SQUAD OF FIFTY OUT.

Four Teams Running Signals This Week.

M. S. M. got off on the first lap of a successful football season last Monday when Coach McCune started his large squad to running signals. After spending the first few days in conditioning work, pushing the old buck-board, tackling the dummy, falling on the ball, etc., the squad was split into four teams, and real work started.

The men have been working hard all week at signal practice, preparing for the first light scrimmage next Saturday. No attempt has been made to pick any man for any position. Every man is on his own, and is given a chance to learn the signals. There are men out for every position, but as is always the case, some shifting will be necessary before the position for which a man is best fitted is found.

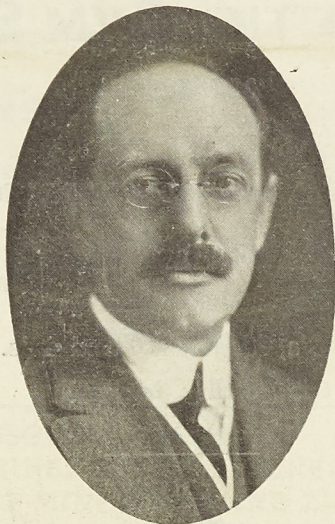

Cairns Captain "Pro Tem."

Owing to the fact that Capt. elect Place did not return to school this semester, it was necessary for Coach McCune to appoint his successor. "Buddy" Cairns, being one of the veterans out, was chosen to pilot the team at present, or until a captain is elected.

If numbers count for anything it would seem that a real team should be developed this year. We have material enough to put three teams on the field every night. This fact, coupled with consistent training and a fifty-fifty break in luck, will put M. S. M. where she should be in athletic circles—at the top.

DR. CHARLES H. FULTON Director

Dr. Fulton, the newly elected director of the Missouri School of Mines, is rapidly winning a large place in the hearts of the student body by his sympathetic attitude toward school activities, and his understanding of the vagaries of the poor student.

WHY NOT A MEETING ROOM FOR THE SCHOOL?

With the several societies in the school holding meetings weekly, or even every two or three weeks, the need of a regular meeting room must seem apparent to all. Such a room should be comfortably fitted up, for it seems that that alone would add a pleasure to the meeting.

Then again, we need a lounging room of some sort for visiting athletic teams. This meeting room then, could be made to serve the purpose of a lounging room in the daytime.

This is merely a suggestion to the various societies, who might take some concerted action on the matter if they feel the need strongly enough.

"DUCKY" STROUP IN THE SOCIAL "SWIM."

Some one pushed "Ducky" into the creek. And he isn't right sure that he wanted the swim either. You see the young people's society of one of the churches mailed invitations to several of the "stujents" Tuesday, but they left "Ducky" off their mailing list—and "Ducky" objected strongly to being slighted in such manner.

So deep was his grief, in fact, that some good girl friend of his, when she heard of it, immediately called him on the phone, and in her most loving and luring voice urged that he be present on the appointed night.

Now, simply because there were so many gathered around his end of the phone when the fair one called, "Ducky" smells a rat, and remembers some studying he has for that night.

"Ducky," we'll be ashamed of you if you don't step out and get your wings wet. We know the young lady would be delighted to come by for you if you don't know the way over there.

PETSCH GOING TO PANAMA

Gus Petsch, '20, who is with the Gulf Oil Co., at Tampico, Mexico, is soon to spend three months on the Isthmus for that company in examination work. He reports that there are many old M. S. M. men at Tampico. Among them are Bohart, Ebmeyer and Velasco.

R. G. Knickerbocker, '13, writes from Messina, South Africa, that he is completing the new smelter in the next two months, and expects to "blow in" by December.

MISSOURI SCHOOL OF MINES GETS U. S. BUREAU OF MINES LEAD AND ZINC EXPERIMENT STATION.

The following is an article taken from the Sep. 10 issue of Science:

Secretary of the Interior Payne, acting on the recommendations of Dr. F. G. Cottrell, director of the Bureau of Mines, has selected Rolla, Mo., as the place for the latest mining experiment station of the bureau. This station will look after the mining interests of the Mississippi Valley and will give consideration to the various problems which are met with in the production of lead and zinc.

After a careful investigation, The Missouri School of Mines and Metallurgy at Rolla, Mo., was selected as an ideal place to carry on much of the actual laboratory and investigative work of the new station. However, it was also decided that the central offices of the station should be at or near St. Louis, Missouri. Consequently, the plan is that the actual laboratory and investigative work shall be done in cooperation with the Missouri School of Mines and Metallurgy at Rolla, but that headquarters

of the station should be in St. Louis.

For a long time the Bureau of Mines has desired to take up, in cooperation with the mining and metallurgical industry, those problems met with in the Mississippi Valley where lead and zinc deposits occur. As is well known, the ores of this district are for the most part sulphide ores and are ordinarily not difficult to treat. However, there are also large deposits of oxidized lead ores in certain districts of Missouri, and their mining and metallurgical treatment presents a serious problem. Concentration by gravity methods had been tried for years on these ores, and there are many thousands of tons of high grade tailings, as well as crude ore, awaiting proper methods of recovering metallic values. Such being the case, the bureau will carry on such research and investigational work in connection with the treatment of these ores as will assist in the development of processes which will prevent their being wasted, due to the lack of a metallurgical process which it may be commercially feasible to apply to them.

QUEER DUCKS.

The Bonanzas have taken in a couple of "green" members that should be put in cages. So far they have not shown much familiarity with the Mother Tongue, but parrots learn slowly, and these have only the average of intelligence. Altogether, they may be called 'a couple of rare birds.' They were presents sent to L. E. Lumpkin.

W. F. Lottman, who finished here with the Class of '19, is spending a few days with old friends at the Bonanza house. He is a draftsman and designer for the A. Lescher Rope Co.

LEAD AND ZINC INDUSTRY HEADS TO CONVEVE AT ST. LOUIS.

There will be held a conference of the the representatives of the lead and zinc industry in St. Louis on October 9th. The meeting will convene at the Chamber of Commerce, and will be for the purpose of ascertaining the nature of the work to be undertaken by the new mining experiment station which was established here at the School of Mines this summer by the United States Bureau of Mines.

All business of the Bureau of Mines throughout the Mississippi Valley will be transacted through the office to be established in the Chamber of Commerce Building in St. Louis. This is the central division of the United States, and the divisional experiment station is to be here at Rolla.

"BLOOM" CATCHES A "NIGGER-CHASER."

George Bloom will never believe Prof. Forbes any more when the latter makes the statement that one of his old "squibs" probably won't go off because of its age. Prof. lighted one of the squibs in a lead pipe, aimed it out of a window in the mining lecture room—and it did a slide-slip, landing in George's lap.

No! Prof., they deteriorate with age.

**IN TRAINING.**

Ye athlete now with muscles
large
Doth revel in his might,
He trains and trains and trains
by day,
And dissipates by night.

THE MISSOURI MINER.

A weekly paper published by the Students, in the interest of the Alumni, Students and Faculty of the Missouri School of Mines and Metallurgy, Rolla, Mo.

Entered as second class matter April 2, 1915, at the Post Office at Rolla, Missouri, under the Act of March 3, 1879.

On Friday evening, Sept. 11, the Sigma Nu fraternity gave a dance, at which Mr. and Mrs. H. O. Norville chaperoned. Light refreshments were served at midnight, and the affair proved to be a very enjoyable one.

**SLOVER TO PROSPECT
IN SOUTH AMERICA.**

E. A. Slover, '20, is on a prospecting trip thru the Andes Mountains of South America. His journey takes him into the interior by way of the Amazon River.

G. E. Abernathy, '14, is foreman of an iron mine at Lyon Mountain, N. Y.

W. S. Grether, '06, is assistant superintendent for the Butte & Superior Co., at Butte, Mont.

Mr. Guiteras arrived Wednesday to take a position in the Geology Department.

It looks as though we are going to have to partition off the campus again, and make each class responsible for a certain portion if we expect to keep a green-looking front yard for the school. At Missouri U. it is a crime to get on the grass except while drilling; why not make it a crime at M. S. M. to get on the grass except while in surveying lab?

**BROTHER MINERS, GREET
MY BROTHER.**

My little brother's come to town
To join the School of Mines,
And I hope you'll all be good to
him

After you read these lines.

You see, I learned in Chem last
year

To make some durn good
brews,

And we've made a lot of coin
out home

Since Dad gave out the news.

It's durn good stuff, if I do say
so,

And powerful as sin—

A feller drove out tother night,
Got some, and started in

To try to knock a Frisco freight
Offn the track with his car—
The hooch sure gave him a good
idea,

If he didn't get very far.

So when Dad seen all I had
learned

He says to little brother,
"Havin a eddicated son is fine,
I guess I'll have another."

He's gonna be a Freshman
green—

He's greener than I was

Two years ago, that's goin
some—

Cause green I surely was.

The kid aint much to look at
But a kid you can't help like
So be good to him for my sake

His name? It's OZARK IKE
HILL BILLY.

P. S. I aint gonna add no P.
S. this time.

Thanks, Hill Billy, for the in-
formation concerning Ozark
Ike. You have been placed on
the subscription list of the Min-
er, and we hope that you edu-
cation is such that you will be
enabled to enjoy each issue to
the fullest extent.—Editor.

SATYR PLEDGES ELEVEN.

The following Sophomores
are pledged to the Satyrs: Zol-
ler, Gordon, Mosby, Webster,
Stuart, Harris, Gibson, Fisher,
Perce, Hollow and Wilkerson.

Prof. Thornberry has his
hands full with the largest en-
rollment on record in ore dress-
ing laboratory. "Thorny" is
teaching forty-seven students to
make little ones out of big ones.

Many of the old Miners prob-
ably will be intrigued to know
that the present student body
includes both John Bowles and
Mike Collins, of "ye goode old
dayes."

The Pi Kappa Alpha frater-
nity entertained last Friday
evening with an informal dance
at the chapter house. Mrs. C.
M. Knapp and Mrs. N. A. Kin-
ney chaperoned, and there were
about thirty other guests pres-
ent. There was an intermission
at about twelve-thirty Saturday
morning, at which time a lunch-
eon was served by the fresh-
men.

J. E. ("Jimmy") Leavitt, of the Class of '11, is here to perform the primary traverse on the highway work the Government is doing between Rolla and Potosi, Mo. He left the School of Mines in 1909 to assist in the U. S. G. S. Alaska Boundary Survey, and has been with the Government ever since. During the war he was a Lieutenant in charge of map and topographical work in France, but he now comes from Santo Domingo, where he has been doing military mapping.

According to H. A. Hollingshead, treasurer of last year's Junior Class, total expenditures for last St. Pat's were \$1505.60! This is more than was ever before spent for a St. Pat's celebration; but wasn't it worth it? And doesn't this almost prove that the Missouri School of Mines celebrates St. Pat's on a larger scale than any other institution in the country?

WHO'S WHO.

"Fat" Laun, resident of "Jimmie town," spends his Friday afternoon lab. period waiting for No. 4 to run. Signs the pledge to study once a year. Has enjoyed his greatest fame in the language courses. Was ring leader of the Frosh his first year, and after the first week strongly advocated the heating of Frisco Pond. Will probably get his B. S., etc., including Ph. D., in the gentle art of "Shootin' the bull."

Homer Hollingshead, formerly of Hannibal, but now of St. Joe. Travels on a pass, and thinks the Frisco is a branch of the Burlington. Known on the "Line" in Butte, where he spent the summer, as a good mining engineer. Also famous as an importer of the products of French vineyards. Could graduate tomorrow but is waiting on Joe Wilson.

Jim Jewell, noted tenor of Kansas City, who only took up mining to pass away the time between songs. Will sing at a smoker, mass meeting, or in church, and is applauded at the first two mentioned places. Is "Ducky" Stroup's guardian angel even going so far as to get dates for him. Objects to Prof. Forbes' dynamite because it breaks too much rock.

Julius Bruno Rixleben comes from the town where the Illinois Insane Asylum is located, but insists that he didn't enter M. S. M. on credits from that institution. Distinctly individual in his pronunciation and interpretation of technical terms, and thinks "modulus" is something to eat. Has had so much military that he is all broken down from it. Thinks Gettler couldn't get along in school without his help. Strong for keeping his jewelry in the family, and thinks there is no harm in lov-

NATIONAL BANK OF ROLLA

ing a cousin. "WHO LOST THE DOLLAR?"

H. H. HOPPOCK

IS IN HUNGARY.

R. R. Stroup recently received a letter from H. H. Hoppock, '20, addressed from Seged, Hungary. "Hop" states that he is having a great time continuing his education. He is engaged in mining work, but, as yet, has seen little of the game, for he has been busy locating products and arranging shipping points. Mr. Hoppock finds it rather difficult getting from one country to another, and states that a knowledge of German would be of assistance to any one in that country.
