MINERS 33, SPRINGFIELD NORMAL 15.

MINERS WIN SECOND CONFERENCE GAME.

Cairns Goes Over Four Times.

The Miners strengthened their hold on the conference championship last Saturday when they defeated Springfield Normal to the tune of 33 to 15. With both conference games a decided victory for the Miners, and the team going stronger every day, M. S. M. will be a strong contender for the championship.

The game opened with the Miners receiving the ball. White led off with 5 yards around left end, and a line plunge made it "first and ten." A 10-yard penalty placed the Miners on the 15-yard line, a blocked punt was recovered by Cairns who was downed for a safety and two points within the first three minutes of play. Play was resumed on the 20-yard line, and Cairns staged the first of his many gains when he zig-zagged around end for eight yards. The Miners then started a steady march down the field, but were forced to punt. Normal punted back but the Miners lost the ball on a fumble. Normal was held for downs within one yard of the goal line. A series of passes and end runs put the Miners within thirty yards of the goal, a fake place kick failed to produce results, so Bohn put the oval between the uprights from the 30-yard line, resulting in three points for the Miners. Normal received the kick, and by a series of criss-crosses and

OPEN SEASON FOR THE MINERS.

After defeating the Cape Girardeau "Ducks" and the Springfield "Bears," his chances for winning the Conference this year look pretty good.

FRIDAY NIGHT TO BE BIG SOCIAL FEATURE OF THE SEMESTER.

Will Surpass All Previous Hal- lowe'en Affairs.

The annual Miner Hallowe'en dance this year promises to surpass that of last year, even as last year's dance far outshone any previous effort of its kind on the campus.

That dance was not a masquerade, and the abolishment of this custom of masking for the Hallowe'en dance seemed to meet with such success that this year's staff decided to continue the policy of permitting the St. Pat dance to be the only masque dance of the school year at M. S. M. Costumes will not be barred, however, although face masks will be.

Means of identification will be given out to dancers, and must be worn. This is to pre-

MINERS MIX WITH BILLIKENS TOMORROW.

Chances of Victory Were Never Brighter.

Our football team once more journeys to St. Louis for its annual mix with the Billikens. This year, however, a different tune is to be played, for Coach McCune's eleven came out of the Springfield Normal game more confident of its power to defeat a team on foreign grounds. The team which St. Louis U. will put on the field tomorrow will be a fighting machine, for they have suffered two crushing defeats, and will not be in any mood to surrender the game easily.

Our chances of victory, however, were never brighter, and when Coach Rodemacher's eleven finishes the game Saturday they will have another defeat chalked up against them. The Billikens, it is true, have been playing teams a little

Continued on Page Eight.

Continued on Second Page.

above their calibre, and they will not be out of that class until after Saturday, for if our team plays the brand of football it did against the Bears the Billiken eleven will never stop it.

Miners in Good Shape.

The Miners came out of the Normal game with a few slight bruises. Zoller, whose shoulder was dislocated, has been out at practice the latter part of the week, and it is probable that he will be able to get into the game. McClurken, perhaps, will be on the sick list another week. The team has worked hard this week in anticipation of the game tomorrow, scrimmage and defensive work against plays known to be used by St. Louis U. being on the schedule every evening. Every man who gets into the game tomorrow will be able to give a full account of himself.

Although this game bears no direct relation to the Conference championship, we must win it. Every Miner in St. Louis tomorrow, be he player or rooter, will have but one cry, namely, "Beat the Billikens."

FRIDAY NIGHT TO BE BIG SOCIAL FEATURE OF THE SEMESTER.

Continued from Page One.

vent a deplorable habit that some spiritless people have of slipping into a dance without paying—and expecting their fellow-students (or otherwise) to bear the burden of their entertainment and edification.

Dancing will start next Friday night at about nine o'clock, and the grand march will start at ten sharp. All encores will be "cut in's"; so you fellows who have been unable to get a date will not be left out in the cold, cruel world.

A friend is one who knows all about you and still likes you.

COMPENSATION OF MINING ENGINEERS.

The average salary of mining engineers and of engineers in mining service has been a topic of much discussion, and in some cases of great "anxiety" among the members of the mining profession. The American Association of Engineers has been very successful in various other fields of engineering, schedules of salaries which they have endeavored to standardize now being in force practically every where in the United States.

The Missouri School of Mines being one of the foremost mining schools in the country, and the local chapter of the A. A. E. one of the leading "mining" chapters of that association, it is only natural that a schedule on "Salaries of Engineers in Mining Service" should originate within this institution.

To this end a committee has been appointed with Prof. C. R. Forbes as chairman, to prepare a schedule of salaries for positions connected with the mining profession. The schedule when complete will be submitted to the National Executive Committee of the A. A. E. for adoption, and then to every mining company in the country as a comparative basis for the payment of all employees.

This movement is one which should be of primary importance to every mining man in the country, and should receive their most hearty support and co-operation. To be the fore-runners of such a nation-wide problem is a matter of no little distinction, and the local chapter feels justly proud that they are able to contribute to so worthy a movement.

"Willum" Stewart is about to lose a perfectly good disposition just on account of two little words—"WHY NOT."

"CHECK."

We do not know who the "D. D. M." is who has so thoroughly expressed the sentiment of the student body by advertising with white crayon the fact that we must have more light by which to study, but he should receive the hearty endorsement of every student in school.

There has been a great deal of talk and boosting for support of "school activities." Picture the student going to class from eight to twelve every morning, to laboratories from one to four every afternoon. Also do not forget the "popular evening courses" at least once every week.

Every professor claims that he has a right "according to the catalogue" to "demand" two hours preparation for every lecture. Consider that a large percentage of the student body are working their way through school, and whatever spare time these students have during the

day they are going to use at work in order that they might stay in school and obtain a college education.

Then consider the students that are connected with various school activities and school technical societies, attending the meetings of these societies and working for the interest of the various school activities, which surely take some of the student's legitimate time. Then feature a student carrying twenty hours work, with each professor demanding two hours' preparation for every hour's lecture. Where does the student come in?

The Prof. announces a quiz for the following day—or may be he doesn't announce it; but the student "has a hunch." He has a class that evening, or must go to a meeting of some school activity; after that he goes to his room to study, and behold, about the time he gets to studying real good "THE

EDITORIAL.

Wouldn't it be a good idea for the Student Council to take up with the faculty the matter of cuts for lateness that some of the Profs. are putting out? Several of the instructors say, "Well, if I am five minutes late, you don't wait for me; so if you are five minutes late I'll give you a cut for absence from class." Is this right? Very few Profs. but have their office in the near vicinity of their lecture room, and there is seldom an excuse for them being five or more minutes late to class. Neither is there valid excuse for the student to be ten minutes late, but to draw a five-minute line for a student who must go from one building to another, with the Profs. very careful about using the hour clear up to the bell, and sometimes holding over for a minute or two, is hardly logical.

LOCAL UPHEAVALS OF THE EARTH'S CRUST.**Frosh Make Important Discoveries.**

The present freshman surveying class, in its study of the peculiarities of the Dumpy and Wye levels, has made the annual discovery that similar classes have done in the past—the shifting of the elevations of the surface of the campus that occur over night. Most changes in the earth's crust occur gradually over great periods of time, but some of the frosh always discover that changes of as much as one or two feet, or even ten feet, have taken place over night when they come to check over their elevations the next day.

"Chief" Buehler and Mr. Pond, of the Geological Survey, and Mr. Gross, of the U. S. Experiment Station, were the only ones from Rolla to take the field trip of the St. Louis section of the A. I. M. M. E., which started from St. Louis last Friday, and ended at Bismarck Sunday. "Chief" saw many of the old M.S.M. men on the trip, among them being "Shanks" Moore, '20, "Noisy" Neustaedter, '16, "Pete" Stahl, '18, Harry Schiermeyer, ex-'17, W. M. Weigel, '00, L. A. Delano, '04, and J. H. Steinmesch, '06.

JUNIOR LYCEUM COURSE DESERVES MORE SUP- PORT.

The Junior Lyceum course is not receiving the support it deserves among the students. Less than half the men in school have bought tickets. A thing that the student should keep clear in his mind is the fact that this proposition is not a money-making scheme for any one. Every cent put into this entertainment course will be returned to the student in pleasure on the 17th of March. To make this year's celebration what it should be will require the utmost effort of the Junior Class, coupled with everything the other classes can do in support. Let's see a larger sale of tickets among the students in the next week.

NEW BULLETIN READY.

Technical Series Bulletin, Volume 5, Number 2, known as "The Effect of Addition Agents in Flotation," Part Two, by M. H. Thornberry and H. T. Mann, is now ready for distribution at the library.

Drury was out en masse last Saturday to root for the Miners at the Springfield Normal game. Let's hope that the Normal rooting for us will have as good effect when we play Drury next month.

The bums were out in full force in Springfield, every one getting thru all right. We hope that all of us who start tonight for St. Louis have as good luck.

HEARD IN E. E. LAB.

Huffman: "Ma got E in the quiz.

Gettler: Oh! Did she?

Huffman: No! Shih got an S.

Voice: "What did you get, Daniel?"

Daniel: "Two points, and I would have had an I."

STANDING OF THE CONFERENCE TEAMS.

If you don't think we have a good football team this year just look at the standing of the teams of the Missouri State Conference:

	Won.	Lost.	Tied.	Pct.
Rolla.....	2	0	0	1,000
Kirksville.....	1	0	0	1,000
William Jewell.....	1	0	0	1,000

Central.....	0	1	0	000
Drury.....	0	1	0	000
Maryville.....	0	0	0	000

Prof. Bains is a faithful follower of Prof. Richards, but he was rather upset in Ore Dressing the other day when he turned to the "Good Book" for information and found it not. We hope Prof. doesn't lose his "Book," as it would be an awful calamity—and no one would ever know the difference between a "sieve" and a "screen."

"Rix" answered the question in mining quiz Thursday concerning the tools used in hand-drilling, naming the following tools: steel, 4-pound sledge, and small air compressor. What is the reason for the latter? Is it to blow out the cuttings?

Word has been received of the marriage of G. E. Johnson, '16, to Miss Hilda Krickbaum, on Oct. 12th, at Canton, Ohio.

The Juniors are wondering when Prof. Bains will begin lecturing in assaying. They think he ought to have found out all "they" know by now.

FOOTBALL GAME FOR "SCRUBS" NCV. 20?

The propaganda of the Miner for a football game for the "scrubs" seems to be bearing fruit, as an effort will be made tomorrow while the coaches are in St. Louis to arrange a game with either the St. Louis U. or Washington U. freshman team for a game on the Miner open date, Nov. 20.

Owing to increased cost of railroad fare, equipment, etc., the athletic association is already running far behind on its football budget; so no funds are available from that source to finance the proposed game. Therefore some other means must be found to defray the expenses of the visitors, which will amount to about two hundred and fifty dollars. Probably the best way will be for some organization to take over the business end of the thing and sell tickets.

More arrangements can be made about the matter, however, after the game has been definitely arranged, and anything of interest that develops will be announced in the Miner and in mass meeting.

NEW DIVING BOARD.

Many of our aquatic sportsmen, including S. K. Reed and "Fat" Watts, as well as the diving Venus, "Kid" Grady, will be more than pleased to learn that the lumber for a new and substantial diving board has arrived, and the board will soon be ready for use. We thought the last one was "substantial" until Mr. Watts demonstrated to us that quite the contrary was true.

L. J. Zoller, '18, is with the National Exploration Co., at Tulsa, Okla. His address is 416 N. Cincinnati, Tulsa, Okla.

TICKETS.

Tickets for the Miner Hallowe'en dance are on sale at Scott's, Faulkner's, and the H. & S. They can also be procured from any member of the Miner Staff. All who enter the dance floor will be required to show a certain means of identification, which will be supplied as the dance ticket is turned over to the doorkeeper. All who haven't this means of identification will be asked to stay off the dance floor and the balcony on that level.

LOST.

Jim Jewell has two hats and one cap running loose around the campus. Those meeting same please note location and altitude.

GUESSING CONTEST.

Heard in Prof. Frame's E. E. Course:

Devereaux: But how do you know what to guess?

Prof.: Experience in magnetic circuits is necessary.

Devereaux: That's what I thought.

The Frisco seemed to take all precautions last Friday night when they sent No. 9 and No. 1 thru here at forty miles an hour. No telling what these Miners would tackle, Frisco! Look out for this coming Friday night. It's near Hallowe'en, and the Miners might get you "if you don't watch out."

Miner Hallowe'en dance—the best dance of the semester.

Continued from Page One.

end runs had the ball within three yards of the Miner goal when the quarter ended. Score 3 to 2 in favor of the Miners.

Miners Win Second Quarter.

At the beginning of the second quarter they pushed the ball over for a touchdown. Then the Miners showed the Teachers some real football. The Miners received the kickoff and after several gains punted to the Normal 35-yard line. Normal punted back, the ball going out of bounds on the twenty yard line. A march down the field that resulted in a touchdown was inaugurated here by a 35-yard pass. The Miners went through and around the Teachers for snappy gains and another forward pass put the ball within one yard of the goal. Cairns then went through for a touchdown. The next score for the Miners followed in short order. Normal returned the kickoff to the 30-yard line, where the next play, a forward pass was intercepted and carried to the Teachers' 15-yard line. Two downs and the ball again went over for a touchdown. The rest of the half was uneventful, and the score ended 17 to 8 in favor of the Miners.

Second Half Score Like First.

Beginning the third quarter, Cheek of Normal received the ball and carried it to the 30-yard line. An end run brought the ball to the Miners' 30-yard line. Normal fumbled the ball at this stage of the game; the Miners recovered it, only to lose it on a fumble to the Teachers. Normal then punted 70 yards, "30 up, 30 down and 10 forward." A forward pass, a line buck and a 25-yard end run by Cairns brought the ball to the 35-yard line. After two downs and no gain Bohn delivered a place kick. Normal received the kick, and with a ser-

ies of line plays found themselves on our 25-yard line. A forward pass put the ball over for the last score the Teachers were able to obtain. Cairns received the Normal kickoff and three sensational runs by White, Bohn and Cairns brought the ball to within one yard of the goal. Cairns went over for the counter. Score, 33 to 15 in favor of the Miners.

No Scoring in Last Quarter.

There was no scoring in the last quarter, although all the playing was done in the Teachers' territory. The Miners were finishing the game in a fast manner, and continually punched the Normal line for short gains. A touchdown was in sight when Normal intercepted a forward pass. Cherry kicked 15 yards, after several short gains around end the game ended with the Miners on Normal's 15-yard line.

The line-up.
