BIG GAME HUNTER

SPEAKS AT M. S. M.

Prof. Richard L. Sutton, widely known hunter, lecturer and Professor of Dermatology at Kansas University, spoke before a large audience on the subject of "Tiger Trails in Southern Asia," last Thursday evening. There must have been a magic appealing power in the word "tiger" for Farker Hall was filled to overflowing.

The moment Prof. Sutton stepped on the platform, he started speaking in a rapid, easy fashion that held his listeners spellbound. One moment he would describe some thrilling adventure with a buffalo or an elephant and in the next breath he would relate a humorous incident with a native. In fact, Sutton's "wise cracks" was one of the best features of his lecture and made it appear doubly interesting.

Fear, impatience, gentleness and repugnance to gruesome details are highly undesirable in a big game hunter and he must be ready at all times for any sort of experience. In time he learns to overcome such trifles as snakes dropping into his bed, crawling lizards, lusty mosquitoes and attacks of fever. With constant practice, he masters the art of shooting an animal in a vital spot with uncanny skill.

Prof. Sutton hunted mostly in Southern Asia among the Burmese, Sengalese and Malays. No doubt his party killed more desirable specimens of tiger, deer, buffalo and elephant than any other similar expedition of recent years. Incidentally, Sutton's intensely interesting records of the various natives he encountered are priceless to historians and scientists.

The talk wound up with a revealing series of slides, illustrating the numerous prizes shot by Prof. Sutton and picturing many phases of wild jungle life. One photograph in particular showed an angry buffalo charging Sutton at full speed in a swamp. Quick thinking and acting saved his life by a hair.

It was an exceptional treat to hear Prof. Sutton and we are sure that everyone who heard him speak

DR. ARMSBY TO MAKE EXTENDED TOUR OF HIGH SCHOOLS.

During the next three weeks Doc Armsby, registrar of this school, will be away on an extended visit to the high schools of the larger cities of this state and surrounding territory. This week will be spent busily and profitably by Doc Armsby in providing publicity for MSM in the high schools of St. Louis. He will also attend a convention of registrars of various colleges throughout the United States.

Immediately following this visit to the high schools of St. Louis Doc Armsby is scheduled to appear at the foremost high schools of the suburbs of St. Louis. From there he will go to Jefferson City, Fulton, Hannibal, Sedalia and Kansas City, spreading the gospel of the value of an engineering education on the way.

In each place he will gain audience with the seniors, telling them all about the school, explaining just what an engineering education is, and what its advantages are.

Altogether this seems to be rather a powerful campaign, with the recent radio broadcast programs, the issue of approximately 50,000 bulletins advertising MSM, and the present tour of high schools for prospective students. Such efforts should net as a huge freshman class next fall.

Doc Armsby is completing plans now for an entirely new method of handling the freshman class next fall. It seems that the frosh are to be here a week before the sophomores and upper-classmen arrive. That week will be spent in registration, entrance examinations and in a series of special orientation lectures by various members of the faculty. More complete information on this proposition will be issued later when the plan is completed. It looks, however, as though the sophomores of next fall are in for one sweet time when they arrive in the midst of a large gang of partially educated frosh.

will agree with us in saying that he deserves a supreme place among the big game hunters of the world.

INTERCLASS TRACK MEET

SATURDAY, APRIL 7TH.

Order of events:

100 yard dash, 2:00 p. m.
One mile run, 2:15 p. m.
440 yard dash, 2:30 p. m.
120 yard high hurdles, 2:45 p. m.
880 yard run, 3:00 p. m.
220 yard dash, 3:15 p. m.
Two mile run, 3:30 p. m.
Pole vault, 2:00 p. m.
Shot put, 2:00 p. m.
High jump, 2:30 p. m.
Discus, 2:30 p. m.
Broad jump, 3:00 p. m.
Javelin, 3:00 p. m.

Each class will be limited to two entrees (exclusive of letter men) in each event. No one man may enter more than two track events and two field events or a total of four events.

Track events will take precedence. A man taking part in a field event will be excused to run in track event.

Track letter men will compete but their place will not count.

Class entrees will report to the clerk of the event at time event is called. Once event is started no further entree will be allowed.

The scoring: first place 5 points; second, 3 points; third, 1 point.

MINER TRACKMEN PLACE IN

W. A. A. U. INDOOR MEET.

Three of our track men competed in the A. A. U. Indoor Track Meet at the St. Louis Coliseum Saturday night. Schulz running in the two mile placed third in an event that broke the record by 25 seconds. Green running in the mile finished in fourth place and Lentz in the 600 yard dash did not place although he ran a good race. All things considered we should be well pleased with their performance at this time.

A number of the track men are not reporting for practice regularly. They are letting baseball and other affairs interfere. We can not expect to successfully compete with opponents under these conditions.

One of our stiffest meets in two weeks off every track man should practice every day and get into the best shape possible. Begin today.

INTRAMURAL BASEBALL.

The Independent's met the P. K. A.'s on Monday to play off a contested game, and the P. K. A.'s emerged on the winning side of a 5-4 score. Maune and Loupe pitched for the P. K. A.'s with Berry receiving, while Brower and Long held down the mound for the Independent's with Weiss behind the bat.

The Mercier's defeated the Lambda Chi's 13-6 in a loosely played game. Runs were scored in every inning. The batteries were: Heubner and Godat for the Mercier's and McClusky and Burg for the Lambda Chi's. Hollow hit for the circuit and a carton of Chesterfield cigarettes.

The faculty was forced to forfeit a game to the Sigma Nu's due to the fact that they were unable to place a complete team in the field. However, with two outside players they defeated the Sigma Nu team 3-1 in a game which was featured by 12 strike outs by Doc Schrenk. Batteries: Schrenk and Weiss for the faculty; Schofield and Ledford for the Sigma Nu's.

Pi. K. A. defeated Kappa Sigma 6-3. Maune and Berry comprised the winning battery, while Smith and Young were the losers.

The Prospector-Lambda Chi game was a batting spree with the Prospector's winning 9-7. Batteries: Tuttle and McCrorey for the Prospector's and McCluskey and Tucker for the Lambda Chi's. Suhre and Fields hit home runs.

The Independent's ran wild over the Triangle team 15-0; it was the first no hit—no run game seen here in years. Brower pitched two innings and Long the other four. Kjar hit two home runs and collected a carton of Chesterfields. Dresback was the losing pitcher.

This week the games will be played in the following order with the first game Monday, April 2nd:

Bonanza—K. A.

Sigma Nu—Mercier.

Kappa Sigma—Faculty.

Triangle—Pi K. A.

K. A.—Independents.

Lambda Chi—Bonanza.

Mercier—Prospectors.

Each organization manager should get a copy of the schedule at the gym office and should know when his team is scheduled to play. Hereafter the rule as to postponements will be strictly enforced. Agreements for postponement must be signed and

handed in at least 24 hours before time for games.

PROF. WALL WILL

APPEAR APRIL 11.

The date of the appearance of Prof. Wall and his concert entertainers on the Miner campus has been postponed until April 11th.

It is not known, exactly, what form of an entertainment he will furnish at this appearance, but we all feel assured that it will be well worth while to attend. Prof. Wall has assured us that the entertainment will be of an entirely different nature from that of several weeks ago when he made his appearance here with the Missouri University Glee Club.

Watch next week's Miner for complete details in regard to this excellent program.

WATCH FOR THE DOPE.

Miner sport followers will be able to get a good line on the competition our track team will run up against by watching the papers for the next two weeks. Arkansas University has a dual track meet with Drury at Springfield on April 7th and on April 14th the Arkansas tracksters meet the Washington U. Bears in St. Louis. On April 16th the Miners meet Arkansas at Rolla, and on April 21st they journey to St. Louis to meet Washington U. Shortly after the Washington U. meet the Miners will oppose Drury at Rolla.

NOTICE**INTRAMURAL BASEBALL**

A baseball meeting of all the intramural baseball managers was held in the gym last week. It was decided that:

1. All games, for the first two rounds, would be six inning games.
2. The umpires shall have absolute authority while umpiring a game. He shall have the right to exclude unruly players from the field.
3. On the day of the games the players should be on the field at 4:15, and the games shall start promptly at 4:30.

CLASS SPIRIT.

St. Pats is over for everyone but the members of the Junior Class. A good many loyal members of the class have paid up their dues and assessments, but there are a great

many who seem to have a class spirit of a very doubtful nature and have not paid up. It is absolutely necessary that all these men pay up before the firms with whom we had business negotiations can be paid.

Every man in the class should realize that the money he owes is not a debt to the class as a whole but a debt to each member of the class. It

A BATH FOR THE BATHROOM.

Occasionally there appears in these columns an article loudly proclaiming the urgent need of some commodity about the school in identity from school spirit to water in drinking fountains. It is not accurately known whether or not these articles accomplish the desired effect. In any event a real need is always expressed in these articles and the need should be supplied.

This time we find the shower room on the ground floor of the gym in great and urgent need of a jolly good scrubbing. Dirt and scum hang upon the walls in such quantities that it looks more like a slimy cell of an ancient underground dungeon than like a bright clean shower room as it should. The locker room on the ground floor, and the pool are never as clean as they should be. We urgently call the attention of whomever is in charge of the cleaning of the gym to have someone get on the business end of a brush and give the MSM bathroom a bath.

THE WAGES OF SIN.

The University of West Virginia has been expelled from membership in the North Central Association of Colleges and Secondary Schools, for paying athletic funds. Specifically, it has been charged with paying members of the football squad.

The organization, which met last week in Chicago, comprises 251 colleges. Its action against West Virginia was the most drastic it ever has taken. The southern institution, which was granted membership two years ago, was censured last year for its athletic methods. It was ordered to clean up or get out. Its representatives tried to stave off action at the latest conference by offering to make a change in policy, but its promise of reform came too late.

Charges were filed by the executive committee, of which Dr. George F. Zook, president of the University of Akron, is chairman. Inadequate supervision of athletic funds and proselyting by alumni were charged in the indictment. The executive committee insisted that the academic, health and character interests of student bodies rank first. It recommended firm opposition to payment of money to athletes, and the abolition of free training tables. Solicitation of prospective athletes by coaches through promises of money compensation was denounced also. Alumni of the University of West Virginia are charged with having established a fund with which to induce athletes to attend the University.

The conference also recommended that each school's athletic policy should be controlled by the faculty. It proposed that coaches be put on the same basis as other members of the faculty, both in relation to tenure of office, and salary. Coordination of athletic and general educational problems was given as the aim of the association by its president, Dr. H. M. Gage, president of Coe College.

NEW STUDENT

WHO'S WHO IN ROLLA.

Individual personalities of great renown, deserving in a great or small measure of the attention and comment of the common people are, from time to time, brought before the public eye in these columns. We have, in our midst, one who so fully merits our attention for a moment

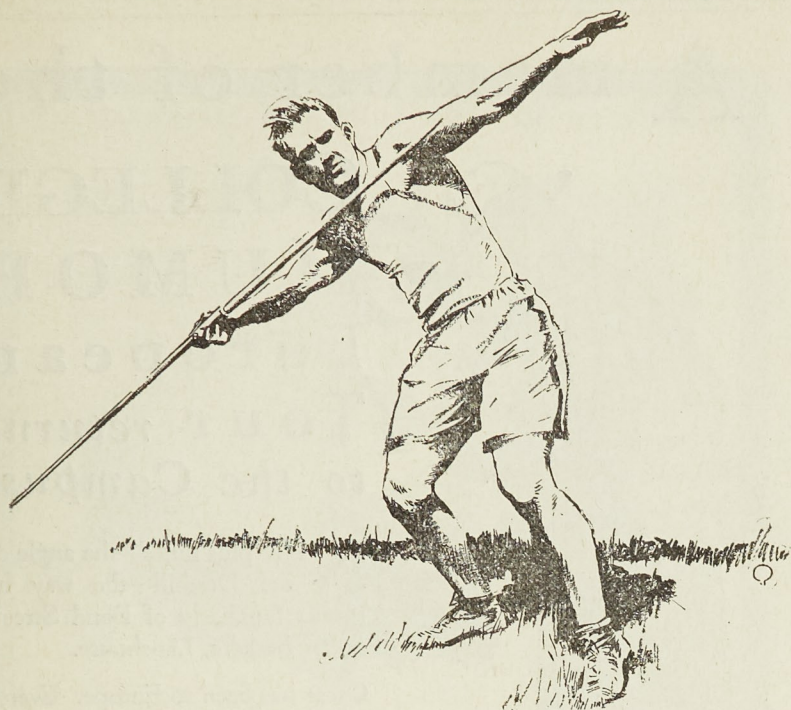

that it would be rank injustice to withhold longer our comment.

We refer to no less distinguished a personage than the right honorable Professor Clair Victor Mann than whom there is no greater or more ardent research-reformer upon the face of our fair earth. To enter upon a lengthy narration of the history of our esteemed professor would serve no purpose. Our beloved St. Pat very aptly described this case in his recent speech when he stated that "some men go to college and after a variable number of years, get out. Those who remain are the professors." In short, Prof. Mann is an alumnus of this institution. All hail!!

Let us consider then, the abundant wonders which about us lie that are, more or less, the direct result of the untiring energy of our revered Professor Clair V. The Drawing Department, under his supervision, has attained such smooth-running perfection, especially in the branch of that famous "lost art" Descriptive Geometry, that nearly fifty percent of those who unwillingly brave the unknown errors of the folding planes are fully convinced within less than two months that it is a subject beyond ordinary human conception. As a result it is to be noted that the grain on Doc Armsby's supply of drop sips has been really lamentable, if not alarming.

And another thing—who, among others, was it "brought up" this idea of final examinations thus breaking rudely the calm of the students' tranquil existence at M. S. M.? Only four guesses allowed to each man. Oh, well! It could be much worse. Suppose, dear friends, that our benevolent professor, with his undeniable genius for reform, his abundance of ingenuity, and his undying energy should suddenly change his ambitions from the uplift of engineering education to the betterment of the human race—individually and collectively in such an enterprise perhaps, as the Anti-Saloon League, or a society for the improvement of the morals of engineers.

Reflect deeply upon that possibility for a moment then let us rejoice that we have with us now and always a personage of note who, putting wise-cracks to one side, is really a good honest fellow worthy of the position he holds or any higher one he may attain.

SKILL

THE twist of the wrist, the "throw" of the arm, the shifting of the weight—these are among the many little points which make the skill that you admire in the javelin thrower as he hurls the shaft two hundred feet or more.

As on the track or the football field, in the gymnasium or on the water, so in industry progress is the result of fine improvements—a thousandth

of an inch here—a minute variation in a curve there—slight changes foreseen by engineers and carried out by skilled workmen.

It is this attention to detail that is constantly improving General Electric apparatus and contributing to the electrical industry, which, though still young, is already a dominant force, increasing profit and promoting success in every walk of life.

Whether you find this monogram on an electric refrigerator for the home or on a 200,000-horsepower turbine-generator for a power station, you can be sure that it stands for skilled engineering and high manufacturing quality.

TENNIS.

Tennis season is here, all the courts have been rolled and lined, so all you tennis players get your racquets and get busy. A meeting of tennis fans was held at the gym the early part of last week, where plans were made to send a team to represent MSM at the conference meet. The state conference meet is held during the conference track meet and this year will be held at Fulton, Missouri, May 17 and 18. A team in tennis consists of two singles players and a doubles team and may be made up of two, three, or four players. Although tennis is a minor sport in the M. C. A. U. the tennis

title is the most strongly contested of all the titles, and we will run into plenty of strong competition at Fulton.

An elimination tournament will be held in the near future to select the team which will represent MSM. This tournament is open to all tennis players, and anyone wishing to enter should sign the list in the Registrar's office immediately as the drawing will be made soon. It will be necessary for you to choose your own doubles partner. Don't forget to turn in your name to the office if you want to enter the elimination tournament.

NOISES OF THE NIGHT.

Every wilderness community has its own peculiar night noises. In the jungle, the ears of the listener are always met with the stealthy sound of padded feet of beasts passing. The wilderness of Rolla has night sounds and noises of entirely different character: the bark of a dog, the discordant bleat of a distant radio, or a peal of feminine laughter, are all familiar to the native's ear. When, however, a comparative night silence in the vicinity of the campus is rudely broken by the hoarse, insistent shriek of the power plant whistle, great confusion is occasioned.

Last Wednesday night a faculty meeting was in progress in Parker Hall. One of the members was in the midst of an oration, other members were in various stages between attention and dreamland, and at the same time a Power Plant class of E Es and Mechanicals was running a boiler test in the power plant. Perhaps an excess of steam developed, making it advisable to relieve the pressure by means of the whistle. Opinions differ as to the motive for the blast that rent the night air, causing several of the sedate faculty members to make hasty exit from the meeting and to desert the speaker for more interesting points. It is presumed that the hurried exit was made to determine the cause of the untimely blast, but since we have listened to various lectures we wonder if that was a reason or an excuse.

"Bob" Sturgess '28, has accepted employment with the Guggenheim interests at their tin mines in Bolivia. He sailed for Bolivia on March 15.

The U. S. Army announced, on March 5th, 1928, the promotion of Frank C. Bolles from Colonel to Brigadier-General. Brigadier-General Bolles attended the School of Mines back in '91 and later graduated from West Point. In 1922 he was granted the degree of C. E. (honoris causa) by the School of Mines.

J. Charles Miller, '16, has just received the degree of Master of Arts for special work done in geology at George Washington University, Washington, D. C.

SENIOR TRIPS

The senior trips will start this year on May 3 when the senior Civils will leave Rolla, via bus for Jefferson City, where they will visit the Highway Commission and inspect the Highway Testing Lab, leaving the same day for Keokuk, Iowa. They will inspect the Keokuk Hydro-electric plant early on the morning of May 4th and leave before night for Chicago, where their headquarters will be the Y. M. C. A. Hotel. They will remain in Chicago until May 14th, visiting various places of interest to engineering students. They will leave Chicago on the 15th for Milwaukee to visit industrial plants in that city. On the 16th they will leave for St. Louis, and on the 17th visit the water treatment plant at Chain of Rocks and the new plant on the Missouri River in St. Louis.

The Miners with Prof. Forbes, will leave May 6th and spend the week of the 6th in Bonne Terre, Flat River and Iron Mountain. They are thinking of going over to Rosiclare, Illinois, to visit the fluorspar district and also some of the large coal mines on the way back. This, however, has not been definitely decided upon.

The senior Chemists have already made their trip, having attended the Petroleum Institute in Tulsa last fall.

The Geologists accompanied by Dr. G. A. Muilenberg and Prof. L. W. Carrier, will go with the Miners to Flat River and Iron Mountain. They will leave the latter part of the week for the fluorspar district near Rosiclare, Illinois, and then return to Rolla. They will leave for Joplin the 14th and be there May 15, 16, and 17.

The senior Metallurgists will leave May 16th for Chicago, where they will maintain headquarters at Hotel LaSalle. They will be there about ten days. Side trips will be made to Milwaukee and Kenosha, Wisconsin, and Gary and Hammond, Indiana. They will be accompanied by either Prof. Clayton or Prof. Hanley.

The electricals will leave on May 6th for St. Louis, but they have not yet worked out the details of their trip.

is not fair that the loyal members of the class should pay up in full while other members get away without paying. No loyal Junior with the interest of his fellow Juniors at heart would do this. So let's get together, fellows, and get these debts off our minds.

JUNIOR CLASS

TAKE A WEEKLY TRIP HOME OVER THE TELEPHONE

It's JIM... Telephoning from College

JIM HASN'T a motor car. Jim hasn't a Phi Beta Kappa Key. He isn't what you would call a Social Lion. Neither is he a Star Athlete. Yet if you were to ask the first man on the Campus—who is the best liked man at college—he would in all probability mention Jim's name.

Because Jim has a reputation for being a good fellow—one of those jolly, hearty, kind-hearted chaps who figure that the other fellow's feelings come first.

That this is well founded is proved by the fact that every week of his college life (and he is a Senior now) he telephoned his Mother and his Dad. A worthy habit.

It's worth trying yourself. Not only will your Mother and Dad enjoy these weekly chats, but you'll get a real kick out of it yourself.

ROLLA TELEPHONE CO

ROLLAMO IN HANDS

OF PRINTER.

A large and efficient Rollamo staff has worked hard all this year in the production of a larger and better 1928 Rollamo. The greater part of the work of the staff is now finished. The copy, including all write-ups, is completed and with the editors stamp of approval on it, is now in the hands of the printer.

An attractive feature of this issue is the division and sub-division page illustrations. These are art sketchings representing stone plaques depicting the progress of man, especially in engineering, throughout the ages.

Words fail in the description of these decorative plates, one must see them to appreciate the cleverness and artistry which produced them. The artist is Joe Schneider, the same who produced the illustrations of last year's Rollamo. It is our opinion that he has outdone himself this year.

The department of photography has spent much time and effort in the arrangement of individual pictures to produce symmetrical harmony in the appearance of the pages and to avoid monotony of presentation. Several new views of the campus will be of interest to readers.

We must withhold our judgment of this issue of the Rollamo until its appearance. However, those of us who have scanned its pages of pictures of handsome strong men, and the interesting writeups therewith, can promise that the book will be a pleasant surprise and a collection of memories which we will keep always.

Those who have not a subscription received in registration, or who wish an extra copy should see one of the members of the Rollamo staff at once.
