THE MISSOURI MINER.

Missouri School of Mines and Metallurgy, Rolla, Missouri.

Volume 9, No. 5.

October 2, 1922.

Price, 8 Cents.

GOOD TURN OUT FOR M. S. M. RADIO WORK.

In response to the article in last week's issue of the Miner about eight men have signified their desire to take part in a radio program by turning in their names to the Physics Department. Not all of these men are experienced operators, but with the experienced men acting as instructors, and breaking in the men who have not heretofore had a chance to learn, we should soon have a well organized force.

A new aerial was installed a few weeks ago, which eliminated the noises which had been heard up to that time. Here is the point: the amount of appropriations that Dr. Woodman is able to get for this work depends entirely upon the interest shown by the student body. If enough enthusiasm is stirred up, and enough men signify their desire to take up the work, more apparatus will be requisitioned, and this will in time lead up to the installation of a sending set.

Radio is the most popular of the recent inventions, hence every engineer should have at least a practical knowledge of the work.

DR. BITTING SPEAKS.

Dr. W. C. Bitting, of St. Louis, spoke before a mere handful of students in Parker Hall last Thursday. Classes were to have been dismissed at three o'clock in order that the students could avail themselves of the opportunity of hearing him speak, but even with this promise the Seniors were the only class to have a good representation.

Dr. Bitting gave a splendid talk upon the meaning of religion, and it is a regrettable fact that his audience was so small.

In the evening he was the honor guest at the Methodist Engineers' banquet, and after a luscious repast he entertained the banqueters with clever stories of experience and humor.

H. & S. INSTALL RADIO SET.

Believing that it is easier to work and loaf to the tune of high-powered jazz-band, or the mellow refrains of an opera star, the Students' Store has installed a new radio receiving set. The new Western-Electric loud talker,

RESULTS OF FRESHMAN SPECIAL EXAMINATIONS.

The results of the special examination given to the Freshman Class are as follows: On the Technical Test the average for the 68 men taking the test was 56, the highest individual score being 94, and the lowest 31. The average score made by 6700 Freshmen in 43 Engineering Schools is 62. This apparently indicates that our freshman class is slightly below the general average of Engineering Freshmen in technical knowledge.

On the test for quickness of thinking the average score made by the 68 men taking the test was 93, the highest individual score being 142, and the lowest 55. The average for 6700 Freshmen in 43 Engineering Schools is 89, apparently indicating that our Freshmen can think a little faster than the average.

The general experience with these tests in other schools has been that men ranking low in these tests generally rank low in their school work, though not always, and that men ranking highest in these tests usually lead their class in scholarship. However, these statements are correct only for the general average, and cannot be expected to apply to every individual case.

The third test, for judgment, indicates that the members of the Freshman Class on the average have as good judgment as the average college student, although there are some very notable exceptions.

On the whole, our Freshman Class seems to be about on a par with the freshmen of other engineering schools. It will be interesting to compare actual accomplishments with the predictions of these tests.

Any Freshman who wishes to may obtain his standing in the tests at this office. No papers will be returned.

H. H. ARMSBY,
Student Advisor.

with which it is equipped, makes the broadcasts audible from the store's circulating library to the bleachers on the gridiron, thereby entertaining the students during whatever task they may be performing at the time when the big sending stations are broadcasting.

WASHINGTON GAME MAY BE BROADCASTED.

In reply to an inquiry by Mr. McBrien with regards to the possibility of broadcasting the Miner-Washington game results, the St. Louis Post-Dispatch has announced that if suitable connections can be made to get the dope from Francis Field to the P.-D. sending station they would be glad to broadcast it. If the special train goes through the necessity of getting this news red hot will be minimized; however, if the special train proposition does not materialize, suitable arrangements will, no doubt, be made with the Post-Dispatch. Watch the bulletin boards for further announcements.

EMMONS FELLOWSHIP AWARDED M. S. M. ALUMNUS.

John S. Brown, '17, Associate Geologist with the United States Geological Survey, has been awarded the Emmons Geological Fellowship by the University Council of Columbia University, New York City. This fellowship, established as a memorial to Samuel Franklin Emmons, is awarded annually by a committee of three leading economic geologists. At present the committee consists of Professors Kemp of Columbia University, Bate-man of Yale University, and Lindgren of Massachusetts Institute of Technology.

The fellowship carries a very liberal stipend, and is intended to encourage research on ore deposits. The recipient is privileged to carry on his research at any institution of first rank in the United States.

Brown has elected to do his work at Columbia, where he will become a candidate for the Ph. D. degree. He will study the origin of graphite deposits, and has spent the late summer in Alabama gathering field data for his problem. He has had a field conference with Dr. Kemp, and the two spent some time with another M. S. M. alumnus, J. C. Bartin, '17, who is engaged in developing graphite deposits in Alabama.

Brown received a Master of Science degree from George Washington University in June, 1922. He matriculated at Columbia a few days ago.

MEETING OF THE VETERANS
OF FOREIGN WARS.

In the future regular meetings will be held at the K. P. hall on the first and third Thursdays of each month. The next meeting will be held on Thursday, October 5th, at 7:30 P. M. We have a number of likely candidates to initiate on this night, so be there and help put on the work.

JUNIOR COMMENTS.

It has been rumored that "Barreihouse" Blount tore out the pages of a certain book as he read them so as not to lose his place. Why not before reading?

"Tex" Magalis is overworking his hand instead of his head in geology. "Look out for callouses somewhere else, Tex!"

Dave Flesh is now changing from Synagogue to Holy Rollers. You seem to be getting quite a kick out of Holy Roller meetings here lately.

"Snipe" Schaeffer says that the last batch was the best.

The theoretical juniors, seemingly, had a meeting Sunday night, according to the number of empty mason jars and bottles lying around Monday morning.

Subscribe for The Missouri Miner.

SOPHOMORES.

Attention, Freshmen. Probably you are not acquainted with the fact that one of your duties as Freshmen is to attend Mass Meetings and assemblies. At Dr. Bitting's lecture on Thursday afternoon there were six Freshmen present. This is a mighty poor showing, Class of '26. You may have been unaware of this particular duty of yours, but, Freshmen, don't let it happen again.

The attendance at football practice of the Sophomore team has been very poor. There has never been more than a dozen men present any night since practice started. Let's get behind this thing, men, and every one do his share. No one is deriving any personal benefits from it, but it is to uphold the honor of the Sophomore Class. So let's all go out to practice, which is held in front of the Chemistry Building every afternoon at four o'clock.

We call your attention to the announcement of the Opening of the VICTROLA DEPARTMENT by J. A. SHILMAN. Here is a chance to get some records FREE, and to boost this department, of which the students and citizens of Rolla are proud.

MEETING OF GRADUATE
STUDENTS CALLED.

For the purpose of transacting some business pertaining to graduate students, it is desired that they meet in the Mining Lecture Room (Room 106, Norwood Hall) Wednesday at 7:30 P. M. The following men are known to be graduate students, and are expected to be there. If there are any others, they are wanted also. W. J. Darby, M. L. Frey, J. B. Butler, D. S. Mosby, E. S. Wheeler, C. V. Mann, C. J. Millar, E. J. McNely, G. F. Barnwell, M. W. Wallace.

METHODIST ENGINEERS

GIVEN \$100,000.00.

The Methodist Church here was given \$100,000. at the recent conference for the purpose of building a new church and turning the present building into a student center. The new church will occupy the whole block on which it now stands. Work will start in time to have the old building in readiness by the opening of school next year.

This is being done in the name of the Wesley Foundation, which is already established in many university towns, notably universities of Illinois, Wisconsin, Minnesota, and Penn. State.

BUREAU OF MINES NOTES

Francis B. Foley has been transferred from the North Central Station of the Bureau of Mines, at Minneapolis, Minn., to the Rolla laboratories of the Mississippi Valley Station, where he will carry on work the Bureau is doing in co-operation with the Missouri School of Mines and Metallurgy on the investigation of drill steel.

Mr. Foley is a graduate of Girard College, and after graduation was employed by the Midvale Steel Company in their research department. In 1917 he joined the faculty of the University of Minnesota, assisting in the Department of Metallography of the School of Mines, resigning in 1918 to take up work in connection with the War Materials Investigation. From July, 1918, until the close of the war he was engaged with others in an investigation of the blast furnace practice of companies engaged in the production of ferro-manganese, and in addition collaborated with Prof. C. Y. Clayton in an investigation of defects in army ordnance. In 1919-20 Mr. Foley worked with the late Prof. H. M. Howe, at Bedford Mills, New York, on a study of the effect of the rate of cooling on carbon steel, and later, while at the Minneapolis Station, completed an investigation of the occurrence of Neumann bands in steel. At Minneapolis he also carried on work in connection with the drill steel investigation of the Bureau. He has been actively engaged for some time in the work of several committees of the National Research Council.

Because of the interest displayed by the Missouri School of Mines in the improvement of drill steels, and the facilities which this school offers for the study of general drill steel problems, the Bureau has transferred Mr. Foley from Minneapolis to Rolla, where he will co-operate with Professors Clayton and Forbes in this investigation. Prof. Clayton and Mr. Foley made a trip recently through the mining districts of Michigan, Minnesota, Arizona, California, Nevada, Utah, Idaho, Montana, South Dakota and Missouri, in order to make a study of the methods of handling drill steel at the mines.

Professor Chas. Y. Clayton and Mr. F. B. Foley are attending the convention of the American Steel Treating Society at Detroit this week.

Dr. C. H. Fulton and Mr. B. M. O'Hara attended the meeting of the committee for the International Standardization of Zinc at New York, beginning Sept. 25th.

The work of the drill steel survey is still going on. During the latter part of the work Professors Clayton and Forbes traversed the Southeast Missouri Lead District to study drill steel conditions there. About ten days before that they made a similar survey of the Tri-State District. Much data is being collected on the subject, and it is hoped that some general method for heat treating both bits and shanks will be developed whereby the uncertainty now connected with the process will be eliminated.

IMPORTANT VOCATE MEETING.

There will be a regular meeting on Tuesday, October 3rd, at 7 P. M. sharp. There are a number of important issues to be brought up, which include the staging of a Smoker De Luxe in the near future. If you are interested in putting on something big at a small cost to each individual Vocate, turn out and help to make the arrangements.

RECENT ADDITION TO**TEACHING STAFF.**

One of the recent additions to the teaching staff of M. S. M. is that of Mr. Barnwell, of the Geology Department. Mr. Barnwell is a graduate of the University of British Columbia, with a degree of B. A., later receiving the degree of B. S. at the University of Wisconsin. He has also been in the field, having worked at different times on the Canadian Geological Survey. We wish to welcome Mr. Barnwell, and we feel that he is a valuable addition to M. S. M.

PIPE AND BOWL CLUB**ENTERTAINS.**

On Saturday night, Sept. 22nd, the beautiful Baysinger home was the scene of a delightful dance, staged in honor of the following pledges to the Pipe and Bowl Club: W. B. Crutcher, D. N. Griffin, D. L. Moodie, L. M. Tidd and F. C. Schneeberger.

**QUO VADIS ANNOUNCES
PLEDGES.**

At a recent meeting the following men were designated as having the proper qualities which are in keeping with the elite of the organization, and which may be beaten into a shape such as will qualify them to wear the emblematic tin can at a rakish angle on their heads: W. R. Groschan, J. G. Huckins, C. L. Kemper, B. Samples, F. C. Schneeberger.

Hubbard (in Oil and Gas): Prof., can I take oil without the gas?

MY GUIDE.

Found among papers of Thomas Van Alstyne, electrical engineer for Westinghouse Co. Died at Hanley, Canad, October, 1913.

To respect my country, my profession and myself. To be honest and fair with my fellow men, as I expect them to be honest and square with me. To be a loyal citizen of the United States of America. To speak of it with praise, and act always as a trustworthy custodian of its good name. To be a man whose name carries weight wherever it goes.

SPORTSMANSHIP.

The student body has been told, in just so many words, that it is guilty of an act of poor sportsmanship. It is no trivial matter, nor one to be laughed at, when the authorities of a university of the calibre of Washington U. pronounces such a scathing sentence. And we would be "poorer" sports if we denied it. In this matter, however, as is usually the case, the many suffer for the misdeeds of the few.

The majority of the student body knows how to conduct itself when on a visiting athletic field, but where group activities are considered there are not a few who do not know, or

else knowing, do not practice good conduct away from home. Of course, such actions should reflect on those few, but it never does. Always the group is judged. And that is what has happened in our relations with Washington U.

We hold no brief for those individuals who, by their conduct last year, placed our school in the wrong light with the authorities at Washington U. Neither do we hold anything against Washington U. for their stand in this matter. They have done as we, no doubt, would do, yet we do not care to see a whole student body branded for the acts of a few. Furthermore, we do not believe that Washington U. considers our student body as a whole in a group that tolerates such action; yet outwardly, as a matter of policy, they must assume that attitude, and we must suffer for it.

Next Saturday we will be given an opportunity to redeem ourselves. Some of our number may still not be gentlemen enuf to respect Washington U.'s position in this controversy. Should last year's actions be repeated there is no doubt but that athletic relations will be severed. If the latter should happen the blame will rest, not upon our athletic management, and not upon the student body, but upon a few individuals who have the privilege of calling themselves a part of the student body. And these few men can be easily spotted, and should be dealt with accordingly.

We are not trying to pin white ribbons on our coats, neither are we going to the game tied to our mother's apron strings, but we do think it due our hosts, due ourselves as men, due our team and school, to conduct ourselves as men should. We may not wear white collars, we may be Miners, we may "bum" to the game, feel dirty, be dirty and greasy, still that does not occasion the use of vile oaths in the presence of decent men and women, such as will be at the game. A man can be a gentleman even tho in rags, but vulgarity will out, even tho clothed in a dress suit. Which class are you going to be in next Saturday? We believe the "Student Body" can beat Washington U. at its own game, both on the field and in the bleachers. It's worth trying, at least.

HONOR AND THE ENGINEER.

If a doctor told his clinic the truth when he was called in (it would probably be the last time he was called there. If a lawyer told the truth when he was consulted—well, that is not what he is paid for. But when an engineer is consulted, the truth is

wanted. His report must be reliable as well as accurate.

A certain geologist who claims the honor of discovering the greatest salt field in the country today will not be employed by any company in the United States. He is considered one of the best geologists we have, but when he was sent by a firm to investigate what proved to be this large salt deposit, he tried to use the information obtained for his personal gain. His plan failed, and now he might as well be the worst geologist in the country.

We who are studying to be engineers should realize the responsibility the community reposes in us. If honesty is as important as knowledge, we should learn it here. Last year a lecturer told us many schools had to discontinue the honor system because there was not enough honor in the school to keep it up.

Why not let the world know M. S. M. as more than a school that trains engineers? Let the world know it as a school that turns out honest engineers, engineers who realize the trust reposed in them, and are proud of it. If there is no honor in M. S. M., we might as well not be engineers. If we are going to be engineers, let's be real engineers.

AN INEVITABLE RESULT.

The present political system in vogue at M. S. M. has brot its inevitable results. During the Junior Class election a split in the class was threatened, and a split has actually occurred in the Sophomore Class. If such things continue, soon there will be no possibility of concerted action by the classes or by any other body composed of both fraternity and non-fraternity men, and much of the important functioning done by the student body is done thru the classes.

A faction is necessarily narrow, selfish, and egotistical. Therefore, such things as recently took place are to be expected under the present system. Factional aims, interests, and fancies are the paramount issues; the common interests and the common good are secondary at best, and can be forgotten entirely if need be! Therefore much mud-slinging in regard to this latest move may be expected.

It is still the question of the faction or M. S. M., and whether the various members of the student body have the good sense to see it as such. Factionalism, like a cancer, has been growing here for a long time; it has driven its roots deeply into the tissues of the organization of the student body, and has sent its deadly poison into every fiber of the structure. As a result it

is impossible for many men to think in terms other than that of the gang TO THEM THE IDEA OF LETTING A QUESTION STAND OR FALL ON IS MERITS OR DEMERITS AS A QUESTION OR THE IDEA OF LETTING A MAN WIN OR LOSE ON HIS MERITS OR DEMERITS AS A MAN, IS PREPOSTEROUS. They fail to see that when they cast aside the fundamentals and act on artificialities they are heading for discord, strife, hard feelings, and finally the collapse of the entire system thru

which the student body functions. Would it not be better to stop short of the latter?"

A system is necessary, and so when the dangers of the present course are becoming so apparent, would it not be better to institute some changes while there is yet some chance of their being effective? At present the idea seems to prevail that all the men are crooks, and must be watched continually. One man does not trust his neighbor, and it looks as if one man does not consider another as

being capable of rendering an intelligent decision! The result is that we have a system which would be admirable in city wards, where the dirtiest dealer is the biggest man, but is abominable among a group of men who are supposed to be of at least average intelligence, and who are attending a school which, besides teaching engineering, is supposed to inculcate at least a hazy idea of honesty and integrity.

ALUMNI NEWS

New Members M. S. M. A. A.

New members of the Alumni Association include: W. F. Hoke, '22, assistant superintendent Ash Grove Lime and Cement Co., 834 Landers Bldg., Springfield, Mo.; Hanley Weiser, '18, '20, McGill, Nevada; V. K. Fischlowitz, '21, '22, Rolla, Mo.; J. T. Hodges, Salaverna, Zacatecas, Mexico, Frank W. Gibb, '82, F. W. Gibbs and Company, Architects, 225 Gazette Building, Little Rock, Arkansas; Roger I. Manning, '21, Engineering Dept., Bunker Hill and Sullivan Mining and Concentrating Company, Box 925, Kellogg, Idaho.

There are 243 members to date, and more coming in every day. If you have not sent in your dues, remit to Prof. Dean today.

'22 G. J. "Gobby" Christner is enrolled in the Sales Engineering Course of the Ingersoll Rand Co., at Phillipsburg, New Jersey. He expects to go on the road in a short time.

'12 E. D. Lynton, in renewing his subscription to the Miner, writes that he has been transferred from the Los Angeles office of the Standard Oil Co., to Abilene, Texas, where the Company has begun operations in Mitchell County, under the name of "The California Company." He has been placed in charge of all the California Company's geological exploration work in that part of the state. He intends to attend the annual meeting of the American Association of Petroleum Geologists, which will meet in Denver, at the end of October. It is expected that quite a few Miners will attend this meeting.

'22 R. J. Lapee is working in the chemical laboratory of the Anaconda Copper Company, at Great Falls, Montana. He informs us that R. B. Caples, '10, assistant general superintendent of the Great Falls reduction plant, is planning a visit to Rolla in October.

'22 R. N. McGill is employed as a geologist for the Josey Oil Company, near Great Falls, Montana.

'22 A. Devereux is employed as a sampler for the Anaconda Copper Co., at Great Falls, Montana.

'22 C. W. Burkhardt is at 44 Whittier Place, Indianapolis, Indiana. At the present time he is engaged by the O. L. Miller Cement Company as a chemist.

Ex-'77 J. D. Wright is in Washington, D. C., where he is enrolled at George Washington University. He mentions that until recently five Miners who were in Washington took lunch together twice a month. Besides Wright they were V. W. Balderston, ex-'17, Capt. T. C. Gerber, ex-'17, John Brown, '17, of the U. S. G. S., and H. O. Strawn, ex-'17.

A. H. Fay, '02, recently entertained several former M. S. M. students at his residence in Washington. Dr. Ladd, who was director of M. S. M. from 1897 to 1907, was present.

'22 P. C. Andrews, who was formerly with the Geological Survey of Colorado, is an instructor of calculus and mining at the Oklahoma School of Mines, Wilburton, Okla.

Ex-'22 J. H. Dougherty is attending Missouri University. He expects to receive his A. B. degree at Christmas.

'22 I. F. Hodges is engineer for the Atlas Mining Company, of Snelfies, Colorado.

MINERS VS. WASHINGTON
SATURDAY.

The end of the week will bring to M. S. M., its students, faculty and alumni, the most thrilling event of the year. When the Miners and the Pikers clash on Francis Field at St. Louis next Saturday every muscle and nerve will be strained to the utmost, for the hopes of all will be placed on the Miner eleven. Just what they will do yet remains to be seen, but from all appearance the chances are very bright.

With four hard weeks of practice gone by the team is at its best. The middle of the week will bring Hoover back into the game, and the final strengthening of the weaker spots will begin. Fast moving, hard hitting and full of fight will be their qualifications, and such a combination means a difficult foe for Washington.

Twenty-two men are expected to make the trip, although this is not authentic. Maybe a fewer number, or maybe more, for the team has not yet been picked. Every man out has his chance, and the lucky men who are chosen will have the full backing of every M. S. M. booster.

Here goes for the hardest game and the best team that Washington has ever handled. Fight 'em, Miners.

DARK HORSE LOOMS UP
IN GOLF TOURNEY.

Harris, with a twenty-seven stroke handicap easily and decisively defeated Thomby by a 5 and 4 victory. Harris' first round was nothing to brag about, but beginning the second nine he uncovered some excellent golf to take five holes in succession and the match. Harris' score, on the first five holes, along with the net score, and par, follow:

Harris: Totals.....5 4 6 5 4

Net.....4 3 5 4 3
Par4 3 4 4 3

If he keeps up this brilliant pace the tournament is his, even taking into consideration the steady game that Pond has been playing of late.

The rest of the matches in the second round turned out as had been expected, with the exception of the defeat handed Rountree thru the hands of Kershner.

Results of the Second Round.
Championship.

Pond defeated Clayton, 2 up.
Armsby defeated Parker, 6 and 5.
Dennie defeated Cameron, 5 and 3.
Harris won from Thomby, 5 and 4.

Class A.

Sevier defeated Keeling, 3 and 2.
Medding defeated Kennedy, 2 and 1.
Kershner beat Rountree, 5 and 4.
Kasel defeated Muench, 6 and 5.

SHALL WE HAVE

A SPECIAL TRAIN?

The Mass Meeting last Friday brot out some very promising returns in regard to a special train for the Washington U. game.

At a meeting previously scheduled the plan decided upon was as follows: To ask the Frisco for a special round trip rate of \$4.00. To ask for either a special train, or for the start of the Cuba accommodation from Rolla at 6 A. M. Saturday. This train is due to arrive in St. Louis at 11 A. M. Further to ask that the tickets be made good for a return to Rolla on Sunday trains.

Several lists which had been passed around town, and at each Club and Fraternity, netted a total to date of 261 persons.

Any one who wishes to go down on Thursday or Friday should buy one of the tickets to help M. S. M., as the

tickets will be good for a return Sunday, and the fare would be the same.

Sign the lists, and help the team by your boosting.

CHANGES IN GRID RULES.

Following, in brief, are changes in the football rules, effective this fall:

Abolishing of free kick after touchdown, whereby the scoring team may take the ball back to any point behind the five-yard line and carry the ball across the goal again by kick, pass or run. If the ball is carried over, it counts one point.

In the initial kick-off, the side winning the toss selects the goal, the other side having the choice of kicking or receiving. Heretofore, when one captain elected to defend a goal, the other side was obliged to kick off.

The code has been altered to allow the referee, with the consent of both captains, to decide between halves to shorten the fourth period or both periods of the last half.

Rules of substitution also come in for changes. Now a player cannot return to the field in the same half in which he is removed. It is not necessary that he should return to the field in the same half in which he is removed. It is not necessary that he should return at the beginning of the period, however.

The "one man in motion" regulation was re-written so that any player leaving the scrimmage line before play begins must be at least five yards behind the line when the ball is snapped.

Another rule is that the officials should whistle as soon as convinced that the ball has crossed the goal line, or in case of forward passes, when the pass is completed behind the line.

No change was made to make numbering of players mandatory.

UNEXCELLED WORK

Harry S. Witt Tailoring Co.

FOOTBALL CAPTAIN

GOES ASTRAY.

H. E. Zoller, alias "Hank," and more familiarly known about this institution of learning as "Tin Ear," has won the distinctive honor of wearing the only set of hand-painted ear muffs in Rollie. Being somewhat of a bear,, once in a while, among the fairer sex, and claiming to have a "crush" on no one in particular, our hero journeyed forth under the cover of darkness last Monday evening to meet the diminutive beauty whom "Crime-Wave" Terill had promised he should meet was be given the opportunity. By previous arrangement it was agreed to meet at a designated place on the campus. "Tin Ear" journeyed forth to meet this young lady in the true cavalero fashion, and after "C. W." had introduced, H. W. Thomas, Jr., who took the part of the fair lady, as "Miss Hall of Kirksville," our hero, with his heart marking time, proceeded to put out the usual line. He talked to "her" for a few moments, then suddenly stopped, but, alas, he realized his mistake too late, and now we find his name listed in the aquarium. Remember, "Tin Ear," this world is three-fourths water, making the chances three to one that we'll be born a fish, so don't feel bad about it.

PROF. DEAN KNOCKED OFF ! ! !

Two Years an M. S. M. Student, Bothwell Finds Way to Campus at Last.

Matriculating in 1920, Max Bothwell was able to interrupt his college work long enough to visit Parker Hall for the first time last week. He appeared suddenly in Prof. Dean's office and helped the renowned registrar (for whom it was thought by many that the shock would prove fatal) up from the floor and back into his chair. Although he has hitherto been considered inured to the element of surprise in anything, Prof. Dean rallied quickly from the blow and conducted Bothwell about the various buildings on the campus. Max complimented the Prof. upon having such a nice little school here and remarked that he would drop in again some time.

That Bothwell is sincere in his unwonted studious attitude may be judged from the fact that he recently declined an offer of nine dollars a day poling hogs in Southern Arkansas. Max intends to make part of his expenses by working for the City of Rolla. He has been appointed to succeed the former Department of Street Cleaning, who was discharged for beating the stuffing out of his broom.

THE M. S. M. PLAYERS FINANCIAL STATEMENT

Covering School Year 1921-22.

ROLLA, MISSOURI

Doc Barley: What was the Wesleyan movement?

Hauck: It was a protest of the peo-

ple in England against the slave trade.

You win, Hauck. Cut yourself a piece of cake.

VOCATES.

John Riddle is back in school after spending a very profitable summer with the H. H. Hall Const. Co. improving the highways of southern Illinois. Those roads should be like boulevards after having an engineer like John working on them.

Earl Snell has returned to school after an extended vacation, which included sojourns at several of the popular national resorts. We understand most of his time was spent at the resorts on the shores of Lake Michigan. Evidently he has neglected some of his domestic duties in and around Rolla, as he has not been seen going over the hill since his return. His neglect may be either voluntary or forced. We are watching for developments.

Lee Elliott seems to have been enjoying himself extremely the past week in the society of one of Rolla's popular young ladies (probably due to the fact that Steelville is 33 miles away.) We do not know if he is driving a Studebaker "6" or a Ford roadster; however, neither is an unpleasant diversion.

George Berry is reported as being the principal in Rolla's latest and most sensational social battle. It must be more than thrilling to be thusly sought after.

S. L. Argus was in Rolla last week visiting old classmates.

Miss Sanders held the lucky number in the diamond ring raffle last week. Fate is unkind—might have given it to some one who did not have one.

"Red" Williams took a young lady for a car ride the other evening. He failed for one of various reasons to provide an ample supply of gasoline. The result was that the young lady was compelled to help push the car to a place of safety. Next time try and borrow some gasoline, "Red."

"Red" Weekly spent the week end in Rolla visiting friends and—. There are some conflicting reports as to his domestic status. We hope to be able to give him a rating some time in the near future.

On Saturday, Sept. 22, 1922, the parents of John Botog were killed in an automobile accident near St. Louis. We wish to extend our sympathy thru this column.

"Joker" Clearman has been worried to no small degree the past two weeks. It is presumed by some that he is expecting a visit from a very close relative at any time.

Prof. Dean enjoyed Dr. Bitting's lecture at the banquet very much. He only went to sleep three times. Twice he woke up by himself, and the third time Dr. Bitting woke him to tell him it took a good orator to sooth a man's nerves so well that he would go to sleep.

The frosh did not wait until Saturday night last week for their seminal trip to the pond. The irregularity is liable to impair their health.

Prof.: I noticed you were talking during my lecture this morning.

Student: I beg your pardon, sir. I do not recall. I must have been talking in my sleep.

Prof. in Chemistry: "I want you to work out this problem in kgs."

Ost (after much thought): "Say, Prof., what is the capacity of those kgs?"

Each person attending the OPENING, will receive a souvenir.

J. A. SPILMAN

When Prof. Dean and Opponent celebrated Prof.'s twenty-fifth anniversary as a professor at M. S. M., it marked a record which even Christy Mathewson would be proud of. After all that time his arm is as good as ever, and his control superb.

For the benefit of the Freshmen and new students, we wish to state that the D. D. M. is an organization whose purpose in life is to razz Profs., tell the students when they should have a holiday, and to uplift humanity in general.

Certain students have been greatly offended by the article on "The Theoretical Junior." They say there was no cause for writing the article. Then why be offended? There were no names mentioned.

"Suspicion always haunts the guilty mind," said Shakespeare, and his psychology is unerring.
