SOPHS WIN INTER-CLASS TRACK MEET.

Two New School Records Set, and One Tied.

Under the guidance of Captain Hubbard the class of '23 made April 2nd Sophomore day by winning the Inter-Class track meet held on Jackling field. In this meet two new records were set and one tied. Hubbard finished a brilliant two-mile run far in the lead, with a time of 10:46, four seconds under the time set by J. R. Maher in 1915. E. Pesout established a new javelin record of 142.2 feet, and White easily won the 880-yard run, with time of 2:04, tying that set by Boyer in 1906. The old discus record could not be found, but the one set by Barret in 1908, of 111 feet, 6 inches, was broken by C. A. Runge, who threw it 113 feet and 6 inches.

White won individual honors, with three firsts.

The final scoring, not counting points made by letter men, was: Sophomores 63; Freshmen 52 2-3; Juniors 10; Vocates 1-3; Seniors 0.

The results of the meet were as follows:

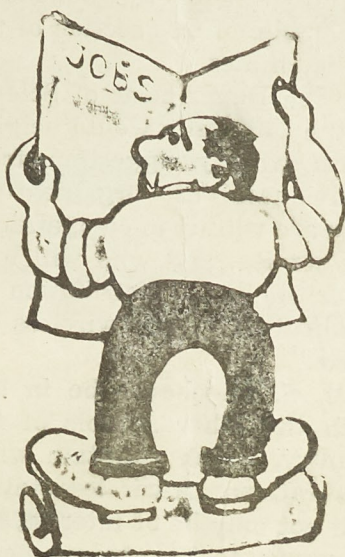

100-yard dash: Smith first, Buck second, Hooper third. Time, 10.2.

120 high hurdles: White first, Buck second, Hoover third, Rembert fourth. Time 18 seconds.

One mile run: Chomeau first, Leonard second, Hubbard third, Storrs fourth. Time 4:55.

44-yard run: White first, Runge second, Wallace third, Matlack fourth, Druout fifth.

Continued on Page Ten.

WHAT'S THE USE?

BOOKER RESIGNS FROM MINER BOARD.

K. W. Booker has resigned his position of General Manager of the Miner Board. Mr. Booker came on the Board as Assistant Business Manager in the fall of 1918. He served in that capacity thruout the school year. Upon his return to school in the fall of 1919 he took up the duties of Business Manager, and practically filled the position of Advertising Manager as well. In his last year on the Board he served in the advisory capacity of General Manager. Mr. Booker has always been an untiring worker, always ready to lend a hand where it was most needed. His efficient management and unceasing work among the local advertisers has done much to put the paper on a sound financial basis. Mr. Booker's resignation leaves a gap in the Board that will be hard to fill.

M. S. M. PRACTICALLY ASSURED A WIRELESS STATION.

Will Be Valuable Addition to School.

Since the announcement that a movement was under way to establish a wireless station at M. S. M., work has been going along quietly, and it now seems that it is only a matter of time until M. S. M. will be "listening in" on news sent via wireless. The student body is taking more interest than was shown at first, as was indicated by the number present at the meeting held Friday, March 25, when plans were discussed relative to the size of station needed, and the equipment necessary to run it.

The suggestion was made that the school be asked to provide not only an instrument room, but also a room where the men interested could meet for a social hour. From latest reports this has met with approval from Dr. Fulton, and in the event that a wireless club be formed, it appears altogether probable that they will be provided with a room for the necessary apparatus, and one for their social and business meeting.

The tentative plans are to make an addition to the carpenter shop back of Mechanical Hall, and devote two of the rooms to the use of the wireless club. At the above mentioned meetings a list of the necessary equipment was made, and a suitable location for the aerial was discussed. It was first thot that the top of Jackling Gym could be utilized for that pur-

pose, but the present idea is to locate the aerial elsewhere on the campus. Dr. Woodman is in communication with the General Electric Co., and hopes to get a complete supply of the best instruments obtainable at their educational discount price.

As an example of what use such a station could be to M. S. M., and more particularly to the community about Rolla, we are printing the following letter from the Meteorological Bureau of St. Louis U.:

"The United States Weather Bureau has arranged with the Department of Science of St. Louis University for the latter to send broadcast by radio-telephone twice each day the official weather forecast for Missouri and Illinois, and also the reports of the water stages of the Mississippi, Missouri and Illinois Rivers and their tributary streams.

"This service will start on April 15th, and the weather forecasts will be sent out at 10 A. M. and 10 P. M. of each day from the powerful wireless station of the University, which until the completion of the Government wireless station at the Chain of Rocks also was used to direct the aerial mail between St. Louis and Chicago. In this service, however, the key was used, and in the Weather Bureau Service the radio-telephone, to which any one with a proper receiving apparatus can "listen in," will be the medium of communication.

"The arrangements for the service were made by Montrose Hayes, Chief of the Weather Bureau of St. Louis, of which the St. Louis University Observatory is a co-operating unit, and with the approval of the Department in Washington. The service will send the official Government forecasts, and the Department of Agriculture requests the newspapers and the Chambers of Commerce of the

various cities and the Farmers Organizations within at least one hundred and fifty miles in every direction from St. Louis to make preparations to take advantage of the service, which St. Louis University will give gratuitously for the benefit of the public of this section of the United States.

"The Department of Science of the University would be glad to receive any suggestions from individuals or organizations who are willing to co-operate in the service, and who will look after the local distribution or publication of the wireless reports."

M. S. M. should be in line with the other schools of the country, which maintain wireless stations. A wireless station will not only be of interest, but of service to the student body, and this part of the state in particular. We would be able to receive most of the high powered stations in Europe, and also enjoy the radio-phone concerts sent out from different points in the United States. Our sending radius would be about two thousand miles. Later a radiophone could be developed and put into operation. The first requisite however, is to have the students take the initiative in the matter. See Dr. Woodman if interested, and help the cause along. There will be plenty of chance for radio research work. This work is just in its infancy. If you are not interested in the research end of it, join any way and hear the news of the world as it happens. Let's all "listen in" when we return next fall.

COACH ROGER T.

McCUNE RETURNS.

Coach McCune, who left soon after the close of the football season last fall, returned to M. S. M. Monday to resume his duties as assistant athletic director. Coach McCune has been in Cleveland, O., the past four months "resting up" from a prolonged illness. Our coach will remain here this summer, and resume his duties as football coach in the fall.

M. S. M. is looking forward to a decisive victory in the conference with Coach McCune again directing the football team.

ABOUT COMPLAINTS.

Many men have just complaint to make about their membership in A. A. E. An opportunity will be given Monday, April 11, from 2:30 to 4:30 P. M., in Room 106, Norwood Hall to straighten out these complications. Even if you have made your complaint before, it is necessary to come to the office at this time in order to have it attended to this semester.

Any Seniors who desire to join A. A. E. before leaving school will also do well to come to the office at this time so that membership cards may be received as soon as possible.

MINER BOARD ELECTS

NEW MEMBERS.

Shovels Awarded.

At the recent meeting of the Miner Board four new members were elected, and four shovels awarded to old members. Mr. M. W. Watkins and Mr. Fred J. Underwood were added to the business department, while Mr. C. D. Fischburn and Mr. R. L. Yeager were added to the editorial staff. Shovels were awarded to Mr. Hollow, Mr. Teller, Mr. Zeller and Mr. Wilkerson for their services on the Board during the past year.

**THE SENIOR TRIP
STARTS NEXT WEEK.**

Interesting Visits Planned.

The Senior trip, which will be taken this year by about thirty-five men, promises to be one of the most successful ever attempted. The trip will start next Wednesday, April 13th, and continue thru Saturday, April 23rd. A study of practical work in geology, mining, metallurgy, and ore dressing will be given to the students under the supervision of Professors Muilenberg, Forbes, Clayton and Baines, respectively. The party will be divided for the first three days of the trip, as the men specializing in mining will devote their time to visiting coal mines in Illinois, and studying geological formations among the Missouri iron deposits, while those specializing in metallurgy will devote their time to visiting several metallurgical plants of interest in the

vicinity of St. Louis. For the remainder of the trip the party will be undivided. It is the aim of the faculty members in charge of the boys to make it both entertaining and instructive.

It is rumored that a few members plan to make the trip in their Miner style, a la side-door Pullman.

The schedule is as follows:

Wednesday, April 13th—Leave for St. Louis on No. 4.

For the men specializing in mining the schedule for the first few days is as follows:

Thursday, April 14: Coal mine near Edwardsville, Ill.

Friday and Saturday, April 15 and 16: Geological work near Ironton and Iron Mountain, Missouri.

During these three days the men specializing in metallurgy will devote their time as follows:

April 14, A. M. Mazda Lamp Works. P. M. Warren Steel

Casting Co.

April 15, A. M. St. Louis Brass Co. P. M., Liberty Foundry Co.

April 16: Hoyt Metal Co.

The remainder of the trip will be the same for all men.

April 18 and 19. Milling in Flat River District.

April 20. Smelter, St. Joe Lead Co., at Herculaneum, Mo.

April 21, A. M. St. Louis Smelting and Refining Co. P. M., American Zinc, Lead and Smelting Co.

April 22., A. M., National Lead Co. P. M., Scullen Steel Co.

Saturday, April 23, A. M. St. Louis Coke and Chemical Co.

Would you bet ten thousand dollars that you could tell the absolute truth for twenty hours? Bob Bennett did. Later he said, "I thought I could do it." Still later he said—but see the play, Parker Hall Commencement Week.

CONSTITUTION OF THE ASSOCIATION OF COLLEGIATE ENGINEERS ACCEPTED.

The student body voted today to accept the constitution of the Association of Collegiate Engineers, which was printed in the last issue of the Miner. The local chapter, however, reserves the right to assume such name as it desires.

Homer Leonard was elected national vice-president of the association. His duties will consist in planning and supervising the national convention which is to be held here next year.

It was also voted that the petition of the University of Colorado, for the establishment of a chapter be granted.

Crookedness never pays in the long run. Look at the cork screw—out of a job.

BASEBALL SERIES
CONTINUES.

The fifth game of the Inter-Club-Fraternity series was won by the faculty, who put a nine in the field which was capable of defeating the Lambda Chi Alpha by a score of 12 to 10. Many hits and errors marked the procedure of the game. Batteries: Faculty, Kershner Kamp and Thornberry; Lambda Chi Alpha, Reed and McBride.

The sixth game, which was played on April 5th, between the Independents and the Kappa Sigma, was won by the latter 6 to 5. This was, no doubt, the most interesting game of the series, and it marked the second victory for the Kappa Sigma fraternity. Batteries: Kappa Sigma, Cameron and Owens; Independents, Kenyon and Hollow.

The seventh game, played on Wednesday, 6th, promised to be one of great interest and a close score, but after a few innings it proved the Sigma Nu's easy victors over the Bonanza Club, 15 to 8. Batteries: Sigma Nu, Cairns and Watkins; Bonanza, Alcorn, Miller and Saunders. This game was the second victory in the series for the Sigma Nu's.

The eighth game was the first of the consolation series, and marked the second defeat of the Prospectors, as the Lambda Chi Alpha team defeated them 6 to 2. This defeat administered to the Prospectors eliminates them from the series. Batteries: Lambda Chi Alpha, Murphy and McBride. Prospectors, Anderson, Deckmeyer and Smith. Smith catcher for the Prospectors, was injured in the first inning, and was relieved by Deckmeyer.

The game today is the second of the consolation, being staged by the Vocates and K. A.'s. The first game Saturday, the third of the consolation series, will be

between the Independents and Grubstakers.

M. S. M. STUDENTS TO DO
EXPERIMENTAL WORK.

Prof. C. R. Forbes, in company with Dr. J. J. Rutledge, Superintendent of the Mississippi Valley Station of the Bureau of Mines, last week visited the Tri-State mining district. Prof. Forbes made arrangements for experimental work with rock drills which is to be done under his supervision by I. F. Hodges and J. T. Hodges, students in mining here at M. S. M. This is a part of the experimental work carried on by the school in conjunction with the U. S. Experiment Station. The actual work will be performed in the Bilharz mine, near Picher, Oklahoma.

"Conductor- I'd like some tickets."

ADDITIONAL EQUIPMENT FOR THE MINE.

This summer will see a large improvement in the mine, owing to the addition of new machinery and equipment, which is to be installed. This has been brot about by the increased appropriation awarded M. S. M. by the State Legislature.

Prof. C. R. Forbes has arranged for the installation of a new 125 H. P. boiler, and also an additional aid compressor, which will double the air capacity for drilling. A Joplin type head frame, Joplin type hoist, a Blake pulverizer, capable of crushing the rock down to 10 mesh, ore elevator, 100 ton ore bin, and other equipment, are to be installed. The rock will be crushed and sold to the farmers for fertilizer, an example where a mine started in waste dolomite, with apparently no value, has turned out to be worth a great deal for agricultural purposes.

All should appreciate these improvements, for they will furnish the student a better opportunity for practical mine work, and a better understanding of the workings of a real mine.

PIETY.

Yesterday I was walking
Along a slippery
Street, and a very
Snappy-looking girl in
Front of me, with pretty silk
stockings
Slipped and fell. I ran
To help her, but just then
I remembered that father had
Told me never to pick
Up a girl. So I
"Let 'er lay."

ALUMNI.

Edward D. Lynton, '12, is with the Los Angeles office of the Standard Oil Company of California as geologist.

Chas. H. Richards, who attended school here during '01 and '02, is associate consulting engineer in the office of J. B. Lippincott, Los Angeles, Calif.

Herman J. Mutz is now at Cimarron, New Mexico.

Robert E. Dye, '12, has been appointed superintendent of the Bailey Customs Mill, at Cobalt, Ontario.

A recent issue of "The Black Diamond" contains a detailed account of the work of Charles Foster Roy, who was here in '99. Mr. Roy evidently found his fort in coal mining. After holding a number of responsible positions in various coal fields, he is now located at Somerset, Pa., where he owns and operates several mines.

Joseph C. Finagin, '14, who has been located at Collinsville, Okla., is now with the White Hills Mining Company, White Hills, Ariz.

George Bloom, now Lieutenant Bloom, who was here last strom Field, Arcadia, Fla.

Many of our more socially inclined friends at M. S. M. have felt that wonderful touch of spring, and as a result may be seen almost any morning or noon taking "school lab"—namely, escorting the fair young ladies of Rolla safely to their high school.

Dear Editor: I am only 18 years old, and my boy friend wants me to walk to the mine. I don't know what to do, but he seems to be awfully nice. Will I be safe with him?

Sary of the "Stutes."

Dear Sary:

If he is paralyzed in both arms take a chance.—Ed.

The different classes have been reorganized for the summer's work, and will soon be in the field, practicing the work explained during the winter semester. The highway class has already been in the field studying bridge construction, under Mr. H. E. Bilger. Mr. Bilger is the new highway engineer recently employed for this department, and is a capable man of wide experience in the profession.

The topographical staff, as well as the class, is growing. Mr. T. T. Raney, topographer from the U. S. G. S. arrived in Rolla recently, along with Mr. W. E. Breuer, another topographer from the Survey. These men will assist Major Cooke and Prof. Bardsley.

Monday morning the field season opened as scheduled, and every one was on hand "raring to go." The crowd in front of the power plant reminded one of the response to an add, "Man Wanted," during a financial panic.

Three parties are now in the field, and work is progressing nicely on the Meramec Springs quadrangle. This quadrangle lies to the east of the Rolla Sheet, which has already been published. The control work was done last fall by Mr. Leavitt of the U. S. G. S., assisted by several of the student topographers.

Major Cooke has charge, and he and his party are plotting the northern portion of the sheet. Mr. Breuer has charge of the party to the south, while Mr. Raney with the third party is splitting the quadrangle, west to east, between the two other parties.

Professor Bardsley is breaking in some new recruits on the levels, and before long will have them running primary level circuits on the sheet.

Mr. Saunders has a primary traverse party near St. James. Before the season closes every man taking the course will have had experience on this party.

What is this "noise" about it costing one of Fisch's algebra students a dollar to find out about the sign? Is the "sign" right, Riddle?

The Vocational Department is to lose one of its most efficient official chauffeurs. He has taken a position as "Engineer Rodman," and will leave at once for South America to take up his hazardous occupation. The name, while not familiar to most of us, has a technical "ring," and we believe the position will be efficiently filled.

Mr. Woolrych has charge of the "Oil Slickers," and hopes to whip them into technical oil men in short time.

The topographers have covered a great amount of work during the winter, and it is presumed that great progress will be made in the field this summer.

**STUDENT COUNCIL AND
ATHLETIC ASSOCIATION
ELECTIONS.**

At the mass meeting today the officers of the Athletic Association, and the members of next year's Student Council were elected. S. I. Zook, E. J. Wendell and D. F. Updike were elected President, Vice-President and Business Manager respectively of the Athletic Association.

W. R. Gettler, T. G. Weir and E. S. Wheeler were elected from the Junior Class to serve on next year's Student Council, Messrs. Gettler and Weir being retained from this year's Council. From the Sophomore Class Messrs. Teller and Parkhurst were chosen.

See Bob Bennett in "Nothing But The Truth," at Parker Hall Commencement Week.

TRACK MEET WITH WASHINGTON U. TO BE HELD ON APRIL 16.

This year is no exception to former years, and we will go forth as usual to claim Washington U.'s scalp at a dual meet to be held on Francis Field in St. Louis on April 16th.

With the material which presented itself in the Inter-Class track meet the Miners should have little difficulty in obtaining the long end of the score. It is expected that a large squad of men will be taken, as Coach Dennie expects to use every man who shows ability to win points.

We have always backed our teams to the limit, so let's all go down and out-root Washington as usual. No doubt the Frisco will be sadly disappointed if their freights are not heavily loaded. Do not disappoint them by staying away from the meet.

TENNIS TOURNAMENT STARTS.

The tennis tournament opened this week with four games played.

In the doubles Zook and Hubbard vs. Kohlbry and Cameron, the latter team won, 3-6, 6-3, 6-1.

In the singles Salmon vs. Smith, was won by Smith, 6-0, 6-1.

Hubbard vs. Nudleman, won by Nudleman, 6-3, 6-1.

Walker vs. Zeller, was won by the former, 4-6, 6-4, 6-4.

This series will continue until all contestants have played and winner is picked. There will be a consolation series of all losers of the first round playing runner-up 2nd place. The winners in this tournament will go to Springfield and contest against Drury and Southwest Teachers College at the triangular meet.

Subscribe for the Miner.

CHANGE IN CUSTOM.

About two hundred years ago it was the custom to tell the truth, one example being George Washington, who only told one lie in a life time. Since that time the custom has changed, and when you see "NOTHING BUT THE TRUTH" you will realize how hard it is to tell the truth after getting out of the habit. One of the characters does tell nothing but the truth for twenty-four long hours. He wins a bet and loses a girl by telling the truth, but at the end of twenty-four hours he wins her back again by lying.

"NOTHING BUT THE TRUTH" is going to be staged on Wednesday evening, April 27, in Parker Hall. All the members of the cast have had experience on the stage before, and from the way they are taking hold of their parts, this play promises to be one of the best ever put on here.

What would you do if you had to tell the truth when your best girl asked you if you had ever loved any other girl before? You will know what to say after you have seen "Nothing But The Truth."

The following was taken from The Oredigger, Colorado School of Mines publication:

The other day a young lady was walking along Curtis street wearing one of those transparent skirts. After Christie followed her around for about an hour, he walked up to her, touched her on the shoulder, and said: "Lady, this is Colorado. You're not in Missouri."

We reckon it's supposed to be a joke, but "You got to show us."

If you tell "Nothing But The Truth" you can't even tell a little "white" lie to HER. See "Nothing But The Truth" at Parker Hall Commencement Week.

*the
Only
One*

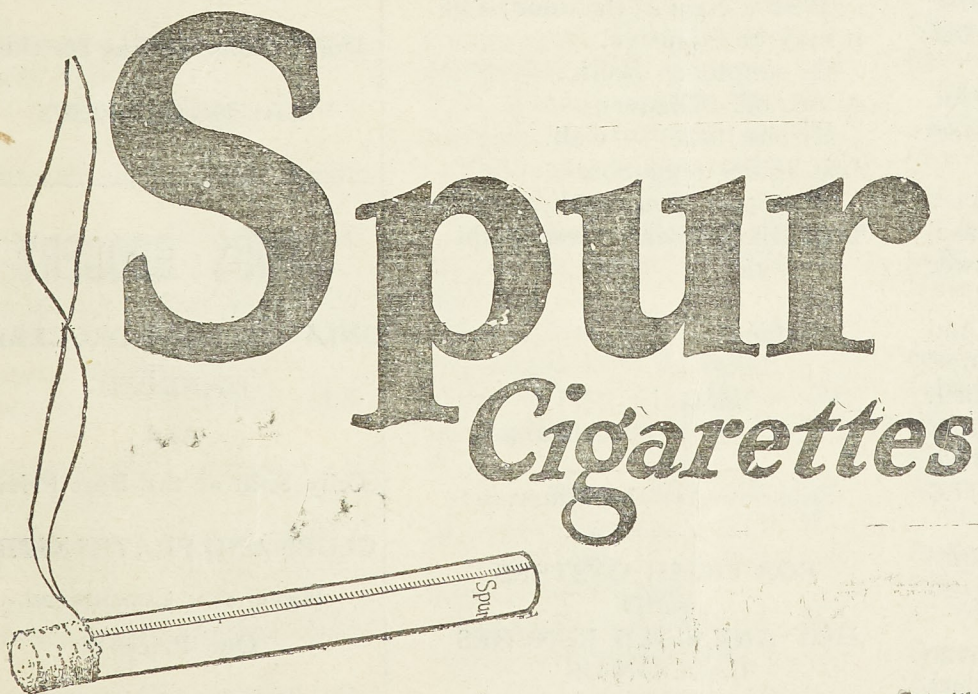

that's

4 leaf blend Crimped

Why not *three* or *five*, instead of *four*? The answer is: "The blend must be balanced." Burley heart-leaf for that good old tobacco taste; rare Macedonian and Golden Virginia for spicy aroma and sparkle; and good old Maryland tobacco for cool-burning.

Have you noticed how much longer, more evenly, Spurs burn? How trim and clean-cut they look? The edges of the paper are *crimped*—not pasted. This patented method is found only in Spurs.

Kolbry second, Smith third. 20
feet 6 inches.

In any event where over
three men are namde, the last
three are not letter men, their

points counting in the scoring
for their respective classes.

AIN'T IT THE TRUTH?

It may be a mansion—
It may be a dump,
It may be a farm—
With an old oaken pump;
It may be a palace—
It may be a flat,
It may be a room
Where you hang up your hat;
It may be a house
With a hole in the floor—
Or a marble hotel
With a coon at the door;
It may be exclusive,
Or simple, or swell,
A wee bit of heaven—
Or one little—well.
Just kindly remember
Wherever you roam,
That Shakespeare was right,
kid,
