FOOTBALL SCHEDULE 1920.

Three Games at Home This Year.

There are three games at home on the football schedule for this year, and five away from home. We suggest that you clip the following schedule and paste it on some convenient cardboard for future reference:

Oct. 2—Washington U., at St. Louis.

Oct. 9—Cape Girardeau, at Rolla.

Oct. 16—Springfield Normal at Springfield.

Oct. 23—St. Louis U., at St. Louis.

Oct. 30—Arkansas U., at Fayetteville.

Nov. 6—Warrensburg Normal, at Rolla.

Nov. 13—Drury, at Rolla.

Nov. 25—Henry Kendall, at Tulsa.

ALUMNI NEWS.

Though it has always been the policy of the Miner to obtain and publish a great deal of alumni news, the Board will make an especial effort in the future to get every bit of such news that is available. There will be one man on the Board appointed to handle this work exclusively.

Since this will do more than anything else to make the Miner a medium between alumni, we will be very glad to hear from any former student at any time. The Board will also appreciate it if the news to the different clubs and fraternities from former students be turned over for publication in this section of the paper.

FOOTBALL SENTIMENT.

At the close of the basketball season last spring M. S. M. was just awakening to the fact that it takes more than five or eleven men to win a contest. It is just as essential even more so, that the spirit of the whole school be in a contest, as it is that the athletes should be completely absorbed in the game.

It is said that one University has one rule only for athletes, and that is, that each athlete can do anything he wishes six days during the week, but the seventh he must give unreservedly to his school. Of course, such a rule is self-enforcing, because to give unreservedly a man must train seven days. The spirit of that rule should be applied here at M. S. M., not that our athletes do not train, but that the student body should help them train.

Just as public opinion or sentiment swings or helps to make decisions, so it is that student or school sentiment can easily go half way toward making the athletic season a success. To be blunt the student body must get behind and push, because Push plus Push equals Success.

Our football team under the guidance of a new coach will do the planning, and a large part of the actual pushing, too, but as students we must help. Not only should we be out rooting every game, but at practices we should be there too.

Last year it was intimated that the Freshmen should be on the side lines every evening. Now, why not everybody, especially upper classmen? Set the Frosh an example and be there,

Continued on Page Eight.

SOPHS AND FROSH TO MIX MONDAY MORNING.

Rules Governing the Class Fight

1. All holds, such as the strangle hold, scissors and hammer lock are barred. Tennis or other soft soled shoes must be worn. Cotton rope will be used for tying purposes.

2. Any participant who can get back into the fight during the first five minutes will be allowed to get back into the fight.

3. Any student who matriculated during the summer term will be automatically barred from the class fight.

4. All caps must be worn within one hour after the class circus.

5. F. Z. Meeks, a member of the Sophomore Class, will be barred from the class fight and from all student activities of a similar nature, on account of his action on Tuesday evening, August 31st.

6. No metallic substances shall be carried by any of the contestants.

7. The contest ends when the last qualified man on either side has been tied.

8. Seniors will act as referees of the fight, and the Juniors will act as field men.

9. Green caps will be on sale at the Gymnasium immediately after the circus, and will be handled by the Student Council.

10. In all matters not covered by these rules, the two classes will be governed by precedent.

THE STUDENT COUNCIL.

TO MEMBERS OF A. A. E.

In an organization as large as the local chapter of A. A. E. it is absolutely necessary, in order to accomplish any results, to carry on the larger part of the association work through committees, so that when some matter is presented to the chapter for consideration it can be presented in a concrete form, ready for discussion. It will, therefore, be necessary, if this chapter is to be a live organization, to have a number of committees acting during the year.

Furthermore, in A. A. E., as in anything else, the more thought and work a man puts into it, the more benefit will he derive from it. A man who simply joins an organization, and then does nothing to further the work of the organization, is no benefit to the organization, nor is it any benefit to him.

Having these thoughts in mind, I wish to make a personal appeal, through the columns of the Missouri Miner, to all members of A. A. E., urging them to accept appointment on a committee, and to do all in their power to aid in the work of that committee, and thus in the work of the chapter. Let's all get together, and make A. A. E. a real force in M. S. M., an organization which we will be proud of. We have the membership, now let's have the pep, and put M. S. M. on the map as having the best and liveliest chapter of A. A. E. in the country.

H. H. ARMSBY,
President.

NEW ASSISTANT PROFESSOR IN C. E. DEPT.

Prof. Joe B. Butler is the new assistant professor in the civil engineering department. Prof. Butler takes the position left vacant by Prof. Armsby when he was made associate professor in the department. Prof. Butler is a graduate of Oklahoma A. and M., having finished there

in 1915.

Since graduation he has had a wide experience in engineering work, having worked for one year with the Interstate Commerce Commission, one year in railroad valuation work, and one year in state highway work in the states of Arkansas and Kansas. Besides this Prof. Butler served for two years as Lieutenant in the Engineer Corps of the army, ten months of which time was spent overseas.

The Miner welcomes Prof. Butler in behalf of the student body, and we hope that his stay with us will be a long and pleasant one.

NEW FOOTBALL COACH ARRIVES.

Practice Starts Next Monday.

Roger T. McCune, the new football coach, arrived in Rolla Wednesday noon, and has been looking over the ground for football material. There will be a meeting of all prospective football men called for the end of this week, and regular football practice will start off with a bang next Monday.

Coach McCune graduated in mechanical engineering from the Case School of Applied Science last year, where he made three letters in football and was captain of the team the last two years. Last year he also acted as assistant coach. He played end his first year, and quarterback the last two years.

He also made three letters in baseball at Case, captaining the team one year. He was one of the best catchers that ever worked in a Case battery.

Besides his prominence in athletics, Coach McCune was active in other forms of school activity, being on the school senate, president of his senior class, and president of the board of managers of the Case Club. He is a member of the

Phi Kappa Psi fraternity, and lives in Cleveland.

Last year a great cry went up from the student body for a separate coach for football. Now we have one; let's see how well he is supported. A successful football season depends upon three factors, football material, a football coach, and school spirit or student support. We have good material, a good coach, and now it is up to the student body to do its part toward making this one of the most successful football years in the history of M. S. M.

BAUMGARDNER STUDIO

KNAPP-MILLER.

The following is taken from The Rolla Herald of September 2, 1920:

"Miss Marion Knapp and Mr. E. L. Miller sprang a surprise on their friends Friday afternoon, August 27th, 1920, by getting married. The ceremony was performed at the home of the bride's parents, Mr. and Mrs. C. M. Knapp, by Rev. C. S. Hanby, of the Methodist Church. Besides the bride's parents there were present only a few very intimate friends. Before very many of the people of the town knew of the wedding Mr. and Mrs. Miller left on No. 4 for St. Louis, thence to Kansas City, to spend a few days with Mr. Miller's parents.

"The bride is one of Rolla's most attractive and most popular daughters. She is a graduate of the Rolla schools, and also a graduate of Lindenwood College. She is a member of Beta Sigma Omicron Sorority,

and also of Phi Theta Kappa honorary society. Last year she taught school at Lockwood, Mo., and she had expected to teach school again this year at Pacific, but Cupid determined otherwise.

"Mr. Miller is a senior at M. S. M. During his stay in Rolla he has won the respect and confidence of all who have met him. He is Editor-in-Chief of the Missouri Miner, and President of the Press Club, a member of the Pi Kappa Alpha fraternity, a member of the Trowell Club, and also holds membership in the American Institute of Mining Engineers, and American Association of Engineers. He is popular with the faculty and student body, and many friends join in wishing him and his fair bride happiness, joy and success.

"Mr. and Mrs. Miller returned to Rolla Tuesday night, and will make their home at Mr. and Mrs. Knapp's until he graduates."

LESS THAN ONE HUNDRED AND FIFTY.

This is the condition of the subscription list of the Miner. With nearly four hundred students enrolled, not more than one-third of the number have subscribed for their school paper. This is the year of the semi-centennial of the school. Being a big year for the school means that the Miner will be bigger and better than before. But for this to be possible there must needs be a far stronger support than has been accorded it so far this year. The Miner is YOUR paper, the student comes first with the Miner. Can you fail to support the organ which stands for your ideas?

This issue is being sent to every one in school. To get the next and the succeeding issues see one of the Board, or mail us your subscription.

The price, in view of the cost of printing and paper, is reasonable at \$1.75 per year.

TO THE FRESHMEN.

To all Freshmen and to other new men in school we would extend a hearty welcome.

We are glad to have you share with us the benefits of M. S. M. Coming as you do from many schools in scattered localities throughout the country you add a new life and new ideas which are essential to the school's continued success.

Any school from year to year must have new life added, and this is the means by which it is gained.

But among any new class of men entering any school in the country there are always those who have an inflated idea of their own importance.

For such as these was hazing inaugurated, and we would say to all Freshmen that if hazing should ever come their way to please remember that hazing is doing some one of the class a world of good. By such

means are good upper classmen made.

Freshmen, be true sportsmen, all of you. You have nothing to lose and everything to gain in the way of making your class a popular one in the school.

Again, we welcome you, Freshmen.

TWO NEW PROFS. FOR ENGLISH DEPARTMENT.

Two new instructors have been appointed in the Department of English and Modern Languages, Mr. O. A. Henning and Mr. P. Cambiaire. Mr. Henning is an addition to the department, while Mr. Cambiaire is the successor of Professor Daniels, who has joined the faculty of the University of Arizona.

Mr. Henning is a graduate of Central Wesleyan College, and has done a good deal of graduate work in the University of Wisconsin. Mr. Cambiaire is a graduate of the College of Tivoli, Bordeaux, of the University of Lille, and of the University of La Sobonne, Paris.

Mr. Henning will have charge of German, and will also teach English. Mr. Cambiaire will teach French and Spanish. The foreign languages will be taught largely from a practical point of view, Spanish especially being given almost wholly from the conversational standpoint.

GEO. A. EASLEY ADDRESSES STUDENT BODY.

At a mass meeting of the student body and members of the faculty on Tuesday, Geo. A. Easley gave a very interesting address.

Mr. Easley is a graduate of this school, having received his degree of B. S. in Mining in 1909, and the degree of Engineer of Mines in 1912. Since

graduation he has spent the greater part of his time in Bolivia, South America, and by hard work and conscientious effort, has enjoyed a remarkable rise in the mining world. He now has his headquarters in New York City, and he conducts his mining work in South America from his New York office.

Mr. Easley made it plain to the under-graduates that there were many rough places to be encountered along the path that leads from graduation to success. He impressed on the student the idea that hard work alone would overcome these obstacles.

His descriptions of the industries of Bolivia were interesting indeed, and so also was that part of the talk which had to do with the possibilities there for young mining engineers.

Mr. Easley has had a wide and varied experience in the field of mining, and is one to whom we can well afford to listen.

VOCATES ORGANIZING EARLY.

The Vocational Class held their first meeting Tuesday night, which was well attended. They are starting right on the jump with the real Miner spirit and pep.

Next meeting will be held at 7 P. M. Tuesday, Sept. 7, and all Vocates are expected to attend.

Fred Moses, '14, is back in Salt Lake City, Utah, with the Barrett Company.

W. R. Luckfield, Jr., ex-'21, is at Chelsea, Okla.

SIC TRANSIT—

"The king is dead, long live the king,"
Men cried in days of yore—
I wonder how the old king felt—
You'd think he might get sore

To hear folks talkin that-a-way
As soon as he was done,
A-praisin up the new made king
In spite of all he'd done

To make his reign a happy one
For subjects great and small,
And doin jest the best he could
To help em, one and all.

But they didn't mean no disrespect
To him, cause in his day
He'd won their love, and he'd keep it too,
Forever and a day.

But they wanted the new king to know
They'd back him thru and thru,
And they hoped he be like the former king,
Staunch, honest, loyal, true.

So now us guys at M. S. M.
Have lost a dear old friend,
Old Doc is gone—the new Doc's here,
Let's back him to the end.

We're gonna miss old Doc, you bet,
A loyal friend and true,
And we wish for him the best of luck—
We think it is his due.

But to the new Doc we all say,
"Go to it, Doc, we're with you."
Old Doc is gone, long live new Doc,
"Go to it, Doc, we're for you."

P. S. Well, Pa and Solomon,
here I be
Back on the job again.
I've been improvin my style,

and say,
Don't I shake a wicked pen?
P. S. Agin. By heck, I durn near fergot to sign this here pome. If "Schnuuttz" can take time to read it, now that he's got himself all tied up, and if he prints it, I may write some more some day.

HILL BILLY.

The Miner is printing this product of our old friend, Hill Billy, because of its striking appropriateness at the present time. However, no "pomes" will be printed in the future unless the author discloses his, or her, true identity to the Editor. The matter will be treated as strictly confidential, but we cannot continue to print anonymous offerings.

As is always the policy of the Miner, we recommend that the students patronize our advertisers. The merchants of the town have been very liberal in their support to the Miner, one of the largest advertisers being Messrs. Harvey and Smith, of the Students Store. A full page adv. in this issue tells of their very complete line of Drawing Instruments, Textbooks, and other College Supplies.—Adv.

SAFETY AND SERVICE

DEPOSITORY M. S. M.

At the Other End of the Wire

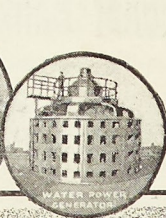

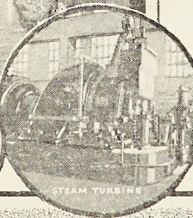

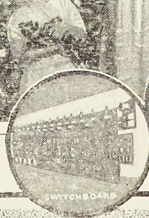

A TWIST of the wrist and electricity lights cities and towns, turns the wheels of industry, or affords conveniences to millions of people.

But let us follow the wire carrying this energy to its source and we find either a waterfall, a coal mine or an oil well.

Much of the supply of fuel in this country is being used up rapidly while the power of water is running to waste. For the rivers and streams of this country could, if properly harnessed, develop enough electric power to save 300,000,000 tons of coal annually.

By studying nature's forces—coal, oil and water—by applying them to machines, and finally by the perfection of apparatus to insure uninterrupted power service under varying conditions, the General Electric Company is serving to make electric power cheaper, more plentiful and reliable.

95-331 H

GENERAL ELECTRIC COMPANY

Continued from Page One.

too. Try leading the Freshmen out there once. It will work, for people naturally follow the crowd. With such a sentiment behind a team nothing can stop it, at home or on a foreign field.

As for material, there are enough men in school to have a winning team. Every effort is being made to make the season a success. With the addition of a new coach the athletic department will be able to handle and train a large number of men for the football team. With material and a coaching staff the only other requirement is that the student body sees that men capable go out and help build the team up to standard. It's up to the men to go out; and it's up to the students to help them train; if not, to make them train.

There should be a sentiment at M. S. M., such that an athlete will think twice before breaking rules. YOU can help create such a sentiment. Start early. Talk it up. Encourage every football man to do his best—then stay behind him and the team.

With such a sentiment toward football, and athletics in general, M. S. M. will be assured of a high standard in athletic circles; there will be no lack of the right kind of material, and, especially, of that old fighting Miner spirit if the team is backed by the whole student body.

MINER DANCES.

For the benefit of all Freshmen and other new men, as well as the older men of the school, the Miner Board wishes to announce that it will continue thruout this year its policy of giving a Miner Dance every two or three weeks. The Board hopes to afford the student body a good time at each dance, and will try to procure the same good music which made the dances popular last year.

The dates have not been set

for the dances, as they will be regulated by other social and school activities. However, the student body may expect the first Miner dance of the year at an early date, which will probably be announced in the next issue of the Miner.
