Price, 7 cents.

AMERICAN MINING CONGRESS.

The following members of the faculty are attending the meeting of the American Mining Congress in St. Louis this week: Director McRae, Doctors Cox and Barley, and Professors Forbes and Clayton.

R. N. Stubbs and R. O. Swayze are also in attendance looking after the School's Metallography exhibit.

Monday's St. Louis Republic quotes Dr. McRae as follows:

Dr. A. L. McRae, director of the School of Mines, at Rolla, who is on the organization committee for the national conference of the Schools of Mines, stated his organization was anxious to gather from the congress information about the characteristics of various nationalities who work in mines.

He said he had heard, for example, one nationality of foreign workmen are very docile until they get in the majority, and then they become extremely obstreperous and hard to manage. Some men of foreign birth also show a greater tendency to herd together than others, he said. He stated if the mining companies would collect data on this subject it would be extremely valuable.

James E. Fulcher, '86, is professor of civil engineering Des Moines College, Des Moines, Ia.

Wm. C. Hogoboom, '14, is with the Atlas Portland Cement Co., Hannibal, Mo.

John S. Stewart, '10, is superintendent Lead Smelter and Refinery Kingdon, M. and S. Co., Galetto, Ontario, Canada.

A LITTLE DOPE ON DOPE.

Every year, and especially during the football season, the little bug-bear, dope, comes out of its hiding place and raises Cain for a few months. It is the foundation for all bets which should have been won; the butt of uncountable criticism of more or less lurid hue; the one thing which scoffs at and defies logical sequence of events. A proper definition would be hard to give.

We take, for instance, two football teams whose past records have been about on an equal plane, and play them against each other in a contest. According to dope, the battle should be a close one, and then somebody pops up and kicks over the bucket, and one team annihilates its opponent. Nobody expected it—the dope didn't "pan" out. All sport prophets—and they are a legion—go out of business temporarily, and use up great gobs of ink in "alibiing" for a favorite's defeat.

Some of dope's most intimate friends recover and say, "it can't occur again," and "bang" on the next Saturday their favorites, doped to win again by a large margin, wallow in defeat. More money changes hands, and a blue haze is prevalent in the camp of the favorites. You can't beat it—except in cases where no dope is necessary—and they are comparatively few.

Did you look at last Sunday's sport sheet? How much of your dope came out O. K. Average your right and wrong dope, and be truthful.

MINERS 32, SPRINGFIELD NORMAL 0.

("Buddy" Cairns' Field Day.)

The worm turns sometimes, and last Friday afternoon it had one of its periodic revolutions, and the Miners won a football game. Springfield Normal was the victim and, except for a few brief spurts, were never seriously in the hunt. Both teams played a far better offensive than defensive role and, except for the phenomenal playing of Cairns, would have probably played to a much closer score than is shown above.

"Bud" just naturally slipped, slid, dodged and squirmed his way thru the Teacher's line in a manner that was refreshing. He and Bruce were the only Miners whose work stood out above the rest. Bruce opened up most of holes when "Buddy" decided to go thru the line. Eddie Bohn was also around when some yardage was needed to make it a first down. He plunged across for a touchdown on his own account. Cairns made the other four touchdowns and did a very satisfactory afternoon's work in piling up the 24 points which go with the touchdowns. He also kicked one of the goals after touchdown, bringing the total to 25.

The Miners, when once in possession of the ball, were hard to stop, and only penalties, at critical times, saved the Normals from a few more touchdowns. Cairns' long game on quarterback runs featured, and the Normals could not solve the play. In the line

A PIPE'S the thing with men. Under the spell of WDC Pipes men relax, fagged brains are relieved. The specially seasoned genuine French briar breaks in sweet and mellow. It will not crack or burn through. The WDC Triangle on the bowl is your guarantee. Ask any good dealer.

WM. DEMUTH & CO., NEW YORK
WORLD'S LARGEST MAKERS OF FINE PIPES

the Miners had the advantage when on the offensive but large gains were made thru them on the defensive. Stonewall tactics saved the Miners from a score late in the fourth period, after the Teachers had rushed the ball from mid-field to our 10-yard line. It was their only serious bid for a score.

At the end of the first half the score stood 19-0 in our favor, and in the second half Coach Dennie sent in numerous substitutes to save his men for the Turkey Day game in Springfield. With Brazill in the line-up again, we should present a line-up, the equal of the one which played the vaunted Pikers to a close score three weeks ago.

Down in Springfield they are probably counting the score already by which they will defeat us but we think different. Their victory over St. Louis U. means nothing, and the Miners played their rottenest brand of football against the Grand Ave. aggregation. If the Miners play like they did against Washington—look out, Drury!

MASS MEETING.

The faculty endeavored to show the student body just how little they know, or at least that is what the students in attendance inferred from the talks made by Dr. Shaw and Major Wild. Dr. Shaw informed us that most of what we know is bunk, and that most of what we didn't know is what we ought to know. It must be nice to know what to learn, but since we are not all experts we do not always know "bunk" from that which is not bunk. Then Major Wild gave quite a lengthy and detailed discourse about the R. O. T. C. and school spirit. We are in accord with his views on co-operation, and attempted to develop some pep for the football game by an old-time parade, but after all arrangements had been made Dr. McRae announced "that school would be dismissed at 2:50 for the game at 3:00. What's the use!

At the Mass Meeting today, with the Seniors in charge, Prof. Dean made a talk that touched upon a subject that

has been in the minds of many for some time. He criticised certain men for their arrogance as a result of their having been overseas, while those who actually did the fighting have the modesty to refrain from any remarks of aggrandizement or derision. A reel showing bridge construction as developed by the army was shown by Major Wild, and proved to be very interesting.

TWO WEDDINGS LAST WEEK.

Mr. Clyde O. Reinoehl, of the State Geological Department, and formerly a student at M. S. M., and Miss Laura Bennett were united in marriage Wednesday, November 12th, at the home of the bride's parents in Salem, Mo.

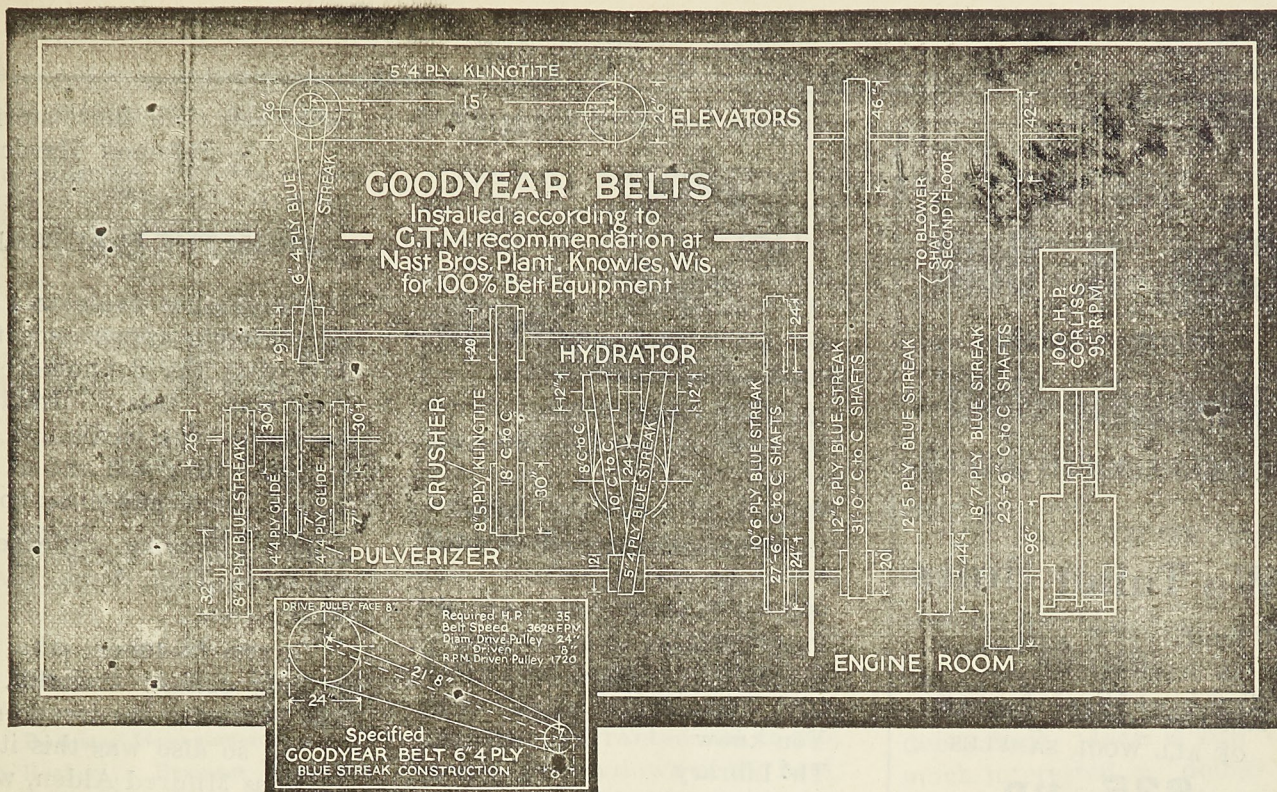

Mr. Howard Jones Teas, M. S. M. '17, of Freeport, N. Y., and Miss Hazael Estelle Chapin, of Rolla, were joined in marriage Saturday evening, November 15th, at the home of the bride during a birthday dance given by the sister of the bride, Miss Wanda Chapin. The wedding came as a great surprise to the many guests. Miss Wanda Chapin was the maid of honor, and Walter F. Lottman was the groomsmen.

Mrs. Teas is a teacher at Covenant School, just east of Rolla, and she will continue until some one is found to take her place. Mr. Teas returned Monday to Edwardsville, Ill., where he is an engineer for the Illinois State Highway Department.

Wm. Porri, '12, is chief geologist Old Dominion Co., Globe, Arizona.

Dr. O. A. Randolph, '11, has been made associate professor of Physics, University of Colorado, Boulder, Colo.

One Belt, an Entire Plant—and the G. T. M.

The proper study of power necessarily includes belts. No matter how competent the generative source of your power, the final results from a drive depend on the success of the transmission. A belt may even be in many respects a good belt and yet fail to deliver the power load economically because ill-adapted to the work required of it. The solution of the problem is the right belt for the particular need.

This is the idea underlying the service of the G.T.M.—Goodyear Technical Man. The basis of his recommendation for a single drive or an entire plant is careful study of the power problem involved. To this analysis he brings the force of experience, the example of hundreds of comparative studies, the judgment of a man grown expert in the operating and observing of many drives under many conditions. His plan is the scientific method.

After analysis, the right belt is prescribed. Is there heavy duty to be performed? That calls for one type, with the proper number of plies. Is light work at high speed the order? A belt of different specifications is required. All the factors of the drive—pulley dimensions, center-to-center distances, load, alignment and application—govern the selection of the right belt for the specific use. The G.T.M. plots these factors with the painstaking exactness of an engineer.

The plant installation here illustrated—Nast Brothers Lime & Stone Co., at Knowles, Wis.—typifies the value of G.T.M. analysis and Goodyear Belt quality. Two years ago, the G.T.M. specified for the Nast plant at Marblehead, Wis., a 6-inch, 4-ply Goodyear Blue Streak Belt for the pulverizer drive—a belt-killing duty on which a new belt, with luck, sometimes lasted a year. The Goodyear Blue Streak for 22 months now has stood up to the task so well—confirmed by performance the G.T.M.'s analysis so unmistakably—that today the whole Nast plant at Knowles is standardized on G.T.M. specified Goodyear Belts.

You may expect from Goodyear Belts the highest values of good belting. Flexible, they hold to the pulleys. Unstitched, they wear uniformly. They neither rip nor stretch. They outwear the average belt—their first cost is but little more. Proof of G.T.M. analysis and Goodyear Belt quality is at the command of every concern with a power problem. The G.T.M. service is free. The Goodyear Belt service is built into the belts.

Students and teachers of engineering who would like to know more about the G.T.M. method of drive and plant analysis may find much of profit to them in the Goodyear Mechanical Goods Encyclopedia. A request by letter to the nearest Goodyear Mechanical Goods Service Station or to Akron will bring one to you.

You know
Th' Library
Up on th' Hill
All full of Technical Books?
Well, I ain't kickin' none
It's a good Library,
An' that's what it ought
To be full of.
But sometimes
I get blesed tired
Of Technical Books,
An' I want to read
A robbery,
Or a murder,
Or somethn' cheerful.
An' I don't never have time to
read a book.
Gosh! whoever seen a Miner
read a book?
Short stories was made for Min-ers.

Well, in th' Library
I seen all my ol' friends
On two shelves.
There was Conrad, that sailor
chap,
An' Joe Hergesheimer,
An' Richard Harding Davis,
Who knew how to spin
Adventure yarns.
Well, I tuk half an hour
To decide what I wanted.
Then me an' Richard
Went up to th' desk.

Doc, I ask you
As man to man,
Why is geniuses th' only ones

What can read short stories?
—Solomon Hardcider.
Eta Bitu Pie.

FROM THE FLAGPOLE.

The campus presents a very cocllege-like appearance these days with the Sophomore and Freshman classes practicing for the coming battle. It surely does look good, and at least shows school and class spirit.

The following appeared in the Anna Talk, Anna, Ill., last week:

"Bruno Rixleben, who is attending college at Rolla, Mo., was home for the week end."

And so also was this item:

"Miss Mildred Alden, who is attending Lindenwood College, was home for the week end."

It doesn't take a Sherlock Holmes to get the connection between these two, and all we have to say is that when it comes to fixing things, Rex is some "engineer."

Once again does the wayward son of M. S. M. feel his feet begin to itch, and to satisfy that longing he grabs a handful of box cars and heads toward that Drury game. At least we hope it will be that way, and may at least half the school feel that itching for the team. We will do all the rooting and encouragement we can crowd into the grand stand on that day. They did good work last Friday, now let's show them that we are behind them.

The subject for Thursday's Physics lecture, "Gas," was a very appropriate one. In fact, it is one that would apply to almost any lecture.

B. L. Ashdown, of the John Stewart Co., of New York City, dropped us a line and said he would be in Rolla about Christmas. He is making good in the profession, just as he did at school. In 1915-16 he was Editor-in-Chief of the Miner.

AMERICAN LEGION

ELECTS OFFICERS.

At a meeting of the Martin F. Bowles Post, No. 76, American Legion, on Nov. 18th, the following officers were elected: Post Commander, Thomas P. Walsh; Post Vice-Commander, J. R. Evans; Post Adjutant, O. E. Stoner; Post Finance Officer, S. M. Hayes; Post Historian, L. E. Davidson.

Approximately fifty ex-service men are members of the local Post. About fifty other men are eligible to membership. A determined campaign is now being made to enroll these men as members.

The next meeting of the Post is scheduled for Thursday, Dec. 11th.

MET. AND CHEM. SOCIETY.

Thursday evening the society was favored with an address by Mr. Slover. The cobalt district was discussed from several interesting phases. The geology, natural resources, history, labor conditions, mining activities, geography and market control were all discussed, and every one present thoroly enjoyed the talk. At the conclusion of Mr. Slover's address the Diphenyl Dozen took charge. The menu follows:

Degree 1st. Mixture of (C6H10O5)x surrounding complex amino acids from from trichina; warranted not to rip, ravel, nor run down at the heel.

Note: Observe gratifying effect on your neighbor.

Degree 2nd. Chlorophyl plus (C6H10O5)x-1 plus CH3-COOH—Tickled expression upon the countenance of the head waiter.

Note: This reaction is not reversible.

Degree 3rd. Unknown, of doubtful composition, poluted with C7H8N4O2. Titrated with C2H4OHCOOR, using C12H22O11 as an indicator.

Note: Secure your end point from Fred Lane.

Degree 4th. C12H14N2 in form of pills. Inhale vapors freely. Take one every few minutes till exhausted.

Note: Please observe carefully all physiological effects.

Degree 5th. C2H4O. (COOH)2 in original wrapper. Grind carefully before dissolving.

The Diphenyl Dozen: M. S. Badollet, H. I. Dunlap, A. M. Howald, Wm. Kahlbaum, K. K. Kershner, F. H. Lane, B. Nudelman, S. H. Shanfeld, W. H. Sternberg, M. L. Terry, W. D. Turner, H. Weiser.

Committee in charge: F. H. Lane, K. K. Kershner, Wm. Kahlbaum.

Two of our golf friends, Clayton and Stubbs, were playing a round together. After the first hole Clayton asked:

"How many did you take?"

"Eight," replied Stubbs.

"Oh, I only took seven," said Clayton. "It's my hole."

After the second hole Clayton again asked the same question. But Stubbs was wiser this time, for he smiled knowingly, and said:

"No, Prof., it's my time to ask first."

A member of the Miner Staff has recently received a letter from Jack Imlay, now in Aberdeen, S. D. Jack is still very much interested in "doings" at M. S. M., and asked to be put on the Miner subscription list. He sends his regards to all of his friends in Rolla.

Jack will be remembered here as the best all-around football player of M. S. M. history, and many of the "old boys" still speak of his prowess on the chalked field when he squirmed thru any opposing teams with little or no effort.

Robert Craig, ex-'16, is chief engineer, Soc. Minera Backus y Johnson del Peru, Casepalca, Peru, S. A.

Member of the Federal System

A bank where personality enters into every transaction.

A bank where you will feel as much at home as by your own fireside—

The same courtesy is extended to a small as a large depositor. "Uncle Sam" guards your money when placed in our bank.

MY AUTO 'TIS OF THEE.

My auto 'tis of thee, short cut to poverty—of thee I chant. I blew a pile of dough on you two years ago and now you refuse to go, or won't or can't. Through town and country-side you were my joy and pride, a happy day. I loved thy gaudy hue, thy nice white tire so new, but now you're down and thru in every way. To thee, old rattle box, came many bumps and knocks; for thee I grieve. Badly thy top is torn, frayed are thy seats and worn; a whooping cough affects thy horn, I do believe! Thy perfume swells the breeze while good folks choke and wheeze as we pass by. I paid for thee a price, 'twould buy a mansion twice, now all are peddling "ice"—I wonder why? Thy motor has the grip, thy spark plug has the pip, and woe is thine. I, too, have suffered chills, ague and kindred ills, endeavoring to pay my bills since thou wert mine. Gone is my bankroll now. No more 'twould choke the cow, as once before. Yet if I had the mon, so help me John—amen, I'd buy a car again, and spend some more.—By Pulius Hynes, M. S. M. '21.

**THOSE WERE THE
GOOD OLD DAYS.**

In days of old,
When Miners bold
Had won a football game;
The students went out
With many a shout,
And set the night aflame.

For up and down
The sleeping town,
They made their merry way;
And RUM bazaars
And trolley cars,
Were wrecked ere break of day

Great were the joys
Of the Miner boys,
And wild the nights we spent.

I wonder how
They do it now
ON LESS THAN 1 PER CENT.

—C. L. Parker, Calif.

LET'S GO! !

The Miners seem to have hit their old-time pace once more, as evidenced by the game with the Springfield Normals. The steam roller which steamed and rolled over the Normals on Jackling Field last Saturday gave a good exhibition of what it is capable of doing. Only one more game is to be played this season, that with Drury. We've simply got to win that game, and this fact should be the prime consideration in the minds of all Miners. It behooves us all to plan and arrange our affairs so as to be at the Drury Field Thanksgiving Day to out-root and out-pep that Panther bunch. The Miner rooters at the Washington U. game, under the leadership of Sherman and Kimmel, clearly out-pepped the whole Washington crowd, and it was this pep that put so much fight into the team that day. Everybody

who saw that game was well satisfied with the spirit with which the team fought. They will fight Drury with the same spirit, and win if we back 'em up as we should. The dope indicates that Drury will beat us; it indicated that Nebraska would be swamped by Missouri, but the result was quite the reverse. Dope does not mean anything this season. We have an even chance to beat Drury, and for the Miners to have an even chance and not win is certainly humiliating to our pride and dignity. We'll upset the dope and win this game if we will collect ourselves on Drury Field on Nov. 27, and exhibit some real Miner punch.

EVERYBODY UP to Springfield!

JUNIOR.

The few who took the mining quiz Tuesday are wondering what they have done to have such a problem thrust upon them as the one handed one. Was it because they stayed when the others didn't?

Brace up and prepare for the second great slaughter Friday night. Worse things than a Mechanics quiz have happened during your school career.

A certain student of M. S. M., a person whose standing in school would lead one to believe him incapable of saying such things, has been known to make such remarks as "he

wished he had been 'gased,' or 'shell shocked,' so he could live off of the Government, and have them try to educate him at \$80.00 a month." This is certainly a very low and sarcastic way of showing respect to the less fortunate ones of those who fought "over there," A word to the wise is sufficient! "Lower temperature merely makes the water in Frisco a little colder!"

If you see a fellow
At the head of a crowd,
A leader of men
Marching fearless and proud,
And you know of a tale
Which if told about
Would cause his head
To in anguish be bowed,
Forget it.

H. N.

NOTICE.

The Library will be closed Thursday, Nov. 27th, (Thanksgiving Day), all day.

SOPHOMORE.

The team has been practicing almost every night in preparation for the game to be played Saturday with the Freshmen. We will need a Burroughs to keep track of our score. Hey what?

Dr. Woodman is following in Prof. Dunlap's path. An exhibition of blowing soap bubbles was enjoyed by the Physics class last week. Right tolerable way of being educated.

ANHEUSER-BUSCH
ST. LOUIS

*It must be
Ice Cold*

4E

Visitors to St. Louis are invited to inspect this mammoth institution.

FRESHMAN.

Tevis and Porter are still talking about the fine time they had on their visit home two weeks ago. Judging by the mail they are receiving quite a few girls must feel the same way.

The Company at drill Wednesday was certainly a

snappy one. "Fritz" Reeves had a hard time keeping up with the cadence. "Jim" Westgard did a perfect column right.

"Butterfly" Cathcart took a little spill in the Gym Thursday. Nothing serious.

When "Jake" Corenbaum goes out surveying he does everything in an individual way.

Some way, too.

Whenever Davis puts a notice on the bulletin board, it seems to become queerly mutilated. Has he recovered his New Haven and Hartford motor truck watch? Ask Huckins, he knows.

We promise not to roll up a top heavy score Saturday against the Sophs. We have to make the game interesting.

A goodly number of Frosh have signified their intention to make the pilgrimage to Springfield for the Drury game, and help root the Miners to victory. Other Freshmen are expected to sign up for the trip as it will be the last of the season. Free transportation and free admission to the game is our slogan.

The Sophomore-Freshman football game will be played Saturday, and it promises to be a real battle. However, we intend to win.

We are anxious to see how the Drury Freshmen will entertain between halves.

Prof Johnson has devoted this week in collecting data on "how we get up in the morning," or, in other words, "our morning habits."

R. E. Sprague, '11, is instructor in shopwork and drawing, Central High School and Junior College Detroit, Mich.

C. W. Keniston, '09, is State Sanitary Engineer of Wisconsin.

H. J. Taylor, '99, is senior highway engineer U. S. Bureau of Public Roads, Missoula, Mont.

H. R. Hanley, '01, is consulting mining and metallurgical engineer, 410 Sharon Bldg., San Francisco, Calif.

Continued from Page One.

You will find that it is about a 50-50 at best. Figuring out dope by comparative scores is the commonest indoor sport, and it's harmless—but don't don't bet your hard-earned coin of the realm on such a flimsy pretext—it does not "pan" out.

COLVILLE GETS

CROIX DE GUERRE.

On Thursday George Colville, Jr., received through the mail a Croix de Guerre, with a gold star, awarded him by the French Government for valiant service. Although the citation is dated July 2, 1919, he knew nothing of the award until Thursday. The citation is signed by Petain, Commander in Chief of the French Armies, and reads:

"A member of a crew of a machine gun which was being operated from a shell hole a short distance from the enemy, and the gun having been put out of commission, he advanced with two men, and with the aid of revolvers they succeeded in capturing a machine gun nest, consisting of three guns and nine prisoners... Turning a machine gun on the enemy they made use of it to "support the advance of the infantry."

This occurred near Remonville, France, on the first day of November, 1918, and Colville was given the Distinguished Service Medal for the same act of bravery. The Miner takes it that the school is behind it when we offer the congratulations of the entire student body. It is a thing that we can all be proud of, for we remember that Colville is a true Miner.

Oscar Lachmund, '86, consulting mining engineer, has changed his office from the Paulson Bldg to 217 Symons Bldg., Spokane, Wash.
