Salvation Army lassie who gave out doughnuts under fire; we have lauded the K. C. for their free "eats" and generous hospitality; we have realized the great good that that greatest of all similar organizations, the Y. M., has done—but, I ask, how many of us knew and appreciated the work of the A. L. A. in France?

Every camp, every regiment, every billeting and leave area, had libraries full of books—good books, technical books, and books of fiction and of travel. The private soldier knew these books were there; he read these books; but he gave little thought to the splendid organization that provided them or to the silent-working librarian who labored night and day to keep his division or base section well supplied with that most necessary tonic of the waiting period—books.

Let us take some concrete cases. A regiment of heavy artillery was stationed near Angers during the months of December, '18, and January and February, '19. The men were billeted in barns and old shacks; they were cold, sick, and disgusted; there was nothing to do except to sleep, to gamble, to grumble, and to wait impatiently for the transport home. The men were beginning to lose pep, when one day right before Christmas ten boxes of books came to the regiment from A. L. A. headquarters; every one began to take

an interest in life again; and all passed a merry Christmas and a happy New Year.

The A. L. A. librarian of Base Section No. 1 worked in conjunction with the Section School Officer of the Army. Every camp had its library; Angers, Saumur, Nantes, Savenay, and all the camps around Saint-Nazaire were plentifully supplied with books. When the Divisional School was organized at Saint-Nazaire, the text books and supplies which should have been furnished by the Quartermaster Department failed to materialize so that the school had no books to work with. A fellow named Ranck, head of the Grand Rapids, Mich., Public Library, was the A. L. A. librarian in Saint-Nazaire. He wrote a letter to the Paris headquarters of the A. L. A., asked for a detail whom he sent to Paris with his letter, and in forty-eight hours the detail was back in Saint-Nazaire with a big shipment of text books from the A. L. A., and the Divisional School was able to begin work. The books and supplies from the Q. M. were received less than a week before the school closed.

The A. L. A. furnished its books and magazines through the chaplains, the Red Cross, the "Y", and the other agencies, and through the army mail service. Many a man has read A. L. A. books or magazines in the huts of other organizations and never known of the A. L. A. which provided the books. The A. L. A. was not bothered about credit so long as the men got the books. Why give all the credit to the other welfare organizations? You men who forgot your troubles reading A. L. A. books—you men who studied out of A. L. A. books at the University of Beaune and at the divisional schools—why not say a good word now and then for the

American Library Association, and for the hard working librarians who supplied you with books.

T. P. F. W.,
2nd Lieut., 48th Art., C. A. C.,
(discharged.)

SOPHOMORE.

Prof. Dean dismissed his Bonehead Calculus Class to attend "Virtuous Wives" Wednesday evening. We dare not repeat Prof's thots, inasmuch as he resides in Rolla. Wonder if H. & S. couldn't arrange to run it a week?

When Watts strolled by the fat lady at the circus she said, "There's my own sweet papa." No wonder Fat's mind doesn't run to calculus.

We are glad to see so many Sophs out for football, and judging by their work we should see our class well represented in the line-up against Kirksville.

Evidently Dr. Woodman hasn't a very good opinion of the Miners as a whole. The Doctor has it figured out that were there nothing between here and the lower regions except a vacuum, a Missouri Miner would land there and have a nice bed of coals picked out in just 21 minutes after his demise.

Though we realize that there are probably very few things that our dignified (?) Lieut. Thomy of the Freshman Class doesn't know, still we believe that there are a few things yet that he could be enlightened on. One of these few might relate to the geographical location of the Frisco pond and the temperature of the water there about ten o'clock at night.

FRESHMAN.

Everything going fine for the big smoker on the 15th. Updike promises to have a real red hot bunch from St. Louis on hand to entertain.

Every Freshman should be out Saturday afternoon to help whip the Osteopaths. May be our only chance to put on a snake dance this year.

Wednesday afternoon the bunch came out in a body to watch the team thru practice. Zoller says he is back in the game to stay. Porterfield has a beautifully decorated eye.

Monday and Tuesday we demonstrated our speed by getting out of "Chem." lecture at 11:05.

Some wonderful sights when we "stepped out" in our uniforms.

Murch and his assistants are still looking for some men.

The algebra quiz on Tuesday was a great success. Very many alibis.

Trips to St. James, Cuba and Newburg are the fashion. Our class is certainly well represented. Tevis and Sapper remember St. James quite well.

Specials and Vocational men who so desire are requested to join the Freshman class.

How would you like to be operating a business and have half of your clerks come one day and the other half the next day? Or, how would you like to be operating a factory, and have a great many men hired, and their work for each day planned out for several weeks ahead—and then when the whistles blew for work to start have only a part show up? How would you like to have your organization broken up every day, and be forced to partially close down because the men under you only come when they feel like it, or when nothing else interferes? Would you like it?

This is what happens on the football field when the candidates are not regular in their

attendance. Why not put forth a little effort and encourage regular attendance, instead of letting regularity be superceded by regularity? A little interest shown on the part of the student body in the way the football team is coming on will go a long way toward encouraging the candidate to be regular at practice.

JUNIOR.

The boys who went on the A. I. M. & M. E. trip to Chicago were so used to walking on the soft sod and green grass that after hoofing it over the pavements of the windy city it became almost impossible to get around. Some had to wear blinders in order to arrive back in Rolla with eyes in a fit condition to continue perusing the text.

Webb got the roof of his mouth very badly sunburned while gazing "open-mouthed" at the tall buildings.

Some frosh are "Green" we know, but some are of a more brilliant lustre than others.

The other day a frosh was found on his hands and knees, at the head of the stairs in the book stacks of the library trying to find out whether the glass floor was safe to walk on.

"Bus" Hughes has been pretty busy studying lately, but we are sure it isn't school work. The other day he was inquiring about the cost of a plain gold band wedding ring. Is it possible that "Little Harry" is serious?

Prof., to fickle Junior: "Why are you so far back in your work?"

Student: "So I can pursue them better."

It has been decided by the statistical board of Low Muckymucks that the man who holds on to the last is the shoemaker.

The "Constitution" of To-day—Electrically Propelled

THE U. S. S. "New Mexico," the first battleship of any nation to be electrically propelled, is one of the most important achievements of the scientific age. She not only develops the maximum power and, with electrical control, has greater flexibility of maneuver, which is a distinct naval advantage, but also gives greater economy. At 10 knots, her normal cruising speed, she will steam on less fuel than the best turbine-driven ship that preceded her.

The electric generating plant, totaling 28,000 horsepower, and the propulsion equipment of the great super-dreadnaught were built by the General Electric Company. Their operation has demonstrated the superiority of electric propulsion over old-time methods and a wider application of this principle in the merchant marine is fast making progress.

Six auxiliary General Electric Turbine-Generators of 400 horsepower each, supply power for nearly 500 motors, driving pumps, fans, shop machinery, and kitchen and laundry appliances, etc.

Utilizing electricity to propel ships at sea marks the advancement of another phase of the electrical industry in which the General Electric Company is the pioneer. Of equal importance has been its part in perfecting electric transportation on land, transforming the potential energy of waterfalls for use in electric motors, developing the possibilities of electric lighting and many other similar achievements.

As a result, so general are the applications of electricity to the needs of mankind that scarcely a home or individual today need be without the benefits of General Electric products and service.

Figures that tell the Story of Achievement

Length—624 feet
Width—97 feet
Displacement—32,000 tons
Fuel capacity—a million gallons (fuel oil)
Power—28,000 electrical horsepower
Speed—21 knots

An illustrated booklet describing the "New Mexico," entitled, "The Electric Ship," will be sent upon request. Address General Electric Company, Desk 44, Schenectady, New York.

BILLIARDS**FROM THE FLAGPOLE.**

Prof. Dean is holding night sessions for the ones who went on the A. I. M. E. trip, (and others). Judging from some of the papers the gleam of the bright lights is still in their eyes, or perhaps this is as the morning after, and they are seeing red, white and blue turkeys with merry widow hats, instead of the dx.

Some of the fellows are still wondering what 25 cents more would have opened to their visions at the circus side show. Those who did venture so far say that the only new thing was the apparition of one more 25-cent piece taking wings and flying in the same direction as had gone the other four bits.

There was a young student named "Bo,"
Who went to a circus side-show
But when he got there,

The show wasn't so rare.
But he'd do it again, we know,

And along with him went
"Gus,"

Who wanted to be in on the
fuss,
"Gus" saw the show,
And said, "I don't know,
But I believe I'll come back af-
ter the rush.

All good souls who haven't
full hours on Thursdays and
Fridays should think to call Dr.
Barley and remind him to take
his quinine. The Doctor is re-
cuperating from a fever, and
doesn't want to slight the treat-
ment by neglecting the dose of
quinine.

Note.—Sophomores better
let the upper classmen do the
reminding..

OLD GRADS GET TOGETHER AT CHICAGO.

Terrell Gives Luncheon.

One of the most enjoyable features of the A. I. M. E. convention at Chicago was the luncheon given by Arthur D. Terrell, '98, to the graduates attending the meeting, at the University Club, Sept. 24th. The luncheon was a big success, as the twenty-five men representing sixteen classes will testify.

Mr. Terrell, who is General Manager of the Mineral Point Zinc Co. and subsidiary organizations with offices in Chicago possesses that old-time M. S. M. "pep" to the highest degree, and believes in doing things that really count. There are approximately thirty Rolla men in the Chicago district and we expect to hear in the near future of a Chicago Alumni Association, with Mr. Terrell as president.

Besides Dr. McRae, Director of the School, and the host, the following were present: F. N. Flynn, '95, Balbach Co., Newark, N. J.; V. H. Gottschalk, '98, Director of Research Laboratories, American Cotton Oil Co., Chicago; Herbert Rogers, '99, Supt. Superior Phosphate Co., Joliet, Ill.; J. H. Underwood, '99, Mine Operator, Granby, Mo.; John A. Garcia, '00, Allen & Garcia, Mining Engineers, Chicago; W. M. Weigel, '00, Supt. Missouri Cobalt Co., Fredericktown, Mo.; H. A. Grine, '04, Gen'l Supt American Zinc and Chemical Co., Langelathe, Pa.; H. H. Clark, '07, Experimental Engineer Peoples Gas Co., Chicago; Boyd Dudley, Jr., '08, Major, Ordnance Dept., Watervliet Arsenal, N. Y.; R. H. DeWaters, '09, Chief Chemist Corn Products Refining Co., Argo, Ill.; J. W. Bodman, '10, Ge'l Manager Wm. Garrigue Co., Chemical Engi-

neers, Chicago; M. H. Thornberry, '12, School of Mines Experiment Station, Rolla; C. Y. Clayton, '13, Associate Professor of Metallurgy, School of Mines, Rolla; J. C. Ingram, '13, Chemical Engineer American Cotton Oil Co., Chicago; F. G. Moses, '14, Hydrometallurgist, U. S. Bureau of Mines, Salt Lake City; R. S. Dean, '16, Assistant Professor of Metallurgy Armour Institute, Chicago; G. E. Johnson, '16, Anaconda Copper Mining Co., East Chicago, Ill.; H. A. Ambler, '17, Captain Infantry, Fort Sheridan, Ill.; T. P. Walsh, '17, Graduate Student School of Mines, Rolla; J. W. Pugh, '18, Chicago; H. W. Doennecke, '18, Mineral Point Zinc Co., DePue, Ill.; J. M. Morris, '18, Allis-Chalmers, Milwaukee; and W. E. Oyler, '19, American Cotton Oil Co., Chicago.

DePUE TRIP.

The five Rolla men who took the trip to DePue Ill., to visit the Mineral Point Zinc Co. at that place, were well rewarded for their time and trouble. The plant is a model one in every respect, and is under the general management of one of Rolla's graduates, Mr. A. D. Terrell, '98. The visit around and thru the plan was a personally conducted one, under the direction of another old Rolla man, H. W. Doennecke, '18. Henry has been very successful in the zinc game, being foreman of kilns at the present time. The entire plant was inspected, particular attention being paid to the sulphuric acid plant.

The following M. S. M. men are with the Chino Copper Co.; R. C. Thompson, '10, and W. H. Elbelt, '12, mine shift foremen, and R. C. Henschel, '17, sampler at Hurley; J. H. Bock, '16, steam shovel foreman at Santa Rita.

ANOTHER—

Miner dance? Yes!!! one more as good or better than the first. The second dance for the benefit of the Miner Board will be held in the Gymnasium on Saturday evening, October 4. We think you all had a good time at our first effort, and we will say here that the music will be just as good or better, and the refreshments of the same caliber.

No better opportunities are offered the Frosh for getting in and "getting his feet wet" than Miner dances, for they hold the same relation between the student and the townspeople as the smoker among the students. For the old men, too, they are a means of forgetting the trials of the week, and of getting around among the bunch for a few hours.

We promise you a good time. Let's have a full turnout at the same old price, 75c per couple.

Also we wish to announce that on Hallowe'en you will be treated to something unusual in the way of a hop. It is our aim that this dance shall be in the nature of the annual St. Pat affair, and with out efforts toward decorations, refreshments and new music, along with full support from the student body we will be able to put on a dance that will be a pleasure for you to have HER to attend.

BE A FRESHMAN AT N. U.**

The men who were on the
Senior trip to Chicago will per-
haps remember reading the
following article from one of
the Chicago papers. For the
Freshmen here who think they
are cruelly treated, this may
bring a little sunshine.

The rules and regulations
which will guide the 'little pink
feet of freshmen at Northwest-
ern University for one year—
unless the sophomore rules
committee is entirely mistaken
—were posted yesterday on
the campus and throughout Ev-
anston in all their drastic com-
pleteness.

The placards read as follows:
"SCUMS, ATTENTION."

"Whereas the class of 1922
feels morally obligated to aid
and instruct the class of 1923
in all matters for one year, the
following rules are to be care-
fully followed:

- "1. Wear a green cap.
 - "2. Salute all sophomores.
 - "3. Wear a fireman's hair-
cut.
 - "4. Bathe at least once a
week.
 - "5. Apply to sophomores
for campus passes.
 - "6. Do no fussing on the
campus.
 - "7. Wear short pants to
all classes.
 - "8. Use no tobacco.
 - "9. Provide self with hand-
kerchief and use same.
 - "10. Refrain from childish
practice of eating jawbreakers
after 7 o'clock at night.
- "Until these rules have been
complied with for one year, the
class of 1923 will retain its low-
ly status as scums of the earth.
"Rules Committee, Class of
1922."

It has been said that hazing
publicly is a thing of the past
everywhere, except at Rolla;
however, from the above arti-
cle it would seem that the so-

called hazing here is a mere
pink tea for the entertainment
of the unrivaled, all-highest
class of 1923, whose advent in-
to the School of Mines has so
far been heralded only by the
threat of a slap on the wrist.

Has the day come when a
freshman, a man who has been
in the school only a few weeks,
can carry himself like a sopho-
more, talk with the familiarity
of a junior, and wear the sen-
ior's needed shave? Heaven
forbid; but with hazing abol-
ished, "the brightest days of the
school year, "the days of real
sport," are gone, and with
them the power to keep the
freshman class where it be-
longs.
