THE MISSOURI MINER.

Missouri School of Mines and Metallurgy, Rolla, Missouri.

Vol. 7, No. 9.

Friday, October 29, 1920.

Price, 8 Cents.

MINERS DEFEATED 27 TO 0.

First Quarter Spelled Disaster; 20 Points Scored.

Altho an easy victory was predicted for the Miners last Saturday, the Billiken eleven romped away with the game by the score of 27 to 0. Their "much mangled, bandaged and spiritless" team proved to be a battering ram during the first quarter, and this, coupled with a muddy field, helped to cause our downfall. The real reason for our defeat, however, lay in the apparent inability of the Miners to solve their shift play early in the game.

After the Springfield Normal game, the entire week was spent in directing our defense against the plays and formations used by St. Louis U., especially their touted shift. But a slight change in their method of attack seemed to baffle our line, and twenty points were piled up during the first quarter.

Another Score in Second Period

The first few minutes of the second quarter saw another tally chalked up for the Billikens. For the remainder of the period however, the Miners got down to real business, and with a defense working effectively, held the Billikens to better than an even game, the quarter ending with the score 27 to 0.

No Scoring in Second Half.

The second half found the Miners still fighting, but 27 points was too big a lead. The Billiken rush method had swept us off our feet, and the game ended with the score still 27 to

Continued on Page Eight.

ARKANSAS RAZORBACKS TO BE ATTACKED TO- MORROW.

No Easy Game Can Be Expected.

M. S. M.'s football eleven left for Fayetteville this week-end to play the Arkansas Razorbacks at Fayetteville Saturday. Arkansas U. is known to have a strong team this year, judging from the fact that they have won most of their games. They will put up their usual hard-fought game, and it will task our team to the utmost to hold them to an even score.

Last week's defeat, perhaps, did us more good than harm, for our men will enter the game tomorrow determined not to have last Saturday's results repeated. If Arkansas wins the game it will be because they deserve it.

Eighteen Men Take Trip.

Eighteen men were taken, consisting practically of the same squad that faced St. Louis U. Bohn, who was injured in the game Saturday, will be on the side line for a week. Neither Zook nor Wendell will make this trip, as they are still nursing bruises. McClurkin, who has been out of the game for two weeks, has reported every evening the past week and will, no doubt, round into form for the game with Warrensburg. McBride, who has been working at end, has been shifted to the backfield to compensate for Bohn's loss. "Buddy" is a scrapper, and should show up well in the game tomorrow if given a chance. Buck, another snappy end, will work at tackle in place of Zook and Wendell.

MISSOURI MINING AND MET. ASSOCIATION.

There will be a meeting of the Missouri Mining and Metallurgical Association Wednesday, Nov. 3, in Geology lecture room. Prof. Guiteras will give a talk on the Braden Copper Co., Chile. The talk will start at 8 o'clock. Business meeting at 7:30. All members urged to be on time. Eats and smokes. Let's make it a real meeting. Remember the date, Wednesday, Nov. 3.

FIRST LYCEUM NUMBER WELL ATTENDED.

The first number of the Brown Lyceum course was given in the auditorium at Parker Hall on Wednesday night, October 27. The evening's entertainment consisted of a six-reel picture show featuring Viola Dana in "The Willow Tree," and a selected program by "The Potters." The freshman orchestra furnished their usual standard of high class music. The Potters gave a splendid rendition of Ben Bolt and other old classics.

HERIVEL, EX-'17, MARRIED.

Harold T. Herivel, ex-'17, was married September 14, 1920, to Miss Harriet Laurretta Thomas, daughter of Mr. B. F. Thomas, in Guadalajara, Mexico. Mr. and Mrs. Herivel are making their home at El Oro, Mexico, where Mr. Herivel is with the technical staff of the Esperanza Gold Mining Co.

Buck is fast, and can give a good account of himself.

Prof. Butler.

VOCATES.

Major Cooke has arrived here from Washington, D. C., and is co-operating with Mr. Bardsley in instructing the Vocational men in topographical engineering. Major Cooke has for many years been connected with the United States Geological Survey, and is especially qualified for his duties here.

Mr. James (Jimmie) Leavitt of the United States Geological Survey is making his headquarters in Rolla while engaged in running the primary traverse for the geodetic control of some areas in this vicinity.

Negotiations are under way to secure from the Army a limited number of trucks and automobiles for the use of the vocational students in connection with their field surveys.

H. L. Turner, "Vocate," is working on an invention, which he claims will greatly facilitate the leveling of transits and levels.

"Booze" makes every trip to the field with the "Topogs" and seems deeply interested in the course. When rain occasionally prevents their going out he is frequently heard to express his disappointment with, "Dog gone it!"

Burke, a brand new Vocate, informs us that he is in urgent need of sheekles as he is going to join the benedicts next week. "What'll we do with the newly-weds, Boys?"

Prof. Bardsley lost a rear wheel of his Lizzie last week. Reward for the finder. He gave it a good dose of salts, and is on the road again. A good Ford will run on three wheels, anyway.

Jos. C. Finagin, Jr., '14, writes that he will be at the Kendall game Thanksgiving. He is still with the Prime Western Spelter Co., at Collinsville, Okla.

ROLLAMO PLAY.

"OFFICER 666," to be presented by the Rollamo Board under the direction of the Star and Garter, is now well under way and, judging from the ability which those taking part have shown at rehearsals, the presentation will be of the best possible.

The cast is as follows: Mrs. Charlotte Singleton, Mrs. H. O. Norville, Miss Billie Farris, Baxter, Hoke, Whitworth, Kiskaddon, Gordon, Watkins, Collett.

MET. AND CHEM.

At the meeting of the Met. and Chem. Society last Friday evening it was definitely decided that the name should not be changed, although there was some sentiment in favor of changing the society to a purely chemical one. Would this have strengthened the organization? The majority did not think that it would, although the metallurgists have been represented only by a very small per cent of their number at the meetings for the past several years.

It is the request of President Taylor that the Met. men come to the next meeting with their full strength. Mr. Metz, '14, gave a clear cut and interesting talk on the ball mill process, after which the members partook of refreshment in the regular "banquet room" of the Met. and Chem. Society. Those who were not present will do well to attend the following meetings. Watch the bulletin board for announcements of next meeting.

PROHIBITION HITS**ORE DRESSING.**

Prof. Bains told the class the other day that beer bottles were formerly used in mill work. Who wants to be a mill hand now?

EDITORIAL.

The chances for a game for the "scrubs" on November 20th are small, because of lack of available opponents within reasonable distance. Neither the Washington U. nor the St. Louis U. freshman teams could be obtained.

Along the line of needed improvements advocated by The Miner, we would suggest that before the students can ask for re-decoration in some of the buildings they must show that care will be taken of any improvements made. A glance at the walls just inside some of the doors, for instance the south door to Parker Hall, will indicate a way for needed "improvement." Match streaks are hardly the "latest thing."

Annually the Sophs and Frosh battle on the gridiron to decide the lower-class football championship. There are three weeks between now and the Miner varsity open date, and

that is more time than is necessary for these teams to get together. Why not have this grid battle at that time instead of the middle of December? And if the Friday afternoon laboratories could be shifted over to Saturday afternoon for that week, the game could be pulled off Friday, the 19th. This would permit more townpeople to go to the game, with a consequent greater income to the financially-embarassed athletic association.

Prof. "Boots" Clayton has a very interesting film coming in the course of a week or so. Everybody should turn out, as it will be an interesting one in connection with the iron industry. Details will be out later.

The old Miners around Tulsa are making ready to welcome the hordes of spectators to the Miner-Kendall game Thanksgiving. There will be a dance that night to which any one from Rolla is invited. Better be there!

Miss Eva M. Underwood, daughter of Prof. Underwood, has been appointed an assistant in the library of the School of Mines.

H. L. Wheeler, librarian at M. S. M., is in St. Louis this week attending the twentieth annual convention of the Missouri Library Association, of which he is president.

"Herbie" Mundt, '21, is with the Southern Acid and Sulphur Co., working out of Sullivan, Mo., prospecting for iron ores.

Water Supply Paper No. 490-A of the U. S. G. S. is a bulletin by John S. Brown, '17, entitled "Routes to Desert Watering Places in the Saltan Sea Region, California. It is a very complete publication, and will be of great value to traveling across the California Desert.

"Give Us A Trial"

CASUAL COLORED COMMENT CAREFULLY "CELECTED."

Colored folks have a keen sense of humor. Their witty sayings are always entertaining and often very laughable. Colored comedians in vaudeville and black-face artists in minstrels have scored success with darktown gags. Likewise on the motion picture screen in The Literary Digest "Topics of the Day" colored folks' humor has produced lots of laughter. The Miner selected the following wordings from the "Topics" to take yo' back to "Ol' Virginny" for a spell of fun:

"Sam, you ought to stay at home and keep out of trouble. Look at your eye."

"Man, yuh don't know what yuh talkin 'bout—home am trouble's headquarters!"

—Louisville Journal.

"Rastus, what's an alibi?"

"It's proving dat you was at a prayer meetin' when you wasn't in order to show dat you wasn't at de crap game when you was."

—Ithaca Journal.

"Rastus, did your soldier son get any medals?"

"Say, dat boy wuz de mos' meddlesome lad in de whole regiment."

—New York Evening World.

"Well, Henry, in trouble again?"

"Yes, yo' Honnah; 'member you was mah lawyer last time? Don't need one dis time, 'cause ah's gwine to tell the truth."

—St. Louis Republic.

Edmonton (Canada) Journal.

"Madam," said the conductor politely to the lady, "You must remove that suitcase from the aisle."

"Fo' de Lawd's sake, conductah dat aint no suitcase. Dat's mah foot."

—Ithaca (N. Y.) Journal.

**MANESS, '18, CONTRIBUTES
"POME."**

The following "pome," entitled "The Geologist," and whose author is unknown, was sent to us by O. N. Maness, '18, a geologist himself, who is with the Oklahoma Producing and Refining Corp., at Tulsa, Okla.

Who is it breaks the farmer's fence?

The Geologist.

Who gets "bawled out" for high expense?

The Geologist.

But whose opinion first is sought Before the acreage is bought?

Who "joy rides" till at last he's caught?

The Geologist.

Who "rushes" all the "village queens"?

The Geologist.

Who smashes company machines?

The Geologist.

Who works ten sections in a "block"?

And maps out every ledge of rock

In just one hour by the clock?

The Geologist.

Who is it wears ex-army clothes?

The Geologist.

Who has a scarlet, sun-burned nose?

The Geologist.

Who gets the credit when they're "dry,"

But if they "flow" it passes by?

Who takes a day off on the sly?

The Geologist.

Who puts the "wrinkles" on the map?

The Geologist.

Who, over theories, likes to "scrap"?

The Geologist.

Who works from early morn, they say,

Till others all have "hit the hay,"

To earn his "hundred bucks a day?"

The Geologist.

**VERY UNFORTUNATE IN-
DEED.**

"Slim" Updike with about fourteen others in their daily pursuit of knowledge found upon arriving at the door of Prof. Johnson's class that it was locked. It is all right, considering that it is sometimes better to be on the outside looking in rather than on the inside looking out.

FUTURES.

Fred Lane will take the chemistry department's books to the Pearly Gates with him to prove his innocence should any Miner get there to make accusation against him.

PERHAPS—

Doc. Barley in Eng. Writing: "There must be some relation between the mill term, launder, and the common word, laundry. What is it?"

John Bowles: "I guess it's because they both have water in them."

Prof. Thornberry having had a very bad breakfast last Monday morning started out taking the results on a few certain "studes" about a certain article in the Miner. The article mentioned brings to light the policy of the Miner in that it believes in getting them young, treating them rough and telling them nothing, as then the poor "studes" will have a chance. We like to hear some comments as those given by "Thorny" as then we can improve each shining hour by the aid of the light given by the light plant along about eleven-thirty each night.

R. S. Weimer, '10, is resident engineer for the Central Coal and Coke Co., Rock Springs, Wyo.

Kenneth Aid will leave for Venezuela in the employ of the same company with which "Bob" Marston has located.

SURVEYIN

Us Freshmun
Is exposed to
Surveyin
But most of us
Is immune

The first few days
Wuz nice
We went walkin
But after that
Cum chainin

The chainin itself
Wuz ezy
But the figerin
Korrecksions
Thats sumthin else agin

Then cum levelin
I learned so I could
Set up a level
In 20 minutes
That wuz ezy enuf

But them gol-durn notes
They wuz always rong
I got the KA house
Bout 15 feet higher

Then Parker Hall

Then the transit oh boy
Thats a lulu of a job
Settin up one of them things
An readin angels etc
But I learned sumpin about it

I wuz gettin along purty good
When long cum Dooc Armsby
An give us a lecture
On shootin the sun
An now the stuff's all off

I guess he knew
What he wuz talkin about
But us Freshmun
Didn't

He sez its ezy
To shoot the sun
An it is ezy jest
To look at the durn thing
But the figeerin—!!!

You add the declination
To the suns mean hourly hite
An multiply by the refraction
An then divide by 2

Add on the longitude
Subtract the latitude
Add 4 divide by 62
The result? Damfino

OZARK IKE '24

P. S. Prof. Johnson has me all
mixed up
On punctuation marks
So I aint usin none in this pome
Then I cant have any rong

MINERS ORGANIZE

BIBLE CLASS.

Dr. W. D. Turner is the newly elected teacher of a bible class organization, which meets at the Methodist Church at 9:45 every Sunday morning. This class has been known as the Methodist Miners up to now. Their new name will be Society of Methodist Engineers. Similar classes are being organized in other college-town churches, where engineering students attend.

Brandenberger, R. E.

Bolt, R. T.

Christner, R. G.

Zoller, C.

Parkhurst, L. G.

Wendell, L. T.

Wilson, L. E.

Kenning, F. B.

Cairns, Quarter.

Owens, L. H.

Bohn, R. H.

Substitutions: Zook for Bolt, Bolt for Zook, Zook for Wendell, Coffey for Parkhurst, Fischer for Coffey, Squires for Owens, Grey for Wilson, Buck for Brandenburger.

MAKE M. S. M. 100 PER CENT BY SATURDAY NIGHT.

There are still a number of men who have made application for membership in A. A. E. who have not filled out qualification blanks nor paid their dues.

We cannot send in to national headquarters any applications which are not accompanied by dues and by qualification blanks approved by the local qualification committee.

Only those applications which are in the mail by Saturday of this week will be counted in deciding whether or not this chapter wins the prizes offered in the membership campaign.

Therefore every man who intends to join A. A. E. is strongly urged to do so before 5 p. m. on Saturday, and thus help us to win the big cup. It won't cost you any more to join now than it will later, and you will be helping the chapter. Borrow the three dollars from "the wife" if you haven't it yourself.

There will be some one in the office, room 108 Norwood Hall, from 12:45 to 5 p. m. on Friday, and all day Saturday, up to 5 p. m., to receive applications, qualifications, and dues,

and all who sign up before 5 p. m. will be sent in that night and will count toward prizes in the campaign.

Let's all get together and win that big cup for M. S. M.

OUR TEAM TOO CONFIDENT

"Cock-sureness" Lost Game to Billikens.

Regardless of our defeat we still believe we have a better-balanced and smoother-running machine than that presented by St. Louis U. Had our men gone into the game with just a little less confidence the results could easily have been reversed. One consolation, however, that we may derive from our defeat is the fact that it was not a conference game.

If "press-agenting" had anything to do with our over-confidence, it is better that St. Louis U. knocked it out of our systems rather than to have Warrensburg or Drury do it. It is well to be confident, but to be "cock-sure" of winning is a bird of another color.

We still have two conference games to play, and two to win, if we are to float the championship flag this year. We can do it if every man is a hard, aggressive worker, confident of his own ability, and also cognizant of the fact that his opponent may be equally good. Let's get some steam up, and go after the remaining conference games as though we meant business. So—

Warrensburg or Drury—

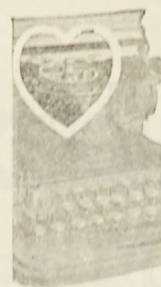

Let's go get 'em,

They'll get us if we let 'em—

Come on! M. S. M. Let's Go!

"Thorny" has received a letter from E. P. "Red" Barrett, '09. "Red" is metallurgical chemist with the U. S. Bureau Utah.
