THE MISSOURI MINER.

Missouri School of Mines and Metallurgy, Rolla, Missouri.

Vol. 6. No. 8.

Friday, October 24, 1919.

Price, 7 cents.

ARKANSAS U. 20, MINERS 0.

After clearly outplaying the Razorbacks in the first quarter of the game, the Miners weakened, and Arkansas scored a touchdown late in the first half. The Miners were, for the most part, in poor condition, which was evidenced by their slowness in coming up to the line of scrimmage after every play. Practically all of the backfield men were in a more or less injured state before the game had progressed very far, due primarily to lack of proper training.

In the second half the superior weight of the Fayetteville aggregation wore down our defense, and two additional touchdowns were registered by them before the game ended. Davidson starred for Arkansas, while the Miners' ends played most consistently on the Rolla side of the line-up. No Arkansas runner had a chance to run back a punt for any yardage to speak of.

We play St. Louis U. at St. Louis next Saturday and, judging from their showing against Lombard we should be able to make them hump to beat us. If all of the squad rounds up into condition and puts up the scrap they are capable of, we will win. Moral and vocal support will also be there to cheer the boys when they line up for the kickoff at Federal League Park in St. Louis next Saturday. Will we win? Hell—Yes!

Capt. Harry Ambler, '14, has secured an extended leave from Fort Sheridan, and is in school to do research work in the metallurgy of copper. He expects to stay three or four months.

THE MISSOURI MINING AND METALLURGICAL ASSOCIATION.

The Missouri Mining Association met last week and elected officers for the present year. F. W. Uthoff was elected president, and Wm. Netzeband was chosen for the position of secretary-treasurer. During a discussion and outlining of plans for the year's activity it was decided to make a change in the constitution with regard to the name of the organization. As is known, the Missouri Mining Association is affiliated with the American Institute of Mining and Metallurgical Engineers, and since the latter recently elected to include metallurgical engineers in the Institute it became necessary for the student organization to make a similar change. The Association has many metallurgical students on its roll, and in view of this fact, as well as the one formerly stated, it became necessary to change the name. There may have arisen some misunderstanding because of the Metallurgical and Chemical Society catering to students of metallurgy as well as chemistry, but the change was not made with the intention of encroaching on the field of the Met. and Chem. Society.

A series of lectures and entertainments is being planned that should be of interest to the entire school, and it is hoped by those who are making an effort to present a number of interesting programs that every one will avail themselves of the opportunity.

All upper classmen are eli-

Continued on Page Eight.

BE A BOOSTER.

There has been an unusual amount of criticism thus far this year by a certain clique in the student body regarding the noticeable absence of school spirit and student activities. That these criticisms are founded on fact cannot be disputed, for it would seem that little if any interest is being taken by a large majority of the students in supporting any of the many and varied activities that should be supported. BUT, as is usually the case, many have tempered their much worked hammers, and continue to knock sparks from the anvil of school activities instead of using their efforts on the busy end of a horn. If these sage critics steeped in wisdom will come out of their shell once in a while and boost or suggest such changes as they think necessary for the life of school activity they would be conferring a favor on their Alma Mater instead of hampering activity by their more or less continued criticism.

NOW!

An opportunity has presented itself for every one to manifest their interest in school activities! The Miner Board is making a great effort, entailing no little expense and work, to give a Hallowe'en Dance that will attract the interest of all those who possess any of that purely American essence—Pep. This dance is not only designed for the followers of terpsichore, but also for spectators who seek unique entertainment.

Hallowe'en, with all of its tradition and mystery, a relic of olden times and now more or

less dormant spirit of merry-making, is to be brought back in all of its countless phases by a dance-entertainment next Thursday evening at Jackling Gymnasium. The men in charge of the dance are availing themselves of every opportunity to make this an occasion to look forward to, as well as one that may be looked back upon with pleasant recollections. One of the most popular St. Louis orchestras will furnish the music, the Gymnasium will be appropriately decorated, while the refreshments will be those of the season. Are YOU going to miss the biggest time of the semester?

EVERY ONE is invited, the faculty, the townspeople and their guests, and the student body. This is your opportunity to boost school activity, as well as to set precedent for the success of the occasion will determine whether it is really worth while to have a real dance.

MET. AND CHEM. SOCIETY MEETS.

About thirty members listened to a very interesting talk Thursday night by R. C. Schappler. Schappler has had experience as a metallurgist in the western U. S., and spoke of the metallurgical processes employed by some of the most progressive mills of that section. Among the mills mentioned by Schappler were those of the Anaconda Copper Co., at Butte, Mont., and the 2010 gold stamp mill located at Edgemant, S. Dak. The meeting closed with a big eat fest in the Assay Lab.

Note: The faculty was conspicuous by its absence.

EVERYTHING TO EAT AND TO WEAR.

FROM THE HILLS.

I hearn a brakie t'other day
 A'cussin' up an' down,
 An' swearin' that he'd never
 run
 Agin' through Rolly town.

I says, says I, "Ease up a bit,
 Them cuss words sure is
 strong;
 Count ten an' hold your breath
 a spell,
 Then tell me jes' what's
 wrong."

He says, says he, "I've been a
 brake
 For fifteen years or so,
 Upon the Great Southwestern
 An' on the B. and O.

"I've met with bums on every
 road,
 I've chased 'em off each line;
 But these here bums o' Rolly
 They shore do beat my
 time!"

"They're as plentiful as cin-

ders,
 They're as agile as a flea;
 For every one that you chase
 off—
 You find another three!"

"They hop on from off'n
 bridges,
 They slide down from off'n
 banks;
 Then they fox-trot on the box
 cars
 An' play tag around th'
 tanks."

Sometimes they bums to see a
 girl,
 Sometimes to see a game;
 An' ef there ain't no reason—
 They go bummin' jest the
 same."

"I ain't much up on prayin',
 But I'm makin' this my
 prayer—
 'I don't want to go to Heaven
 Ef these bums is bummin'
 there.' "

COMING.

The reels which were to have been run at Mass Meeting this morning will be shown at a joint meeting of the Mining, Metallurgy and Chemical Societies some time next week. As these reels are pictures of processes in the coal and steel industries they should be of interest to all of the school. Watch for a notice announcing the time that they are to be shown.

PERSUASION POOL.

The Frisco Pond is coming back into its own. Once more it temporarily receives into its cool, wet, and ego-curing bosom various and sundry frosh, who do not or will not, pay heed to the greatest traditions

of M. S. M., democracy and loyalty. Monday night two freshmen paid the penalty, and took the icy plunge. Since there has been a marked change in their demeanor.

Methinks it would be well if certain upper classemen also could be taught the lesson of Frisco Pond. This applies not only to democracy and loyalty to fellow students, but also to consideration and courtesy for our foreign students, who at the best find life in a strange country, with strange speech and customs, none too easy.

MASS MEETING.

The Mass Meeting this morning, with the Juniors in charge, was given over to a discussion of a memorial to those who offered the supreme sacrifice for their country. The question was discussed pro and can, but no action was taken on it.

The Sophomores will pilot the Mass Meeting next week, and we are all anticipation for a rip-roaring program.

JOBS SOME FELLOWS WANT.

Calling stations on a transatlantic liner.

Chief carpenter in a toadstool factory.

Writing advertisements for the Congressional Record.

Artist for a newspaper for the blind.

Ice man in Greenland.

Butcher in a colony of vegetarians.

Mining engineer for the Sahara Desert Company.

Mechanical inspector for rural mail-boxes.

—Exchange.

John J. Shipley, '17, is draftsman for the Standard Oil Co. Sugar Creek, Mo.

John J. Doyle, ex-'16, is working for the Cosden Oil & Gas Co., of Tulsa, Okla., at 216 Famine St., Shreveport, La.

MINERS ABROAD.

In giving a digest of the year's football leaders of the country, the St. Louis Post-Dispatch of October 17th has this to say of our team:

"Missouri State Intercollegiate—Missouri School of Mines has shown a strong scoring machine, '50 points better than the Blue Jays of Westminster.'"

This, coming as it does, from one of the St. Louis papers, all of which seem to hate to say anything good about the Miners, is highly complimentary to our team, and is giving credit where credit is justly due. The Arkansas defeat does not mean anything. The morale of the team is not shaken in the least, and we now look forward to the two St. Louis games with perfect confidence. It is up to the student body to present themselves at these games in goodly numbers to out-pep and out-yell our rivals, and root the team to victory. Transportation facilities are ample. The Frisco will be operating their usual number of trains, and all the blinds and side-door Pullmans of Oct. 25th and Nov. 1 have been reserved exclusively for the Miners. Nov. 1 is the big day, and we'll have to fight hard to win, but win we will. Frosh, how about some real Miner spirit and Miner pep on Francis Field that day? You are expected to be there, and so hoarse the next day you can't talk.

FRESHMAN.

It cost Davis two dollars to be convinced that he was wrong. Evans says, "There's one born every minute."

At inspection Wednesday Hollow had no hat. When asked by the Major where his top piece was, he answered, "Borrowed without leave, sir." He was promptly charged with a new hat.

Walter Gammeter, '15, is engineer and assistant superintendent Arizona Asbestos Association, H. W. Johns-Manville Co., Chrysotile, Ariz.

Last Wednesday night the members of the Student Council were the dinner guests of Dr. McRae at the Baltimore Hotel.

Organization of the Council was completed, and O. E. Stoner was elected chairman. Suggestions regarding a suitable memorial for those alumni who made the supreme sacrifice in the war just past were made and discussed.

The members of the Student Council are: Marston, Stoner and Stubbs of the Senior Class; and Booker and Norville of the Junior Class.

In a recent clipping from an eastern paper we note mention of a former football star of M. S. M., for his brilliant work on the gridiron. Copley, '18, star tackle on the all-victorious 1914 football team again makes his prowess known in a recent game between Akron and Pitcairn. It will be recalled that Copley was chosen for a position on the All-American some time ago.

Announcements have reached M. S. M. of the marriage of Raoul Chavez, '18, to Miss Felicia de Linss, of Chihuahua, City of Mexico. The announcements were in Spanish, and stated that Raoul and his bride had been married on the 14th of October, in the church at Chihuahua, Mexico.

Raoul was a Prospector while in school, and specialized in geology. The Miner extends best wishes.

Rolla Lodge, No. 213, A. F. & A. M., meets regularly on the first and third Saturday evenings each month. All Master Masons are cordially invited to attend whenever convenient.

Mr. and Mrs. Robert L. Spencer announce the marriage of their daughter, Martha, to Mr. Joseph Griswold Wilson. "Joe" was center on the all-victorious 1914 eleven and was popular in other school activities during his stay at M. S. M. The wedding took place at Williamsburg, Va., on October 14th. Our best wishes are with the young couple.

Mr. Wheeler, the Librarian, is absent this week, attending the annual conference of the Missouri Library Association at Kansas City. Mr. Wheeler is secretary of the Association, and has had charge of preparing the program and arranging for the various sessions.

Ralph Dale, '17, is with the Illinois State Highway Commission, Canton, Ill.

John T. Craig, ex-'17, is petroleum geologist, 1212 Merchants Bldg., Shreveport, La.

R. W. Hayden, ex-'15, is with the Atlas Portland Cement Co., Hannibal, Mo.

G. F. Metz, '14, is designing engineer Atlas Portland Cement Co., Allentown, Pa.

Elmer List, '10, is research engineer for the Aluminum Company of America, 103 Maryville, Alcoa, Tenn.

Adrian B. Chaney, ex-'17, is assistant engineer Mo. Pacific R. R., Little Rock, Ark.

Boyd Dudley, Jr., '08, recently discharged as Major Ordnance Department, U. S. Army, has accepted the position of manufacturing engineer, Watervliet Arsenal, U. S. Army Watervliet, N. Y.

J. J. Sandford, '08, is with the B. & F. Mining Co., Gillham, Ark.

John S. Stewart, '10, is now at Kellogg, Iowa.

W. G. Richards, '07, is with the Leschen Wire and Rope Co., St. Louis.

NATIONAL BANK OF ROLLA
Resources over \$600,000.00
Member of the Federal System

A bank where personality enters into every transaction.

A bank where you will feel as much at home as by your own fireside—

The same courtesy is extended to a small as a large depositor. "Uncle Sam" guards your money when placed in our bank.

FROM THE FLAGPOLE.

Have you noticed that tree of the luscious fruit that caused Adam's downfall, on the way to school? And doesn't it seem to be farther from the fence each time you pass it?

Oh, I once took Prof. Dean's Calculus.

Toted it home each night, Learning of the failings of the best of us,

And that there never was a text really right.

Oh, I labored for a month or more,

But strayed from the path I fear,

Prof. raved and he swore, and showed me the door,

And said, "Come again next year."

The Sophomores say that they are doing very well, thank you, in their night school. On Wednesday night they had the privilege of attending three different sections. Looks like there will be some activity in school during Christmas week.

One student lost a girl not long ago because he didn't take her to a Miner dance. Moral: Better get your ticket now.

We learned in Physics that there are much shorter ways of working the problems, but we must not use them. Goodness no, because they do not imply the sublime, the exquisite laws of Physics.

A large delegation was present on Monday evening at Frisco Pond to watch Thomy and Linzer as they made their explorations of the bottom of the lake. Sometimes more than one expedition is necessary before such worthies as these realize that you are not showing them all these things because you are so in love with their ways.

No, Prucella, "Inspection Arms" doesn't mean that you are to roll up your sleeves. Only a Freshman thinks that.

Frosh; "Say, who is that fellow going up the street?"

Soph.: "That's Boots Clayton."

Frosh: "Well, I wonder if he is ever going to graduate? I saw his picture in the 1912 Rollamo, and he was a Junior then."

ANY tobacco—*every tobacco*—tastes better in a W D C Pipe. Our own specially seasoned and carefully selected French briar makes it so. Add to this the supercraftsmanship of the Demuth workers, and you'll not wonder that we claim pre-eminence in the quality of our pipes. Ask any good dealer.

WM. DEMUTH & CO., NEW YORK
WORLD'S LARGEST MAKERS OF FINE PIPES

BOLSHEVISM.

Continued from Last Week.

Carl Marx was the Socialist writer whose ideas exerted the most powerful influence on the thinkers of the day. His teachings became the central thots round which the Socialist parties in the different countries grew. It must be remembered that the leading European countries, England and France and Germany, and several of the smaller ones, like Switzerland and Belgium, already had secured sufficient political freedom to secure free circulation of thought among the different strata of population.

Conditions were different in Russia. The Czarist power there was at its height. Their rule—or misrule—was a shield for almost any selfish interests of the chosen few surrounding the throne. The industrial development of the country was several decades behind that of her western neighbors. In the seventies of the last century there was as yet no large laboring class, the sufferings of which was to be relieved. Public spirited men had

another enemy to combat—the autocratic powers of the government, —and, accordingly, there were no Socialists in Russia,—only political revolutionaries, that is, men fighting for a change of political, and not social conditions.

Only in the eighties of last century was a true Socialist party organized, and that split up soon after its formation into two branches. The one called the Social Democratic party (or S-D for short) was composed of orthodox followers of Marx. The other, the Social Revolutionary, (S-R.) party modified his views to suit the special conditions in Russia.

An analysis of the personality of the Revolutionaries, and an acquaintance with the conditions under which they worked, may clear up some ideas regarding the events of today.

Most all of them became affiliated with the parties while young; young people are easier enthused, and choose more readily a path fraught with danger. Their liberal views make them enemies of the state which with great cruelty tried to stop their activities. It us-

ually did not take long for them to become known to the police. In order to escape persecution they had to live under assumed names, without means of earning a living, frequently at the expense of their sympathizers and abettors. Their moral standards were strongly affected by such conditions. They began to think that the only thing of importance was their true adherence to party principles and the staunch support of their co-workers. They sharply differentiated between the morals of the "bourgeois," or middle class, and their own. Respect for other people's property they had none: was not property acquired by heartless oppression of the defenseless lower classes, or by grants and payments of the government which had no moral right to make such grants? Nor had they much respect for life, their own life or liberty being in constant danger.

Continued Next Week.

INTER-FRATERNITY AND CLUB BASKETBALL.

The series numbers have been drawn for the coming basketball tournament by the representatives of the clubs and fraternities, and are as follows:

Kappa Sigma.....	1
Pi Kappa Alpha.....	2
Lambda Chi Alpha.....	3
Kappa Alpha.....	4
Bonanza	5
Sigma Nu.....	6
Placers	7
Prospectors	8
Independents	9
Grubstakers	10

The preliminary games will be in the following order:

December 9—1 and 2.

December 12—3 and 4.

December 15—5 and 6.

December 19—9 and 10.

Every organization should get their men out for practice, and help make this tournament a success.

gible for membership in the Missouri Mining and Metallurgical Association, and a cordial invitation to join is extended to them.

SENIORS.

Stubbins, who has undergone an appendicitis operation in a St. Louis hospital, is reported as getting along nicely. We hope to see him on the campus again in the shortest time possible.

Dr. Cox offers us encouragement. He says that even saloonkeepers and rousties have made reputations as geologists.

SOPHOMORE.

"Us Physicists" are setting a fine and worthy example of harmony and unity. Over 50 per cent rated F in the last quiz which shows co-operation.

Dean, despairing of ever teaching us calculus, has been devoting his time, and amusing us, with a course of expression. He feels blue sometimes about the boneheads, but then the world wasn't made in a day, Prof.

The temperature of Frisco pond is pretty low these evenings. Soon it will be cold enough to duck those Freshmen who persist in wearing caps.

Rix has broken loose again. Here is his latest:
There was a guy named Dean,
Who thought his calc was keen,
But he's all off, he's off in his bean.

Thumbs up.

WHO'S WHO.

Dr. Guy Henry Cox, noted expert on efficiency. Gained some prominence until he paid full price for a hair cut.

The best of men will get stage fright once in a while. The other night Dave Bash got so excited over the Blonde that he stuck the wrong end of a burning cigarette in his mouth.
