THE MISSOURI MINER.

Missouri School of Mines and Metallurgy, Rolla, Missouri.

Vol. 10, No. 4.

Monday, September 20, 1923.

Price, 8 Cents.

R. O. T. C. NEWS.

The Department of Military Science and Tactics announces the following appointments of officers in the R. O. T. C. Battalion for the school year 1923-24.

Cadet Major: D. L. Moodie.

Cadet Captain and Adjutant: J. O. Hunt.

Cadet Captains: H. R. Drouot, A. W. Walker, H. O. Schramm.

Cadet 1st Lieuts.: A. L. Naylor, C. F. Schaefer, J. P. Campbell.

Cadet 2nd Lieuts.: W. E. H. Knight, G. C. Gabler, R. T. Muench, B. K. Rice.

The Advanced Course enrollment is the largest in the history of the Unit, and includes 12 Seniors and 20 Juniors. The total enrollment in the Battalion is 148.

The distinctive uniforms which are furnished by the Government to the Advanced Students have been ordered and will be ready in a few weeks. This year the students have adopted the Sam Brown belt and will be worn with the uniform by the Cadet Officers. The Cadet Non-commissioned Officers of the Advanced Course will wear the belt without shoulder strap. Regulation army sabres have been bought by the school, and will be issued to all Cadet Officers assigned to companies.

The Department has recently bought a stereographic library of 200 views of the World War. These views will be used in connection with class room instruction, and may also be seen at any time in the office of the Department.

Summer Camp.

The R. O. T. C. Summer Camp was held this summer at Fort Snelling, Minnesota, about eight miles from St. Paul. It was attended by 950 students representing twenty universities and colleges from the states of Minnesota, North Dakota, South Dakota, Iowa, Nebraska, Missouri, Kansas and Arkansas. The camp was considered the most successful one held so far.

The Missouri School of Mines was represented by the following students: Burg, Couch, Cunningham, Crocker, Drouot, Gabler, Hasselman,

CLASS OFFICERS

ELECTED SATURDAY.

The class elections held last Saturday resulted in the following being elected:

Senior Class.

President: C. E. Stover.

No other officers nominated.

Junior Class.

President, F. C. Schneeberger.

Vice-president, M. A. Ledford.

Secretary, J. N. Harris.

Treasurer, F. O. Fink.

Sophomore Class.

R. N. White and J. D. Crawford tied.

Vice-president, Erwin Gammeter.

Secretary, no nominations.

Treasurer, J. A. Holman.

The polls closed at six o'clock Saturday night, after 113 votes had been cast. The votes were then counted by a fraternity man, a club man, and two Independents. A list of all those voting, together with the ballots were turned over to the Student Advisor, who will later destroy the ballots, and give each class the list of men of the class that voted. It has not been decided how the tie in the Sophomore Class will be decided.

PEP MEETING PEPLESS!

Outside of the characteristic masterpieces delivered by "Spike" Dennie and "Thorny" the meeting lacked the Miner pep of former years. Some good points were brought up by each of the speakers, among which was a suggestion by "Thorny" that everybody who attends football practice be wrinkled if caught smoking while on the field. Dennie outlined the policy which is to be adhered to in dealing with players who do not train, in these words: "We are going to have a team composed of the best players in the school—who have trained." We sincerely hope that this will include the very best players in the school, or in other words, we hope that our best players will train.

Moodie ordered the Frosh to become better acquainted with the yells, and we believe this order should include in general the entire student body. We would also suggest that at least one or two more cheer leaders be elected. It not only appears much

COACH McCOLLUM GIVES FOOTBALL MEN STIFF WORKOUT.

With the opening tilt of the season, the game with Washington, just three weeks off, Coach McCollum is leaving nothing undone in order to have the Miners in the best condition possible. But the men are willing workers, because they realize that with one of the hardest games on the schedule just three weeks away hard work is absolutely necessary to enable them to enter the fray in good shape.

Coach McCollum has handed out some new plays, which will be increased from time to time, and when the date of the opening game rolls around the Miners will have at their command an unlimited repertoire of plays.

The squad has been greatly strengthened by the addition of several new men. Kemper has been holding down left end on the Varsity for the past week, and should prove to be a tower of strength on the line. Although a familiar figure on the basketball court, Kemper has had little experience on the gridiron. However, he has a powerful physique, and a knack for catching forward passes which at times seems uncanny. In Player and Kemper the Miners have two valuable ends, both on offensive and defensive.

Blair is another valuable addition to the squad. After only a few days of practice he has shown much promise, and with three weeks more before the opening game he should make a valuable man.

Robinson and Johnson are making strong bids for backfield positions. They handle the ball nicely, and hit the line like veterans.

Arra has been shifted to center, and, although it is not his natural position, he fits in nicely.

The time being close at hand, the game with Washington forms the chief topic of conversation. Unless handicapped by injuries the prospects for a Miner victory appear exceedingly bright.

Continued on Page Two.

Continued on Page Two.

Continued from Page One.

Kelm, C. L. Martin, F. C. Martin, Merrill, Muench, Rueh, Schaefer, Seiffert, Stogsdill and Wilson.

Practical instruction covered the subjects of Field Engineering, Demolitions, Land Bridges, Pontons, Reconnaissance, Sketching, Equitation, and in addition a week was spent on the rifle range, during which time every student had the opportunity to fire the army qualification course with the U. S. Springfield rifle. Burg, Merrill, Rueh, Schaefer and Wilson qualified as marksmanship.

The Engineers from this school distinguished themselves in a demonstration in which they threw a foot bridge 285 feet long across the Minnesota River in eight minutes and seven seconds, which is, as far as can be determined, a record for this type of bridge.

Continued from Page One.

better, but the body of yellers can be handled much better if more leaders are on the job.

It is planned to have a gigantic pep meeting on Friday, Oct. 5, or the day preceding the Washington U. game. It is hoped that the places of business in Rolla will close during this meeting, and that everybody will turn out and generate some real pep. This meeting will probably be held during the mass meeting hour, however, further announcements will follow in the Miner. Staying away from this meeting will be equivalent to boosting Washington U. to win; so let's turn out.

M. S. M. MAN LOSES FATHER IN WRECK.

W.O. Sublett, father of Ira Sublett lost his life last Friday, Sept. 7th, when a railroad motor car in which he was riding with six other men turned over near Plain Dealing, La. Mr. Sublett was roadmaster for the Cotton Belt. D. W. Bowker, another official of the Cotton Belt, was also killed, and the others were more or less painfully injured. The accident was supposed to have been caused by the spreading of the rails after the recent heavy rains. Ira Sublett left late Friday night for his home in Texarkana, Arkansas.

The Miner and the student body extend to both Ira and Mrs. Sublett their most heartfelt sympathy in their bereavement.

V. F. W. POST BRINGS

SPECIAL FEATURE TO ROLLA.

The local post of the V. F. W. has booked Gene Stratten-Porter's picturization of her book, Michael O'Halloran for Rolla's Theatre Thursday, Sept. 20th. This picture has never been shown in a city of less than 200,000 population, and the local post has spared no expense in getting this picture for Rolla.

It is the story of "Micky," the newsboy, who adopts a family, and his slogan of "Be Square" brings happiness to all. Irene Rich plays the leading role, and is supported by an all-star cast.

Besides this picture, a seven-reeler, Fred Hamlin presents Wm. (Kaiser Bill) Hohenzollern in a two-reel special feature, entitled "The Ex-Kaiser in Exile," a picture of the former German Emperor in his Dutch home at Huis Doorn. Contrasting pictures of him as Emperor of Germany during the World War are also shown.

The Virgil A. Faulkner Post, No. 473, V. F. W., is an organization Rolla should be proud of, and should support in all its activities. This show is for the purpose of furthering its work among the needy veterans of Phelps County, and every one should gladly spend 35 cents to see the programmes they have arranged for you.

"Michael O'Halloran" has never before been shown at prices as low as this Post has set. "The Ex-Kaiser in Exile" is the only moving picture ever taken of "Kaiser Bill" since his exile, and in all probabilities will be the last. See what the Yank army did to Germany's former war lord. Rolla Theatre Thursday, September 20th, 7:30 P. M. Prices 35 and 15 cents.

At the beginning of the semester the Senior Council ruled that the sidewalks which are on our campus be the only place on which travel afoot be permitted. A few "wrinklings" have been performed on a few of the student violators. However, as a rule they have obeyed beautifully.

Now comes the question of Faculty violators—the "monarch of all I survey" type, who are persistent in regarding anything which any student,

or any student body recommends or rules, as an inferior sort of a meaningless order. We are inclined to think that these violators come under the same general heading as those who smoke in the presence of football players, and further, that the same punishment be dealt out to all violators who come under this heading, regardless of place or position.

THE SCHOOL OF MINES AND METALLURGY

A Division of the
UNIVERSITY OF MISSOURI.

The second oldest School of Mines in America, offers seven four-year collegiate curricula leading to Bachelor's Degrees in

- | | |
|------------------------|-----------------------------|
| I. Mining Engineering | II. Metallurgy |
| Options { Metal Mining | III. Civil Engineering. |
| Coal Mining | IV. General Science |
| Mining Geology | V. Mechanical Engineering. |
| Petroleum Engineering | VI. Electrical Engineering. |
| | VII. Chemical Engineering. |

Also offers one-year graduate curricula leading to Master's degrees in the branches of engineering named above.

The following degrees are conferred after three to five years of professional work:

Engineer of Mines, Civil Engineer, Metallurgical Engineer, Mechanical Engineer, Electrical Engineer, Chemical Engineer.

Has 800 graduates scattered all over the world holding positions as Engineers, Scientists and Teachers of Science and Engineering. At least 300 non-graduates have reached distinction in their chosen profession.

THE AIRPLANE AND MINE RESCUE.

Washington, D. C.—The adaptability of the airplane to a novel use is being tested by the Department of the Interior at Birmingham, Ala., where experiments looking towards the use of planes in rushing the trained mine-rescue men of the Bureau of Mines to the scenes of mine disasters are being made. A landing field has been located at Carbon Hill, an Alabama coal mining town, and other fields will be located at mining towns within reasonable flying range of the mine-rescue station of the Bureau of Mines at Birmingham. Trial flights of planes carrying Bureau of Mines trained men equipped with oxygen breathing apparatus have been made between Roberts field, Birmingham, and Carbon Hill.

Two planes of the Alabama National Guard, each carrying a National Guard pilot and a Bureau of Mines engineer, transported five sets of rescue apparatus from Birmingham to Carbon Hill, a distance of 60 miles, in 46 minutes, or at the rate of 80 miles an hour. It is estimated that the minimum time that would have been required by a special railroad engine to cover the distance with a clear right-of-way would have been three hours, while an automobile truck proceeding over the roundabout public roads would have required four hours.

In ordinary rescue work, following explosions and fires, it is standard practice to use not less than five sets of oxygen breathing apparatus for the rescue of possible entombed miners and in the recovery of bodies. It is necessary to use oxygen breathing apparatus in the poisonous and irrespirable atmospheres which are generally found after explosions and fires. The apparatus used in the airplane test weighed approximately 200 pounds, and the weight of the two pi-

lots and two passengers aggregated 780 pounds.

The Bureau of Mines at present maintains 10 railway cars and 7 automobile trucks equipped for mine-rescue purposes, but it often requires considerable time to send these cars or trucks to remote mining camps. It is hoped to demonstrate the value of the airplane in supplementing the work of these mine-rescue cars and trucks, especially in reaching camps where landing fields are available. The speed and mobility of the airplane, and its independence of railway schedules and bad roads are also valuable factors in the consideration of its adaptability to mine-rescue purposes.

THETA TAU PLEDGES.

SUCCESS.

By E. C. Brisbane, Engineering
Division, Chicago Office, Westing-
house Electric & Manufacturing Co.

1. No man should believe that the work he is doing is being done in the best possible way. Nothing is so perfect that it cannot be improved upon. The man who does things a little better is the one who succeeds.

2. Haste is the seed of discouragement, and those who hasten are laughing at efficiency which will surely result in discouragement.

3. One of the reasons why American business men in general are not as efficient as they might be is the fact that they invariably think of profits first, with quality and service taking the secondary position.

4. If men are doing work worth their effort, the things they do require all of their brain power and initiative and thinking about money and profit will seriously impair their efficiency and ability to succeed.

5. One thing that this world lacks is faith. We haven't half enough of it. Most people are always saying, "I can't," when they should be saying, "I will," and "I won't stop trying until I have."

6. Fear is a great disease, which

undermines the initiative and ambition of man. Most men are entirely too confident of their ability to fail. If they were as confident of success, they would surely succeed.

7. Competition in "Man and Brain Power" grows keener day by day. Therefore, if you would attain the laurels of success, be aggressive, fear nothing, have confidence in yourself, know what your competitor is doing, and, above all, strive to improve upon that which you are now doing.

PHOTOPLAY.

We are pleased to note that Rolla's photoplay house boasts new releases as early as our one hundred and ten miles from St. Louis will permit. Rolla's Theatre has changed hands. We are all pleased to see the new owners, C. E. Hart and T. Gray, continuing in the good work of Mr. Burbank.

Mr. Gray has been in the moving picture business for over ten years, and promises the citizens of Rolla the best in moving picture entertainment. We are not sure whether the now appearing Aesop's Fables are for the children of Rolla or for our new Freshmen. Mr. Hart (unfortunately not related to either Bill or Bret) should be known to many Miners as the late proprietor of Idlewild resort on the Meramec.

Last week the frosh rushed the show. The owners were not entirely surprised, as Mr. Gray has been operating a movie house at Laramie, Wyoming—the seat of the State University. The new proprietors do not object to such procedure if not duplicated too often. Use your own judgment, fellows.

JUNIOR CLASS MEETING FRIDAY

Owing to the fact that an epidemic of Junior Class quizzes has resounded on the school during the beginning of the week, it has been decided to hold the first meeting of the class on Friday, Sept. 21st, at 7:30 P. M.

It is requested that all members of the class make an effort to be present.

GOLF TOURNAMENT.

Plans for the golf tournament are being completed by Athletic Director Dennie. This tournament, an eighteen-hole handicap, is to start the first week of October. To qualify a contestant must present five certified score cards and pay an entrance fee of one dollar. This money will be used to purchase rewards for the winners.

Last year interest in the golf tournament was very keen. Some exceedingly good playing was displayed, and every one was well pleased with the contest. Quite a number intend to compete this year so we should see some real golf soon.

The ground rules for this contest are as follows:

Hole No. 1. Drive into ditch to the left of a line from No. 1 tee to the bridge over ditch on No. 9 fair way may be lifted without penalty.

Hole No. 3. Drive into ditch just south of No. 1 green within the limits of No. 3 fairway may be lifted without penalty.

Hole No. 4. Second shot may be teed up providing ball lies in the fair way and not in ditch.

Hole No. 7. Second shot may be teed up providing it is not in the rough or hazard and lies in No. 7 fair way. This privilege is not allowed for drives onto No. 6 fairway.

At all other drives a ball must be played as it lies, or if unplayable ball may be lifted under penalty of stroke and distance. If a player lifts ball in accordance with this rule he shall play his next stroke as nearly as possible from the spot from which the ball was played.

ALUMNI.

Old Miner Back.

The old saying that, sooner or later they all come back, must hold good, because three old Miners, Emily Hosterman, Joe Wanenmacher, Tommy Weir and "Porky" Taylor are here now. Glad to see you, fellows.

R. B. Caples is with the Anaconda Copper Mining Co., at Great Falls, Mont.

S. H. Karge, '22, is now with the Karge Hosiery Co., St. Louis.

William Elliott is a mining engineer and prospector Blue River, B.C.

A. B. Needham, '21, is chief contract engineer for the Butte and Superior Mining Co., Butte, Mont.

Shanks Moore, '23, is with the Athletic Mining and Smelting Co., Ft. Smith, Ark.

J. L. Gregg, '23, is a metallurgical inspector at Gary, Ind.

Gus Schmidt, '23, is with the Tidal Oil Co., at Dallas, Texas.

A belief common in Japan is that to live long one should sleep with the head pointed due north.

One thousand gardeners and laborers are employed to keep London's great royal gardens in order.

OH, LOOK—UP!

A lady's arch, long years ago,
Would make her blush red should it
show.

And later ankles came to light;
To marking things were going right.
And later as time flew apast,
Her dainty knees were viewed at last.
Now the small boy snicks and snick-
ers.

Lo and behold! We see her knickers.
And now, dear friends, I'll close my

tale;

Should I proceed, I'd go to jail.

—Sour Owl.

WILLIAMS ADDED TO STAFF.

Len Williams was elected to the
Miner Board at the regular meeting
held last Tuesday. He will be an As-
sistant on the Editorial Staff. Len
has been contributing poetry and
prose for some time, and should prove
to be a valuable man.

BASEBALL TROPHY LOCATED.

After a diligent search, dating back from the time of the Faculty's final victory over the Sigma Nu two weeks ago, the baseball trophy has finally been located. It rests in the front window of the metallurgy building to the east of the main entrance, where it can readily be seen by all passers-by. There it stands, this token of victory, majestic in its appearance, and enshrined in the hearts of the Faculty as their emblem of superiority in baseball.

H. C. SCOTT, EX-'25, IN ROLLA.

H. C. Scott, who entered M. S. M. with the class of '25, has been in Rolla the past week.

"Scotty" lost a leg the middle of the second semester of his freshman year, and has been out of school since.

His former classmates are very glad to see him back, if only for a

visit. "Scotty" was a loyal member of his class, and had the old Miner fight, which made him the last man tied up by the Sophs in the class fight two years ago.

to M. S. M. Christmas and RfifuLhnn
"Scotty's" present plan to return to M. S. M. Christmas and resume his work is good news to all of his old class, and the Miner hopes to see him down to the old grind next semester.

Model: "I'll do ten draped poses for \$50.00, pay when you will."

VOCATES.

D. R. Roselle left for Chillicothe, Mo., to accept a position there.

R. E. Richardson, better known as "Muchy," is with the State Highway Department, at Sullivan, Mo.

After spending a week in St. Louis "Joker" Clearman was again reported married by Bob Heller.

The V. F. W. meeting held on last Thursday night was poorly attended. Lea's get going and keep her alive.

The Editor is in receipt of a letter, and a check for subscription, from John Riddle, '41. John has had quite an array of experiences since his departure from here. After penetrating the depths of Mexico on a railroad project, his wounded arm became infected, causing him to return to the States. He spent a time in a Government hospital in New Mexico, and was later sent to San Francisco. He reports that he was greatly benefited by the rest, and by the treatment received there. John is now Assistant County Engineer, and also Assistant Resident Engineer at Morion, Kansas.

Along about the first of last year a handsome and amiable young man from down in Texas joined the vocational oil class, and speedily made for fame in the social world of Rolla. He made his initial appearance, or debut we may call it, as a dashing cop in the M. S. M. Player's presentation of "Just Jones." Then, as the spring wore on and the trend of conversation was turned toward the summer work in the field, Mr. E. J. Lyon informed us that he intended to revolutionize the oil industry, or at least greatly improve field methods. In this respect he was true to his word, as he returned with a story of a project under his personal supervision involving the outlay of some twenty-five thousand dollars. He motored up from Oklahoma in a brand new automobile, but, of course, we wouldn't ocuse anybody of graft.

The deplorable part of it all is that since Mr. Lyon's return with Mrs. Lyon and all the little lions, he has kept himself very secluded. However, we hope he'll venture forth soon and give the oil class the benefit of his "vast" experience.

THE VOCATE OIL

CLASS RETURNS.

By the stories we hear on the campus and around town from the returned "oil slickers," it is not hard to believe that the various companies employing these men must be suffer-

ing a severe loss now that these men have returned to resume their studies once more.

One of our gallant "crude oil" knights even carries a letter from his employer imploring Prof. McKee to permit him to return next summer.

Another, Bill Kauffman by name, who summered this year in the wilds of Arkansas says he liked the place so well that it was with regret that he returned to Rolla.

As only about half of the fellows have returned it is impossible to give any lengthy account at this time of the doings of individuals, however, we are assured at least that all had a pleasant time. The oil fields are such a pleasant place to spend the summer with their varied forms of amusement, most of the companies having swimming pools, golf links, tennis courts, etc., right on the leases.

From the appearance of several new automobiles in town it is not hard to suppose that the proverbial wolf stayed far from the doors of these "oil slickers," either.

MAJOR C. E. COOKE IN TOWN.

Major C. E. Cooke arrived in Rolla the first of this week to be present at the marriage of his son, Gordon, to Miss Bertha Fulton, which will take place Wednesday. The Major will be remembered as the head of the Vocational Department here up until about a year ago. He was sent down here primarily to take charge of the men who were taking Topographic Engineering, having served upwards of thirty years with the United States Geological Survey. Later he was made the head of the Vocational Department, and carried the title of Professor of Topographic Engineering.

The Major was exceptionally well liked by the men in his department, and as well by all who came in contact with him. Every one was greatly disappointed when his assignment here terminated, which caused him to report back to the U. S. G. S. at Washington, D. C., and later to be sent to his present headquarters at Austin, Texas. We are sorry that his visit here will be a short one, and sincerely hope that in the future he will arrange to be with us more often.

GYMNASIUM IS NEWLY PAINTED

On returning to school this year the Miners had a pleasant surprise awaiting them. The walls of the interior of the Gymnasium had been arrayed in a very appropriate and

RESTFUL shade of gray. The floor of the basement is done in battleship gray. All of this presents a sight as seen only in advertisements of gymnasium equipment, etc.

It is rumored that the Gym was done in a restful hue in order that the other side of the "VS" might have something restful to look at when returning from the gridiron.

All we need now to fix us up in A1 shape is a new spring board with a RUBBER MAT.

The professor was engaged in a knotty problem when his study door was opened by a servant who announced:

"A little stranger has arrived, sir."

"Eh?"

"It's a little boy."

"Little boy? Well, ask him what he wants."

—Wampus.

The walls, floors and ceilings of our vaults are lined with a network of electric wires and any tampering with our vault doors will set off an electric burglar alarm.

In addition to this both our vaults are insured against burglary.

Bank here in safety and comfort.

ROLLA STATE BANK

ROLLA, MO.,

H-A-S-H.

The case of Boots Clayton injuring his leg in a baseball game brings to mind the story of Hiram Hicks, who also hurt his leg in a ball game. Hiram was engaging in a ball tourney out back of Cal Kaskadden's Barn. Hiram slid into what he thought was third base, then broke his leg trying to dive into a watering trough.

When the gang all goes to the W. U. game how is it going to look when they turn out three strings of men on the side lines, and we turn up with the first team and only about six subs. Wouldn't it look like real stuff if we could get together on a proposition to put the whole gang on the

bench. The fellows who have put in every evening doing real work are certainly deserving of the trip. It will be impossible for the Athletic Association to finance the whole thing, because they will not have sufficient funds to go to this extra expense, but with over three hundred students in school, and every one of them is expected to go this game, we should be able to put the thing across either by popular subscription or some other method. If we could get every man in school to donate fifty cents the whole gang could be taken. It would be a sure way of putting the fear of defeat in the heart of the Washington team, and would make them realize that they were playing against a man's team. Think it over.

Just a few more weeks till Washington

Gets tossed into the can.

Just a few more weeks till M. S. M.

Returns the winning clan.

They'll wish they'd never known us,

'Cause we'll bust 'em open wide,

And return to little Rollie

With their motley craven hide.

Holfelder is in the market for a bicycle. He had advanced the proposition that he will swap his worldly possessions, namely, a dozen empty bottles and a shaving mug, for one of the things. In view of the fact that girls are a rather scarce article in this town he shouldn't have any difficulty in making a trade, especially if he wants one automobile size.

WANTED.

A room mate. Have two rooms, study and bed room. Very reasonable rent. Write Box 632, Rolla, Mo.

BOOSTER'S CLUB**OFF WITH A BANG.**

Every club and fraternity in school has pledged its support to the Booster's Club. Altho the Independents and Vocates have not been able to hold a meeting yet, Blake and Fink both promised their organizations would come thru.

Last year over \$1100 was loaned to worthy athletes, and the club hopes to be in a position to more than double that amount this year. Besides offering financial aid to worthy athletes, the Booster's Club was instrumental in getting many of the new athletes who are here this year.

The success of the organization its first year can not be denied. Neither can any one deny that it is not a benefit to the school. The only way it can continue its good work is for every one to lend a hand and BOOST.

TO THE ALUMNI.

Sept. 5, 1923.

Dear Alumnus

From the humble beginning on November 5, 1921, when forty-four (44) loyal sons of M. S. M. signed up and paid up, the Alumni Association has in less than two years reached a membership of four hundred and five (405). Many more have promised to come in soon, and several have promised to take life memberships. Thus far we have twenty-one (21) life members. The Constitution provides that ALL former students may become members, and up to this time sixty-one (61) non-graduates have joined the ranks.

It has been my constant effort to keep expenditures down to a minimum until the Association shall have got on its feet. We have loaned about \$600.00 to students, and have about \$1500.00 in cash after paying the Miner subscriptions for the ensuing year. It has not been the intention of the Board merely to hoard up money, but to get the Association on a sound footing, so that there may be money on hand to carry on any program that may be initiated by the incoming administration.

I am confident that our Association is in its infancy, and that before long we shall have one thousand (1000) members. Then we can get busy and do something worth while for our Alma Mater.

Fraternally,

GEO. R. DEAN,

Secretary-Treasurer M. S. M. Alumni Association.

OPTOMETRIST**TENTH FLOOR GANG****GETTING ORGANIZED.**

This organization will be remem-
bered as the aggregation which occu-
pied the tenth floor of the Marquette
Hotel at the time of last year's Wash-
ington U. game. Many humorous in-
cidents were recorded in connection
with their stay last year, and it is
hoped that a correspondent will gain
entrance to their festivities again this
year. The ranks are somewhat thin-
ned by the attraction of the thirty-
five dollar raise. In the case of the
Vocate members, however, a recruit-
ing campaign is in progress, and from
present indication the unit will be up
to war strength in time for the hos-
tilities.

WHO'S WHO.

Among the celebrities and perma-
nent fixtures of the campus one shines
above, or below, all the rest. He is
none other than the Potant Gizzard
of that venerable class of 23.5, Bar-
ney Google, who answers "here" to
Jean Paul Bryan at the roll call at the
Bryan family's roll call at breakfast
each morning. That is when he is
home, because although he lives in
Independence, most of his time is
spent in Kansas City while home.
(The address where he is most likely
to be found will be given upon re-
quest.)

Speaking of shining, Barney is quite
an astronomer. Up until a certain
exhibition of contortion a few nights
ago, he wore the white star of Sigma
Nu, but it was lost in the struggle. He
has become so interested in the stars
that he is seen out almost every night,
and almost every afternoon, studying
the stars that winkle above Rolla by
night. This has not caused him to
neglect another source of light that
enlightens man's heart above all oth-
ers. Consequently he is becoming a
rationally recognized authority on
that "light that shines in woman's
eyes."

Barney has shone often behind the
footlights in Parker Hall. His great-
est hit was in the drunken scent of
"Fair and Warmer." It is hardly fair
to count that as acting, tho- because
as Barney does not take after Wm.
Jennings, he was not on the water
wagon during that scene.

Barney has been very active on the
campus in his somewhat extended stay
in Rolla. He has dabbled in every-
thing from acting to courting—ex-
cept studying—while here. The fact
is, getting an education agrees with
him. The only drawback is having to
attend a class now and then. It sim-

ply breaks the day.

Google is now worried that the fac-
ulty will graduate him in spite of him-
self, and end his stop-over here. That
friendly grin and Missouri laugh will
be missed as his dauntless spirit which
is exemplified in his class motto:
"23.5, we're here to stay."

SATYRS ANNOUNCE INITIATION.

The following men are new mem-
bers of the Satyr organization: C.
A. Anderson, M. N. McIlwain, E.
Gammeter, W. H. Harrison, D. S. El-
iff, M. B. Mills, H. M. Diers, F. C.
Robinson, C. L. Gilbreath, J. B.
Christopher, P. Ashlock, H. Birchard,
Duue Arra, H. W. Seifert.

The following officers were elect-
ed: C. A. Anderson, Grand Chief;
J. B. Christopher, Vice Grand Chief;
H. W. Seifert, Grand Scribe and
Treasurer.
