Monday, September 29, 1924.

Price, 8 Cents.

PLAYERS TO PRESENT

"CLARENCE."

Booth Tarkington's phenomenal stage success "Clarence" has been selected as the first play to be given by the M. S. M. Players this year. This play enjoyed a very decided success both on the legitimate stage and in the movies when Wallace Reid took the part of "Clarence". The picture, incidentally, was the last one that Wallace Reid made before his death.

The play is a four act comedy depicting the home life of an American family. Clarence is a returned soldier who, as an entomologist, found a place in the army driving mules. He proved to be an all-around handy man, even fixing the bathroom plumbing and playing the saxophone.

Try-outs for parts in this play will be held Sunday, October 2, at 2 p. m. in the auditorium of Parker Hall. The play will be presented some time near the first of November.

Membership in the Players is secured by competition. Any student of the Missouri School of Mines or young lady of Rolla is eligible to compete for a part in the plays. Those caring to try out may secure a copy of the play from Valerius or Doc Armsby before the try-outs and become familiar with it. The cast is selected by the director and advisory director of the Players. Any one who successfully carries two parts is eligible for election to the Players. A notice will be posted on the bulletin board when the copies of the play arrive. All who have had any dramatic experience, or who think they have any ability along that line are asked to come out next Sunday for the try-outs.

FATHER OF HARRY

BIRCHARD KILLED.

Mr. H. R. Birchard, father of Harry Birchard, '26, M. S. M., was killed a short time prior to Harry's intended return to school this fall, when he crashed into an interurban train while returning to his home in East St. Louis, Ill.

Mr. Birchard was secretary of the Y. M. C. A. there, where he continued the work in which he was prominent in the East.

RECRUITS NEEDED ON MINER.

The Missouri Miner is published by a staff composed of students of the school. New members are elected by the staff from those who are trying out for places. Any student is eligible to compete for a place on the Board, and any one who shows an ability or determination will have no difficulty in becoming a member of the Board.

When vacancies are made on the Board, a call is issued for recruits. After trying out for three months, a student is eligible for election. At the present time there are vacancies in both the editorial and business departments.

Working on the school paper takes quite a bit of the student's time, but it is time well spent. The training received is invaluable, and the service to the school is great. No one who has the time (and most students have) will regret that spent on the school paper.

We earnestly invite all who will to come to the next regular meeting of the Miner Board next Tuesday night at 7 o'clock, and get full details of the work. The meetings are held on the second floor of the Power Plant building.

Most students, and especially the freshmen, are backward about coming out. We hope all who care to will feel free to come up Tuesday.

MINERS VS. MCKENDREE.

The Miners will blast open their 1924 football schedule Friday, October 3, when they engage McKendree College, of Lebanon, Ill., on Jackling Field. Just how much opposition the Miners will run up against is not known, as they have never before met a McKendree team on the gridiron, but regardless of the opposition the Miners will be in there to win.

The game will start promptly at 3 p. m., and admission will be \$1.00, or presentation of an athletic card by the owner.

NOTICE.

Petitions for substitutions will not be considered by the committee unless they bear the approval of, or some recommendation from, the head of every department concerned.

H. H. ARMSBY, Student Advisor.

MINERS WORK HARD

FOR OPENING GAME.

With the opening game of the season less than a week off, Coach McCollum has been driving his charges at a faster clip than ever. Barring injuries, which are ever a source of worry, the Miners should present a formidable eleven when the referee's whistle brings the two teams together.

Competition for places on the back field is just as keen as was predicted it would be. Thomas and Modaff are fighting it out for the quarterback berth, while Tucker and Lee are staging a friendly rivalry at fullback. Hasselman, Fisher and Lemon are showing up well at halfback positions and it is still doubtful just who will draw the opening game assignments. McCoy, a 170-lb. Freshman, has also been going good at halfback, and is putting up a hard fight for a permanent place.

On the line Capt. Ledford is showing his old fight, and is undoubtedly a permanent fixture at end.

McBride, Buck, Young and Johnson are fast approaching mid-season form, and are going to be hard men to keep out of the line-up.

Cammack has been forced to the side lines during the past week owing to injuries, but it is expected that he will be able to don the moleskins again in time to face McKendree.

We wish that we could give you the line-up which will start the opening game. We can't. We can't even give a probable line-up and be somewhere near right. If you asked Coach McCollum himself he would undoubtedly tell you that he hasn't as yet picked the varsity. Competition for positions is too stiff to pick a team yet, but one thing is certain: the team that takes the field Friday is going to be a fighting eleven.

HAROLD DROUOT MARRIES

MISS DALLIS THOMPSON.

Harold R. Drouot, '24, and Miss Dallis Thompson of Rolla, were married Saturday, September 27, in Rolla. Mr. and Mrs. Drouot will reside in Tulsa, Okla., where Harold is employed as civil engineer with the county. The Miner joins with their many Rolla friends in all good wishes.

SOPHS VICTORS IN CLASS FIGHT

When the Freshies and Sophs lined up for the annual class fracas on Monday, Sept. 22, the Frosh had a slight advantage in numbers. The Freshmen were at a disadvantage, however, since they had spent the previous night on the frosty terra firma of the Fair Grounds, in company with the Senior Council. They were also handicapped by various and sundry of their classmates being A. W. O. L.

At the bark of the pistol the classes mixed, or perhaps met in the better word, in the center of the lawn before the Chemistry Building. The battle lasted thirteen consecutive minutes, with no time out for refreshments. The thirteenth minute proved to be unlucky for the Freshies. The R. A. C. (Rolla Ambulance Corps) assisted the victims from the field of horror, and pronounced the Sophs victors by half a dozen rope lengths.

After allowing the Sophomore engineering students to indulge in the art of painting, the Freshies exhibited the results, pending the approval of Rolla's 400 and numerous urban residents. Being duly approved, the Freshies rendered various bits of the latest song hits, lullabies, etc. The fact that eggs and molasses is a poor mixture was also demonstrated. During these various ceremonies, the Sophomores were put in the back ground by the Freshmen, but they managed to offer valuable assistance in the rear.

In a happy mood, after the festivities on Jackling Field, the Freshmen held swimming races in Frisco Lake. Several of the Freshmen cleaned up. However strong the Freshies are for prohibition, not a few returned to their various lodgings in a wet state.

FOOTBALL SCOREBOARD.

In order to afford the Miner football followers, who cannot follow the team in its road trips, an opportunity to see the game at home, a football scoreboard has been purchased by the Athletic Association.

The scoreboard is twenty-two feet long and eighteen feet high. It records accurately, play by play, a complete picture of the game as it is played. The board is operated electri-

cally and the movements of the ball are easily followed on a miniature gridiron. The line-ups of both teams are shown on either side of the scoreboard and the player carrying the ball, number of the down, yards to gain, etc, are shown very realistically.

It is expected that this scoreboard will be a valuable asset to all the M. S. M. students and Miner rooters. It has already proven a success in over two-hundred schools, newspapers and theatres throughout the country, and the Athletic Association is to be congratulated on this addition to M. S. M.'s equipment.

BOOSTER CLUB**ELECTS OFFICERS.**

At the initial meeting of the M. S. M. Booster Club for the year 1924-25 the following officers were elected for the forthcoming year: President, J. N. Harris; Vice-President, R. F. Orr; Secretary, E. J. Gorman; Business Manager, Prof. M. H. Thornberry.

To carry on the good work so nobly started several years ago is the objective which the present officers have in mind. That the Booster Club will carry on should never for a moment be doubted. An organization founded on the high ideals which this is, and functioning for a common purpose should not and can not fail.

To review the work which this organization has done would require columns, and in order to condense it we are publishing a financial statement of the Booster Club. If you read this statement carefully we are sure that a worthy organization, in which you have taken but a passing interest, will be given that which it deserves—a whole-hearted interest.

In closing, we, who understand and appreciate the work which the Booster Club is doing, would like to speak a word of appreciation to the man who has devoted much of his time in the past, and who will devote much of his time in the future in the interest of the Booster Club—Prof. M. H. Thornberry. It is a well known fact that Thorny's name is synonymous with the Booster's Club, and fortunate it is for the Club, for he is a Booster worthy of the Booster Club.

WORTH CONSIDERING.

The following clipping from some unknown college paper recently came into our hands and contents warrants publishing, although we are unable to give the writer due credit. The subject of school activities and scholarship is one of vital importance to a college student and one that receives much editorial comment. We have been asked to state that this clipping is contributed of Tau Beta Pi. This shows how that organization stands regarding the so called extra-curricula activities. In another part of this issue is a call for students to work on the Miner, and an announcement of try-outs for the next play to be presented by the Players. These two activities offer the experience which is pointed out in the following article as being necessary to engineers. Freshmen are especially urged to consider the following and avail themselves to the opportunities offered by school activities.

"One of the problems that every student in college must work out early in his college career is that of determining the amount of time he

is going to devote to student activities. There is little doubt that a man is greatly benefited by taking part in various activities while in school. The question really is, "How much time is a student justified in spending on college activities." Some men take practically no interest in such things and spend a large part of their time studying. Others get mixed up with every thing that comes along and often neglect their school work for some student organization or movement.

It is easy to see that either of these extremes are to be avoided if we are to get the most out of our college course. We are here primarily to obtain an education, to learn what has been done in the past in our chosen line of work, the way in which it was done, and to analyze the mistakes that have been made so that we may avoid making them ourselves. We are here to learn to think clearly on problems that will come up for us to solve when we have finished school and are practicing engineers, to go to the bottom of things and find out all of the factors that enter into the case, and to apply the fundamental laws and principles of nature to the various phases of the problem in order that we may arrive at a correct solution. To do this we must put in a large part of our time studying.

As engineers we will also be called on to handle material and men in the most efficient manner and to organize and carry through projects of many kinds. We will be called upon to present plans before gatherings of non-technical men, before public mass meetings and committees. To be successful in these things we need some experience and preparation. The various student activities offer a wealth of such experience to the men who will take an interest in and devote part of their time to them.

Every student, soon after entering college, should give the matter of student activities careful consideration and plan to devote a part of his time to them but at the same time he should limit himself to the amount that he can carry and still maintain his standing in class work."

SEND THE MINER HOME.

The percentage of students who subscribe to the Miner is very small. Many do not realize that the subscriptions are necessary for the financial success of the paper. In most cases, the advertising is the big source of revenue, but with the Miner the ads do not pay for the printing.

The deficit must come from the subscriptions.

Last year it was impossible to publish a special Christmas issue because of the added expense. Cuts and cartoons also cost extra and can not be run for the same reason. If every student were a subscriber the staff would be able to publish a much better paper.

The usual excuse a student gives when asked to subscribe is that his room mate takes the Miner, or that there are enough at his house taking it. If that is the case, send the Miner home. It cost no more, and is easier than writing letters. There is usually some member of the frail sex who will be glad to get it, and there is no additional charge for that either.

Several of the clubs and fraternities are trying to get their members to subscribe 100 per cent. Let's get the whole school to subscribe 100 per cent and see what the staff can do with a few extra shekels.

WHY NOT?

Has it ever occurred to you that you were once a freshman at old M. S. M.? Can you remember away back yonder when you first arrived in Rolla, and were greeted by "Dam You Frosh"? Do you still hold the memories of your first registration, and how far it seemed to the end of it all? Why, man, that was the beginning of the greatest turn in your life. The only worry was the Sophs and you later found that to be somewhat of a lark. You didn't know Prof. Dean then, and Doc. Armsby hadn't sent you a single "notice." Little did you know of quizzes and the fights with the "mid-night oil." In fact you were either pretty wise or pretty dumb, and everyone of you was treated alike.

There were frequent treatments with the paddle and the Freshman-Sophomore fight, the class-day circus, and the command to stay in at nights. You thought it was unfair then but when you think of all now you remember it to be just a joyous beginning of your college career.

And say, did you play football? No? Well, neither did I. We couldn't all be football players, but we were real boosters. Why, don't you remember how we'd pile on the freights to follow the team to St. Louis or Springfield? And how the natives there would marvel at the pep we had whether we won or lost. Say, man, that was the old stuff, and we haven't lost that old pep yet-have we? You haven't grown old and forgotten those

good old days, have you? Why not drop in on the bunch sometime and see how things are getting along. Maybe you might not know 'em all now, but you can soon get acquainted. The old Miner pep is still burnnig, and they are just rearing to see the old gang once more.

But here's another thing, why not bring some young fellow down to school with you. Show him around and he'll soon get the old spirit and sign up for a few courses. It won't be long before you'll be proud of that boy and he'll be encouraging others to go back to school with him.

You know nothing can long endure without the support of the original supporters. Do you know how easy it is to explain to some boy the possibilities of engineering, and what he can do with his education?

This seems to be the age when a great per cent of the high school graduates are uncertain as to what profession to follow. Very few consider engineering because no one tells them about it. They generally follow the line of least resistance and enter the State University as an arts and science student. Now why is it engineers don't encourage the high school graduates to follow the technical line? It's because they're too busy to

fool with such a minor problem. They have too much else to do to waste their time talking to kids about their future. But you'd be surprised to know how easy it is to line a fellow up and how good you feel when he comes home Christmas and raves about your Alma Mater. He can tell you all about the doings in Rolla. He knows all the profs and will have a message from Prof. Dean. He can renew your old times, and before you know it you'll be dropping in on the bunch just to see it all your self.

So let's get together and send a freshman class to school each year that will make our old school so big that they'll have to hire ten coaches to handle the football men. "Give 'em hell Miners."

AN ALUMNUS.

FRESHMAN HAZING RESTRICTED

In accordance with a ruling of the Faculty and the Board of Curators, the customary first week hazing of the Freshmen by the Sophomores was abolished. Previously, tradition dictated that the Freshmen who stayed in town after six o'clock p. m. received a welcome (?) at the hands of the Sophs. The traditional class fight and circus were not, however, included in the restriction.

Rumor caused Director Fulton to call a short meeting of the Sophomore Class on Thursday, Sept. 18, to give them some worldly advice in relation to disobeying the instruction, and the situation was remedied. Thus the Sophs had to be content with only the class fight and the circus to nurse their hurt feelings.

Although one old M. S. M. tradition was lost, another was revived, by allowing the Frosh to have their cap-burning festival on Thanksgiving Day. To this order the Sophs published a dictum prohibiting the use of belts by the Freshmen, allowing them the use of suspenders. This ruling is to be enforced till the end of the school year.

BOARD FOR STUDENTS

Rooms in modern home and board for students.

Apply to MRS. LANGSTON,
409 Rolla Street.

THE SCHOOL OF MINES AND METALLURGY

A Division of the
UNIVERSITY OF MISSOURI.

The second oldest School of Mines in America, offers seven four-year collegiate curricula leading to Bachelor's Degrees in

I. Mining Engineering

Options { Metal Mining
Coal Mining
Mining Geology
Petroleum Engineering

II. Metallurgy

III. Civil Engineering.

IV. General Science

V. Mechanical Engineering.

VI. Electrical Engineering.

VII. Chemical Engineering.

Also offers one-year graduate curricula leading to Master's degrees in the branches of engineering named above.

The following degrees are conferred after three to five years of professional work:

Engineer of Mines, Civil Engineer, Metallurgical Engineer, Mechanical Engineer, Electrical Engineer, Chemical Engineer.

Has 300 graduates scattered all over the world holding positions as Engineers, Scientists and Teachers of Science and Engineering. At least 300 non-graduates have reached distinction in their chosen profession.

THE EDUCATED JUNIOR.

Oh, why should I go on to school,
And daily mop my brow?
There ain't a thing that I don't know,
I'm educated now.

I've learned a lot of Ology,
Gee, Zo, Lith, Soci., Bi,
I know an acid from a base,
If not, I hope to die!

Somehow a worm ain't just the same

As what it used to be,
I've learned that it is human, too,
That is, as you and me.

My education is complete;
How's this for earthly labors:
To drive a car with just one hand,
The other in your neighbor's?

A hundred other things I know:
A mineral's not a rock,
To take a course without a text,
To pick a locker lock.

So what's the use to waste a year
On lectures that are bull?
Three years have taught me all there
is,
My marvelous brain is full.

Joseph H. Rohloff, B. S. '22 was
married to Miss Elizabeth Walker, of
St. Joseph, Mo., on Sept. 20, 1924, at
Providence, R. I. "Dodo" will be re-
membered as one of M. S. M.'s bas-
ketball veterans.

ALUMNI NEWS.

Walter E. Soest, B. S. '99, was instantly killed in an auto accident near El Paso, Texas, on June 9, 1924. Mr. Soest was connected with the Potosi Mining Co., at Chihuahua, Mexico, in the capacity of Mine Superintendent.

At the time of his death Mr. Soest was making an inspection tour of the chief mining districts of New Mexico, Arizona and California, preparate to the construction of a new five hundred ton mill at Chihuahua, of which he was to be Superintendent upon its completion.

H. H. Soest, a non-graduate, is in the contracting and construction business in Los Angeles, Calif.

Geo. F. Berry, a graduate Vocational student, is with the City Engineering force at Tulsa, being employed as an inspector.

The M. S. M. Alumni Association reports the following list of new members signed up since the closing of school last spring. This gives the Association a total membership of five hundred and seventy members to date: A. B. Jewell, R. E. Grady, Jr., Chas. L. Lintecum, A. F. Denison, H. H. Ziesenis, F. E. Harrison, G. F. Perry, W. H. Backer, C. P. Burford, G. A. Hallstrand, S. M. Greenidge, C. B. Kentnor, Jr., J. G. Vogt, P. F. Thompson, Bruno Rixleben, W. J. Alton, Carl W. B. Sitzler, A. B. Schrantz, Lee J. Elliott, J. N. McGirl, E. D. Wheeler, A. L. Bradt, Thos. H. Beck, R. H. Brumley, T. R. Thomas.

J. W. Pugh, B. S. '18, is taking post graduate work at Boston Tech. Present address is 81 Audubon Road, Boston, Mass.

The Wishon Exploration Co., of which Walter W. Wishon, E. M. '81, is a senior member, has just purchased the Crystal group of copper claims in the southern part of Majave County, Arizona. Mr. Wishon is experienced in copper mining and

metallurgy, having spent many years in that industry in Butte, Mont., and predicts, after carefully looking over the mineral resources of Arizona and neighboring states, that the copper and lead ores of the southern portion of Mojave County, the lead-zinc ores of the Cerbatwallapai ranges, and the gold ores of the Black or River range will yet make Majave County one of

the great outstanding mineral assets of Arizona.

"Pinkie Zeller, according to the latest news, has decided to adopt a military career. His new address is Lt. George A. Zeller, 3rd Field Artillery, Fort Benj. Harrison, Ind.
