## MINERS ARE VICTORIOUS IN FAST GAME WITH WESTMINSTER.

The Miners sent the Westminster team down to defeat by a score of 30-23 last Saturday night. In this game the Miners supplied all that has been lacking in the previous games. The five men on the team worked like a well oiled machine. The passes were well made and the fellows knew where to find the basket when necessary. Each player on the team played a real game and the five men worked as nicely as any one would want to see a team work.

The game started slowly, but after a few minutes of play it became one of the fastest and best played games of the season for the Miners. The Miners gained a few points lead early in the game and managed to keep on the long end of the score most of the time. The game was hotly contested in the first half but several sensational plays by the Miner team produced a nine point lead at the end of the first half. During the greater part of the last half the Miners played a defensive game. The Blue Jays attempted to force the play but in so doing they left openings which allowed the Miners to pile up a still larger lead. In the latter part of the game the Blue Jays attempted to stage a rally but they were only successful in cutting the lead down from 12 to 7 points by the time the game was over.

In this game the Miners showed a style of play that has been lacking in the earlier contests of the season. The Miners still have a chance to pull up near the top in the conference and we are in hopes they will do this in the games in the next few weeks. This is the first conference game won on the home court this season.

Green was high point man of the game with five field goals and seven charity shots, a total of 17 points to his credit. Twice Tommy dashed down the floor to receive a pass and drop the ball through the loop with a Blue Jay swinging on as he made the throw. In both instances he made

## PHI KAPPA PHI PLEDGES AT MASS MEETING.

From a scholastic standpoint, the most important assembly of the year was held in the auditorium last Friday morning when new members of Phi Kappa Phi were pledged. To be pledged to Phi Kappa Phi is the highest honor scholastically that an M. S. M. student can receive.

The following seniors are ones who were honored this year: P. H. Delano, E. T. Harvey, B. N. Daniloff, E. T. Willson, A. T. Gardner, R. A. Bryant, J. H. Hahn and B. R. Coil.

After the pledging, Mr. Percy Redmond of St. Louis, gave a short talk. His subject was "The Relation of Scholarship To Success."

## FORMER PRESIDENT OF MISSOURI U. TO LECTURE HERE.

Dr. A. Ross Hill, former President of Missouri U., will present a lecture in the M. S. M. series in Parker Hall Thursday evening, Feb. 28th. His subject is to be "The Near East".

Dr. Ross, whose term as President of the University extended until 1921 is associated with the Near East Relief. His research in that part of the world has well equipped him to present an excellent lecture on the subject.

## MINERS LOSE TO CENTRAL WESLEYAN AFTER A HARD FIGHT.

The Miners lost to the Central Wesleyan representatives in one of the hardest fought and most interesting games of the season. Every man on the Miner team was fighting hard throughout the game, and every man played a good game individually, but there was a noticeable lack of team work all through the game. In spite of the Miners hard luck and of their inability to get started, the game was very close at all times. The score was never more than three or four points in favor of either team until the last few minutes of play. Numerous substitutions and changes were made for the Miners in order to try to find a combination that could work to-

## ANNUAL A. I. M. M. E. MEETING TO BE IN NEW YORK CITY.

The annual meeting of the American Institute of Mining and Metallurgical Engineers will take place in New York City, Feb. 18-22 inclusive. The program will be devoted to the presentation of technical papers, section meetings, conferences, lectures, general sessions, luncheons, dinners, dances, a smoker and an all day excursion to West Point.

M. S. M. is to be well represented at this meeting by Dr. Fulton, Prof. Forbes, Clayton, Walsh, Hanley and H. A. Buehler. Two papers will be read and discussed by these men. The first paper: "What the College Expects of the Operating Companies in Receiving and Training Its Graduates," will be read by Dr. Fulton. The second paper, "The Formation of Insoluble Zinc Compounds During Roasting", is to be presented by Professors Hanley, Clayton and Walsh.

## MR. PERCY REDMOND PRESENTS EXCELLENT TELEVISION LECTURE.

Last Thursday evening Mr. Percy Redmond, general manager of the southwestern district of the Bell Telephone Co., presented an intensely interesting lecture on the new science of television. Mr. Redmond showed a remarkable ability to reduce the abstract terms in which the science of television is usually stated, to an easily-understood discussion of the fundamental principles of the subject. In the opinion of some persons, the lecture as a whole may have been considered too basic and general for the average technical student. The fact that this lecture was one of the best attended general lectures of the year and the manner in which it was received by the audience are points of proof of the ability of the speaker.

Mr. Redmond displayed a brilliant sense of humor that is quite rare in most scientists while discussing any particular branch of science. The behavior of electrons and the protonic phenomena—a dose which would be

## BIG SIX TEAMS

## ARE BELOW PAR.

One hears much about the high-powered brand of basketball which will be played in the new Big Six Conference this season, but when he views the present court situation closely, he may be tempted to change his opinions.

Missouri and Oklahoma lead the league at present, with 3 victories and no defeats. However the Tigers dropped two games in rapid succession in Indiana, and the margin of defeat in both cases was decisive. The basketball played at Kansas, Missouri, Nebraska and Oklahoma is supposed to be on a par with any in the United States, but results to date would not indicate that such was the case. Kansas opened the season by losing to Washburn College, and then proceeded to drop seven straight along the road, to Notre Dame, Missouri and California, before it succeeded in taking a single contest. Last Tuesday night Missouri experienced a good bit of trouble defeating this same Kansas team by a scant four points.

The Kansas Aggies, while not a strong team, are expected to cause the leaders quite a bit of worry before the season ends. However, they lost to Creighton recently by the ignominious score of 50 to 25. Oklahoma, one of the strongest contenders for the Big Six title this year won from Kansas by a single goal. Missouri appears to have the greatest potential power of any of the conference outfits, but cannot seem to get under way.

—Missouri Student.

## LOSSES IN TRI-STATE DISTRICT FLOTATION TAILINGS.

An examination of flotation feeds and tailings from the Missouri-Kansas-Oklahoma zinc district, is being made at the Mississippi Valley Experiment Station of the United States Bureau of Mines, Rolla, Mo., to determine if excessive grinding increases the amount of zinc lost in the finest sizes. A delicate elutriator (classifier) is used for this work.

The part of a flotation feed and tailing, respectively, through 150 mesh was elutriated and the distribution of the zinc in the respective sizes was determined. The elutriated feed was of about the same grade throughout the sizes, but the tailing was of relatively high grade in the sizes finer than 10 microns, thus showing the poorest flotation ex-

traction in the minus 10 micron size. The lightest elutriated product showed a relatively poor recovery; the mean diameter of the grains was 2.5 microns—thirty times smaller than 200 mesh.

## COST OF RUNNING FOR OFFICE COMES HIGH.

It is told of a recent sheriff that in filing his cost for running for office that he filed the following account of his expenditures:

"Lost 1349 hours of sleep thinking about the election. Lost two front teeth and a lot of hair in a personal encounter with an opponent. Donated one beef, four goats and five sheep to county barbecues. Gave away two pairs of suspenders, four calico dresses, \$5 in cash and 15 baby rattles.

Kissed 126 babies. Put up four stoves. Kindled 4 fires. Shock hands with 9503 people. Walked 4976 miles. Told 10,101 lies and talked enough to make in print 1000 volumes.

"Attended 16 revivals and was baptized four times by immersion and twice by other ways. Contributed \$50 to foreign missions and made love to nine widows—five grass and four sod.

"Hugged 40 old maids. Got dog bit 39 times and was elected by 5 majority."

—Ex

*Such popularity  
must be deserved!"*

*To an outsider*, the time and trouble taken to produce a Chesterfield might seem as unnecessary as the sabre-scars so proudly worn by students of pre-war Heidelberg. But popularity is much the same the world over — you don't get it for nothing.

But any short-cuts in the time it takes to cure and mellow the Chesterfield tobaccos, or one step the less in blending and balancing them

— would end up in something that *wasn't* Chesterfield. And you wouldn't like *that*.

So we'll stick to our old system—getting the *right* tobaccos, blending them the Chesterfield way, never sacrificing *character, body, flavor* to mere mildness.

We want to keep our popularity, now that we've earned it—and we know no better way than to keep on earning it!

# CHESTERFIELD

*MILD enough for anybody...and yet...THEY SATISFY*

LIGGETT & MYERS TOBACCO CO

In the "New York Telegram" of January 25th we find the following paragraph:

"Mr. Christner came into what you might call prominence by knocking out Mr. Knute Hansen, the millionaire's Hobby Horse, in Cleveland

a month ago. This was something like the Rolla School of Mines beating Army or Notre Dame or California at football, and on the strength of the performance Mr. Christner promptly became a phenomenon, a sensation and a diamond

in the rough."

Cheer-up you know as much about it as we do.

The basketball players are requested to take their lunch with them on future trips.

## A SQUARE DEAL WITH NO SHOOTING INVOLVED.

Last Saturday evening after the victory over Westminster, a crowd of exultant Miners gathered before our one and only Lyric Theatre, solicitous as to the chance for a free show, and more than half determined to gain admittance.

When the gathering had increased to the proportions of a multitude, and the psychological moment seemed at hand, the manager of the Lyric Theatre appeared and stated the case briefly in terms which impressed more than one of the seekers of free admission. He said, "Fellows, the game this evening has already cost us no small amount. We hired a special operator so that Carpenter could play in the game. If you think we should give you a free show in addition to that, you are welcome to come in."

Whereas we had been met, but a year ago on a similar occasion by harsh words and the threat of sudden death at the threshold, we met this time a manager who had already supported the team in splendid fashion and was ready to go more than half way.

Needless to say, the fellows showed their sportsmanship by refraining

from the intended rush. We wish to thank the Lyric Theatre management for the "square deal" and cheerful cooperation we have received.

## TO MARRY OR NOT TO MARRY?

By Beverley Nichols.

"Marriage is a book of which the first chapter is written in poetry and the remaining chapters in prose," says Beverley Nichols, young English writer, in the March College Humor. "Modern marriage is a book of which the first chapter is usually written in free verse and the remaining chapters in journalese. Always my question is 'What will happen when the poetry gives way to prose?' Frankly, I don't know. Nor do you.

"What, I ask myself, could a wife do for me? She could not write any of my books, though she might stop me from writing some of them. She might do my typing, but that is an indignity to which I would not subject her. I prefer to pay my typist's bills. What else could a wife do for me? She could run my house. Yes. Of all the foolish legends with which this world is befogged the legend that women know anything about housekeeping is the most foolish. To see them as they attempt to tackle a supremely simple operation such as spring cleaning is as embarrassing as to watch an incompetent subaltern getting tied up with his platoon during army maneuvers.

"Nor have women, with the exception of rare geniuses, any conception of decoration. If women really had their way they would turn every room into a jumble sale. If they are given a picture, up it must go, whether it is appropriate or not. If they have a cushion, it must be pushed in somehow or other. What else could a wife do for me? She could be a companion. Ah! You are evoking the phantom which is the haunting fear of all bachelors—loneliness. But may there not be a welcome in the very loneliness after the fretting contacts of the day? And are there not more books in the world to read than I shall ever know, and am I not far more capable than anybody else of pouring out my own whisky and soda?

"Suppose I have been to an amusing party. I may want the party to go on. I may want to bring dozens of people home with me—Jane who sings, and John who plays the piano, and Oliver who mimics people so brilliantly. If I am married, how am I going to do that, unless I marry an angel of tact and forbearance?

"I rejoice in my freedom. If I

choose, I can get on board a steamer tomorrow and sail to Hawaii and start a trade in illicit drugs. I can grow a beard and screech anarchy in Hyde Park. I can stay in bed and eat macaroons. I can fill the house with monkeys. I can keep goldfish in the bath. In other words, I can 'be myself,' as the Americans say.

"You are going to tell me that 'if everybody thought as I did the world would cease altogether, and humanity would perish from the face of the earth.' To which I can only reply, 'Why not?'"

## INTRAMURAL BASKETBALL.

## Independent-Triangle.

The Independent team won from a crippled Triangle quintet with very little trouble in their game last Thursday. The Independents are still in first place, not having lost a game. The Triangle team dropped to third place by losing this game. The Prospector five are now in full possession of second place. The game between the Prospectors and the Independent teams should prove very interesting for if the Prospectors win, both teams will be in a tie for first place in the tournament standing. The Triangle team had a great deal of trouble in getting started in the first half. In the second half they had more luck in dropping the ball through the loop and were able to score as much as their opponents.

Bradford and Ware led in the scoring, making 11 and 10 points respectively. Maulder was best for the Triangle team with 8 points.

## Kappa Sigma 21-Pi K. A. 19

The Pi K. A. aggregation put up a hard fight with the Kappa Sigma quintet in an effort to avoid being at the bottom of the intramural list forever. It appeared that they were going to pull out of it when the half ended as the score was 13-7 in favor of Pi K. A. But the Kappa Sigma boys came back in the second half, led by Hoffman and rapidly decreased that lead. The score was a tie until the last minute of play when Hoffman sank a long one to win the game.

Morris was high point man for the Pi K. A. team with 10 points, and Maune second with 8 points.

## Sigma Nu 38-Merciers 15

The Sigma Nu quintet forced the Mercier five down to defeat by a score of 38 to 15. The Sigma Nu team piled up a large score in the first part of the game and managed

to hold it throughout the game. The Mercier five were unable to get started in the first half but during the last half their passes worked much better, and they were able to hold their own in the scoring. Both teams played hard, and at times the game waxed rough from over-eagerness of players on both sides.

Schofield was high point man with 14 points, while Sturm and Graham were runners up in scoring for the Sigma Nu five. Haffner led in the scoring for the Mercier quintet with a total of 7 points to his credit. This game has little effect on the standing of either team in tournament.

#### MODEL MINE TIPLE DONATED TO SCHOOL.

Allen & Garcia, Contracting and Consulting Engineers of Chicago, have donated to M. S. M. a modern model of a coal mining tiple. This tiple is a miniature of one of the several types they have designed and constructed. It is made of structural steel riveted together with brass rivets. It is a working model equipped with small electric motors to run the shakers and screens. At present this model has been placed in the hall on the second floor of the Mine Experiment Building. This piece of engineering workmanship was displayed at the Cincinnati Coal Exposition in 1928. John A. Garcia graduated from M. S. M. in the class of 1900, and last year received a Doctor's Degree from this school.

Continued from page one.

gether. Had the Miners been working together as nicely and been hitting the basket as regularly as they did in the game last week, there would have been a different story to tell.

The game started very slowly with neither team being able to break through with any regularity for a score. Green and Heilig each sank several long shots but the Central Wesleyan team retaliated by dropping numerous charity shots thru the loop. The Miners out-played their opponents on the floor in the first half, but the Central Wesleyan five manager to keep the score about even by making numerous free throws good. The score was tied at the end of the first half, 12-12.

The second half started much as the first and continued so until there were only three or four minutes left to play. At this time the opposing five were one point ahead. Since they were ahead, the Central Wesleyan aggregation started a stalling game.

The Miner five were forced to go down the court and make them pass the ball. For a few minutes both teams played fast basketball, the Central Wesleyan five trying to keep the ball away from the Miners and the Miners trying to get on the long end of the score. Because of the fact that the Miners were forced down the floor their defense was completely broken up and the opposing team had little trouble in breaking thru and scoring.

Green and Heilig led the Miners in the scoring, accounting for 8 points each. The following men started the game for the Miners: Green, Hollow, Heilig, Tamm and Miller. The Miner relief men were Tucker and Teiman.

Continued from page one

difficult for the layman to swallow, was clarified more by a few well-chosen wise-cracks than by many paragraphs of technical elucidation. Needless to say, any remark which bore any suggestion of humor was readily appreciated by an enthusiastic Miner audience.

Mr. Redmond brought out the fact that the Bell laboratories have been in existence ever since the invention of the telephone. The engineers of the company were among the pioneers in the field of television and telephotography. In April, 1927, the Bell laboratories gave what was probably one of the first demonstrations in telephotography; and in June of the same year, they presented their discoveries before the American Institute of Electrical Engineers.

The lecture showed how man has reached out far beyond the power of his natural faculties to extend his power of hearing and sight over an area practically as large as the world and as Mr. Redmond points out to us, there is a possibility of extending these faculties still farther.

In addition to the lecture, two vocal selections were given by Mr. Irvin Mattick. His first was "Invictus" and the second, telephone version of "The Road to Mandalay." The accompanist was Mr. Frank McClure.

#### MINERS LOSE TO ST. LOUIS U.

The Miners failed to provide much opposition for the powerful St. Louis U. quintet and were defeated 47 to 17. The Miners seemed to be at a complete loss on both defense and offense. Green was high point man for the Golden Wave scoring 7 points. Londrigen's 5, Heilig's 4 and Tamm's

charity shot accounted for the remaining points. This victory was the tenth for the St. Louis aggregation this season, and critics acclaim the St. Louis U. team as one of the best in the country.

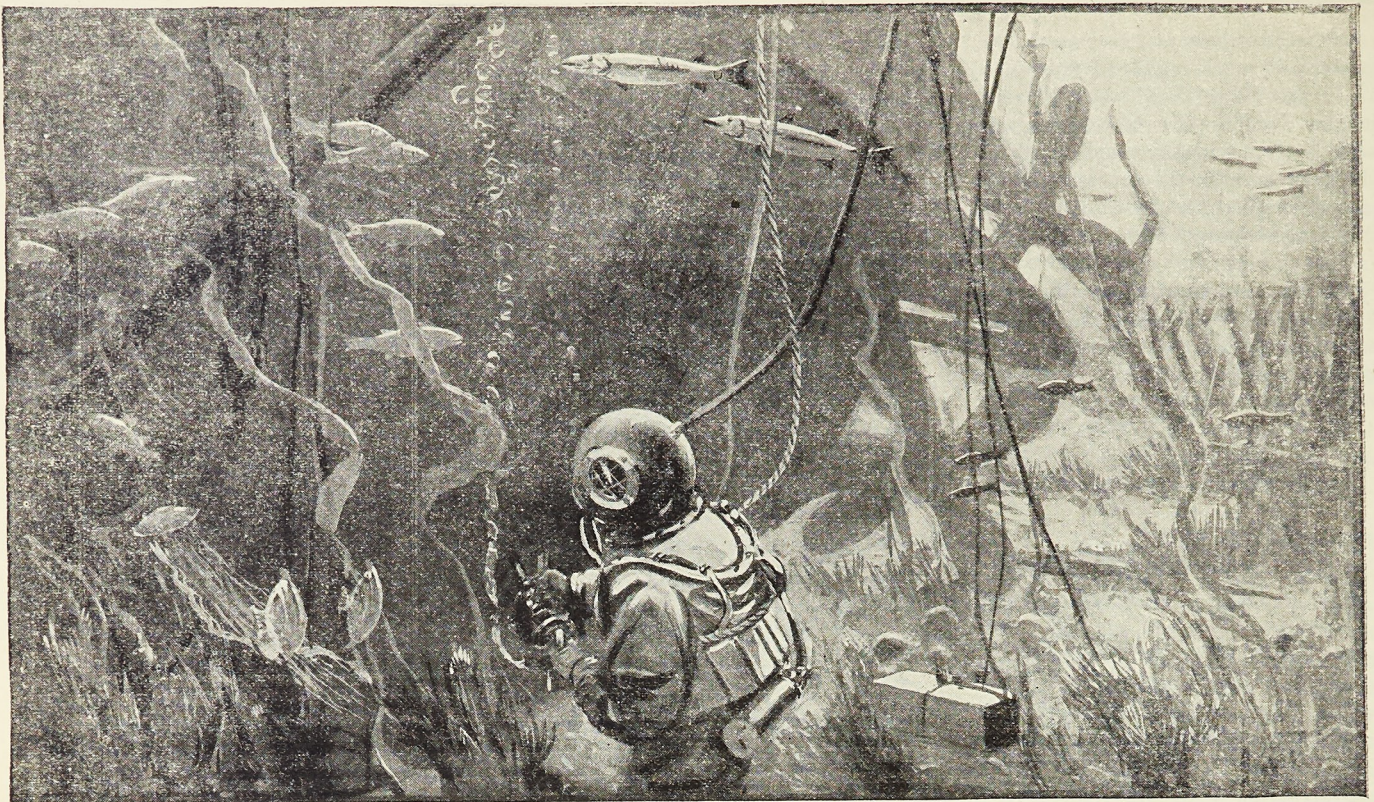

#### HAND BALL MATCHES START.

Last Saturday the intramural hand ball tournament started off in earnest. A list of matches has been posted in the gym, with each player arranged opposite his opponent. Coach Brown strongly advises that each man look over the list and arrange to get his match off as soon as possible. This is very important, since the large number of men entered in the tournament calls for a gradual process of elimination.

Result of matches, February 9:

Player	Team	Score
Schultz, Independent.....		21
Schofield, Sigma Nu.....		17
Offutt, Pi K. A.....		21
Lay, Prospector.....		9
Scott, Independent.....		21
Kay, Pi K. A.....		19

## Down in Davy Jones' Locker

Barnacle covered, half buried in the sand of Davy Jones' locker lies the menacing hulk of a sunken ship. A menace to ocean traffic, it must be destroyed. Another task for dynamite.

Frequently sand and coral must be blasted away from the sides before dynamite can be placed to break the hull. Gelatin dynamite impervious to water is used. Divers place it at

strategic points, prime it with submarine caps and fire it by electric current. The dangerous hulk is destroyed.

Explosives clear the way for progress.

The Explosives Engineer is recommended in many colleges as supplementary reading to courses in engineering.

the two free throws that were awarded him. In the last several games Tommy has proven a valuable player by his fast work and accurate shooting.

Carpenter, a new man in the Miner lineup, played a hard, fast game at forward. This is Carpenter's first appearance in a game and from his showing we have much to expect from him in the future as he is only a freshman.

Captain Tamm played a good game at guard, being responsible for much of the fast work in returning and

passing in of the ball through the Blue Jay defense.

Green and Hileig led in the scoring for the Miners, Green accounting for 17 points, while Hileig annexed 9 points to the score.

The starting lineups of the teams follow:

Miners: Carpenter and Green, forwards; Hileig, center; Tamm and Miller, guards.

Westminster: Saunders and Strobach, forwards; Boyd, center; Newkirk and Mason, guards.
