## NOVEL SHOW TO BE HELD SOON.

### Radio Club to Inaugurate New Scheme.

Sometime during the early part of next semester, probably in the middle of January, a radio show will be held in Norwood Hall, sponsored jointly by the M. S. M. Radio Club and the E. E. Department.

Altho no definite arrangements have yet been made for this affair it is probable that every one in town who has a radio set, or who will have one at the time this show is held, will be invited to enter their set. The various sets and parts will be displayed either in the basement of Norwood Hall, or in one of the lecture rooms. At present the plans are to have the show extend over a period of two or three days. The public will be invited to attend, and at certain hours in the evenings lectures on the various sets, and the primary principles of wireless will be given by some member of the Radio Club, or of the C. E. Department.

The Miner is glad to see this enthusiasm in radio, as shown by the members in the Radio Club, and it will lend its hearty support to this affair, and to any other affairs of similar nature which may come up.

A more complete and accurate description of this show will be given in a later issue of this paper.

## SIGMA GAMMA EPSILON ENTERTAINS THETA TAU.

The Sigma Gamma Epsilon Fraternity entertained the members of Theta Tau with a smoker on Monday, December 10, in the Metallurgy Building. The program consisted of three talks. W. S. Wright, the first speaker, gave a very interesting talk on mining in the Butte district. Dr. Duke spoke on the connection of geology to engineering, and brought up a number of interesting points. The last speaker was Prof. Forbes, who spoke on success in engineering, and gave some excellent advice to the listeners. Refreshments were served after the talks, and an informal get-together followed.

## WORK PROGRESSING UPON PARKING COURT.

### Sum Donated by Senior Class Being Utilized.

The parking space between the new Bureau of Mines building, now completed, and Parker Hall, is from all indications to be very well illuminated, when the lamps which will be placed about the buildings and parking court are set in position.

With the \$250.00 which the present Senior Class donated for such a purpose the school authorities have purchased six beautiful lamp posts. Four of these decorative posts will be seven feet in height, while the other two will rise to a height of twelve feet. The lamps proper are known to the trade as the Reflectalux type, and are octagonal in shape, mounted upon Arcadian style posts.

In addition to the lamps the appropriation will also cover the cost of three large concrete urns. These will be placed around the new steps leading to Parker Hall, at the top of which will be two of the smaller lamps. The other seven-foot lamps will be placed at the junction of the spur walk extending from the new building towards Mechanical Hall. The two larger lamps will be mounted at the top of the steps leading from the enclosure to the walk which will connect the two buildings.

The school authorities, and especially Prof. Mann, who has taken charge of this work, are to be highly commended for the admirable way in which they have spent the donation given them.

All the lamps will bear some kind of a tablet as a fitting memory to the Class of 1924, who so generously donated this money, in the hopes that classes in the future would look upon this act as a class loyal to their Alma Mater.

## FOOTBALL BANQUET.

### Annual Affair Huge Success.

Eighty-five students, professors and townsmen were in attendance at the fourth annual football banquet of the Missouri School of Mines, held at Hotel Baltimore Saturday evening.

In the absence of H. A. "Chief" Buehler, who was called out of town, and who was billed as toastmaster, Prof. M. H. Thornberry acted instead.

The affair was an occasion of much interest and delight to all attending, due to an excellent turkey dinner with all accessories, and a score of interesting talks.

### 15 Men Granted Letters.

Because of their stellar playing during the season through which the team has so successfully battled, fifteen men were granted letters. Those who received the coveted M are as follows: Jack Nolen, captain; J. P. Campbell, G. C. Gabler, C. L. Kemper, L. A. Fisher, M. A. Ledford, Earl Neil, Mearl Neil, F. C. Robinson, Kirk Cammack, A. F. Modaff, G. P. Player, Jr., H. D. Thomas, J. H. Tucker and J. A. Zoller. In addition much praise was heard for the squad, the greater part of which is commonly known as the Oil Cans, because of their hard and regular work in conditioning the team to meet all opposition, as well as being ever present to fill a gap in the Miners' forward wall in case of a necessity.

### Ledford is Captain.

As the crowd assembled for the evening's activity all letter men assembled on the second floor of the hotel, and there unanimously elected M. A. "Mike" Ledford as captain, to pilot the aggregation through the 1924 conflict. This sturdy end, who was a mainstay of the Miners' defense during the past season, succeeds Jack Nolen, who served as captain this season, in the absence of A. E. Buck, duly elected leader, but who was unable to return to school.

To all who have watched the Miners perform this year the choice of Ledford as pilot of the 1924 football ship, is a popular one. He is a two-year man, who in '22 held down a

regular berth in the backfield, usually barking signals, but this year was advanced to a wing position, where he demonstrated wares that duly resulted in his election as captain of the '24 team. Ledford, other than being a valuable asset to a football aggregation as a player, is a natural leader, and in this capacity doubled with the excellent lot of material that is promised for 1924, he should pilot a team that is expected to be one of the best the Miners have ever supported.

It is interesting to note that five of the men granted letters this year are freshmen. With this quintet, supplemented by their letter men of this year and former years, who are billed to be out for competition of next year, the dope points to a winning Miner eleven. Another fact of interest is that only three men on the squad will be graduated this year. These are Gabler, Kemper and Campbell. Thus F. E. Dennie, Athletic Director, and Coach S. C. McCollum, as well as Miner fans, are very optimistic over the possibilities of having a team the equal of the famous 1914 team, which was all-victorious.

The entire squad, comprised of thirty-three men, officials and speakers of the evening, were grouped around the toastmaster's table during this course all information was dispensed.

Toastmaster Thornberry made an appeal for the Booster Club, and told of the sound business way in which this organization was aiding the student body.

Retiring Captain Nolen also addressed the assembly, gracing the chair with optimistic remarks about coming Miner teams. He was followed by the in-coming Captain, Mike Ledford, who demonstrated ability as a speaker the equal of his prowess on the gridiron.

Professor Dean was next in line, who was introduced as the oldest Miner alumnus. He made an appeal for his alleged hobby, "The Alumni Association." Professor Dean reported that at present the Association has a membership of 463, and that the organization is rapidly growing. He has as a goal a membership of 1,000 persons. He reported that of the class of 1923, 63 per cent were members of the Alumni Association, with the class of 1922 having a 75 per centage, and that 61 per cent of the class of 1921 had affiliations with the Association. Prior to this date the percentage of the various classes is not so high.

From such a source Professor

Dean reported that approximately \$2,000 are available, which is to be used in improving Jackling Field. He expressed the hope of having this improvement completed before the opening gun of the 1924 football season.

Throughout the evening, in reviewing the recent football season, much tribute was heard for the improved spirit that was so much in evidence during the recent season among players and Miner rooters. This, it was pointed out, is an indication that a new era in Miner athletics is immediately in the foreground. Officials praised the work of the three "faithful trainers," as they have been dubbed. This inference was to Bill Alton, George Dierking and E. H. Cathcart. These men served during the entire season, administering to the ills of the various cripples from time to time.

Every member of the squad was present at the banquet, except Kirk Cammack, who was ill, and C. L. Kemper, the Miners' star end, who it is reported, could not attend, due to the fact that Duke Arra, Kemper's roommate, had put on the former's only suit of clothes, and was out on a date. A searching party failed to bring Kemper into the banquet hall.

Another speaker for the evening was Dr. Chas. H. Fulton, who talked on his alleged hobby, "The Missouri School of Mines." Other speakers for the evening were Athletic Director F. E. Dennie, Coach S. C. McCollum, and Fred Smith. Each were enthusiastic in the praise of the possibilities of the Miner's athletes.

**SPORTS.**

The year 1924 presents a pleasant outlook at M. S. M. for those who are athletically inclined. After we have feasted upon candies and nuts and dates, and indulged in the New Year's Eve festivities to our heart's content, Rolla and M. S. M. will claim us once more for a prolonged stay of four months.

Basketball will hold our attention first, with wrestling running a close second. Athletic Director Dennie has arranged a basketball and wrestling schedule for the Miners that is truly a real feast. Although the schedules which are printed below are not yet complete, they are in themselves real evidences of the treat that is in store for us.

**Basketball.**

Jan. 24—Wm. Jewell, at Rolla.  
 Jan. 25—Wm. Jewell, at Rolla.  
 Feb. 7—Missouri Wesleyan, at Rolla.  
 Feb. 13—Culver Stockton, at Rolla.  
 Feb. 15—Warrensburg, at Rolla.  
 Feb. 16—Warrensburg, at Rolla.  
 Feb. 21—Missouri Wesleyan, at Cameron.  
 Feb. 22—Wm. Jewell, at Liberty.  
 Feb. 27—Cape Girardeau, at Rolla.  
 Feb. 29—Central Wesleyan, at Rolla.

Besides the games which are listed above, the Miners are practically assured of games with McKendree College, University of Arkansas, Drury and Springfield at home, and with Drury and Springfield at Springfield, making a total of ten or twelve home games.

The wrestling schedule appears elsewhere in this issue.

The 1924 football schedule to date is as follows:

Oct. 3—McKendree College, at Rolla.

Oct. 11—Iowa State College (Ames) at Ames.

Oct. 17—Central College, at Rolla.

Oct. 25—Washington University, at St. Louis.

Nov. 7—Rose Poly, at Rolla.

Nov. 14—Missouri Wesleyan, at Cameron.

Nov. 21—Drury, at Rolla.

The most notable feature of the above schedule is the fact that Washington University will be met the latter part of October, instead of the first. It has always been the consensus of opinion that if the Miners had two or three games tucked under their belt before they tackled Washington, the annual encounters which are held on Francis Field would have a different ending.

Another bright spot on the schedule is the game with Ames. Ames gained a victory over Missouri this year, and always ranks well up among the leaders in the Missouri Valley.

**METALLURGISTS.**

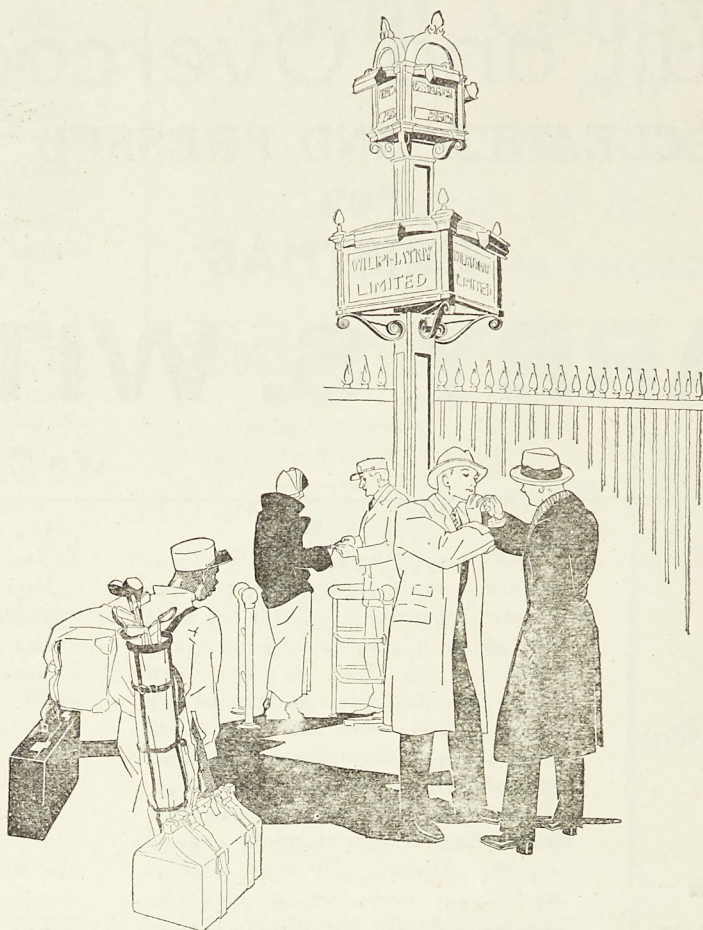

Prof. C. Y. Clayton and Mr. F. B. Foley, Metallurgist with the Bureau of Mines, attended the American Petroleum Institute Convention, which was held at the Statler Hotel in St. Louis on Dec. 10th to 12th. Clayton and Foley represented the Bureau of Mines, and were both appointed members of the Research Committee at the Institute.

Mr. Foley made an address upon "Steel and the Petroleum Industry," which was well received.

**CONCERNING THE PLAYERS.**

We have heard that the M. S. M. Players are to present three plays during the next semester. All of which will create lots of interest for

those who are talented along the dramatic line.

One play will be given for the Rollamo Board, the usual one for the Junior Class at St. Pat's time, and

lastly one for the Athletic Association.

### WRESTLING DOPE.

This year wrestling is to be a keen rival of basketball. Four big meets are scheduled. The first match is with Iowa State, at Ames. This meet is a dynamic boost for M. S. M. Last year Iowa State's team won the inter-collegiate wrestling championship of the United States. The match will be battled on Jan. 26th. This means that the team will have to come thru in force, and train con-

stantly.

On Feb. 2 the first home match will be held at the Gym. Washington U. is reported to have a strong team this year, and should give the Miners a good tussle for a grip on high score. The Washington bear went home last year with its tail between its legs. Let's keep the whip hand.

On Feb. 8 Missouri sends its wrestlers to Jackling Gym. A chance to bind more strongly our relations with our big brothers at Columbia is certainly welcome. Missouri has a good team. Although the sport is quite new to the Tigers they have some very good cubs in the squad.

The Miners will be the guests of Oklahoma A. & M. at Stillwater on Feb. 14. Last year they won the match with the Miners by a narrow margin. They have a squad of well developed tusslers, so the Miners will have to be on their toes every minute at Stillwater.

Coach McCandliss and Captain Walker are enthusiastic over the season's possibilities. They are anxious to give their best help to every man trying out. There is still plenty of room for good men on the squad. With a schedule like this year's, the Miners should put every ounce of kick behind the big stone for a place on the wrestling map.

### NO FROSH SMOKER..

At a recent Freshman Class meeting the class voted to not give a smoker until after the members have been

given authority to remove their green caps. The Frosh say that, although the Freshman smoker is a traditional affair, the tradition-sanctioned custom is that the smoker be given after the green caps are removed. As the present ruling seems to be that the caps are to be worn at least until St. Pat's, there probably will be no smoker this school year.

### REGARDING REGISTRATION.

#### Students Responsible for Complete Knowledge of Scheme.

In view of the fact that several articles pertaining to registration have been published in these columns it is only proper that the student should be held liable for a complete knowledge of the system now in vogue.

However, in the event that some points might not have been made very clear, we herewith submit a summary in order that those unfortunate may be further enlightened.

The most important departure from previous years is the fact that a late registration fee of \$1.00 will be assessed against the student who fails to register during the hours assigned him, and, as a consequence, will not be allowed to register until after 10 A. M. on Thursday. Those who register later than Thursday will not be remitted the later registration fee of \$5.00 and, further, all classes missed will not be excused, and count as "cuts."

For emphasis we repeat the alphabetical division:

Names T to Z, inclusive, Wednesday, January 2, 10 A. M.

Names Br to D inclusive, Wednesday, January 2, 10-11 A. M.

Names E to G inclusive, Wednesday, January 2, 11-12 A. M.

Names H to I inclusive, Wednesday, January 2, 1-2 P. M.

Names K to Mc inclusive, Wednesday, January 2, 2-3 P. M.

Names M to O inclusive, Wednesday, January 2, 3-4 P. M.

Names P to S inclusive, Thursday, January 3, 8-9 A. M.

Names A to Bo inclusive, Thursday, January 3, 9-10 A. M.

A student is not obliged to complete his registration in the one hour, but must get it started. He can then have as much time as he needs.

Upon entering Parker Hall the student will receive, from the clerk, a GREEN INSTRUCTION SHEET. Everything regarding registration is covered in this sheet, and if the student peruses it with diligence, and adheres to the directions printed upon it he should experience very little difficulty with his registration.

FAILURES AND  
HIGH STANDARDS.

There are many ideas about the aims of the college and its contributions to the world. About the means by which the college is to realize its aims and make its contribution there is not so much divergence. When everything is considered it must be admitted that not athletics, not debate, not the hundred and one other activities of the live college, not the social life, but the college curriculum is the principal mechanism by which the college accomplishes its work.

That mechanism has just completed its work for one term, and the achievements and failures have been arbitrarily recorded in the form of grades. The usual F's have been awarded, and the usual complaints have followed. But, after all, F's are inevitable. It is only a question of their number and the proportion they bear to other grades. Too many flunks in the entire college means that something is wrong with the college—too many students, poor teachers, or other disadvantageous conditions. On the other hand, a small per cent of failures surely indicates that some are "getting by" without doing the work. When the laziness

inherent in most of us is considered, we can readily see that high standards imply a certain percentage of failures.—Selected.

Editor's Note:—We have selected the above editorial from one of our exchanges for on other reason than the truths contained therein. We believe that M. S. M. takes the middle path between the rigorous selection of some of our universities, and the lower standards of other schools.

## ENGINEERS?

No longer little Micky Hare,  
Whose ways are mild and meek,  
Will keep my clothing in repair  
For 50 cents a week.  
He now demands a larger sum  
Which I esteem too dear,  
For lately Michael has become  
A Pressing Engineer.

The days Tonic Dorio  
Would clip and trim my lawn,  
And make my kitchen garden grow,  
For ten a month are gone.  
He now is making wads of pelf,  
Takes contracts by the year,  
And on his billheads styles himself  
A Mowing Engineer.

The lads from Greece who cleaned  
my shoes,  
Once in a cheaper time,  
Now with a haughty scowl refuse  
My little proffered dime.  
One sees them by appointment now,  
They've risen, it appears,  
And have become, so they grow,  
Shoe Surface Engineers.

Old 'Rastus Johnson comes no more  
To take the cans away,  
Or knocks upon the kitchen door  
To seek his weekly pay.  
He found a means of getting his—  
The dusky profiteer—  
His card informs me that he is  
A Garbage Engineer.

Jesiah Bridge in days of yore,  
With fossil bugs and other lore,  
When secrets of the rocks he found,  
Was called by name an old "rock-  
hound."

But now to-day he does appear  
A GEOLOGICAL ENGINEER.  
—Written by a Literary Engineer.

### Talk It Over At Home

#### A Christmas Vacation Suggestion To Seniors

**T**HIS is your last year in college. This is your last Christmas vacation.

Your career after graduation is a question that you will want to talk over with the folks at home. They will be even more interested than you are. Now is the time to do it.

The John Hancock has in its field organization producers who began as life insurance men immediately after graduation and have made a conspicuous success of it.

Why waste time trying out something else which looks "just as good" and then come into the life insurance work to compete with the man who got into the game from the start?

Talk it over at home and remember that you can get information and helpful advice by addressing

Agency Department

*John Hancock*  
MUTUAL  
LIFE INSURANCE COMPANY

OF BOSTON, MASSACHUSETTS

Sixty-one years in business. Now insuring One Billion, Seven Hundred Million Dollars in policies on 3,250,000 lives

#### TUCKER RETURNS TO SCHOOL.

Joe Tucker, stellar halfback on the Miner team, who was injured in the game with the Arkansas Aggies at Russellville on Thanksgiving day, returned to school several days ago. Joe

has been confined to a hospital in St. Louis, where he was recuperating from the effects of the blow on the head which he received in the Aggie game. The veil of gloom which settled over the school when the news

of Tucker's injury reached Rolla has been displaced by one of joy at his speedy recovery, and his return to school is welcome news to every Miner.

#### THE SOCIAL SEASON.

##### Many Dances Will Be Given.

With the end of the present semester comes examinations and the social season at M. S. M.—that time of the year when the Miners remove the moth balls from their Tuxedos and lease the services of a brother to fasten their ties peculiarly upon them.

The first of these affairs was that given by the Lambda Chi Alpha Fraternity on last Friday evening. Their home was very beautifully decorated in true Christmas fashion, and lent much charm to the dance.

Other fraternities to have dances are as follows: Pi Kappa Alpha, on Monday, Sigma Nu on Wednesday, and Kappa Alpha on Thursday evenings. Kappa Alpha will give their dance in the spacious dining room of the Hotel Baltimore, while Pi Kappa Alpha will hold their dance in their chapter houses, as will the Sigma Nu fraternity, who are giving a dinner dance.

Both these homes will be beautifully decorated for the occasion.

#### MASS MEETING.

Under the auspices of the Wesley Foundation Judge Ware Stephens, Professor of Economics, Washington University, gave an excellent talk at the regular Friday mass meeting. His subject was "The British Labor Movement," a topic that is being much discussed at present.

As a result of the recent elections in England, Professor Stephens prophesied that the Labor Party will be called upon to organize a new cabinet. The program of the Labor Party is one with Socialistic views, which promises to revolutionize economics in England.

Professor Stephens then compared British labor, which is organized economically into unions, and politically into a party, with American labor, which follows Samuel Gompers' principle of avoiding politics. In conclusion Professor Stephens pronounced American labor's policy better than that of the British.

The student body wishes to express appreciation to the Wesley Foundation for its efforts in bringing Professor Stephens here, and for the instructive lecture, which was enjoyed by all.

### TAU BETA BI-PHI KAPPA PHI FOOTBALL GAME.

Because of the success of the recent Faculty-All-Star game, it is believed that a game between the "Trestle Club" and the "Order of the Rising Sun" would be hailed with delight by those men, who, according to T. Berry, will in a ten years period receive more than a \$3,000 average income. The Taw Bates hereby challenge the Rising Sun Club to a struggle to the finish, provided that the following line-ups are used:

#### Rising Suns.

L. E., "Tow Shaft" Forbes.  
L. T., "Efficiency" Armsby.  
L. G., "Hydraulics" Harris  
C., "Thetar" Woodman.  
R. G., "Least Square" Dean.  
R. T., "Shakespeare" Barley.  
R. E., "Swivel Engineer" Bardsley  
Q. B., "Sleep at the Switch" Jack-

son.

F. B., "Overthrust" Dake.  
L. H., "Ionization" Turner.  
R. H., "Bugs" Wheeler.

#### Tau Bates.

L. E., "Slim" Updike.  
L. T., "Black Jack Joe" Guiteras.  
L. G., "Pinky" Zeller.  
C., "Dave" Walsh.  
R. G., "Boots" Clayton.  
R. T., "Continuous Beam" Garrett  
R. E., "Chief" Buehler.  
Q. B., "Dan" Jett.  
F. B., "Electrolysis" Kershner.  
L. H., "J. Coogan" Bowers.  
R. H., "Pop" Wright.

It is expected that all of the boys men who appeared in the above mentioned previous game will perform in their usual stellar manner. "Charley" Dake, with the Tyner sand under one arm and an overthrust fault under the other, is expected to cause much sedimentation among the opponents. "Boots" insists that the field be laid out according to the Iron-Carbon diagram, but Jackson asserts that the Temperature Entropy diagram should be the lay-out for the day. They will probably compromise and lay out the field according to "Doc" Armsby's chart of "Cuts vs. Flunks."

It is expected that "Boots" will buy more radio equipment after the game, if his knee goes bad again. "Doc" Barley, if his attention can be diverted from making plans for his proposed "Boccacio Lab" is expected to talk the referee out of many substantial gains. The game will be played in five quarters of 15x2 minutes each. Because of his standing in Sigma Xi, it is suggested that "Streptolasma" Bridge be allowed to carry water.

## THE SCHOOL OF MINES AND METALLURGY

A Division of the  
UNIVERSITY OF MISSOURI.

The second oldest School of Mines in America, offers seven four-year collegiate curricula leading to Bachelor's Degrees in

- |                               |                                    |
|-------------------------------|------------------------------------|
| <b>I. Mining Engineering</b>  | <b>II. Metallurgy</b>              |
| <b>Options { Metal Mining</b> | <b>III. Civil Engineering.</b>     |
| <b>Coal Mining</b>            | <b>IV. General Science</b>         |
| <b>Mining Geology</b>         | <b>V. Mechanical Engineering.</b>  |
| <b>Petroleum Engineering</b>  | <b>VI. Electrical Engineering.</b> |
|                               | <b>VII. Chemical Engineering.</b>  |

Also offers one-year graduate curricula leading to Master's degrees in the branches of engineering named above.

The following degrees are conferred after three to five years of professional work:

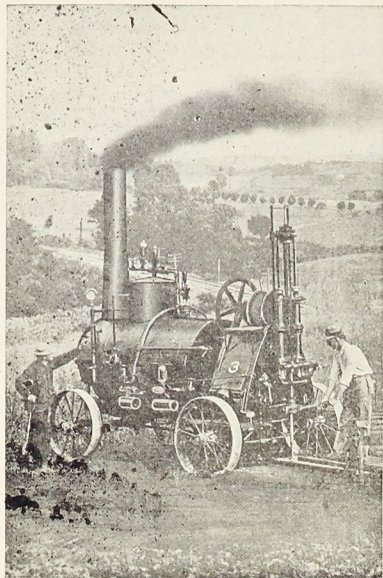

**Engineer of Mines, Civil Engineer, Metallurgical Engineer, Mechanical Engineer, Electrical Engineer, Chemical Engineer.**

Has 800 graduates scattered all over the world holding positions as Engineers, Scientists and Teachers of Science and Engineering. At least 300 non-graduates have reached distinction in their chosen profession.

Consider the "hangover."

Oh, woe is the least!

He sits upon the H. &amp; S. bench

And dreams of other's feasts.

Such is the wail of our unfortunate fellow students who have not had any money since they paid their fees, and as a result of their sad predicament they are forever conscious of their empty pockets banging around their knees.

These chicken grabbin', cash hoggin' refugees think of square meals only as bullion cubes, sugar, waffles, raviclas, etc., and rest their fears upon the passing clouds.

All good men are bad, so we are told, yet could you witness us upon our dates—and allow the fair damsels to fill your ears with the sweet nothings that go on directly beneath their nose—your heart would jump into your mouth and choke the flow of sympathetic words which would be forthcoming.

To those of you who have a suppressed desire to know what hell is like, and wish to learn something of your residence-to-be before moving into it we, the veteran hangovers, cordially extend you an invitation to spend a few days with us. We promise to portray some very interesting acts which will pertain wholly to **imps** and hellions for your embarrassment and pleasure.

**NEW REQUIREMENT IN  
MAJOR CURRICULA.**

At the request of the Mining Department all classes, beginning with the present Freshman Class, will be required to take Mechanical Drawing

22, instead of forge shop and topographical surveying, as has been done in previous years.

Also the Sophomore Electricals will take an introductory E. E. subject, in stead of Mechanics.

**GEOLOGICALLY SPEAKING.**

Jasper and Till were feeling dull, so they decided that they would slide out and have a geologic time. Not wishing to be intrusive, Jasper suggested that they meander out to the park and sit on a bench. The conversation drifted into terms that were not not exactly gneiss. Jasper, realizing that he was in for a hard panning regarding Vivianite, whose structure Till regarded as being the mica schists, assembled all his grit with the view of getting out of the trap. It seemed that Jasper had been caught in a rather stalactitic condition in a past instance, while Till was nearby radiating her lava amygdoloidally. Jasper saw things were getting plutonic, so suggested a ride in his fiord. They went to a joint known as the Piedmont, where they satisfied their appetites. Then Jasper got the hook. Till had been giving him a glacial shoulder. Andy Lucite came in and captured Till, leaving nothing but a wind gap. It was worse than thirty-four miles of over thrust and no fault of his own. After paying the bill, Jasper was at a temporary base level, with no uplift in sight. His heart was cleaved parallel to the pinacoid, so what could he do but wait? Albite. Willie Mite have done differently, but Jasper could only sit and think "what a red-headed jade did to me," and wait until the time came when he could say "Till, We meet again."

## ALUMNI NEWS.

"Bugs" Dougherty will be remembered by some who were at school in '20. Dougherty left us in '21 to attend the School of Journalism at Miz-zou, and has since gotten his A. B. degree from that school. "Bugs" was Prof. Dean's assistant in the Registrar's work.

Pesout, E., '23, has remembered us. Pesout evidently took post graduate work when he left us, for he tells us that he has "graduated from the Assay Office," and is now working in the smelter at McGill, Nevada, with the Nevada Consolidated.

Of that '23 class, F. Mulford and A. Mohri have also found their way to the Nevada Consolidated pay roll.

Teter, W. B., '23, is at Bunker Hill Illinois, hitting the whites of their eyes in the coal industry.

More news from Chihuahua, Mex.

Benham, W. M., '15, was recently married to Miss E. Kneeland, who is the daughter of a prominent con-

struction engineer in Mexico.

Millikan, C. E., '22, is with the El Potosi Mining Co., Santa Domingo. Thanks for your letter, Millikan. Write again.

Ham, N. M., '23, has been taking the sales training course at the New York office of the Ingersoll-Rand Drill Co. He has recently been transferred to the St. Louis office.

Morgan, G. B., '04, is at work with the Government Land Office at Cheyenne. He has recently completed an inspection tour of the California oil lands.

Agriculture is as fundamental as Engineer.

White, F. P., '22, is with the Ralston Purina Co., in Kansas City, Mo. They make chow for horses, cows, poultry, hogs,

Andrews, E. P., '22, is now with the Great National Mexican Smelting Co., at San Juan, Coahuila, Mexico.
