JOINT MEETING OF ALL ENGINEERING SCHOOLS OF MO. WILL BE HELD.

**Professor Armsby
To Present Paper**

THE MISSOURI SCHOOL OF MINES, MISSOURI UNIVERSITY, AND WASHINGTON UNIVERSITY WILL BE REPRESENTED AT MEETING IN ST. LOUIS.

A meeting of representatives from Missouri's three engineering schools, M. U., Washington U., and M. S. M., will be held in St. Louis, November 20th and 21st. M. S. M. will be represented by the following: Professors Mann, Frame, Armsby, Butler, Lovett, Dennie, Cagg and Miles.

The purpose of this meeting is to attempt to get the faculties of

G. W. STEPHENS TO SPEAK TO STUDENTS ON TRANSPORTATION

**WASHINGTON U. DEAN
IS AN AUTHORITY**

For next Thursday evening the General Lecture Committee has provided a speaker to talk upon a subject of much interest in these times. Dean G. W. Stephens, Dean of Men at Washington University, St. Louis, is to lecture upon "The Future of Transportation."

Dean Stephens, who has spoken before the student body several times, was born in Wapello, Iowa, in 1878. He has received many degrees of rank, from various colleges. In 1904 he received the Ph. B. from Wesleyan College; in 1911, Ph.D. from University of Wisconsin, while in 1907 he received his A. M. from the same place. In 1919 he received LL.D. from the University of Maine.

Mr. Stephens has been a member of the faculty of many colleges over the country, conducting courses in economics. He is a member of Economics Association, Phi Beta Kappa, Phi Kappa Phi and Beta Theta Pi. On the occasion that he has spoken here, Dean Stephens was always well received, and his talks enjoyed by all attending. He is a noted authority in the subject of his lecture Thursday night, and all those able to attend will certainly be well repaid for their time.

Depression Day

In view of the world-wide depression about which so many rumors have been circulated, the Inter-fraternity Council has designated Friday, November 20, as a general depression day at the School of Mines. In honor of the depression everyone is requested to dress according to their idea of a person on whom all the evils of a depression have descended.

MSM

St. Pat's Board Dance

The St. Pats Board will again furnish the means for a very pleasant evening when it sponsors another of the series of dances which will be given to raise funds for the annual celebration of St. Patrick's Day.

The music will be rendered by Andy Wilson and his all Miner band and the time is 9:30 Saturday, November 21st at Jackling Gym.

MSM

NEW DIVING BOARD ERECTED AT M.S.M. POOL FOR SWIMMERS

**TANKMEN RAPIDLY GAINING
CONDITION FOR IMPENDING
INTER - COLLEGIATE
MEETS.**

Steady improvement is being made by the swimming squad, and while no attempt has been made yet to put the team in shape for competition, the results of systematic training are becoming evident. Heretofore, the work-outs have consisted of form drill, kicking and arm-stroking, starts and turns; but soon more emphasis will be placed on the various events in anticipation of a squad meet sometime before Christmas vacation. The installation of a diving board serves as a call for fancy divers; six of the squad plan to try out for this event and probably others will report.

With the coming of mid-semester Mr. Gow has emphasized the necessity of staying eligible and a few members have been excused from work outs to enable them to catch up in this work. The four training rules are (1) absolutely no drinking; (2) practically no smoking; (3) plenty of sleep and (4) lots of study. It is Mr. Gow's sincere wish that no member of the swimming squad will have to be dropped for scholastic reasons.

ENGINEERS FORMULATE UNEMPLOYMENT PLAN TO AID RELIEF WORK

**A VERY WELL ORGANIZED
GROUP OF ENGINEERS
HAVE PRESENTED A RELIEF
PLAN WHICH IS DESTINED
TO LEND MUCH ASSISTANCE**

The American Engineering Council has offered the following plan as an answer to the present impelling question: What work can now be provided the millions not employed?

The program includes all construction of whatever character undertaken by national, state, county and municipal governments and their several subdivisions as well as that of quasi-governmental bodies. It will be carried out in two divisions by state committees of the council which are now actively at work in all sections of the country.

One division of the program embraces the emergency plan, the other, the future plan. Owing to existing conditions, it is proposed to concentrate major effort on the emergency plan.

As to a statement of the Council's plan, we quote the St. Louis Globe-Democrat verbatim: "The engineering profession is now organized and ready, through state engineering committees, local engineering societies and in co-operation with many other groups, including the President's Unemployment Organization, to proceed aggressively."

"The profession proposes to do

Entire Miner Squad Plays As Panthers Fail To Threaten

SQUAD GAINS CONSISTANTLY

Utterly scoffing at all the traditional Friday the 13th propaganda, the scrappy Miner footballers completely outclassed their old rivals, and won decisively from Drury in a game played at Springfield on Friday, November 13th. The score was 18-0. Drury was completely outclassed and practically all of the game was played in Drury territory, with the Miners in possession of the ball most of the time. The Miner team showed up splendidly as a whole, every department functioning smoothly. The Miner line outcharged and out-fought the Drury line from the start of the game. Long gains were

Armistice Day Parade Given By R.O.T.C. Unit

Armistice day was celebrated in a fitting manner by the Military Department. All classes were dismissed at 10:00 Wednesday, Nov. 11 and at 10:30 the R. O. T. C. unit assembled in front of Parker Hall. Following the assembly a street parade was held. The unit marched down Main to Eighth and on Eighth to Pine. At Pine the unit formed in platoon front and marched to Thirteenth in this formation. Pine street was thronged with townfolks and students, many of whom followed the march to Jackling Field.

At Jackling Field a formal battalion parade was held. After passing before the reviewing stand the unit formed in company front facing the bleachers while the band played "Taps" in memory of those who died in France during the World War. This simple and beautiful ceremony was a fitting tribute to our soldier dead.

The Military Department in charge of Lieut. Hardin, Lieut. Walslow and Sergeant Bertram, deserves great credit for the creditable performance of the officers and men of the R. O. T. C. unit in this celebration.

Are You Telling Us?

For the benefit of those who have a hard time finding a dispenser of intoxicating beverages, the Springfield Teachers "Southwest Standard" has suggested an easy method:

"Rolla has certainly made a name for itself. On November 2, the village was deemed important enough to warrant the establishment of a Prohibition Enforcement Agency under the authority of the Department of Justice. Now new students of that institution will be able to enjoy the benefits of an index to bootleggers. Instead of driving madly about the countryside in search of one of the four out of five who have it, the stranger may now merely walk up to the new agency, consult the file and follow his nose."

MSM

Depression of Grades

Mid-semester grades appear to have reached a 'new low' for M.-S. M. Concurrent with prevalent practice, the immediate reaction is to attempt a determination of the causes. Some common opinions afloat are that the faculty are reciprocating their cut by reducing the output of gradepoints, that a decrease in enrollment is sought, and that the courses are growing more difficult. Just what reasons the faculty have in mind are not known as yet, but they no doubt believe a decline in the number of brain cells per student to be a cause. Perhaps. But, if the underlying cause of the descent were uncovered, it would be found outside the campus. For the majority of those without a perpetual income, the foremost thought entertained by the Miners these autumn days is the source of sustenance for the winter. When subject to above predicament, the search for grade points is due to be replaced by an expedition in search of the elusive dollar. Contemplation of such an expedition can be blamed for many distracted hours intended for the study of dear old calculus.

What to do about it is one of the faculty's worries and the student's nightmare. Red Oak solves the

problem, but only temporarily. To be sure, it is the individual's problem, to be solved by the individual and without the use of an answer book.

**FOOTBALL**

Continued from page one.

ripped off through the line and when necessary the Miners showed their ability at gaining ground by the aerial route. Not once did the Drury team threaten to score, as the farthest they could penetrate into the Miner territory was to the thirty-nine yard line, which they reached in the first quarter.

The Miners opened the scoring in the first quarter with a touchdown, followed by another in the second, and the final touchdown came in the fourth quarter.

Coffman kicked off for the Miners. After one exchange of punts, Drury was again forced to kick. Williams took the ball on Drury's forty yard line. Here started the march for the first touchdown. With the line performing splendidly, Williams, B. Thornton and Kirchoff ripped and smashed their way to the Drury five yard line. This march was characterized by a nineteen yard off-tackle smash by B. Thornton. From the five yard line Kirchoff went over for a touchdown. Coffman missed the try for goal. Score: Miners 6, Drury 0.

Drury kicked off to the Miners. Drury took a Miner punt and ran it back to the fifty yard line. By a series of Miner penalties Drury was enabled to advance the ball to the Miner forty yard line, as the quarter ended.

Shortly after the opening of the second quarter, D. Thornton, Gibson, Oswald, Tatt and Malik went into the game for the Miner lineup. The Miners were playing in Drury territory during practically all of the second quarter. The second touchdown came shortly after Kirchoff took a Drury punt on the Drury thirty yard line and ran it back to the twenty yard line. J. McDonald came into the game for the Miners. After a series of line smashes, McDonald went around end for a touchdown. Score: Miners 12, Drury 0. Drury kicked off to the Miners, and after an exchange of punts, the half ended with the ball in the possession of the Miners on their own thirty yard line.

Most of the starting lineup was back in the game to begin the second half. The third quarter was characteristic of the first half, with the game being played in Drury territory. McDonald ripped off two twenty yard gains, and D. Thornton went around end for eighteen yards. Despite these frequent and long gains, the Miners were unable to score, and the

quarter ended with the ball in Drury's possession on the Miner forty-four yard line.

Drury failed to gain, and also failed to kick, so the Miners took the ball on downs on their forty-eight yard line. After a series of passes and line plays, characterized by a twenty-nine yard gallop by D. Thornton, the Miners brought the ball to the Drury twelve yard line. Here they lost it, as Drury intercepted Tatt's pass on the two yard line. A moment later, however, Malik recovered a Drury fumble for a touchdown. D. Thornton's pass over the goal line was incomplete. Score: Miners 18, Drury 0. This proved to be the final scoring of the game. During the remainder of the game, the play for the most part, was in the center of the field. The game ended with the Miners in possession of the ball on the Drury forty-four yard line.

Summary: Yards from scrimmage, Miners 280, Drury 85; Yards from punts, Miners 303; Drury 336; Average, Miners, 43; Drury 33.6; Passes attempted, Miners, 12; Drury 12; Passes completed, Miners, 2; Drury 1; Yards gained from passes, Miners 20; Drury 25; Passes intercepted, Miners, 2; Drury 1; Penalties (yards) Miners 25; Drury 20; Fumbles, Miners 1; Drury 2; Recovered, Miners 3; Drury 0.

FRESHMAN DANCE

My, my, what surprises we do get around this dear old school of ours. Last Tuesday we discovered, while scanning the bulletin board, (oh, yes, we read the bulletin, to see when Lieut. Winslow is going to hold his military class) that the Freshman Class was giving a dance Wednesday evening at the gym.

The gym was well decorated with green and white crepe paper and numerous stags. The Varsity Orchestra strained itself to the blowing point and put out music of a better grade than we have had in quite a while.

Many new faces were seen among the feminine part of the crowd, but that section was sadly in the minority though it was thru no fault of theirs.

The dance, which was enjoyed by all, broke up about 12:30 without a single window being broken—what are these Freshman dances coming to?

MSM

PROSPECTOR BOWERY DANCE

The Prospector Club entertained with a very pleasing novelty dance last Friday night. The house, for one night, was turned into a speak easy and the prevailing costumes were those of the Bowery. The whole affair was enjoyed by everyone and the music of Babe Clemmons and his Varsity Orchestra did much to make the dance the huge success that it was. The chaperons were Prof. and Mrs. Millar, Mr. and Mrs. Ed Smith and Lieut. and Mrs. Hardin.

INTERVIEW OF POPULAR BUNCH OF DRURY CO- EDS AT MINER GAME

During the half it was our good fortune to get into a conversation with a group of Drury co-eds whom we proceeded to interview. They were very congenial but refused to pick up strangers (perhaps we looked harmless) and we were unable to get their correct names, although the spokesman of the group was repeatedly called Dorothea by her lady friends. They all hailed from the Kappa Delta House and would give us no further facts of their usual whereabouts. When asked about the prohibition question they said it was all wet as far as they were concerned and also thought that smoking of pipes at football games should be abolished. (Yes, we had our Missouri Meerschauts). The depression, so they told us, has had little or no effect on the date proposition as this is the first year for many years there has been more boys than girls at Drury. Their recreations are very similar to those in Rolla but they are not allowed out all the time. Girls in sororities get three nights a week to be out besides Saturday night and those in the dorm are out only on weekends.

Said that if they weren't so far along in school they would like to transfer to the School of Mines when they found out the ratio of young ladies to the Miners and liked the school on a whole, but thought it was downright mean for us to let our big boys pick on their little ones, even if it was just a game.

MSM

NEW BOOKS

The library department has secured four more new books for the rental collection. These books are the very latest fiction out. They are books by well known authors and have been rated very highly by the critics. In brief they are:

"Cane Juice," by John Earle Uhler. "Cane Juice" is the story of a brazen Louisiana lad, who sets out to revise the sugar industry. He enters the university, with this in mind, but soon drifts to football and the like and almost becomes a regular fellow, but happenings at home recall him to his work which he had been neglecting. He throws his whole soul and body into the work and soon is rewarded with success. He finds himself in love and also with great results. In working out his life's ambition he becomes a hero of his industry. This is a very interesting story of the life of a young man and his many problems in ad-

justing himself to his new situations.

"Sowing Glory," by P. C. Wren. This story is taken from the memoirs and diary of a woman who served in the French Foreign Legion. After serving five years in Morocco as a female soldier, driving ambulances and trucks in the great world war, she found the Army to her liking and not having any parents she joined the French Foreign Legion. The story carries a romance between this woman and a man who has known her from childhood. He loses his commission and decides to make a fresh start and follows her in joining the Foreign Legion. This is a story of a very remarkable woman and will be found very enjoyable to the reader.

"The Destroyer," by Ernest Poole. This is the story of a Post war idealist who finds nothing to his liking or belief. He hates his brother and loves his brother's wife, which inspires him to write very harsh and satirical plays. The story or tragedy, is developed from this and presents many acts and views of the idealist driven to his last defense. It is different from most fiction and has been a great seller from the book shops of America.

"The Matilda Hunt Murder," by H. S. Keeler. This is another of Mr. Keeler's great mystery novels as only Mr. Keeler can write. The story opens with Mrs. Matilda Hunt eyeing a mysterious black leather case, tightly closed with stitches of silver wire, the possession of one of her new boarders. A few days later the boarder disappears. She seems very triumphant and carries the case into her nephew's room. From that room she never came again, alive—Who Was The Murderer? The answer will be found in the book, on the shelf in the library rental department. This novel is another of Mr. Keeler's web-work mysteries, which contains a thrill on every page.

This books are all well chosen and we hope you show your appreciation to the library department by reading them.

Joint Meeting of all Engineering Schools of Missouri Will Be Held

(Continued from page one.)

the three schools better acquainted and to discuss some of the problems common to the three schools. The movement for this meeting was started last summer at the annual meeting of the "Society for the Promotion of Engineering Education" by Dr. Mann, Prof. Armsby, Dean McCaultland of M. U. and Dean Langsdorf of Washington U., and it is possible that the meeting will result in the formation of a Missouri section of the society.

An item on the program will be a paper by Prof. Armsby in which he will present the results of a study of placement examinations which he has been conducting for the last seven years. A comparison of the examination scores with the entire college record of all members of the classes graduating in '29, '30 and '31 has been made. Many interesting correlations have been revealed which suggest a possible modification of the machinery of admission to engineering colleges. A brief outline of his paper will be presented in the next issue of "The Miner."

MSM

New Diving Board Erected at M. S. M. Pool For Swimmers

Continued from page one

Swimmers Set Record

The MSM swimming team during the last week has been performing admirably. They have been timed for the hundred yard dash and the record of the pool established the week before was broken by a large number of those on the squad. This shows the improvement they are making under the never tiring efforts of Coach Gow.

The pool was drained and during the process the swimmers who wouldn't give up any chance to practice were driven to the deep end where they soon scraped bottom. When the pool was dry, Mr. McCaw and a crew of workmen divided the tank into 4 lanes and four cross lines at the center and gutter are for water polo, while the first keep the swimmers to the straight and narrow path.

dressed for duck hunting. However, Bugs let go with a load of scrap iron at the beast just to let him know we wasn't pansies.

Speaking of pansies, this column is organizing a society for the suppression and extinction of guys who persist in dancing with each other at public functions. We realize that there are those who really get a huge boot out of things like that and we used to have a name for them, but the Ed says, "you can't print that in my tabloid," so for those gents we can but extend the season's greetings with a beautiful red cravat embroidered with the official Bronx cheer.

According to Andy Wilson this ole earth isn't so big after all and in an article printed in one of the local papers, Mr. Wilson describes the trials and tribulations of the modern Gulliver. It is especially recommended to those who have difficulty in going to sleep. Everybody tune in on Andy's Broadcast Bedtime story next Sunday night over station B. U. R. P. for assurance of a good night's sleep.

The racketeering business may

have its ethical defects, but you never find a gangster selling apples, and this, dear patrons, is no applesauce. But speaking of rackets, we went to a mighty mean hop the other eve at the Prospectors grangster frolic and although we had to check our violin case and black-jack, the affair would have done credit to any underworld society.

It came to our sensitive ears that one Dave Hale, known to his friends as Dave Hale, was visiting a gal who lived in the country. As they wuz walking throo the newly mown alfalfa and Dave wuz busily engaged in removing the hayseed from his blondined hair, they noticed a cow and a calf rubbing noses in pure bovine love. Touched at the sight, Dave sez: "The sight of that there makes me want to do the same thing." "Go ahead," comes back the heart burn, "its father's cow and he won't mind."

A book missing from the Brooklyn Public Library for 28 years was returned last week by a second-hand book dealer who

found it among a lot of books he purchased. It was a copy of Thackeray's Henry Esmond.

MSM

"Curse of Scotland"

The story of the nine of diamonds is known as "the curse of Scotland." One explanation is that diamonds imply royalty, and that every ninth king of Scotland has been a curse. Another explanation is that it comes from the similarity to the arms of the duke of Argyle, who brought about the union with England, considered by some Scots to have been a detriment to their country.

By Axe, of "Eat, Drink, Etc,"
Fame.

We have heard it mouthed about that the dear subscribers wanted a bigger plus better scandal section in this here tabloid. We were thinking of putting on a one-cent sale to remedy the existing conditions, but wotsa use? Only the elite and eslect few know which is the main entrance anyway and what have we to offer for that extra cent.

The trip to Springfield was not altogether successful last week for we found much to our dismay that we are losing our grip or that we are afflicted with that now prevalent malady known as "bridesmaids breath" or something. Out of five damsels approached only four were interested and as the ole maxim goes, "a house divided against itself gathers no moss."

Me an' Bugs went in pursuit of the elusive quail the other day on account we had some stale toast we wanted to disguise for Squint's breakfast. We had to leave Squint a home cause we had his gun. However, gentle readers, nary a quail did we observe and imagine our embarrassment to have a duck come across our line of vision and us not after ducks. Of course, we didn't shoot it, Pithagorah, for to shoot ducks when quail hunting would not be quite cricket, don't you know, and anyway we weren't

Never parched, never toasted CAMELS are FRESH in nature's own mild way!

EVERYONE knows now that Camels are the *fresh* cigarette.

If inquiry went deeper, it would reveal that Camels are the *natural* moisture cigarette.

That's important, because in handling fine tobaccos, when you process out natural moisture, you sacrifice freshness and flavor too.

Camel smokers needn't worry about that, because Camels are blended of fine Turkish and mild Domestic tobaccos that are never subjected to violent process-

ing. They need no parching or toasting to make them smooth, palatable, cool.

That's why the Camel Humidor Pack is such a boon to Camel smokers—it preserves the *freshness*, flavor, natural moisture, fragrance that are in this fine cigarette to start with.

Camels are *fresh* in nature's own mild way, and if you want to see what that means in unalloyed smoke-enjoyment, switch to them for just one day — then leave them, if you can!

At The Theatre

ON THE STAGE

Monday and Tuesday nights a stage attraction will be presented by the Publix Circuit Vaudeville. Cliq Smor, known as Dixie's Favorite son, and Helen McFarland, the Publix "Perfect Girl," present an act of singing, dancing and all that.

"MERELY MARY ANN"

The romance of a little London working girl and a brilliant musician forms the unusual theme of this picture. Janet Gaynor is a "slavey" in the boarding house where the musician, Charles Farrell, stays. Many interesting and exciting things take place in this Cinderella setting.

The roles of the two principles are more fitted to their character than any of their other film successes.

"MURDER BY THE CLOCK"

You "murder" fiends turn out—here's a picture with all the murders and mystery you could crave for. Who killed Julia Endicott, the wealthy widow? Who killed Tom Hollander? Who killed Herbert Endicott? It's a mystery, folks, it's a mystery—but you'll solve it all when you see "Murder by the Clock." (Note: The writer has a weakness for murder mysteries.)

"DEVOTION"

Ann Harding plays a double role in this picture—one as Shirley Mortimer, the young girl and the other as a middle-aged governess. When Shirley meets David Trent, she falls in love at first sight. But here comes the objection—David is a married man. His marriage is an unhappy one and his wife is abroad. He employs Shirley as a governess for his child, not knowing who she is. From here on the plot gets well under way and an unusual picture results. "Devotion", true to its title, is a great heart interest story, and Ann Harding as its star makes it even more so.

"THE ROAD TO SINGAPORE"

William Powell, the man of many loves, plays the part of a suave and worldly idler, who for reasons best known to himself, spends most of his days in the jungle town of Khata in Ceylon. He meets and fails to interest the wife of a doctor on the island, but by perseverance he gains his point. The doctor, who has unintentionally neglected his wife for his patients, learns of her affair with Powell, and starts in fury for the bungalow of his rival. From here the story sweeps to a dramatic and unexpected ending.

Doris Kenyon plays the part of the young wife and Louis Calhern the doctor. It is one of William Powell's most powerful pictures.

ROOM AND BOARD

Three rooms for rent with board. Right next to the campus. Reasonable rates. 1108 Main Street. Phone 338.

MRS. HUBBLE

Pre-Registration Notice

Pre-registration for the second semester for all students except regular first semester freshmen will start on November 30, and all schedules must be in the Registrar's office before the beginning of Christmas vacation. Regular first semester freshmen will not register until the regular registration day in January.

FAILURE OF ANY OTHER STUDENT TO PRE-REGISTER WILL SUBJECT THE STUDENT TO A LATE REGISTRATION FEE OF \$5.00.

Blank schedules will be sent to the faculty advisers on November 28 and any student who wishes to change his curriculum must notify the office before Thanksgiving.

One copy of the schedule of classes is available now at the office and the printed copies are expected soon. Trial schedule blanks may be obtained at the office anytime. Students are advised to try to make out their own schedules before reporting to their adviser, in order to save time for both the student and the adviser. Advisers are as follows:

Metal Miners.....Prof. Forbes
Petroleum Miners.....Dr. Stephenson
Metallurgists.....Prof. Clayton
Civil Engineers.....Prof. Butler
Mechanical Engineers.....Prof. Jackson

Electrical Engineers.....Prof. Frame
Chemists & Chemical Engineers.....Dr. Schrenk

Ceramists.....Dr. Holmes
Geologists.....Dr. Duke

Students in the Science Curriculum are to report to their major professors.

Pre-registration will be conducted in the same manner as last semester and the schedules turned in first will get first choice of sections. The pre-registration schedule will be the student's official schedule for next spring unless he fails or drops some subject after preregistration, in which case he may have to make a new schedule on registration day in January.

Armistice Day Dance Enjoyed at Pla-mor

On a night much like those in France, rain, and plenty of wind, Andy Wilson and his new all Miner band played for an Armistice dance at the Pla-Mor ball room. Although the crowd was not too large, a good time was had by all. The orchestra, arrayed in tux's behind their new stands with flood

lights illuminating their beaming countenances, waxed very hot and presented an excellent group of dance numbers. The dance lasted for three hours in which numerous people came and went enjoying the dance to the utmost.

—MSM—

TRIANGLE HARVEST DANCE

The Triangle Harvest Dance, the second of their dances this season, was held Saturday, November 14. Everyone, of course, came dressed for the occasion. Overalls and blue denim trousers seemed to be preferred by the fellows present while the girls wore their younger sisters gingham dresses. It really gave the dance that quaint old effect.

The congeniality of the crowd was greatly enhanced by a most unusual accident (?). At about 11:00 o'clock the lights went out and it took two E. E.'s fifteen minutes to persuade them to come back in again. Not only was the orchestra forced to play in the darkness, but the guests were necessarily compelled to find their way around the house in a gloom that could readily be compared to a bottle of India ink. All in all everyone had a marvelous time.

Babe Clemmons' Varsity Orchestra furnished the music and the dance was ably chaperoned by Prof. and Mrs. Dodd, Mr. and Mrs. McDaniels and Prof. and Mrs. Carlton.

Engineers Formulate Unemployment Plan To Aid Relief Work

Continued from page one.

the following cooperation with the Gifford Committee, governmental agencies, and others: List all governmental projects authorized and for which appropriations have been made or may be made in the near future. Determine the status of each project. If the project is being delayed, ascertain the cause or causes thereof. If an avoidable delay is due to some governmental agency present the facts to the governmental official having the authority to remove the cause of the delay, and press immediate action. If an unavoidable delay is due to the public or some part thereof, endeavor to reach the responsible party or parties and get action. If either case obtains and action is not taken in due time, through publicity acquaint the public with the facts so that public will force action."

The foregoing procedure, thru the process of checking and re-checking, is to be continued throughout the emergency, according to the announcement. An immediate country-wide canvass will also be made, to determine what needed work can be done this winter. This work is to include road and street construction and repairs, removal of traffic hazards, cleaning, repairing and remodeling all public and semi-public buildings and grounds, and numerous like things, including such larger undertakings as grade crossings where they may be expeditiously initiated.

A. S. C. E. Entertains Marston With Banquet

The student chapter of A. S. C. E., Thursday evening, honored Dean Anson Marston of Iowa State College, Ames, Iowa, with a banquet at Hotel Edwin Long. About seventy-five men attended, including a representative body from the faculty and members of the Student Chapter.

The banquet was of special interest due to the fact that Dean Marston is the first past president of the Senior Society to visit Rolla, he having served in that capacity in 1927. Among his accomplishments, also, is an active part in the foundation of Students Chapters. In his address, he outlined a history of the American Society of Civil Engineers, and its past importance to the entire engineer-

ing profession. He also expressed a belief, that in the future, national registration of engineers, thru an organization similar to the present society, would be necessary to the practicing engineer.

Music, during the meal, presented by Andy Wilson and his "Missourians" was well received, and most entertaining.

MARSTON OUTLINES INTERESTING WORK OF MANY ENGINEERS

PROMINENT DEAN OF IOWA STATE COLLEGE DISCUSSES THE LARGE PROJECTS WHICH ONLY AN ENGINEER CAN DIRECT.

On last Thursday evening Dean Anson Marston, of Iowa State College, delivered an interesting lecture on the Panama and proposed Nicaraguan Canals. Jim Richardson, president of Theta Tau, introduced the speaker. The program was sponsored by his organization.

Dean Marston stated that there are many problems that arise that are technical in nature, and must be solved by the engineer. The public needs a knowledge of engineering, and the engineer must have a broad education to cope with the different types of problems that arise. Some problems of this type are: highways, the Hoover Dam, and the Mississippi Flood Control.

The International Canal is another problem for the technical engineer. There is an interesting history connected with this canal building. For 440 years, ever since America was discovered, a route has been needed for shortening the distance between the East and West. Nineteen different ones were proposed, but only two were feasible: one in Panama, and the other in Nicaragua. The Nicaragua project found favor at first on account of the fact that the French, who had been attempting the building of a canal in Panama, held out for more money for their

holdings than could be paid by our government.

The present day traffic has grown so great that something must be done. The Interoceanic Canal Board appointed by President Hoover in 1929 is composed of five members, who at present are working on this problem. Dean Marston is one of these five men.

As appropriations for this work were very small, the Army was used in the surveying of the proposed route, and were kept in Nicaragua until last July when their work was finished.

The present board will sail from New York in the near future to

look at the work that has been completed by the Army.

Dean Marston then illustrated the main points of his lecture with some interesting slides showing the locations of constructions and of surveying parties both along the present canal, and along the proposed path of the Nicaraguan Canal.

Dynamite clears the way for modern engineering wonders!

The river front area of the Repauno dynamite plant near Gibbstown, New Jersey, where the du Pont Company first began manufacturing high explosives

...Can 129 years' experience help YOU?

In 1802, E. I. du Pont de Nemours, a young French chemist in America, built and began to operate a small powder mill on the banks of the Brandywine River.

Today—after 129 years—the trade-mark of the du Pont Company is well known throughout the industrial world. Du Pont Explosives have played a major part in building the nation's railroads, highways, aqueducts, reservoirs and subways; in clearing millions of acres of land; in mining enormous quantities of coal and other minerals, and in making possible many great engineering enterprises.

Du Pont has never been content merely to manufacture explosives. Its

highly trained technicians have spent years in chemical research . . . matching ingredient against ingredient . . . to develop new improvements or to make new explosives that will do a given job better. It is significant that a vast majority of all valuable New explosives come from the du Pont plants.

The information that du Pont has gathered in more than a century and a quarter is available to you. As an engineer of today—and tomorrow—you can't afford not to know all there is to know about DYNAMITE.

Write to the du Pont Company for *The Blasters' Handbook*—which tells you how to use explosives. Your free copy is waiting for you.

ALLISON, THE JEWELER

*"They keep tasting better
and better to me!"*

No matter how many you smoke! It's a fact. The last Chesterfield of the day is just as mild and sweet — as cool and comfortable — as the first. For every Chesterfield is like every other Chesterfield!

You couldn't ask for a better test of *uniform mildness*. And it's the tobaccos themselves that give the answer! Only mild, ripe, sweet tobaccos—the smoothest and ripest grown—go into Chesterfield.

And the paper . . . that's mighty important, too! Notice how fine and white it is. The purest that money can buy! Burns without taste or odor.

All this care . . . to make Chesterfields taste better—to make them smoke milder. No purer, better cigarette than Chesterfield can be made. And millions of smokers—men and women both—say it in their own way: "They Satisfy!"

GOOD . . . they've got to be good!
