INTERESTING YEAR AHEAD FOR R. O. T. C.

The Engineer Unit of the Reserve Officers Training Corps maintained by the War Department at M. S. M. has started off with a rush. From present indications the coming year will be the most interesting and most successful since the installation of the M. S. M. unit.

To date 116 men are enrolled for military training, of which are included 29 advanced course men. The percentage of advanced course men is a good indication of the interest being displayed, inasmuch as the advanced course is not required. The advanced course men comprise 25 per cent of the total enrollment, which is high in comparison with other units over the country.

Both Captain Medding and Lieutenant Wanamaker have been working up a series of competitive formations, and plans have been formulated and perfected whereby the high point men will be compensated for their efforts. Beginning Monday, September 18th, each man will be graded on five different features of his military work. Military bearing will count 15 points, spirit 20, conduct 50, class grades 80, and competitive drill 100 points. In other words, a man having a perfect record would have 265 points to his credit. In order to create additional interest in the work the Military Department has put a silver loving cup up for competition. The grading toward this cup will begin Monday, and will terminate just prior to the Thanksgiving holidays. The individual having the highest number of points at that time will be the recipient of the cup, along with the honor of being the best all-around military man in the unit. In addition to the above, the school has offered a medal for the high point men in pistol marksmanship. Efforts are also being made to obtain a medal for rifle marksmanship.

The Juniors and Seniors will soon be the proud possessors of new uniforms, which have the roll-collar on the coat, and long trousers, in place of the regulation army pants. These uniforms will have service chevrons on

STUDENT ADVISOR CALLS IMPORTANT MEETING.

Saturday evening there convened in the Student Advisor's office a meeting which may have much to do with the future of the student body at M. S. M. During the week Prof. Armsby had been interviewing the different clubs and fraternities, in an effort to get an expression of their opinion regarding politics as practiced by the different organizations, and by the student body as a whole in class and general elections pertaining to student activities.

It is generally known throughout school that there is bitter feeling between the Fraternity and Non-Fraternity men. It is the Student Advisor's plan to investigate the feeling, determine as far as possible its causes, and try to find a solution of the problem. As a result of Prof. Armsby's efforts, a committee of men from the Fraternities, Clubs and Independents met for a preliminary discussion.

The detailed proceedings were not made public, but it was learned through authentic sources that the meeting was characterized by a pleasing degree of concord, and that the basis for possibly a complete discussion of the problem was laid. Plans, of a general nature, were laid for the elimination of politics of a destructive nature in elections. The representatives voted to refer the proceedings of the meeting to their respective organizations for approval before attempting anything further.

BUREAU OF MINES NOTES.

Chas. E. van Barneveld reported for duty as the Superintendent of the Mississippi Valley Experiment Station of the Bureau of Mines on August 21, taking the place made vacant by the death of Mr. George J. Salmon, the former superintendent. Mr. van Barneveld will have headquarters in St. Louis, but will have supervision of the laboratories here at Rolla.

Mr. van Barneveld was born at The Hague, Holland. He is a graduate of McGill University, Montreal, Canada. After six years' general experience as assayer, surveyor, mill foreman, mine superintendent and consulting engineer in Arizona, New Mexico, California,

ROLLA HAS POWERFUL RADIO SETS.

Edwin Long, the popular owner of the Long garage, is the owner of one of the finest equipped radio sets in this part of the country. He has heard very distinctly programs given at Atlanta, Ga.; Washington, D. C.; Pittsburgh, Pa.; Pine Bluff, Ark.; Davenport, Iowa, Detroit, Mich.; St. Louis, Mo., and many others too numerous to mention. Bulletins of weather reports, stock quotations, and interesting news items, received by radio, have been placed in the window of the Long garage for the benefit of the public. Luman Long, Mr. Long's second son, has become quite proficient in the operation of radio.

Mr. M. F. Faulkner also has a radio set, and has been able to listen to radio programs given hundreds of miles away. Both Mr. Long and Mr. Faulkner are enthusiastic supporters of radio work.

IMPROVEMENTS AT THE MINE.

The gyratory crusher and the set of rolls which were formerly a part of the Ore Dressing Lab., have been installed at the M. S. M. mine. A ½-inch trommel which was received from Joplin, Mo., has also been installed there. In the future the study of rock crushers and their performances, which is a part of Ore Dressing Lab., will be conducted at the mine instead of in the lab. on the campus, as was the practice formerly.

nia, Colorado and Mexico, he joined the faculty of the University of Minnesota as head of the Department of Mining Engineering. He remained in that position for 14 years, until 1913, when he accepted an offer of the Directorship of the Department of Mines and Metallurgy of the Panama-Pacific International Exposition at San Francisco. At the close of the Exposition he spent one year in the Sierras on an extensive hydraulic mining project. On January 1, 1917, Mr. van Barneveld joined the staff of the U. S. Bureau of Mines as Superintendent of the Southwest Station at Tucson, Arizona, where in conjunction with E. S. Leaver he developed the sulphur dioxide leaching process for oxidized copper ores.

Continued on Page Two.

Continued from Page One.

the left sleeve near the cuff, at an angle of 45 degrees, to designate the service each man has had in the R. O. T. C. Unit. The chevrons will be 2 inches by 16 inches. One black chevron denotes one year's attendance in the unit at school, and one white chevron with red border denotes attendance at one R. O. T. C. Engineer's Training Camp, held each summer by the War Department. These new uniforms will arrive within the next two weeks so it will not be long before everything is in full swing.

The cadet officers for the ensuing year are as follows:

Major, H. E. Zoller.

Adjutant, D. G. Gieson.

Co. A.

Captain, B. F. Hoover.

1st Lieut., W. C. Lay.

2nd Lieut., B. R. Mennie.

Co. B.

Captain, J. M. Reeves.

1st Lieut., V. H. Webster.

2nd Lieut., J. M. Wanemacher.

Advanced Course Platoon.

Captain, E. R. Tragitt.

2nd Lieut., A. B. Parkhurst.

"BARNEY G." (J. P.) BRYAN SUFFERS ACCIDENT.

By special correspondent.

"Barney Google" Bryan had a near serious accident last Sunday morning when returning from church. Some friends passed by in a car and asked him to ride, and in attempting to climb in while the car was moving Barney inadvertently grasped hold of the front door, which flew open. He was dragged some ten feet, and finally lost his hold, nearly falling beneath the rapidly moving car. The rear wheel passed over Google's left leg above the knee, cutting it badly, and spraining his ankle. As a result Barney has been sojourning on a pair of crutches the past week. Incidentally the car was a Ford, and was driven by a Freshman. As a result Barney says his accident has a moral, viz: Beware of Fords and Freshmen.

SPARK PLUG.

DR. L. E. YOUNG ELECTED MINE CO. HEAD.

Dr. L. E. Young, Director M. S. M. 1907-1913, has been elected President of the United Colliery Company, a corporation operating coal mines around Duquoin, Ill., to fill the vacancy caused by the resignation of Eugene McAuliffe.

It is understood that Dr. Young will retain his present position as head of the steam department of the United

Electric and Power Company.

SENIOR CLASS.

At a meeting of the Senior Class last Wednesday W. S. Frame was elected president, H. S. Pence vice-president, A. A. Boyle secretary, R. E. Murphy treasurer, and I. P. Freely sergeant-at-arms.

Mr. Mosby presided over the meeting until after the election of the class officers, and then turned the meeting over to the president. Mr. Frame gave a little talk, and the meeting broke up.

The meeting proved a farcical comedy from beginning to end. Nearly every member of the class was nominated for the different offices, so that in every case the results were close.

The feature of the evening was the suggestion of Mr. Gatts that the class as a whole participate in a stag party time after football season to celebrate our last year at the Missouri School of Mines.

BOOKS ADDED TO LIBRARY.

Since May 1, 1922, one hundred and fifty-three books, whose subject matter ranges from Ornithology to Industrial Chemistry, have been added to the M. S. M. library. Twenty-two of these books have direct bearing on engineering, five on metallurgy and chemistry, six on mathematics, seven on geology, eight on sociology and economics, and lastly, for the benefit of the student who requires mental relaxation, there are twenty-seven volumes of fiction, which are donated by reading clubs.

SOPHOMORES.

The first meeting of the Sophomore Class was held in Norwood Hall Thursday evening, Sept. 7, at 7:30 o'clock. The chief purposes of the meeting were the election of officers and the completion of unfinished business from last year. There are several bills which were incurred last year that are still unpaid. To settle these accounts and to enable the class of '25 to have some money in the treasury each member of the class has been assessed the sum of \$1.00. All dues and assessments should be paid to L. Shire.

Sophomore collegiate Vocates are extended an invitation to join the Class of '25.

NOTED LECTURER TO APPEAR.

Miss New Jersey will give her world famous lecture on "A Study in Contracts" at Mass Meeting next Friday. The subjects for the lecture are "Slim" Updike, "Spoof" Walker, "Duke" Arra.

GOLF TOURNAMENT.

Monday, September 18th, Will Be the First Day of Match Play.

For the benefit of those who do not know the expressions of golf, eighteen holes constitute one round.

The schedule of play is as follows:

First round, Sept. 18th.

Second round, Sept. 25th.

Third round, Oct. 2nd.

Semi-finals, Oct. 9th.

Finals, Sunday, Oct. 15th, of thirty-six holes, eighteen to be played in the morning, and eighteen in the afternoon. All matches must be played by five o'clock Sunday afternoon of the week designated for the match. Failure to do means default. Under all conditions a match must be completed after once it has started.

ATTENTION of all contestants is requested in regards to the rules on, touching or destroying anything living, and as to what constitutes an unplayable ball.

TO AVOID ALL ARGUMENTS, SINK ALL PUTTS.

Pairings for the first round:

CHAMPIONSHIP FLIGHT.

W. F. Pond, 14, and F. B. Foley, 24.
C. Y. Clayton, 19, and H. Moore,

26.
Fred Matlack, 28, and E. M. Parker, 27.

H. H. Armsby, 19, and D. F. Donahoe, 19.

F. E. Dennie, 19, and E. T. Campbell, 24.

C. R. Cameron, 24, and T. T. Ranney, 26.

G. G. Harris, 27, and C. J. Monroe, 24.

J. M. Southgate, 27, and L. Thomy, 10.

Clas A Flight.

Fred Sevier, 30, and P. M. Brown, 34.

W. B. Miller, 40, and W. O. Keeling, 42.

W. L. Medding, 42, and——bye.

D. Kennedy, 40, and Maj. Cooke, 36.

Kilgore, 40, and N. M. Rountree, 32.

Kershner, 36,——bye.

R. T. Muench, 42, and Dunlap, 38.

H. R. Powers, 32, and R. G. Kasel, 30.

Coach Dennie would like to have all track men interested in the Inter-Class track met and the annual Dual Cross Country meet with Central College to report at his office on Tuesday afternoon at 4 o'clock.

ROOM FOR EVERY ONE.

The school has one of the finest gymnasiums in the state, so let's take advantage of it. The equipment is as good as can be had. If you have had experience in gymnastic work, continue the work and interest others. If you have been interested in track, come up and get a suit and go to work. As the situation stands now, every branch of sports needs more entrants. If you have some qualifications, and do not come out, you are doing both yourself and the school an injustice. Use the gymnasium, it is better to wear it out than to allow it to rot out.

It can be truthfully said that golf has taken M. S. M. by storm. This was to be expected, with a course as good as can be found in the State. The fairways are in excellent shape, and the greens are fair.

With the great number playing it is essential that each player do his part to expedite the play. When parties go out with less than a set of clubs for each participant, they should permit other players to go thru. It is not fair to hold up a party that is playing a faster game. A foursome at all times has the right of way.

While golf is a game which is not a hazardous one, nevertheless the golf course is a poor place for children. For the safety of children members must leave them at home.

Mr. Kessler, of the boxing squad, has arranged to write for the Post-Dispatch, of St. Louis, on events pertaining to boxing and wrestling. Kessler will also write for the Miner on the same subjects.

The fall Inter-Class meet will take place on October 28th. The cross-country team will go to Fayette, Mo., on Nov. 24. It is the aim of the track coaches of both schools to extend an invitation to other conference schools to enter a team, with the eventual aim of making the cross-country meet an annual conference event.

A. V. Doster, class of '25, and formerly of the U. of Southern California, comes here with the reputation of having been a member of the U. of S. C. boxing team, in the 125-lb. class.

THE FACTIONS OR M. S. M.?

Politics is based primarily upon differences of opinion upon matters that come up for decision by popular election. A very necessary quality of a political party is that they be constructive in their being and actions; that they work toward the common good. When a political party becomes destructive in policies and actions, and fails to take into account the common good, then that party degenerates into a faction, and no longer justifies its existence.

It is a regrettable fact that politics at M. S. M. is now dominated entirely by factions. Were the factions alone concerned it would be as well to let them fight the matter to a finish. That, at least, would be one form of settlement. But there are other things to be considered besides the factional interests. The good and well-being of M. S. M. is the paramount issue, and, since the factions do not consider M. S. M. first, it is time the fight was stopped.

The split in the student body is between the Fraternity and Non-Fraternity men—a point of social difference. Social organizations are to be commended, for within them a man may find fellowship, recreation, and expression for his personality. But, social organizations are secondary to the school always, and when any body

of that kind attempts to place its interests first, it is time a halt were called. In the controversy each side claims to have rights and privileges to which the other will pay no attention. They claim they are fighting for their right to exist! From such statements it would seem that there is considerable mental aberration among the individuals of each group.

Surely there is room for both social groups in school. The fact that there is a bitter fight certainly does not speak well for the amount of intelligently constructive effort expended by either side. Both must admit that the interests of M. S. M. are paramount; further that for the best support of M. S. M. the combined efforts of all are needed. In the last analysis, it is a question of loyalty to the school. If the individuals concerned are of the degree of intelligence usually looked for in a college student, surely they can forget their selfish and secondary interests for the one big issue at stake.

The efforts of the Student Advisor to bring about an agreement between the two factions is to be highly commended. It is too soon to discuss detailed plans for a settlement of the present disputes and the rejuvenation of clean politics at M. S. M.; neither is it the purpose of this article to suggest plans. The loyalty to M. S. M., proven in so many instances, needs waking once more. Once that is done, there is power enough in that to settle the matter, be the details of the plan what they may.

A REVERSAL OF TACTICS.

Since the opening of the present football season the Miner has been a close observer of the tactics used in the formation or building up of this year's squad by the Athletic Department. While we are not in a position to discuss the chances of success of the squad, we can, at least, voice our sentiments of the new team. It would appear, from the outside, and we are glad to use the word "outside," that the new mentor of football has set his foot down on certain matters relative to the conduct of his men, and the general conduct of the student body. True it is, that it is a reversal of form, but we only hope that the Coach will keep his foot down. Heretofore too much familiarity of the wrong nature has done much to hinder the success of the team. We have always had the tendency to receive with open arms any new comer, and, as a rule, we have been just as prone to kick him down once he slipped.

Another of our shortcomings has

been the desire for undue publicity for our team, both as a student body, and as individuals. If our football squad merits support, as a team or as individuals, let it be shown by action, not by words. Why tell the world about it? It only serves to make the squad over-confident, and the other fellow on the alert. Our team will receive all the publicity it needs if it proves in action that it merits it. Let the world tell us how good our team is, and let our team show the world that it is good. Action always speaks louder than words. Let us have no more long-winded write-ups about the unbeatableness of our team.

Again, let us say that we trust the business-like attitude of the Athletic Department will be continued during the athletic season, not only in regards to the conduct of the student body toward athletics, but in regard also to the conduct of the men composing the squad.

A NOTICEABLE CHANGE.

It has been a practice in the past of the majority of the newspapers in the State, and some other states, to refer to our school as the Rolla School of Mines. This year, however, the school is being referred to by its proper name, Missouri School of Mines. Let every one use his influence and his care to see that the correct name is used.

A LETTER FROM THE
STUDENT ADVISOR.

September 17, 1922.

The Editor Missouri Miner,
Rolla, Mo.

Dear Sir:

It is quite generally known that I have been meeting with the clubs and fraternities during the past week, and have been talking with them on the subject of school politics. I would greatly appreciate an opportunity of presenting my views through the columns of your paper to the large number of men having no club or fraternity affiliation, whom it is very difficult to reach in any other way.

First of all, I desire to state emphatically that I am not representing the faculty in the matter. The faculty in its official capacity has no interest in the matter, which is purely a student matter. If certain members of the faculty take a part in the discussion, they do so as individuals, not as representatives of the faculty. My status is merely that of an individual who is greatly interested in student activities and student welfare, and my only motive is a desire to help the students make their various activities

'22 H. L. Childress is superintendent of the Prairie Dog Mine at Picher, Okla.

C. E. Heinz is engaged in engineering and assay work at Picher, Okla.

Ex-'24 Joseph Castelli is principal and athletic director of the high school at Crocker, Mo.

'12 D. I. Hayes is in the engineering department of the American Zinc Company at Mascot, Tennessee.

more efficient and more useful to the student body.

Secondly, I am absolutely non-partisan. My activity in the matter originated within myself, and was not prompted or suggested by any one else. I have no vote in student elections, have no right to one, and do not wish for one. I am not interested in helping either "side" in the present controversy, but rather in eliminating the "sides," and in having elections made by the Student Body rather than by factions.

I do not denounce politics as such. Politics are necessary, and to my mind desirable. But in a small school like this, with its democratic spirit, where every one knows every one else, I believe that politics should be based on candidates as MEN, instead of as members of small groups within the student body.

To use the Junior Class as an example: When men are being elected to office, I consider that each Junior should ask himself, "Which man is the best MAN for the office? Which man will do the most for the JUNIOR CLASS?" In other words, each voter should attempt to elect, not all Independents, or all Fraternity men, or 50 per cent of each, or any ratio, but 100 PER CENT JUNIORS, and should pay no attention at all to the organiza-

Ex-'22 A. B. Watts is assistant project engineer for the State Highway Commission, at Marble Hill, Mo.

'19 Walter Scott and John Gross will present a paper, "Charcoal Precipitation of Cyanide Solution," at the San Francisco meeting of the A. I. M. & M. E. this month. Scott is chemist at the Rare and Precious Metals Station of the U. S. Bureau of Mines, at Reno, Nevada.

J. G. Miller, B. S. in Met., '21, and B. S. in Mining, '22, was united in marriage with Miss Genevieve Reynolds, of Rolla, Mo., on June 19, 1922. Mr. Miller is now employed with the Iron Mt. Mining Co., Iron Mountain, Mo., as mill foreman.

B. E. Charles, '21, reports that progress in mining in San Jacinto, Chihuahua, Mexico, is very slow. Aside from being fifty-five miles from a railroad, and getting mail service two times a week, he thinks the place is fine. It will be remembered that it was in this mining camp that the Mexican bandits did so much damage during the past Mexican revolution.

tions to which a man may or may not belong. In class matters, all the voters are JUNIORS, and as such should all be equal.

If this spirit could be instilled into the student body, there would still be politics, for there are always honest differences of opinion among any body of men. But the politics would be based on MEN as JUNIORS, and this would result in the election of the man whom the majority of the class honestly consider to be the best MAN for the JUNIOR CLASS, and any man with sufficient intelligence to be in college should be man enough to abide by the will of the majority, honestly expressed.

I have used the Junior Class as an example with no intention of criticizing that class or of intimating that it is any force than any other organization. The same things will apply to any student organization, by merely writing in its name in place of "Junior Class."

If this spirit can be instilled into the student body, and if every man will be a MAN, stand on his own feet, and vote his own honest personal convictions, I am firmly convinced that all the student organizations can be put on a much higher plane of efficiency, and that the Missouri School of Mines will enjoy success never before at-

VOCATES.

There was much commotion at the Vocate office Friday and Saturday. All men taking training in the Vocational Department were re-registered, according to the new schedule now in operation.

J. J. Ryan, of the District office, will be here next week. Any one wishing to talk matters over with him, take note.

The Vocational Department is now able to handle all men sent down for training. There has been a lull in the enrollment here for some time, due to inadequate facilities. About 30 new men are expected to enroll within a short time.

Eight men have been transferred from the Topog class to the Highway class. This transfer was made due to the fact that Congress has not as yet passed its appropriation to carry on Topographical mapping. These men have completed their course in Topog, and, as soon as the appropriation is made will be transferred to the United States Geological Survey.

Miss Clara Bowen has resigned as assistant stenographer in the Co-ordinator's office, and accepted a position as stenographer for Prof. Garst.

Neal Ham has been added to the office force of the Co-ordinator.

Co-ordinator Ragle desires a meeting with all collegiate Vocates next week. Take notice and watch the bulletin boards.

All men out on placement training will be back in school Nov. 1.

The Disabled Veterans held their first regular meeting of the school year Thursday evening at the K. of P. hall. It was decided that a smoker, including many interesting numbers on the program, would be the feature at the next regular meeting Sept. 28th. All members requested to be present.

The V. F. W.'s held a very interesting meeting last Saturday night. The initiation of new members took up most of the program. Some were more "ceremoniously" received into the order than others; however, all the available stretchers were used. The following men were initiated: Co-ordinator Forest S. Ragle, Thomas H. Beck, Wm. L. Miller, Edw. L. Smith, Chas. W. Thatcher.

Mr. F. B. Foley, of the Bureau of Mines Experiment Station, will address the St. Louis Chapter of the American Society for Steel Treating on Monday, Sept. 18th. His subject is "Annealing of Steel."

Mr. Foley will also present a paper

Simon says he has not been able to ascertain yet whether D. D. M.'s means:

Damn Dirty Miners.
Dumb Darling Minks.
Don't Drop Mechanics.
Do Drop Mechanics.
Do Dirty Makeup.
Dependence Don't Matter.
Dependence Does Matter.
Mem 'Dar' Mimickers.
Dew Drop Middies.
Devilish Dice Mongrels.
Diplomatic Dignity Misused.
Direct Discord Maintained.
Dissatisfactorily Distilled Mash.
Dort, Dodge, or Moon.

Prof. Cambiaire (meeting a young lady on the street: "Good morning, Miss ———. You are much stouter than you used to be."

The American women like flattery, Prof., but not that kind.

If you don't get your Miner on time, don't tell us about it. Tell your friends not to send so many post cards. Remember the post office clerks are only human, and can not read the cards and put up mail at the same time.

**5 PER CENT
 ON TIME DEPOSITS**

As you learn how to master your savings account, you are learning how to manage other people and things.

Build that balance steadily.

Rolla State Bank

ROLLA, MISSOURI

In the instrument laboratory last week the following new instrument was discovered by a Freshman. He was looking for something that sounded like a "Range Pole," but this is what he signed up for: "Wrench Ball."

It is the general opinion on the campus that Lay worked a muck stick last summer, because of the calloused condition of his hands. Not at all. He bunked with Prof. Dake on the geology trip.

Any one unacquainted with the peculiar immensity which characterizes Seiver's extraordinary heterogeneous conglomeration of eccentricities peculiar to his vocabulary is apt to fail to construe or comprehend the meaning thereof. In the vulgar tongue, Seiver, talk United States.

Wonder what Sam Lloyd's favorite subject is this year?
