## HOMECOMING NOV. 3

This year M. S. M. hopes to have a real treat in store for returning alumni. The committee, composed of Ahrens, Cairns and Prof. Millar, with Prof. D. F. Walsh as chairman, is planning to have an excellent banquet at the Pennant Bus Station. This event promises to out do any previous affair of this nature.

In the afternoon the Miners will play the Kirkville Osteopaths. Reports indicate that the latter team has two wary players with the habit of running 80 yards. A great number of the alumni are planning on returning to M. S. M. for the game and other events.

## JUNIOR CLASS

### PLANS INTENSIVE FINANCIAL CAMPAIGN.

One month and a half of the first semester of this year of the reign of the Junior Class of '30 in St. Pats affairs has passed. It finds this particular class filled with the customary and very worthy ambition to put on a bigger and better St. Pats. An efficient staff of officers is working hard on plans for a well organized class—financially and otherwise.

That each Junior Class is, or should be essentially a business organization which has, as a goal, the production of a glorious St. Pats celebration as the climax of the social year at M. S. M., is an accepted fact. With this fact in mind the ac-

## D. C. JACKLING GIVES AN ADDITIONAL \$2500 TO LOAN FUND.

Daniel C. Jackling, an alumnus of the School of Mines and founder of the Jackling Loan Fund, has contributed an additional twenty-five hundred dollars to the fund, bringing his total donation to \$6000. The Jackling Fund is the only loan fund that the school has at the present time and the entire fund was out on loans until the recent action of Mr. Jackling.

Mr. Daniel Cowan Jackling was born at Appleton City, Mo., and graduated in Metallurgy at M. S. M. in 1892. Mr. Jackling was the pioneer in the development of the porphyry copper resources of the world. He organized the Utah Copper Co., and was the guiding genius in the success of this company. He now serves the company as president and managing director. Mr. Jackling is also either an officer or director of the following companies: Nevada Consolidated Copper Co., Ray Consolidated Copper Co., Butte and Superior Mining Co., Mesabi Iron Co., Bingham & Garfield Ry. Co., Nevada Northern Ry. Co., Ray & Gila Valley R. R. Co., Chase National Bank, Pacific Steamship Co., Kennecott Copper Corp., and Braden Copper Co. During 1917-18-19 he was director of U. S. Government Explosives Plants and he was assistant to the U. S. Director of Purchase Storage and Traffic during 1918. He received the Distinguished Service Medal in 1920.

An alumni loan fund is in the process of organization and will be used to supplement the Jackling fund. Both funds will be administered by the director of the school and it is hoped that the alumni fund will be large enough so that a man may borrow \$200 per year instead of the present \$100 per year.

The various sections of the alumni organization have been advised of the plans for the loan fund and are working towards a campaign to establish such a fund.

## MINERS LOSE TO CENTRAL 12-6

The Central "Eagles" took our Miners into camp last Friday afternoon at Jackling Field by the score of 12-6. It was a nip and tuck affair all the way and the final issue, of this conference game, was not decided until the last three minutes of play when the flashing "Black and Green" back, McKinley, hurdled himself over the Miner line for the deciding touchdown.

The game started off with Central on the offensive and it looked as though the "Eagles" were going to score on their first march for the goal-post but the Miner line held fast and the "Silver and Gold" recovered the ball on their 15-yard line. The Miners could make little headway and Steiner punted to Bryant. This punting back and forth continued for the entire first quarter and very little ground was gained by either side.

In the second quarter the fire works began and the Miners started a terrific charge down the field. Tex Schofield gained 25 yards on two beautiful end runs and a pass, Hassler to Malik netted another 15 yards. Then after successive line plunges, that netted little gain, Hassler brought the crowd to its feet by a neat pass to M. Sharp, which resulted in the Miner's first touchdown. Schofield then kicked for goal but the elusive pigskin hit the goal-post and was incomplete.

The first half then ended with the score 6-0 in favor of the Miners, but Central immediately took the offensive, in the second half, and proceeded to even up the score on a beautiful run of 30 yards to touchdown, by Bryant, after he had received a pass from Tomlin. Central's try for goal was also incomplete and the teams battled on even terms until the last three minutes of play when the before mentioned M. Kinley made his dive for victory.

Steiner played the most consistent game for the Miners. This flashy Silver and Gold half back starred

**CROSS HAIRS**

Again our school has witnessed the invasion of painters, Michelangelo and his cohorts or The Bellini, Jacopo, Gentile, and Giovanni must have come back to earth. Still the work did not resemble the paintings of any of them and seemed to be from an altogether different school of art, for the expression was rather futuristic, the coloring rather bold, and the idea expressed rather primitive. It might be well to mention that although this painting was on a much higher level than was "The Blarney Stone" it was less beautiful and surely did not express the predominating spirit of the day as well. All of which leads us to conclude that one of our students did it. Check!—I'll go further—I'll explain just how the painting was done.

As I was staggering home from a night lab., half conscious of the things about me and half afraid, shivering and listening to the rustle of the leaves as I dragged one foot before the other, I saw a glimmer of white streak along about eighteen inches above the ground. Then it stopped and altho I could make out its outline I was unable to conclude just what it was, so I proceeded to investigate. It was two fellows; one carrying a bucket of white paint and the other juggling a brush. They stopped as I approached and as a result of my inquisition the brush-bearer shouted, "I'm not waiting all year for McCaw to paint that sign. I'm going to paint it myself." At once the thought arose within me that they were on their way to blotch paint on that one unpainted and unposted square of sidewalk that exists behind Parker Hall. I thought, "Good, now all of the walks on our campus will look like Hell!" I was about to suggest that they write some formula on that spot in order that they might express a little originality. I would help, so I followed them. As we neared the wishing well they turned and very politely asked "Will you remain here, we forgot our palette?" Of course I would as I was very anxious to learn what it was all about. Say, I waited for over an hour and they had not returned so I said "Oh! Damme damn" and chased home. The next day I saw what the two culprits did. Wasn't it terrible? Yet we must admit it climaxed the painting fever that has been on our campus since the opening of the school year.

For one I do hope that we will all hang up our brushes and allow the weather to wear away our painting so that the boys will have clean sidewalks to use at the beginning of the next year.

**BUREAU OF MINES TO STUDY MANGANESE DEPOSITS.**

Owing to the unusual demand existing at the present time for manganese, the Mississippi Valley Station of the Bureau of Mines and the Experiment Station of the School of Mines and Metallurgy have undertaken a survey of the manganese deposits of the United States. St. Louis interest, now the owners of a number of idle iron furnaces in St. Louis, have been looking for manganese deposits for the past six years. With a suitable supply these people hope to put their iron furnaces into operation making ferro-manganese.

Large deposits of rhodochrosite have been known to exist in the Butte, Montana, district for many years, but such deposits were considered worthless. However, studies of samples brought to Rolla by the St. Louis people indicate that a concentrate sufficiently high in manganese content to be valuable can be made from these manganese carbonate deposits. Will H. Coghill, superintendent of the local station, states that they have throughotation been able to make good recoveries of marketable concentrates. It is also possible to use gravity concentration for preliminary cleaning. They have also discovered the fact, previously unknown to the mineral industry, that rhodochrosite is amenable to magnetic concentration. This gives three processes that may be used in the concentration of the mineral. Mr. Coghill thinks that it is possible that no one of the three processes in itself will be sufficient, and that it will probably be necessary to use a combination of at least two of them.

Mr. Coghill reports that the manganese industry is showing great activity in the United States just now. The rhodochrosite deposits in the vicinity of Butte total millions of tons. If a suitable concentrate can be made at Butte this can then be barged down the Missouri River to St. Louis for the production of ferro-manganese.

Issued Every Monday.

We would venture the assertion that Central College is one place where you could find the proverbial college spirit. At least they are backing their football team with an unusual amount of enthusiasm. Last Friday they had a telephone-telegraph combination on Jackling Field by which they reported a play by play account of the game to the student body which was assembled in one of the theatres at Fayette. Not to mention the band and several car loads of rosters who accompanied the team.

The victory over the Miners Friday gives Central an undisputed place as leaders in the M. C. A. U. conference, with three victories and no defeats.

## H. FOSTER BAINE SPEAKS TO MISSOURI MINING AND MET.

H. Foster Baine lectured to the Missouri Mining and Metallurgical Association at their first meeting last Wednesday evening. Dr. Baine is secretary of The Association of Mining and Metallurgical Engineers and he explained the connection which the local organization, as one of the thirty student chapters, has with the national organization.

Mr. Baine described a lead-silver mining project in China which had

been prospected and developed by Herbert Hoover. He also gave an interesting account of his experiences as a prospecting engineer in the wild interior of China.

After the lecture the meeting adjourned to reconvene in the Assay Lab where the members and their guests partook of coffee and sandwiches. An unusual large crowd attended the meeting and they were well repaid for their time.

MINER "B" TEAM TROUNCES  
JEFF CITY JUNIORS 44-12.

In an interesting game the Miner Reserves defeated the Jefferson City Junior College. The game was loosely played and proved thrilling due to the many broken field runs made by members of both teams. Both teams resorted frequently to the aerial attack with the visitors completing a large number.

Nichols ran through most of the Junior College team on several occasions to place the ball behind the goal line and Mitchell, playing quarter, twisted through the line for some very nice gains. Kelly, at half, played well on the offense, as well as the defense. Gabler intercepted a pass on Jeff City's 10 yard line and ran 90 yards for a touch down. Earlier in the game he circled the right end and dodged his way 50 yards for a counter.

In the line Ford, who added two extra points on place kick, Buzzard, Defoe and Kirkpatrick played very well. All the men out for the squad played in the game and one combination seemed to work equally as well as the other.

## MASS MEETING

The miners held their usual pre-game mass meeting last Friday on the steps of Parker Hall.

The Dynamiters led the assembly and conducted the yells and songs. Jack Potter read the constitution for the new Board of Control and announced that it would be voted upon at the next mass meeting. The assembly, which was unusually short, was terminated by several more yells and by allowing the freshmen to pose for Sid Whiting's camera.

At 1:45 the Miners again attempted to pep themselves up by staging a big downtown parade. Nevertheless the old Miner spirit seemed to be lacking.

### SENIOR COUNCIL PROPOSES NEW BOARD OF TRUSTEES FOR STUDENT PUBLICATIONS

The Senior Council working in close cooperation with Dr. Fulton and "Doc" Armsby have adopted a constitution creating a Board of Trustees for student publications. The present Board of Control has functioned without being created by an act of the student body and it is deemed wise to create a new board by adopting a constitution which shall specify the powers and privileges of the Board and of the staffs of the two student publications.

The present board of control has been highly successful with their policy regarding student publications, and the proposed constitution makes very few changes in the powers of this board. In essence the new plan calls for a Board of Trustees of seven members to exercise a general advisory and supervisory control over the editorial policies and financial transactions of the active boards of the "Miner" and "Rollamo." The Board shall consist of two faculty members appointed by the Senior Council, the editors of the "Miner" and "Rollamo," and three members of the Senior Council who are not members of either publication staff.

The constitution which will be presented to the student body for their approval or rejection at the mass meeting Nov. 2nd, 1928 follows:

#### Article I. Composition.

The Board of Trustees for Student Publications shall consist of two faculty members appointed by the Senior Council, the editors of the "Miner" and "Rollamo," and three members of the Senior Council who are not members of either the "Rollamo" or the "Miner" Board.

The Board of Trustees shall elect its own chairman who shall have the customary duties of a presiding officer, but no more authority than any other member of the Board of Trustees. The chairman shall vote on all questions before the Board of Trustees.

#### Article II. Objects and Powers.

The objects of the Board of Trustees shall be to exercise a general advisory and supervisory control over the editorial policies and financial transactions of the active Boards of the "Miner" and the "Rollamo," leaving the details, both

editorial and financial, in the hands of the two Boards.

The editor of each publication shall submit to the Trustees his plans for the publications for the year and the business manager of each publication shall submit a budget for the year. After such plans and budgets have been approved they shall not be changed except with the approval of the Trustees.

The Trustees shall have the power to approve or reverse any and all actions of the Board of either publication and to remove any member of either Board for just cause after due and proper trial.

#### Article III. Meetings.

The Board of Trustees shall meet at least once a month during the school year and at the call of the chairman. The chairman shall call a meeting whenever requested by two or more members of the Board of Trustees.

#### Article IV. By-Laws.

The Board of Trustees shall adopt their own by-laws and may amend such by-laws at any time, provided that no by-laws shall be adopted which is in conflict with any of the provisions of this constitution or with any future amendments to this constitution.

#### Article V. Repeal of Old Constitutions.

The ratification of this constitution shall automatically repeal the existing constitutions of the Miner Board and of the Rollamo Board, and it shall be the duty of these Boards to immediately draft new constitutions which shall become effective as soon as approved by the Board of Trustees.

#### Article VI. Ratification and Amendment.

This constitution, in order to become effective, must be ratified by a two-thirds vote of those members of the student body present at a regular Mass Meeting, provided that this constitution shall have been read in a previous Mass Meeting and published in the Miner with a notice of the time and place of voting.

This constitution may be amended in the same manner as provided for original ratification.

"Billy grabbed me last night and said he was going to kiss me."

"I bet you were scared."

"I was—I thought for a minute he was going to back out."

—Vanderbilt Masquerader.

### OZARKS IN DANGER

#### OF MODERNISM

Slowly but surely the Ozark Mountain country is displaying the effects of modernizing in thought and industry. A sincere plea is being started by the Missouri State Historical Society to preserve a few remnants of the old order for posterity.

The residents of Phelps county and adjoining districts are asked to retain their rustic worm rail fences and watermills, for these things are certain to attract tourists to visit the country. It is well to remember that Sarah Teasdale, Harold Bell Wright and Rose Lane have written a real store house of beautiful literature about the folks and scenery such as found near Rolla.

The vanishing art of the old-time fiddler, the old Ozarkian ballads and songs peculiar to the mountain people are now in danger of being lost forever.

While perhaps objectionable to some, the moonshiner's still is something that should be preserved in the future for local color. If Missouri possesses all these quaint traditions, why not encourage their safe-keeping for ages to come?

#### IRA RAMSEN MEETS.

The semi-monthly meeting of Ira Ramsen was held Monday evening, October 22nd. Mr. Pattee who is doing graduate work in chemistry and who formerly was with the Hercules Powder Co., at Carthage, Mo., gave the talk for the evening.

Mr. Pattee gave a very interesting and instructive lecture on the method of manufacturing explosives, in the Hercules plant and illustrated with flow sheets which gave a much clearer conception of the process developed and used by this company. Mr. Pattee had made a special trip to Carthage and procured various samples of the ingredients used in the manufacturing of explosives.

Hot chili and coffee were served at the close of the meeting and an enjoyable evening was spent by those present.

It is to be hoped that there will be a larger attendance at the future meetings.

Anybody interested is cordially invited to attend and especially those taking chemistry.

The great ambition of every college comic editor is to put out just one issue after he gets his diploma.

**TAILINGS.**

After watching football practice we wonder if the boys who grind so hard for merely an "M" from Prof. Grant pound just as hard for their grades in their other subjects.

We had heard that many battles have been won and lost by merely a pistol shot but we didn't believe it until after the St. Louis U. game.

Heard in edass: "A friar is a person who stays in a White Castle."

—As a joke that's a ham and egger.

Speaking of beaneries Pete the pie man tells us he has given up golf. It was acase of one slice after another with him.

He should take up baseball since he has a "mean cut."

This article is nothing more or less than a protest. It was written in an attempt to cure an unmolested evil; one that is degrading our students, that is casting us among the uneducated, that is ruining us morally, physically, and mentally! Recently a celebrity passed among our ranks and he, none other than Dr. Woo, was able to notice our backwoods manners.

We are pleading to the adumni, to the students, to the faculty, or to anyone with the authority to curb this menace, and halt the use of the sticks which hold our newspapers in the library.

Since 1839, when our fair school was founded, there have been students scratched and cut, jammed and poked, their clothing torn, and their spirits crushed in this ceaseless battle with innocent periodicals. They have fumed and raged but to heedless ears. Always those sticks punched holes in their breasts while the librarians laughed. Those of us who have had the courage have been martyrs to current events.

But this is not merely a criticism; we have made a thorough research in this matter. In Kokomo after the abolition of this newspaper torture, the use of periodicals encreased 83 per cent, accidents were reduced to one fifth, and there was never a person in town who didn't know of every political move, of every sport event, and of every blood-curdling murder.

In Belleville the progressive citizens waged a similar war on these man-killing newspaper holders. After their success in 1915 the illiterate

people decreased from 672 to 27 in 1926. Can there be anything more evident than these statistics?

On the eve of a presidential election if "Smith will carry Pennsylvania" the need of a change in policy is even more pronounced. Thus it is with bated breath we ask that some benefactor come to our rescue so that there might be no eyes poked out in the search for education and enlightenment.

**PROF. "SPIKE" DENNIE  
WINS ANOTHER TITLE.**

From Kansas City Times:

Another "championship" changed hands when Dr. J. A. Reilly, a familiar sight around the K. C. A. C., was relieved of his "late arrival" crown at the K. U.-Aggie game Saturday.

Dr. Reilly, who has long been champion of the "late arrivals", surprised the multitude by reporting on the field on time at the Manhattan game. The last time he was scheduled to officiate at a game in Topeka he was said to be in Manhattan.

When it came to starting the game at Manhattan Saturday, two startling discoveries were made: That Dr. Reilly was on time and that F. E. Dennie, umpire of the game, was missing. Louis Menze, who was on the field as a spectator, was sent in to "pinch hit" for Dennie who had missed train connections at Kansas City.

About the middle of the second quarter Dennie reached the field and dashed to his position. The game was temporarily halted until the hand of the Brown university product had been warmly shaken by every official on the field and Menze had retired. Play was then resumed. And Dr. Reilly had been relieved of his championship.

And one college professor was so absent-minded that he addressed the members of his classes as "Gentlemen."  
—College Humor.

"Is my face dirty or is it my imagination?"

"Your face isn't; I don't know about you imagination."

—Wisconsin Octopus.

Writer of this stuff: How do you think my jokes got across?

Hard-hearted friend: On the Mayflower.

writ this fall.

Kay J. Hansen, who attended the School of Mines, '26-'27, died May 18, 1928, in Puerto Cabezas, Nicaragua, according to a letter received by Harry Bolon. Mr. Hansen had been working for Bragman's Bluff Lumber Company, and was prospecting for gold in the country along the Nicaraguan coast in the company of two partners, Mr. Hanberg and Mr. Gaæ, and was preparing to go to Brazil to do some prospecting, when he was stricken with the "Black Water Fever", while in the jungle. He was taken to the company's hospital at Puerto Cabezas, where he died after only a few days' illness. He was buried in the only cemetery in Dilway.

Kay had planned to go to his home in Tolsager, Asnoes, Denmark, after the proposed trip into South America.

### TRIUMPHANT ADVANCE OF THE FEMALE CONTINUES.

From the E &amp; M J, Oct. 13, 1928:

Metropolitan newspapers (edited by men, of course) not infrequently remark and lament the gradual passage into oblivion of many of the most sacred and formerly inviolable privileges of the male sex. The successful entries of the feminine forces into the smoking car, the barber shop, the electoral polling booth, and the realm of sport have all elicited comment.

Mining men will probably hear with interest, and perhaps with concern, that still another sacred stronghold has been trespassed by French heels. From Tucson goes forth the word that the School of Mines of the University of Arizona is now possessor of one aspirant for a B. S. degree in Mine Engineering, who hails from the Other, the Gentler, the Better sex. Miss Katherine Ysabel Morton, 18, of Webster Groves, Mo., has enrolled for the course in Mine Engineering.

That Miss K. Ysabel Morton is really imbued with a desire to engage in the profession is not strange, for her uncle, Louis E. Foster, of Silver City, N. M., is a practicing mining engineer.

"Engineering and Mining Journal" confidently expresses the hope that success may attend her efforts on the dozen or so chicken ladders, descent of which may be incidental to the lady's first professional assignment.

## An echo that circles the globe

*Sightseers* returning from the Alps never fail to babble of the marvelous echoes that reverberate so obligingly from peak to peak.

But no such phenomenon matches a certain echo that keeps circling this whole mundane sphere. It is the best-known cigarette slogan ever coined—the Chesterfield phrase “They Satisfy.”

Originated to describe a unique coupling of

qualities seemingly opposed—“they’re mild, and yet they satisfy”—its descriptive accuracy was instantly perceived. Today it echoes and re-echoes wherever cigarettes are smoked:

“Satisfacen...ils *satisfont*...THEY SATISFY!”

And rightly enough, for Chesterfields *are* mild—and they *DO* satisfy...and what more can *any* cigarette offer?

# CHESTERFIELD

MILD enough for anybody...and yet...THEY SATISFY

### SOPH CLASS MEETING

A good bunch of sophomores were out for the first official meeting of the year, last Thursday, at Parker Hall.

“Joe” Scally, president of the class

spoke on the coming Frosh-Soph football game, semester dues, and the Junior class movie shows. The majority of men present voted against having Coach Rappe as Frosh coach, since a student director has always

been employed in the past. L. Tuttle was elected Soph football manager. Wood and Scally urged a stricter attitude towards cap and suspender enforcement.

tive members of the class have formulated a plan which is, briefly as follows:

A big carnival, the kind everyone enjoys—packed with feature events and performances and supported by numerous side shows is to be held at Jackling gym on or about December 1st. Features of the big show will be the annual gun and radio raffle, a popularity contest to determine the most popular girl of Rolla, and a dance with a feature prize number for "them as knows how." It is promised that the side shows and booths of the carnival will form no small part of the attraction of the show. Everyone is requested to keep this event in mind and look forward to an evening of real fun.

Among the other events scheduled in the present campaign are the usual Miner dances at the gym each week. A benefit performance by Betty Harlin's dancers, and several bridge parties at later dates.

To the few members of the Junior Class who have not been supporting, President Jarboe wishes to urge all to attend the meetings of the class. Few meetings are to be held. When a business meeting is called it will be short, and of interest to every member of the class. If the class is supported as it should be, the success of the social year insofar as the class of '30 is concerned, is assured.

Continued from page 1

both on the offensive and was by far the main stay of the Miner's attack. Hassler and Schofield also starred in the backfield while Bolon and Capt. Lacy played their usual steady game in the line.

In summing up the game it cannot be said that the Miners were out-classed by Central. If figures prove anything the Miners were far superior to their rivals in many departments of the game. The Miners completed 12 first downs to Central's 6. They completed 5 passes to Central's 4 and averaged 35 yards on their punts to Central's 30.

Lady luck played a large part for

Central but this week is another game and the Kirksville Osteopaths will know they were in a game before they leave Rolla this Saturday. Let us all be out there and send our big team off to a victory—an honor which they rightfully deserve.

Central	Line-up	Miners
Ensor	L.E.	Sharp
Turner	L.T.	H. Bolon
McAdams	L.G.	Lacy
Tylor	C.	Tomlinson
Innes	R.G.	Tucker
Moore	R.T.	Lamb
Downing	R.E.	Malik
Tomlin	Q.B.	Hartle
Bryant	R.H.B.	Schoefield
Reid	L.H.B.	Steiner
Gray	F.B.	Hassler

Officials:— Lewis, Washington; Klein, Missouri; Thornberry, Head Linesman.

Yards through scrimmage: Miners 188, Central 224.
