No. 18.

## WRESTLERS LOSE TO OKLAHOMA A. AND M.

### Aggies Prove Too Much for Inexperienced Miners.

The Oklahoma Aggies invaded Jackling Gym last Wednesday night, and succeeded in winning every match. Referee Higgins apologized to Coach McCanless and Sam Craig, however, for rendering what he later found to be a hasty decision under a false impression, that deprived Sammy Craig of winning national honors in the lightweight division. Bringham, Sam Craig's opponent, stalled for the entire ten minutes, and Higgins rendered his decision on the timekeeper's tally, which he later found to be incorrect. Bringham won the National Championship last year, which Craig would have been entitled to had Higgins not become confused.

All the other bouts were won by the Aggies by falls. Cammack held off Stuteville of the Aggies, National Champion 1925, and Olympic Entry 1924, for six minutes, but finally succumbed to a half nelson arm lock, which was the Aggies' pet hold. The Valley champions of 1925 seemed to have the half-nelson followed by an armlock down to perfection, and all of the Miners except S. Craig proved suitable victims for this grasp.

With the exception of S. Craig, Cammack and Mandel, the Miners proved easy victims for the husky Oklahomans. Coach Gallagher, of the Aggies can well be proud of his trappers, but the M. S. M. mat followers contend that one national championship missed changing hands by a very small margin.

Coach McCanless' squad had little opportunity to do their stuff against the wily Aggies, but they can rest assured that the Oklahomans boast of one of the best collegiate wrestling teams in the country, if not the best, in collegiate mat circles.

Bantamweight—Peerv (Aggies) threw Moulder (M. S. M.) in 3 minutes.

Featherweight—Kilpatrick (Aggies) threw Cook (M. S. M.) in 3 minutes, 40 seconds.

Welterweight—Northrip (Aggies)

Continued on Page Eight.

## MINING AND MET. SPEAKERS.

February 5.—Mr. Delano, Superintendent of Concentration, St. Joseph Lead Company, Bonne Terre, Mo.

February 26—Eugene McAuliffe, Union Pacific Coal Company, Omaha, Neb.

Other speakers have been announced, but dates have not been definitely arranged.

## K. C. ATHLETIC CLUB TOO MUCH FOR MINERS.

The Kansas City Athletic Club quintet handled too many basketballs for the Miner five to keep track of, and the former college stars rolled up a 63 to 18 score against the Miners. Snappy passes and well directed basket shots left the Miners in a quandary after the opening tip-off, and Murphy's counter was the first scored by the Miners after the K. C. boys had netted fourteen points.

The Kansas City Star attributed the overwhelming score partly to stage fright on the Miners' part when opposing perhaps the best basketball five in the country. The first stanza ended with the Athletic Club holding a 43 to 9 lead. Browning, with nineteen points, scored more than the entire Miner five, and he was closely followed by Forck, who hit the mesh for fourteen points.

The Miners stepped out of their class in opposing the K. C. A. C. basketballers, but they should learn much by the experience of seeing how a twelve-cylinder basketball machine hits on all twelve. Burg led the Miners in scoring with six points, while Murphv managed to tally a duet of two-pointers. The absence of Thomas and Neidermeyer from the squad doubtless weakened the Miners, but the absentees would not have been of any great material aid against a team of K. C. A. C. calibre.

### Line-up:

Miners (18.) K. C. A. C. (63.)  
Hollow (2).....l f.....Forck (14)  
Murphv (4).....r f.....Browning (19)  
Burg (6).....c.....Ackerman (10)  
Arra.....r g.....Wilkin (6)  
Tamm (1).....l g.....Sanders  
Substitutions—Miners, Smith (2),  
Tucker (2) and Gladden (1). K. C.  
A. C. Wheat (2), Mount. Hess (2),  
Williams (10), Pesken and Engel.

Referee—John Bunn (Kansas.)

## MINER CELEBRATES ELEVENTH BIRTHDAY.

First Number Published January 29, 1915, a Four-Page Double-Column Venture into Journalism.

When three live members of the Class of '16 undertook to establish a school paper on the campus of M. S. M., just eleven years ago last Friday, something was started which has since done more than any other one campus organization to advertise the Missouri School of Mines and to keep up the "Old Miner Spirit." Fred Grotts originated the idea, and he and J. L. Head and G. E. Johnson undertook to "show the world" that such an idea could be put into practice. Was their work effective, and did they show good judgment and foresight? Well, The Miner is today a leading factor in school affairs and is traveling side by side with "Old Miner Spirit" who is now more influential than he has ever been, according to old-timers who have recently visited the school.

Each year the staff tries to outdo the work of the Board of the previous year. Many new ideas are begun, most of which are finally discarded as being unworthy of a paper which ranks high among college weeklies, as does The Miner. Every man who has been editor or business manager on The Miner knows that it takes the cooperation of every member of the Board to get out a good paper. If a single man falls down on the job, the paper suffers and M. S. M. feels it. Every man who has ever been editor will tell you that he could get out the paper alone much easier and much quicker than to superintend the editorial staff. But of course such a thing is out of the question. That isn't the idea of the paper.

The success of The Miner is due not only to the efforts of the staff but to the students, alumni, faculty, and advertisers. We appreciate the honor of being the official publication of the M. S. M. Alumni Association and are doing our best, with the assistance of a live alumni editor, to make the paper of real interest to all former Miners. An unusual number of students now in school have sub-

scribed this year. We wish to thank them and those of the faculty who have handed in their subscriptions. Last, but not least, our advertisers are to be congratulated on the assistance they have rendered. The unusual number of student subscribers this year makes it certain that every advertiser is investing wisely when he buys space in The Miner.

Men who have edited The Miner and who have consequently realized the enormous amount of work such a job entails are listed below:

1914-15—J. L. Head and J. J. Doyle.

1915-16—B. L. Ashdown and G. E. Ebmeyer.

1916-17—G. E. Ebmeyer.

1917-18—T. P. Walsh, J. B. Duga, F. H. Geib, and James P. Gill.

1918-19—James P. Gill and R. N. Stubbs.

1919-20—R. N. Stubbs, G. E. Ebmeyer, and G. F. Rackett.

1920-21—E. L. Miller, Jr., H. O. Norville, and E. S. Wheeler.

1921-22—E. S. Wheeler and S. M. Burke.

1922-23—S. M. Burke, M. L. Frey, C. F. Schaefer, Jr., A. B. Wilkerson, Jr., V. L. Whitworth, M. L. Frey (second time), and F. C. Schneeberger.

1923-24—F. C. Schneeberger, C. F. Schaefer, Jr., and Donald R. Baker.

1924-25—Donald R. Baker, E. J. Gorman, and Harold S. Thomas.

1925-26—Harold S. Thomas.

**"BUCK" EWING TO GET DEGREE.**

H. K. (Buck) Ewing, an old Hard-rock, here in '17, '20, and '21, recently arrived in Rolla from Fairbanks, Alaska, where he was employed by the Fairbanks Exploration Company. "Buck" has seen the country at short range made famous by Robert W. Service and is very enthusiastic over Alaska's mineral prospects. He worked for a time at Kenecott where they are mining copper from a huge glacier, the only instance of this kind known in the world. In the Kenecott district some years ago a solid mass of almost pure copper, 600 feet long, 300 feet wide, and 50 feet thick, was uncovered. Calculate the number of pennies this would make.

M. S. M. is well represented in the Far North. D. D. Beyer, '20, is Assistant Manager of the Fairbanks Mining Corporation; H. D. Scruby,

**WHO'S WHO IN ROLLA.**

Very Good Friend Orten, commonly known as the Frisco Kid, dean of the influential friends and well known statistician.

Mr. Orten is a graduate in political science of Washington U., way back when Washingtonians were known as the "Pikers", not as the "Bears". He is of Irish descent, since there is a trace of the Blarney Stone in the quantity of his speech.

Mr. Orten is an honorary advisory director of the "Frisco". It is claimed that the fourteenth assistant tie-splitter and the Rolla-Dillon track walker were classmates and very influential friends of his at Washington. It is also rumored that the Frisco, the Rock Island, and Orten are planning a rail merger second to none in the country.

Mr. Orten holds the world's speed record for dirt roads, having made this record on the Springfield-Marshfield road, driving a big, black shiny, new-model Ford truck.

Commodore Orten, John J. Pershing, Marshal Foch and the Central Powers were in the limelight several years ago by staging a real mixup in Europe.

Mr. Orten was the power behind the recent "Dillon-Read" consolidation of the National Cash Register Co., and the Dodge Bros. Stage Coach. He serves in an advisory capacity for the following:

Calvin Coolidge and the Cabinet.  
Col. Jonah and the Board of Directors of the "Frisco."

Numerous Bank Presidents.

The Interstate Commerce Commission.

The Commercial and Financial Chronicle.

Mayor of Rolla.

Geo. Cragle.

"Lasses" Campbell.

**A MATHEMATICIAN, NOT A CALCULATING MACHINE.**

Prof. Dean Calculates a Mathematician is Something Different.

I accept the recent write-up in The Miner as a bit of fun, but I seriously object to being called a "Calculating Machine", even in fun. There is a vast difference between a mathematician and a mere calculator, but the people who can appreciate that difference are almost as scarce as "hen's teeth." For this reason the business of being a mathematician is a lonesome one.

There appeared recently a publica-

tion which gave its author a great local reputation as a mathematician. This book, which was really an excellent piece of engineering work, consisted in calculating tables by substituting numbers in formulae that have been known for three hundred years. One should not be called a mathematician unless he can apply mathematical reasoning and derive new formulae and facts. The mere working through of text-books and the solving of the so-called problems therein does not make a mathematician.

GEO. R. DEAN.

**LECTURE BY PROF. FORBES.**

Professor C. R. Forbes, head of the department of Mining at the School of Mines, will give the next lecture in the popular lecture course at the School of Mines on Thursday evening February 4, at 7:30 p. m. His subject will be The Romance of Mining. The lecture will be illustrated by lantern slides and by one or two reels of moving pictures.

The early part of the lecture will discuss the lure of mining, which makes men leave home and friends and go to the uttermost parts of the earth in search of the minerals which he finds in the earth. This will be followed by a discussion of the improvements made in mining methods, which made possible the immense mining companies and the production on a large scale as we have it today.

**RUDY AS A COSSACK.**

With success well established in Latin characterization, Valentino has turned temporarily to interpret Slavic temperament. His triple role in "The Eagle," supported by Vilma Blanky, shows him capable of depicting Russian national character on the screen. The Grady Trio, popular vaudeville entertainers, will also be on the program at the Lyric, Feb. 1 and 2.

**FRESHMAN DANCE.**

The insignificants broke loose and for the first time this year gained the approval of the upper classmen, when they entertained with a dance January 28, the now annual Freshman party. It was certainly a good one, plenty warm, and the usual Miner pep was all very much in evidence. Bill's music was hot and helped lots towards bringing about the success of the party. Dr. and Mrs. J. W. Barley, Lieutenant and Mrs. K. M. Moore, and Professor and Mrs. K. K. Kershner chaperoned.

## THE MISSOURI MINER.

## NO ARGUMENT THIS TIME.

Numerous prospects, mostly the fair sex, and many males, lacking the thrill of gunning, plead non-interest when approached with shotgun raffle tickets, a hard argument to combat; so the prospect usually won. This time, however, everybody can be in on the fun. The equivalent of \$450 in merchandise, donated by Rolla merchants, includes a variety of articles, some of which will fit the use of every one. This raffle, promoted by the Junior Class, will be held at the Lyric Theatre February 19. St. Pat is scheduled to drop in on us about March 18, and we are intending a royal reception. Remember the venerable old Saint, and help us make his pilgrimage a success. See a Junior, or get tickets at H. & S., Scott's, or Leonard's.

## GOT A STUNT?

See Heckman or some member of the Junior Class Show Committee. Able aspirants to the legitimate stage often wait years to blossom out on

Broadway. Feeling more kindly toward the amateur, the Junior Class invites you to take part in their show, requesting that you leave your past credentials at home. Come and do your stuff at rehearsals.

JUNIOR CLASS HOLDS  
SPECIAL MEETING.

That an early election of St. Pat and Queen would jeopardize class finances and tend to split rather than unify the class was the consensus of opinion reached when the Juniors met Tuesday night, January 26. Those members eligible to vote, leaving school at the close of the fall semester, may cast a ballot with a proxy, named at this meeting.

Plans are under way for a big burlesque show, an innovation in Junior Class money-raisers.

John E. McCauley was elected Junior delegate to the Convention of American Collegiate Engineers at Nashville, Tenn.

This was a special meeting; ordinarily, future meetings will be held on Thursday nights, as previously arranged.

## JUNIOR DANCE SCORES HIT.

Again the third year men succeeded in putting over another grand party. The dance given Saturday night at the Gym certainly was a good one, and happiness and pep reigned supreme. Good music, lots of people, good chaperons, and everything in general contributed towards a successful dance.

Dr. and Mrs. J. W. Barley, Dr. and Mrs. W. D. Turner, Mr. and Mrs. E. D. Williams, and "Doc" Armsby chaperoned.

## A LARGE TIME—YES!

That big Junior Class dance, February 5, at the Gym will provide all worth asking for. Schedule your date far enough in advance to enjoy this treat. Yours—The Juniors.

## BE AT PARKER HALL

## SUNDAY AT 2 P. M.

Tryouts for the St. Pat's play, "Thirty Days," will be held in Parker Hall, Sunday, February 7, at 2 p. m. About eighteen are needed in the cast, so don't be bashful about coming out.

## NEW COURSES OFFERED.

Among the courses to be offered this semester for the first time are a number scheduled in the Drawing, Economics, English, Mathematics and Metallurgy departments. Other courses not scheduled in these and other departments, will be given pro-

vided a sufficient number of students register for them. The following courses have been arranged. City Planning, 255g,—2 hours credit; Advanced Descriptive Geometry, 232,—2 hours credit; Psychoanalysis, 394,—3 hours credit; Scientific German, 451,—5 hours credit; Spanish, 472, 473, 474 and 475,—5 hours credit; Mathematical Physics, 610—5 hours credit; Refractories Lecture, 881,—3 hours credit; Lab. 882,—1 hour credit.

## ALUMNI EDITION.

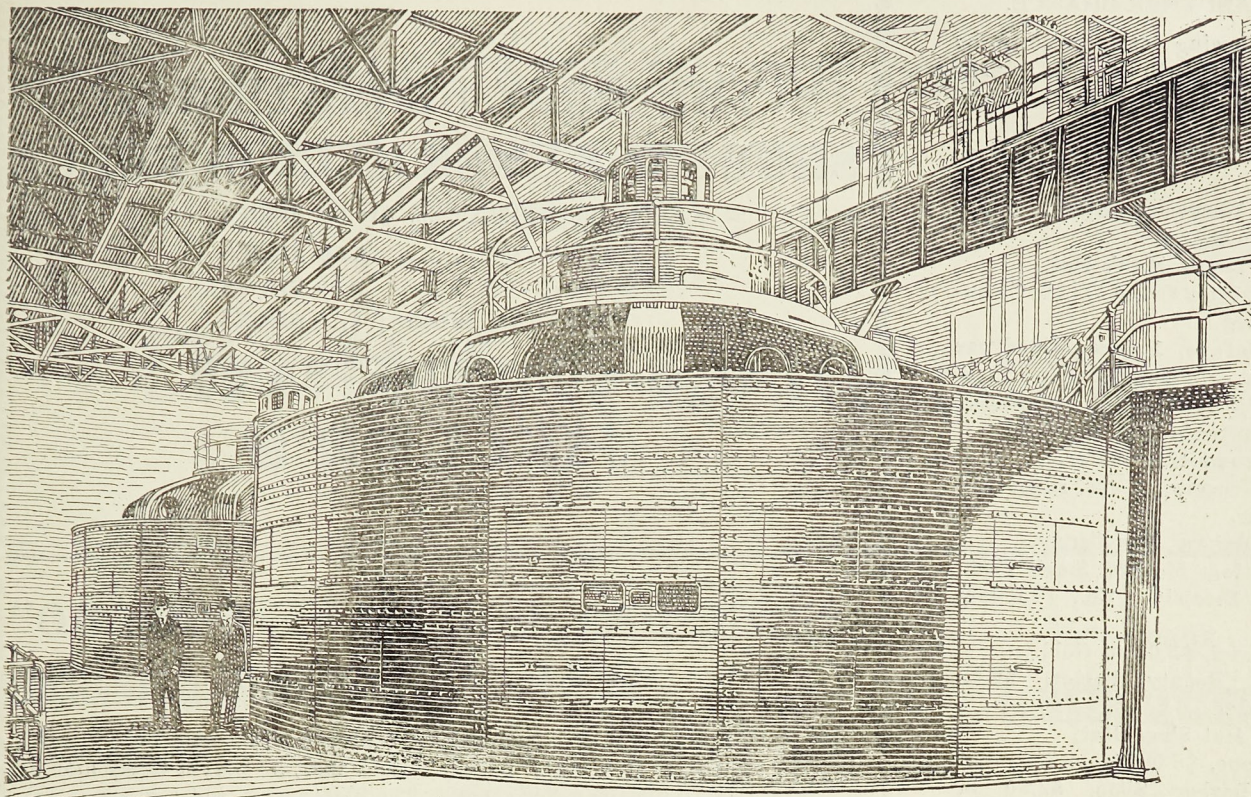

We are pleased to dedicate this edition of The Miner to the classes of:

1901—Alexander, Buckby, Cowles, Draper, Fraizer, Garrett, Hanley, Koeberlin, Olmstead, Powell, Rolufs, Stauber, Spengler, and Watkins.

1902—Daily, Fay, Lyman, Martin, May, Mortland, Norton, Pickles, Rex, Walsh, and Wilson.

1903—Alexander, Bell, Daily, D'Arcy, Gill, Greenidge, Hauenstein, Logan, Luther, Schulze, Walker, Walsh, Webster, and Weidner.

1920—Twenty-eight graduates in Mining, 7 Metallurgists, 10 Civils, 8 Chemists, 1 graduate in Mechanical Engineering, and 1 in General Science.

*This giant hydro-electric unit weighs 750 tons and consists of a vertical shaft hydraulic turbine attached to an electric generator delivering 52,000 kilowatts at 12,000 volts.*

## Bigger Generators— Cheaper Electricity

A 70,000 horsepower hydro-electric unit recently installed at Niagara Falls utilizes the same amount of water as seven former 5,000-horsepower units, yet does the work of fourteen such units. And it saves 700,000 tons of coal yearly for the nation.

As more and still more uses are found for electricity, larger and more economical generators are installed. At the power plant, as well as at the consumer's end, important changes and startling developments have steadily reduced the cost of electricity for light, power, and heat.

And wherever electricity has blazed its trail—in towns, cities, industrial centers, and rural communities—comfort and progress have come to stay.

Generating and distributing electricity concern the technical student. But electricity's application in the betterment of industry, the professions, and home life concerns every educated person. Cheap electricity means many startling achievements *today*, but countless and unbelievable possibilities *tomorrow*.

The General Electric Company, as of December 3, 1924, had 37,716 stockholders, of whom 45 per cent were women. The average number of common shares held by stockholders was 55. In ownership, policies, past and present activities, G-E is unselfishly dedicated to the cause of electrical progress.

A new series of G-E advertisements showing what electricity is doing in many fields will be sent on request. Ask for booklet GEK-1.

## PROSPECTORS ENTERTAIN.

On Friday evening the Prospectors entertained with an informal dance in honor of their pledges. They take pleasure in announcing the pledging of F. A. Weirich, B. L. Browning, J. G. Donaldson, K. P. Neal, L. A. Warner, A. Mueller, L. Mueller, and M. C. Christine.

The performance of Seydler's Collegiates, which was of the usual high quality, contributed mightily to the success of the dance. Chaperons for the evening were Mr. and Mrs. L. M. Robinson and Mr. and Mrs. K. V. Cammack.

## SNATCHES.

"Dad, I'm broke,  
Send 10 bucks if you can."  
He wrote right back and sez:  
"So's your ol' man."

## Off Again

"Is Rudolph dumb?"  
"Dumb? Yesterday I saw him looking down the birth column in the paper to see if anyone was born that he knew."

Every dog has its day. And back in the days of chivalry every lady had her knight.

## Did You Know That—

1. If all the cigarette butts on the campus were laid end to end it wouldn't make any difference how far they would reach?

2. If all the poker chips in Rolla were put in one stack they would probably fall over?

3. Buddy McBride is no longer in school?

Kindness may be better and dearer than gold, but it won't buy you a new suit when your old one gets on speaking terms with the rag man.

"This is about to get me down," said the stude, as he walked into the freight elevator in Norwood Hall.

Well, folks, we gotta go study.

Try working instead of wishing.

BAUMGARTNER BECOMES  
ADVERTISING MANAGER.

R. P. Baumgartner has been elected to fill the position of advertising manager on The Miner, left vacant by the resignation of John A. Rood, who has graduated. Advertising keeps a paper going, and The Miner is no exception. Here's to you, "Bummie."

threw Pelt (M. S. M.) in 3 minutes,  
20 seconds.

Lightweight—Stuteville (Aggies)  
threw Cammack (M. S. M.) in 6 min-  
utes.

Lightweight—Bringham (Aggies)  
won decision from S. Craig (M. S.  
M.)

Sing a song of twenty bucks,

Keg full of rye;  
Half a dozen Miner studes  
Standing 'round bone dry.  
When the keg was opened,  
The air was full of wails:  
There in front of everyone  
Stood-a keg—of—nails.
