No. 1.

"BUD" GORMAN KILLED IN SOUTH AMERICA.

**Dies in Chile Only a Few Months
After Taking Position There—De-
tails Not Known.**

According to word just received in Rolla, Eugene J. Gorman, '25, familiarly known as "Bud", was killed in an accident last week at Sewell, Chile, in South America. Details of the circumstances surrounding his death were not given, though according to the cablegram death was the result of "internal injuries".

News dispatches of last week told of a \$250,000 fire in the offices of the Braden Copper company at Rancagua, near Sewell, where "Bud" was employed, and it is presumed that his death may have been the result of injuries sustained in fighting the conflagration.

Eugene J. Gorman was born in Davenport, Iowa, November 17, 1902. He attended Sacred Heart cathedral school and St. Ambrose college in Davenport graduating in the academic department in 1920. He graduated from M. S. M. last semester and sailed from New York on May 21 to assume his duties as mining engineer with the Braden Copper company.

"Bud" was editor of The Miner during his last semester here at Rolla, also having served very efficiently as sports editor. He was a member of the Bonanza Club and of the Knights of Columbus. By his death M. S. M. has lost an alumnus who was sure to have made a name for himself and the school, and the mining profession a very promising young engineer. All who knew him here feel keenly the loss of a real friend and of an all-around good fellow.

Survivors are the father, three brothers, and a sister, all of Davenport, Iowa. Further details of the accident have been promised by the offices of the Braden company at New York.

H. H. Hoppock, '20, is now with the W. T. Rawleigh Company and his present address is Oriental Hotel Kobe, Japan.

FIFTY MEN ANSWER FOOTBALL CALL.

With the initial set-to with Shurtleff College less than two weeks ahead, fifty golden-jerseyed M. S. M. gridiron warriors are hard at work under Coach McCollum in preparation. The candidates for the line position this fall are possessors of considerable weight, while the backfield makes up for its lightness with exceptional speed.

Captain McBride, R. Johnson and Cammack are all letter men hustling for guard positions, and G. Johnson and Gladden are veteran performers at the tackles. "Skipper" Young will again occupy the pivot position. This leaves the wing positions a problem, calling for the development of some newcomers, as Couch is the remaining letter man on end. Allenbach is again with us, but a recent operation voids his chance of again claiming his end position.

Sharp is a new man on the squad this year, who shows all the qualities of an end, lacking only in avoirdupois. He has considerable speed in moleskins, and handles the pigskin adeptly.

Nolen, Lee, Thomas and Lemon are the veteran backfield men. This quartette is of proven ability, and several new men show signs of previous acquaintance with a pigskin that may prove disastrous to the Miner opponents.

Shurtleff College, which opens the M. S. M. schedule in the fall sport, is of unknown ability, but McCollum's cleated clansmen will be in the pink of condition to receive the Illinoisans. Missouri U. is another newcomer after a lapse of eleven years since the last fracas, when the Miners' steam-roller of 1914 invaded the Bengal jungle and returned with a 9-0 verdict over the Tigers. The complete football schedule:

Oct. 2—Shurtleff, at home.
Oct. 9—McKendree, at home.
Oct. 17—Missouri U., at Columbia.
Oct. 23—Kirkville, at home.
Oct. 31—St. Louis U., at St. Louis
Nov. 14—Washington U., St. Louis
Nov. 21—Drury, at Springfield.
Nov. 26—Springfield, at Springfield.

SENIOR COUNCIL MAKES RULES FOR FRESHMEN.

**Frosh Will Be Allowed to Live but
Must Be Held in Check by String-
ent Laws.**

The Frosh must be shown their place, but the rough stuff must stop. This seemed to be the consensus of opinion at the meeting of the Senior council held Wednesday evening in the reading room of Parker Hall. The rules printed below will show that the Council was very lenient in its attitude towards the Frosh. This student governing body, however, wishes it to be made plain to all members of the Class of '29 that the rules will be strictly enforced. Frosh, govern yourselves accordingly!

Freshman Rules

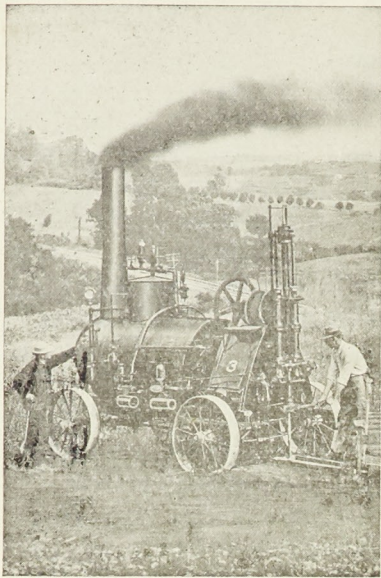

1. Freshmen must wear green caps all of the 1st semester.
2. Freshmen shall be required to touch their caps, all year, to Faculty members and Seniors.
3. Freshmen shall wear suspenders all year.
4. Freshmen shall gather in a body at all football and basketball games.
5. Entertainment shall be provided at all games.
6. All Freshmen shall attend every mass meeting.
7. Freshmen shall carry matches at all times and present them to any upper classman upon request.
8. Freshmen shall be absent from the streets of Rolla from 6 p. m. to 6 a. m. until after the class fight on Monday, September 21st.

Per Order
SENIOR COUNCIL.

HOT DIGGEDY DIG!!

Here's the announcement you're lookin' for, fellers. The first big Miner dance of the season will be held at Jackling Castle next Friday night, September 25. William Karl Schweickhardt and his Varsity jazz connoisseurs will make you shake a wicked hoof. The fun starts at 9:15. A dollar a couple. Hot dawg! Let's go!!

Fred S.—“Well, Pete, howdy! You didn't get a damn bit bigger.”
Pete—“No, but I got my P-H-D!”

A. F. Truex, '14, and family drove through Rolla, September 5, on their way to Tulsa, their home. They had been on a trip to Lawrence, Kansas, Kansas City, and St. Louis.

Mrs. V. H. McNutt and children, of Tulsa, spent a few days in Rolla week before last.

The Rolla fire truck responded to a call of fire last Thursday at the Bonanza Club House. Considerable damage was done before the fire was extinguished.

VICTORY FOR SOPHS.

With the Sophs outnumbered nearly two to one by the Frosh, the fracas this morning between the classes of '28 and '29 ended in a victory for the former. After steen minutes of the toughest kind of battle, the Sophomores succeeded in hog-tying the unsophisticated newcomers, immediately after which the big 3-ring circus on the athletic field began.

A large part of the customary roughness had been eliminated from the first event, and the circus also showed marked evidence of the interference of the hands of those "higher up". But for the unusual activity of the Sophs in reluctantly (?) "hiding out" the dangerous element of the Freshmen class on Saturday and Sunday, the result of the class fight might have taken a different turn; for, though the Frosh are unsophisticated, "in numbers there is strength"—Frosh, 146; Sophs, 68.

MONTHLY ALUMNI EDITION NEXT WEEK.

On September 28, the first of the nine special alumni numbers of The Miner, dedicated to the classes of 1874, 1875, 1876, 1877, 1878, 1879, 1880, 1924, and 1925, will be issued. Much effort has been spent in securing news of special interest to these men.

J. S. Brown, '17, who received his Ph.D. from Columbia U. this year, has resigned his connection with the U. S. G. S. and is now doing geological work in the Joplin district.

The professor who comes ten minutes late is very scarce. In fact he is in a class all by himself.

Among the largest one-man shovels in the world is this electric giant engaged in open-pit mining on the Mesabi Range in northern Minnesota. It picks up eight cubic yards of iron ore at a gulp, which it dumps into a waiting car.

A day's work in a minute

Mesabi Range, renowned iron ore deposit, is yielding its mineral wealth at the rate of 16 tons for every bite of an electric scoop.

A man with a shovel would work a whole day to mine and load eight cubic yards of iron ore which this 300-ton electric giant moves in one minute.

Of course, all mining is not done on the surface. But there are many mines in which electricity has changed our conception of mining operations. Wires, penetrating even to the deepest shafts and galleries, have brought light, power, ventilation and added safety to those who must work in the very bowels of the earth.

Electricity's contribution to mining may be of particular interest to the student of mining engineering, but it is of general interest to all college men as still another example of how electricity is simplifying the world's work.

In every branch of mining operations G-E equipment is very much in evidence. And there are engineers of the General Electric Company especially assigned to mining problems and requirements, just as there are others specializing in all major applications of electricity.

A new series of G-E advertisements showing what electricity is doing in many fields will be sent on request. Ask for booklet GEK-1.

Issued Every Monday.

The Miner, for the student body, Alumni Association, Director, and Faculty, wishes to welcome officially the new students at M. S. M. We trust that you will enjoy your stay here and that before long you will be regular Miners along with the rest of us.

Over half a million dollars will be spent in Rolla this coming school year by the students and faculty of M. S. M. While you are spending, why not make it a special point to make The Miner a bigger and better paper and thus M. S. M. a bigger and better school by patronizing The Miner advertisers? Think it over. Then act!

The enrollment figures published elsewhere in this issue of The Miner include only those students registered up to noon on Saturday. Since students are coming in hourly and many more are yet to be heard from, the attendance no doubt will be well above the 400 mark before registration is completed.

FOR RENT—Rooms to rent for ladies, gentlemen, or college profs.

INITIAL MASS MEETING.

An almost complete representation of the student body was present to hear Dr. Fulton address mass meeting last Friday on various subjects of interest to the students. Dr. Fulton first issued a note of welcome to all the new and old students, and then devoted the remainder of his time to a request for the co-operation of the students, detailing the difficulties to be surmounted and outlining the methods of manifesting this spirit of co-operation. The most notable feature of his talk was that Dr. Fulton discussed objects to be attained, and means for their accomplishment, particularly emphasizing the factor of co-operation as being of prime importance.

"Doc" Armsby made a few announcements, and "Spk" Dennie discussed some matters relating to the use of the gym, after which a call was issued for Freshmen candidates for Athletic Association offices.

A 1925 ROLLAMO FOR \$1.00.

Can you imagine such a bargain? Fifty extra copies of the 1925 Rollamo, the latest edition, are being sold for one dollar each in order to remove part of the debt incurred in publishing the book. This is your only opportunity to obtain a copy for less than 30 per cent of the regular \$3.50 price. Perhaps you neglected to get a copy last year, or would like to send one home. This should appeal particularly to new students, since the Rollamo contains all the dope on the different organizations, and the various social, athletic and scholastic activities, in addition to the special pictorial section composed entirely of views of the campus. Don't wait; take your dollar to Mr. Kahlbaum's office now and get your Rollamo.

Dr. Dake's new book, "Interpretation of Topographic and Geologic Maps," is to be used this year in course 513, map "interruption." Notice of the publication of this book was printed in The Miner of June 1.

CAMMACK—CONKIN.

The sounds of the departing school year had hardly died away before Kik Cammack had taken himself a bride. Cammack was married to Miss Edith Belle Conkin at the Episcopal Church, Kirksville, Mo., June 6.

Cammack is a Prospector and a letter man in football and wrestling. The Miner wishes to add its congratulations to those of his many friends.

DAVE WALSH RETURNS.

David F. Walsh, B. S. '23, M. S. '24, has returned to his home at Webster Groves, Mo., from Europe, where he has specialized in the metallurgy of iron and steel. In June, 1924, he was awarded a scholarship in iron and steel metallurgy at the University of Nancy, France, by the French government and has since been engaged in special research work under the French scientists. He has just completed a tour of inspection of the French iron and steel centers and has had an excellent opportunity to observe as well the social and economic conditions of France.

Dave is a member of Tau Beta Pi and was St. Pat in 1922. He is a brother of John K. "Jake" Walsh, '17, who is now publicity director at St. Louis U.

A. A. OFFICE CANDIDATES.

Conforming to the rules in practice last year for electing officers for the Athletic Association, White has been elected President, and Burg Business Manager.

As in use last year, from an unlimited number of freshmen candidates

assisting the Business Manager on the football field, eight sophomore candidates are chosen relative to their work as freshmen. From these eight sophomore candidates four are chosen then as junior candidates, and from these the A. A. officers are chosen.

Ambler, Koopman, Letts, Metcalf, Moreland, Livingston and Updike are this year's Soph candidates, and Rushmore, Foster, Boismenue and Cutler hold the Junior positions. Freshmen have already been working on the football field, but additional candidates are needed. Any frosh seeking fame is urged to see "Spike" Dennie any time at the gym, and hand in his name, and receive the details of the work.

THE LOST WORLD.

The Lost World, a picture depicting prehistoric days as conceived by modern man, will be shown in Rolla, October 4, 5, and 6, including a matinee on the fourth. This picture is being shown by special request of the faculty. One of the greatest pictures ever produced, being seven years in the making, it is worth far more than the admission fee.

If you have never seen it, don't miss the chance; if you have seen it, of course you will see it again.

The following members of last spring's graduating class of the Rolla high school have registered at M. S. M.: Helen Bowen, Louise Barley, Josephine Ellis, Charles Johnson, Francis Tucker, Clifton East, "Doc" Austin Lee McRae, and Paul and David Moulder.

MURPHY—GAHR.

The prospect of a year of loneliness proved too much for Harold Murphy. He was married to Miss Helen Gahr at Christ Church Cathedral in St. Louis, September 10, and has established residence in Rolla with his bride.

Murphy is a member of the Bonanza Club and a basketball letter man. The Miner and a host of friends in Rolla join in offering the young couple the best wishes.

She (playfully): You Fool!

He (earnestly): No I don't—honest!

DON'T WAIT UNTIL YOU LEAVE SCHOOL

A knowledge of explosives and how to use them will make you that much better equipped to face all kinds of problems after you get on the job. Our publications are a splendid aid in getting this knowledge. They include valuable hand-books on kinds and characteristics of explosives; blasting supplies; and the most advanced blasting practice. Experts wrote them, and men in charge of important work use these booklets constantly for reference as well as for general technical education.

A list of our publications appears on the right. Check the ones you want and we will send them to you, free. They should prove worth-while additions to your own technical library.
