Price, 8 Cents.

## SUMMER TRIP FOR GEOLOGISTS PROPOSED.

The Geology Department is endeavoring to establish a summer camp for Field Training in Geology for the men sufficiently interested. The proposed plan is now before the Faculty for consideration, and it may be that this summer will see the first camp established by the Missouri School of Mines.

It is becoming widely recognized that the only adequate laboratory work in general geology is field training, and most of the better departments of geology are now regularly conducting summer field camps. It is proposed that the summer camp be organized under the following conditions:

1. That the school furnish as part of the regular equipment, the necessary tents, cots, and camp utensils; the students to furnish their own bedding and personal supplies.
2. That the course will not be given for fewer than 10 men, and that not more than 15 be admitted. If more than 15 apply, the choice of candidates will be on general excellence of geology training and fitness for field work. Mineralogy, General Geology, and Geology Laboratory (courses 503, 510, 512, 513) will be held as prerequisites, and Lithology (530) is strongly recommended.
3. Enrollment for the course shall be completed not later than April 1st.
4. The laboratory fee for the course shall be \$15.00, payable on enrollment. There shall be no extra matriculation fee.
5. On or before April 1 each

Continued on Page Eight.

## JUNIOR CLASS BENEFIT DANCE.

The Junior Class will give a dance for St. Pat's benefit, on Friday night, Feb. 24. Real music is being provided, and a "good time will be had by all." Help make this St. Pat a bigger and better celebration, and turn out for the hop.

## THE FACULTY PARTY.

By the Parker Hall House Cat.

(Editor's Note:—The Miner is extremely fortunate in having the following report on the Faculty Party, given in the Gym on the night of St. Valentine's Day. The guardian of Parker Hall and its inmates was requested by the Faculty to be present to see that the party was properly managed, and the Miner was able to secure his version of the great event.)

The Faculty and its wives met around the festive board at 6:30 P. M. on the evening of St. Valentine's Day, and proceeded to fill up properly on hash and cabbage. Hot tamales as desert served to warm up the crowd for the rest of the evening.

The program of after dinner speakers carried a long list of names, but only three got to speak. Dr. Fulton, who was supposed to make the long speech of the evening, absconded in favor of Mrs. Dean, who has the reputation of being able to say it all. Prof. Clayton, the third speaker, found that there was nothing left for him to say.

After the speeches came to their unlooked for end, various forms of amusement were indulged in. Exercise, both mental and physical, was in vogue. Those who were bent upon violent mental activity played chess. They soon became so ab-

Continued on Page Eight.

## ST. PAT'S 1922.

Four weeks remain until the big celebration of the year comes. The Junior Class is already busy with preparations for the biggest and best celebration yet seen in Rolla. The committees have been named, and are hard at work on their particular business in making a success of this year's entertainment.

The costume committee is almost ready to put up the notices for costumes, and every one is urged to get his order in early so that there will be no "last minute scrambling to be suited for the Masque Ball.

The Publicity Committee is endeavoring to have the Pathe News service film the parade and knighting of the Seniors on the morning of the 17th. If this can be arranged, the school will be given considerable good advertising by means of the pictures shown in the theaters thruout the country. A better means of advertising can hardly be devised.

Mystery and excitement reign supreme in Rolla. Everybody has "inside dope," but, strange to say, they all have different "dope." If this state of affairs continues until twelve o'clock Friday night, March 17th, the Masque Ball will be a seething hall of excitement until the appointed hour. Then will come the many "I-Told-You-So's."

With the large class of Juniors, the present hosts will be quite able to show every one the best time of his life at the annual festivities. Got your date yet?

Have a good time at the Junior Dance Friday Night.

## SPORTING SECTION.

## MINERS 32; CENTRAL 13.

## Thirteenth Straight Victory.

The Miners humbled the Central College Eagles last Friday night with a 32 to 13 score. The first half was exceedingly hard fought, with honors about equal. Dorris's quick and accurate guarding was the deciding feature which kept the Central quintet from marking up an equal score.

The game opened with both sides fighting hard, but poor goal shooting prevented either side from scoring. The Miners failed to show ordinary form, and Central's offensive proved to be a difficult one to stop. Central scored first when Randsell dropped in a free throw. Following two more Miner fouls he increased the Central score to 3 points. McClelland broke loose and counted first for the Miners with a field throw. Signer contributed a free throw and a field goal, after which the game went the usual way. Kemper used his jump and height to a good advantage by knocking in a counter from a toss-up near the basket. The first half ended 10-5.

The Miners took their opponent's measure in the second half and soon chalked up a 20 to 8 lead. Campbell replaced McClelland, who soon replaced Signer. This combination with Parker replacing Dorris at guard soon ran the score up to 28 to 9. The "Oil Cans" took the floor. Moodie for Bulger, Springer for Parker, Burg for Kemper, Reeves for McClelland, with Campbell already in the harness, comprised the Miner line-up. During the last few minutes of the game this squad completely outplayed the Eagles, with Campbell adding two

field goals, and Central placing one field goal and two free ones.

McClelland led in the scoring with 10 points, Kemper and Campbell tied with four field goals to each player's credit. Randsell, center for Central, was the leading point getter for the Eagles, scoring one field goal and seven free throws out of 15 attempts.

The sportsmanship of the Central team was evident throughout the entire game. No evidence of foul play was noticeable, and as a whole comprised the cleanest and gamest squad of this year's conquest.

## Line-up:

Miners 32.	Central 13.
Signer (4).....f.....	Ganter
McClelland (10).....f.....	Hanlon
Campbell (8).....f.....	Dodson (2)
Kemper (8).....g.....	Randsell (9)
Bulger.....g.....	Buckner (2)
Dorris (2).....g.....	Stith
Parker.....g.....	Delaney

Miners: Moodie, Springer, Reeves and Burg. Referee: Kamp (Washington). Timekeeper, Thornberry. Time of halves, 20 minutes.

Have a good time at the Junior Dance Friday Night.

## MINERS START ON ROAD TRIP FRIDAY.

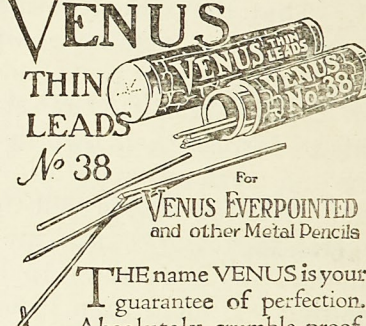

The Miners start on a five-game road trip Friday, and play all Conference games. On the 24th they take on the Drury Panthers, who should prove a fairly easy foe. On the 27th they meet William Jewell for the third time this year. Two previous victories should afford good dope for a third win. On the 28th Missouri Wesleyan will be the foe. Wesleyan's game so far this year has been an unsettled one, and have upset several good teams' standing. However, they should prove to be no stumbling block for a team of Miner caliber. The real test of the trip will come in the fourth game, which is against

Tarkio College, on their home court, on March 1. This game will decide the Conference championship, as neither team has lost a game, and each has six wins. Drury held Tarkio to a 28 to 25 victory, however, which leads us to believe the game as good as won. A victory over Maryville on the 2nd will complete the trip and the season's games.

## ATTENDING A. I. M. E.

Dr. Chas. H. Fulton, Director and Professors C. R. Forbes and C. Y. Clayton, and Mr. O'Hara, of the U. S. Bureau of Mines, are attending the winter meeting of the American Institute of Mining and Metallurgical Engineers, which is convened in New York City this week.

### WHO'S WHO.

Virgil Lee Whitworth, better  
known to the students of this  
institution as "Whit," has the  
distinct advantage of having  
been born with curly hair, and  
blond at that. There are few  
men in school who possess this  
advantage over their fellow-  
men, and fewer who know how  
to use it. Not so with "Whit."  
'Tis rumored that some dame is  
madly in love with our hero,  
and goes to the picture show ev-  
ery night, and watches his ev-  
ery move while he nonchalant-  
ly renders harmony from his  
xylophone. "Whit" denies  
having displayed any unusual  
skill to cause this young lady to  
beam upon him as a little tin  
god upon a pedestal, but we  
doubt it.

**M. S. M. GLEE****CLUB CONCERT.**

The M. S. M. Glee Club is giving a special concert for St. Pat's benefit on Saturday night, February 25, in Parker Hall. The Club has an elaborate program arranged, with special music, and local talent along with the members of the Glee Club, and assure a very good entertainment for the patrons of M. S. M. student activities. Tickets will be on sale Wednesday morning, priced at seventy-five cents.

Proceeds of the sale of tickets will go to the Junior Class to assist in staging the annual St. Pat's celebration. The patrons of the concert will not only be helping out the Junior Class, but will also be well repaid in the high standard entertainment afforded them.

Wednesday, the 22nd, George Washington's Birthday. Legal Holiday. No Classes.

**DE MOLAY.**

The DeMolay will have its second ceremonial convention Tuesday, Feb. 21, at 8:00 P. M. Both degrees will be conferred. All Master Masons are most cordially invited to be present. Bring your friends. The DeMolay is desirous of becoming acquainted with the members of the great brotherhood in whose shadow we labor.

**R. O. T. C. SUMMER CAMP.**

Summer camp for the M. S. M. men in the R. O. T. C. will be held at Fort Sheridan this year, according to latest information. Ft. Sheridan is situated on Lake Michigan, 20 miles north of Chicago. It is one of the finest army posts in the United States. All Engineer Units from the 6th and 7th corps areas will be sent there. The following schools will be represented: Missouri School of Mines, Iowa State College, University of Iowa, University of Kansas, Rose Polytechnic Institute, University of Illinois.

Attendance at the basic camp is limited this year to 5 per cent of the men taking basic work. There are about 20 men who wish to go from here, so there is a contest now in progress in general R. O. T. C. standing to determine who will be the lucky men. The contest closes April 30th. There is no limit on the attendance of the men taking the advanced course.

The War Department is doing all that can be done to make the R. O. T. C. work worth while, both from the standpoint of the good the country will receive, and from that of the good the individual will receive. A circular letter has been sent to the parents of the men now taking the basic course and the advantages it offers. An effort is also being made to interest the bassic men in this year's summer camp.

# Keeping faith with the SMOKER

Our lifelong knowledge of choice tobaccos, our years of manufacturing experience and our up-to-date facilities are concentrated on making CAMELS the finest cigarette that can be produced.

Into THIS ONE BRAND we put the UTMOST QUALITY. A better cigarette cannot be made—even for a higher price.

CAMEL is THE QUALITY CIGARETTE—made for men who think for themselves—for folks who appreciate really fine tobacco.

ONE BRAND—ONE QUALITY—ONE SIZE PACKAGE.

That is the way we keep faith with the smoker.

### VOCATES.

There will be a meeting of the V. F. W.'s next Saturday night at the K. P. hall. An interesting program has been scheduled. Every one is requested to be present.

A letter from Healy and Gegan says that they like their new course of study fine. They are attending the law school of Cumberland University, Lebanon, Tenn.

It is reported that "Uncle Tom" Behnke, well known Vocate, business and club man, who is taking forge shop, finds it difficult to obliterate the evidence of this Lab. from his hands. He has been seen visiting the manicure shop after the Lab. periods so that when he looks them over he will not be reminded of the dirty grimy toil and labor that is a part of the same.

### CHOICE BITS IN TOPOG.

The celestial pole is a blue place in the heavens near Polaris.

The earth's form and size was determined by the atmospheric pressure.

Refraction is caused by a ray

of light passing thru the density of the earth's surface.

Q. How does the secular change in declination affect the retracing of old surveys?

A. Because the earth is not moving in the same orbit, causing the distance to be smaller.

Azimuth is an imaginary line of about 12 degrees in width and south of the zenith of the equator.

Right ascension is the number of degrees between the imaginary equator and the true equator.

Q. What is the Zodiac?

A. The Zodiac is where the earth's orbit and the Azimuth intersect.

2. The degree the earth rocks, as it rotates and revolves, which is 8 degrees, and it takes 25,000 years to rock the 8 degrees.

3. Zodiac is a star opposite Polaris.

Note: (This was not in Topog, however:)

Q. Explain the principle of the Aneroid barometer.

A. The Aneroid Barometer is a machine for exhausting air from a bell jar.

Alex. Grosberg, '12, has returned from Bolivia, where he has been engaged in the mining of tin since immediately after his graduation. During the greater part of his time Grosberg was mill superintendent for the Patino and Llallaqua Companies, but in the past year had charge of the operations of D. G. Bricker, a large mine operator of LaPaz.

George Easley has also returned from Bolivia, and is now located in New York City. Mr. Easley, it is remembered, went to Bolivia last September, after organizing a company which bought up a group of tin mines.

St. Pat's Benefit. Junior  
Dance Friday Night.

applicant shall make a guarantee deposit of \$25.00 to protect the school in purchase of equipment. This deposit shall be forfeited if the applicant withdraws at any subsequent date; except that in case 10 men still remain to take the course, the guarantee deposit will be refunded.

6. On or before Commencement Day, a further deposit of \$25.00 shall be made. This, together with the guarantee deposit, (\$50.00 in all) shall apply on the cost of meals in camp. If, after the total expense of groceries and cook shall have been paid out of these deposits, there is a deficit, this deficit shall be charged pro rata among the men, the charge to be paid before credit is turned in for the course. If, on the other hand, there is a surplus after all expenses are paid, it shall be refunded pro rata.

7. The course shall start the Monday after Commencement, and last for one month.

8. The course may apply on Junior Trip in Metal Mining, Geological, Petroleum Engineering, and Coal Mining options, and, if so applied, shall carry 3 hours additional elective credit. If not applied on Junior Trip, it shall carry 6 hours elective credit in the options above named.

9. The course can be made to furnish thesis material for those wishing to follow the geology option, if the necessary plans are made in advance.

It is proposed, during the coming summer, to establish the camp in the vicinity of St. Clair, Missouri, between here and St. Louis, in an area of faulted rocks of sufficient complexity to make a good problems for beginners.

Estimated cost of the course will be about as follows:

Fee, \$15.00; railroad fare,

about \$5.00; deposit to cover meals, \$50.00; incidentals, \$5.00; total, \$75.00. It is felt that the above is a maximum estimate, and that the trip will actually cost somewhat less.

Dr. Dake, head of the Department of Geology, has just submitted the above report to the Director of the School of Mines, and is very much in favor of the plan. Such a camp would place M. S. M. on a par with other schools which have summer camps for Geology students.

Continued from Page One.

sorbed in the game that they were entirely lost until the next morning. No one knows what time they went home. Those who chose less strenuous mental labor played various card games, ranging from bridge to rook. Prof. Thornberry and Mrs. Dean won prizes at the latter game, which aroused lively interest and keen competition.

The physical exercise was in two forms, bowling and dancing. It is worthy of note that many of the fair sex indulged in bowling, much to the worry of their husbands, for it is a well known fact that bowling develops the muscles of the right arm as almost no other form of exercise can. Lieutenant Wanamaker was the novice of the evening, and incidentally its hero. He had never seen a bowling alley before, but he made a strike the first time.

Those who indulged in that modern type of wrestling known as dancing were treated to an evening long to be remembered. They have the present recollection that at one time Terpsichore himself was in their midst. "Doc" Boyce, because of his proficiency in the professional type of wrestling, easily adapted himself to the more aesthetic form recognized by society, and was the center of

attention. All eyes were focused upon him as he cantered over the floor to the music by Virgie's own Jazz Babies. His movements were so exquisite that his partner declined to finish a dance, saying that she did not want to hamper the art of any one so far beyond her reach.

The one member of the faculty who was seen and not heard was Coach McCune. Having broken into society with such a bang a short time before, he gladly surrendered his place to any newcomer who wanted it.

It was a great get-together, and tended to promote greater fellowship among the members of the faculty.
