NUMBER 28

CHARLES RODD NEW PRESIDENT OF INTRA- FRATERNITY COUNCIL

SEVERAL MEASURES PASSED THIS YEAR

The new Interfraternity Council, which held their first meeting during the past week, announces that the following officers have been elected for the ensuing year: Rodd, president; Short, vice-president; Simpson, secretary; Pinkley, treasurer. During the election, retiring president Schmitt presided.

Following the election the council discussed plans for their next year's dance.

The Interfraternity Council, composed of one delegate from each fraternity and club, has been established here for the past two years. It arose from the needs of the various social organizations for a legislative body to act in fraternal matters. It has proven to be a good venture. Since its founding the council has steadily gained power and has attempted to regulate pledging and initiation requirements to the satisfaction of all its members.

Among the measures passed is a motion forcing the houses to have date cards next year. This will relieve a long endured custom here, that of "cut-throat" rushing. It has also made an arbitrary

Chemists To Attend Regional Meeting

Dr. H. L. Dunlap, C. J. Monroe and W. T. Schrenk are planning to attend the Eleventh Mid-West Regional meeting of the American Chemical Society at St. Louis, May 5th, 6th and 7th. A very interesting program has been arranged for this meeting.

The local members of the Society will present the following papers: "A Relationship Between the Mol Fractions and the Absolute Viscosity in Blended Lubricating Oils," by E. R. Epperson and Dr. H. L. Dunlap.

"Factors Effecting the Electrolytic Deposition of Lead as PbO₂," by Thomas G. Day and Dr. W. T. Schrenk.

"The Solubility of Calcium Sulfate in Sodium Chloride Solutions," by E. W. Mockabey and Dr. H. L. Dunlap.

These papers are reports of the research carried on by Messrs. Epperson, Day and Mockabey, aided by Drs. Dunlap and Schrenk.

NOTICE

MAY 13 1932

The rumor that the School of Mines will not operate next fall is entirely without foundation. The school will be open for business as usual, operating on the calendar published in the last catalog.

COMMENCEMENT WEEK PROGRAM ANNOUNCED

DR. W. E. McCOURT TO DELIVER ADDRESS

The following program for Commencement Week has been announced. The program promises a delightful week despite existing financial conditions. The school will not sponsor the annual Commencement Ball this year.

COMMENCEMENT WEEK 1932 PROGRAM

SUNDAY, MAY 15, 11:00 a. m., Parker Hall, Baccalaureate Sermon. The Right Reverend William Scarlett, The Bishop Coadjutor of Missouri, St. Louis.

WEDNESDAY, MAY 18, 8 p. m., Chemical Hall Lecture Room, Sigma Xi Lecture, Dr. William J. Robbins, Dean of The Graduate Faculty, University of Missouri, Columbia, Missouri.

FRIDAY, MAY 20, 7:15-9:30 p. m., Director's Residence, Director's Reception to Students, Faculty, and Visitors.

ATURDAY, MAY 21, 10:00 a. m., Parker Hall, Commencement Exercises, Address by Dr. Walter E. McCourt, Assistant Chancellor, Washington University, St. Louis, Missouri.

A. S. C. E. Holds Banquet Before Senior Trip

The local student branch of the American Society of Civil Engineers, held their annual spring banquet last Tuesday evening. This meeting is the last one for the year and is given annually as a farewell gathering for the senior members of the Society. A delightful banquet was served and was followed by appropriate remarks by various talented speakers.

Senior Trip

Wednesday the senior civils left via chartered motor bus on their annual spring inspection trip. The itinerary, as planned, will carry them to many large power and

SIGMA NU'S HOLD DIVISION CONVENTION

DELEGATES ENTERTAINED AT SPRING DANCE

The fifteenth annual convention of the Eleventh and Twelfth Divisions of Sigma Nu fraternity was held last Friday and Saturday in Rolla. The local chapter acted as hosts to delegates from schools in Missouri, Kansas, Texas, Oklahoma and Nebraska. Meetings were held at the Penitent Tavern, national officers of the fraternity acting as the principal speakers. After the banquet at the Tavern Friday evening, most of the guests managed to find their way to the free dance at the gym, and had a rip-roaring time at a good old Miner dance.

Saturday evening Gamma Xi, the local chapter, held its annual spring dance at the Tavern. Of course, there were out-of-town guests, as a goodly number of the convention delegates stayed over, and incidentally made their own dates from fair local talent. As usual, there were girl friends from the old home town, and so forth, who added to the general good time. And it really was a swell dance, as so many of the guests remarked. Babe Clemmons' Varsity furnished music of the very best. Chaperons were Prof. and Mrs. Forbes and Dr. Armsby.

The boys from the big state universities are all for Rolla—

Officers Club Petition Granted By Council

A meeting of the new Senior Council was held Thursday afternoon, April 28. A petition presented by the Officers Club, local military organization, was approved, thus making possible the recognition of the club as a campus organization. Committees were appointed to assist in supervising various campus activities and plans were made for carrying on the duties of the council for the coming year.

BENNY GROSS ST. PATS BOARD PRESIDENT FOR COMING YEAR

RETIRING BOARD SHOWS GOOD PROFITS

The St. Pat Board has just finished its second year and in this short time has proved itself to be invaluable to the school. The men who comprised this year's board were also members of the board last year. Now, after serving two useful years, the seniors are turning the board over to their successors. At a recent meeting, officers were elected to lead the board next year. The men elected are: B. Gross, president; P. Steen, vice-president; Parker, secretary; and Short, treasurer.

Until last year, St. Pat festivities were handled exclusively by the Junior Class. They seldom came out ahead and often the whole class was forced to pay extra assessments. But in spite of its disadvantages, this plan continued until the fall of 1930. Then, at an election in which the entire student body participated, a motion was passed to create a St. Pat Board. This board was to have complete charge of arrangements and would relieve the Junior Class

MSM

ST. PATS FREE DANCE

On Friday night the St. Pat's Board, in appreciation of the support given them during the past year by the student body, entertained said body with a dance at the school gym.

Babe Clemmons and the boys of the Varsity Orchestra furnished the excuse for the boys and girls to walk around with each other in their arms; and the excuse was plenty nice rhythm.

During the long intermission (?) music was furnished by Kew at the Baby Grand and McCrory at the drums.

Several weak-minded souls were seen making the rounds of the guests trying to induce them to join the Birdie Club. We're sorry to say they succeeded once too often.

There were quit a few visiting Sigma Nus from various points in these United States and we hope that they had as good a time as we did. Most of them seemed to be having such a time.

With such a dance to inspire us, we ought to give hearty support to the St. Pats Board next year, and maybe we'll get another dance.

Miners To Meet Drury On Track Friday

Next week the Miners will have their first opportunity to see the Silver and Gold trackmen perform when they clash with the Drury Panthers on Friday afternoon.

Coach Weiser of Drury, held an Interclass meet April 23rd in order to pick the most probable men to bring to Rolla. On this year's team Drury has two potential winners in Robb and Ray. In the Interclass meet, Robb dashed through the hundred in 10.2 and captured the 440 in 53.1. In the same meet Ray tossed the discus 123 ft. 3½ in. Acker, a freshman, captured the high hurdle event in 16.8.

These men will offer the Miners stiff competition but nevertheless Coach Grant's stars should come out ahead. Both of the relay teams are showing up fine and with such fast men as Monroe, Spotti, Nickel, Howerton and Irwin the dashes and middle distance events should add points to the Miner's score.

Let's all plan to attend this, men, and give the boys a big ovation. For years track teams here have

lacked the proper support of the students and a large gathering at this first home meet would help revive the last spirit and enthusiasm so noticeably lacking.

—MSM—

Benny Gross St. Pats Board President For Coming Year

Continued from page one.

of any responsibility. A junior and a sophomore from each house and from the Independents were elected to the board. These twenty men served on the board last year and again this year and too much credit cannot be given them. Last year they showed a net profit of some \$600 and again this year a profit of the same amount.

But aside from the monetary viewpoint, they have sponsored a number of delightful week-end dances during the past year and

these have certainly added materially to the school's social events.

As a last gesture of a well organized and successful board, an entertainment was given to the school Friday evening.

ROLLA GOLFERS DEFEATED BY WASHINGTON

The Rolla golf team, playing a return match with the Washington team at Washington last Sunday, were defeated 19½ to 16½. The men report a very enjoy-

able day, with almost ideal golf weather, except for the slight wind. Those making the trip and composing the team were: White, Brown, Wilson, Gleason, Weigel, Offutt, Denny, Donahue, Williams, Thomas, Watts and Rapp.

MEN AND MACHINES

The situation faced by the engineering graduate of this year is unique to say nothing of a bit puzzling. There seems to be an over production in practically every industry and hence little demand for technical men. Just how long this condition will last is unknown to thousands, yea, and even millions.

In the past the cry of industry has been more machines. The invention and installation of these machines generally resulted in a reduction of the number of men required by the industry.

Much capital was spent to increase production with few men and industries building the machines did not absorb the surplus of labor caused by their creation. Nothing was done about it and after a time the increased production, unemployment and a great many other economic factors combined to bring the business situation to the present impasse.

Most of the burden of the creation, installation, and proper maintenance of these machines used in industries to replace hand labor fell on the engineering graduate. That was what the industries asked for and that is what they received.

It was generally estimated in plant construction that \$2500 might be spent on a machine to eliminate one man in the operation of the unit. The engineers gladly went about creating more machines because that was their job and what they were most fitted for.

Now it begins to look as if our pets were turning to bite the hand that created them. Engineers built machines because the industries wanted them to eliminate hard labor. The machines did that with a vengeance and now it looks like something had also eliminated the demand for technically trained men.

However, it would be decidedly unjust to put all the blame of the present situation upon machines. The present depression will undoubtedly end in time as all previous depressions have in another period of inflation. Then there will be a demand for the machines and

their creators.

There is, however, one thought that should give us pause. Society is still far behind the rapid advancement of science and mechanical achievement. So far there has been no sufficient adjustment of our social structure to take care of the decreased demand for common labor. Until that takes place the engineer and technical man must suffer with the common laborer.

There must indeed be something wrong when the whole world constantly cries overproduction and yet the people go hungry. Who can blame that on the creators of machines? They did only what was asked of them and yet they must suffer for it. The social and economic structure is outside the realm of engineering and becomes some one else's problem. The only thing we can do is wait and hope that those who do understand the situation can do as much about it as has been done in the realm of science in the past two decades.

—MSM—

Thru The Transit

With streams and streams of people pouring (guess what) toward the gymnasium and with everyone in school there the St. Pat Board Dance for the hoi poloi, or what have you, began with a rush. In fact the whole thing seemed to be one big rush. It was all we could do to get away from a girl after being cut without the gentlemen standing about asking such elegant questions as "Who's the jane?" or "Where did she come from?", etc., far, far into the struggle. And did you attempt to dance more than two steps with any one girl. Tsk! Tsk! We got to take three once with one girl and were so surprised that we didn't even notice that we were standing on her foot until she very casually mentioned it.

We are getting to be strangers around here, what with all of the high school kids that were scattered about over the week-end. And every unattached Miner seemed to be hanging around in front of Parker Hall last Friday night.

The war clouds that loomed on the horizon last week seem to have blown over or else they are waiting for sufficient scandal before breaking. And to think that anyone would do such a thing to this fine, clean, truthful, and excellently edited paper. (Ed's Note: Maybe I'd better raise your salary. You seem to understand me better.) Of course, all of the above ballyhoo was merely for the benefit of the editor and the gullible public who believe what they read. To really disclose the facts, this sheet may be called a tabloid. In fact, that is the height of our ambition. We have always wanted to write on a tabloid and be the man who makes the x's for the spot where the body lay.

It has been strongly suggested, nay, even insisted upon, that we begin a campaign for beer for the

college man. We believe somebody is trying to get us in trouble. It was that beer campaign that we were going to start that caused the war of the tabloids or beer versus soda or what will you. But they are throwing a parade for it in St. Louis. Why not have one here? Surely everyone can get a tin can and assume a beer thirsty expression while parading the streets of our fair city (Don't thank me for them kind words, thank the Chamber of Commerce.) Such a demonstration would be stupendous, magnificent, absolutely unexcelled.

As we were motoring hither and thither upon the main drag we encountered no end of strange things:

Three girls in blue shoes and red socks—such a delicate blending of color—Pinkley, Towse and Jurvic playing car poker for ice cream sticks—Frank Haines blocking traffic while he talks to a girl who is parked in the middle of the street—no beer—Musick roaming about the street—in search of a girl no doubt—George Hale going to the music contest at Parker Hall—cars going up and down the street—and never getting anywhere—the same cars again—a most beautiful blue car—reputed to belong to Stinky Davis—All the C. E.'s that were taking senior courses loafing on the corners now—Prof. Dean with his umbrella and a red book—rumors that the new Rollamo is to be out this week—it is a swell looking book—and contains an excellent dedication—rain, rain—and then a quick change to sunshine.

After playing about the course on the wrong fairways, we have thought of a swell idea for those who play golf like Squint and Axe. Why not have two courses. Make a course for the dubs with the rough on a direct line between the tee and green and put the fairways off to the sides. In this way we could always stay on the fairway.

The only reason rough is put on a course is so that some of us will have some place to play and so that the so-called guns can brag about never being there!

Thayer Wins High School Track Meet

Jackling Field was the scene of a most exciting track meet last Saturday—it was the South Central Missouri High School Meet. Not many meets are as closely contested as this one was. When the tumult and the shouting died and the figures were totaled, Thayer High emerged victor by a nose. This was Thayer's first appearance this year on the local track, but what an appearance! The totals for the leaders:

Thayer, 23
Rolla, 22½
Salem, 18
Newburg, 18
Eminence, 17½
St. James, 17½

Union, Sullivan, Steelville, and Pacific ranged in the order named after the leaders.

One meet record, in the 100 yard dash, was equalled; the performance was by Jimmy McGregor, popular Rolla star, and a nifty track man. Time: 10.4 seconds. But five other records were broken; in the 880 yard run, by Adams of Thayer, time 2 minutes, 7.8 seconds; in the 440 yard dash, by Jeffries of Salem, time 53.6 seconds; in the high jump, by Brown of Union, with a leap of 5 ft. 10½ inches (not bad); in the 880 yard relay, by the Newburg team with a time of one minute, 38 seconds; and in the 880 yard medley relay by the Sullivan team in 1 minute, 46.2 seconds.

Saturday was a grand day to hold a track meet, and the performances turned in added to make the occasion one to be remembered. Let's hope that some of the boys come to M. S. M. to strut their stuff in future years.

Wednesday of this week is to be the day for more high school contests in S. C. M. competition. Baseball teams have been entered by Rolla, St. James, Newburg, Steelville, Salem and Cuba. Tennis

teams from Rolla, St. James, Salem, and Eldon are also to compete.

Don't forget that the Miners have a dual meet this Friday afternoon with Drury, here at Jackling Field. Everybody out to watch the Miners in their first home meet of the year! Our own track team is nothing to be sneezed at.

—MSM—

W. H. Comins Addresses Local A. I. M. M. E.

Last Thursday evening, through the efforts of L. A. Hibbets, the members of A. I. M. M. E. were privileged to hear Mr. W. H. Comins, who made a short but very interesting talk on "Safety in Mines."

Mr. Comins, who is a Mining Engineer from M. I. T., has been an active leader in the fight for accident prevention and is now local manager for the St. Francois Plant of the St. Louis Smelting and Refining Works. Prof. Forbes and Mr. Beuhler also added a few comments illustrative of their own

experiences along safety lines.

This was the final meeting of the institute for the present year, bringing to a close a most successful year under the leadership of President Jim Richardson.

"ELECTRIC BULLETS"

THE result of exhaustive wind-tunnel tests of conventional trolley car models revealed that at speeds of 70 and 80 miles per hour, 70 per cent of the total power was consumed in overcoming air resistance. Streamlining saves approximately 20 per cent of the power.

When the Philadelphia and Western Railway Company decided to replace its cars with faster and more efficient equipment, it chose "electric bullets"—new streamlined cars—each powered by 4 G-E 100-hp. motors. The cars, constructed of aluminum alloy, with tapered noses and tails, are much lighter in weight and capable of greater operating efficiency.

In developing transportation apparatus, college-trained General Electric engineers have conducted extensive tests to improve operating conditions. On land, on sea, and in the air, to-day's equipment is safer, swifter, more dependable, and more comfortable.

MINERS LOOSE FAST MEET TO TEACHERS

The Miners went to Springfield last Wednesday afternoon and had a dual track meet with the Teachers that night. Although the Miners were a little handicapped, as it was their first night meet, they made a pretty good showing. The Springfield Teachers have a very fine track team which is very evenly balanced. The Miner relay teams did very excellent work and the mile relay team managed to set a new record.

The following is the final results of the meet:

100-yard dash: Hillhouse (S), 1st; Nickel (M), 2nd; Livingston (S), 3rd. Time: 10.4 seconds.

Mile run: Killion (S), 1st; Hen-son (S), 2nd; Brown (M), 3rd. Time: 4:35.1.

220-yard dash: Howerton (M) 1st; Hillhouse (S) 2nd; Livingston (S) 3rd. Time: 23.3.

120-yard high hurdles: Sanders (S) 1st; Calloway (S) 2nd; Wehrman (M) 3rd. Time: 16.4.

440-yard dash: Spotti (M) 1st; Knott (S) 2nd; Pfeiffer (M) 3rd. Time: 52.3.

2-mile run: Killion (S) 1st; Davis (S) 2nd; Brown (M) 3rd. Time: 10:33.

220-yard low hurdles: Calloway (S) 1st; Coghill (M) 2nd; Sanders (S) 3rd. Time: 27.

880-yard run: Killion (S) 1st; and Monroe (M) tie; Irwin, 3rd. Time: 2:1.3.

Half-mile relay: M. S. M. 1st. Time: 1:33.4.

Mile relay: M. S. M. 1st. Time: 3:33.6.

Pole vault: Newton (S) and Maze (S) tie; Neal (M) 3rd. Height: 10' 7".

High jump: Adams (S) and Sanders (S) tie; Weigle (M) 3rd. Height: 5' 8".

Javelin: Maze (S) 1st; Parker (S) 2nd; Towse (M) 3rd. Distance: 174' 4".

Shot put: Grant (S) 1st; Adams (S) 2nd; Jenkins (M) 3rd; Distance: 38' 1/2".

Discus: Maze (S) 1st; Jenkins (M) 2nd; Grant (S) 3rd. Distance: 122' 5".

Broad jump: Calloway (S) 1st; Miller (M) 2nd; Adams (S) 3rd. Distance: 19' 6 1/2".

The total score for each team was Miners 47, Springfield 89.

The Miners meet Drury here Friday, May 6 and the meet promises to be a very interesting one.

OUR CAMPUS

In the hurry and worry of trying to amass enough grade points to keep in good standing, the majority of us take our campus only as a matter of course. Its just there and makes a good place to set the buildings and that's about all its good for. That's all very well when winter has taken the beauty from the shrubs and trees.

But now its spring again and surely one must be quite insensible to beauty not to feel a thrill of pride as he walks across the campus in the warm May sunshine.

The soft green stretches of freshly clipped grass, luxuriant shrubs and the patches of shade under the towering elms are restful to mind. The beds of gorgeous tulips form a veritable riot of color against the sober reds and greys of the buildings.

The best part of it all is that the campus will become more beautiful with each passing year. It is truly something to be proud of now and within the next few years should be justly famous and justly remarkable when ever college campuses are mentioned.

MSM

New York—(IP)—Student life at Columbia University has been in a turmoil since the expulsion recently of Reed Harris, militant editor of the Spectator, under graduate publication.

A majority of the students have protested the expulsion on the grounds that it is an act of overriding the rights of the students. But on the other side has been arrayed the athletes of the university who last fall were the object of somewhat bitter attacks by the editor. Several of the athletes on the football team at the time offered to "beat up" the editor, who, being pretty hefty, invited one and all to go to it. None did.

University officials, however, in-

dicated that the attacks on the football system at Columbia was one of the "Indiscretions" for which Harris was order out.

Said Herbert E. Hawkes, dean of Columbia College, who expelled Harris:

"Material published in the Columbia Spectator during the past few days is a climax to a long series of discourtesies, inuendoes and misrepresentations which have appeared in this paper during the current academic year, and calls for disciplinary action."

Several near-riots took place on the campus as one group of students decided to strike as protest against the expulsion and the athletic group attempted to break up the meetings of the protestors.

After his expulsion, without a formal hearing, Harris asserted that he had always believed

Columbia a center of liberalism, but that he was "completely disillusioned concerning the liberalism of Columbia."

grade for initiation into all of the fraternities.

Under the new officers, the council hopes to continue as successfully as it has during the past two years and to create a friendly relationship between the fraternity men and the Independents.

Ind. A Holds Lead In Intra-Mural Baseball

The Independent A baseball team, though idle last week, continue to hold their lead in the intramural baseball league. The Prospectors are still winning and continue to hold the second position. The results of games played last are as follows:

The Merciers won from the Kappa Sigma team, 7 to 4. Batteries—Merciers: Etzkorn and Murphy; Kappa Sigma: Parker and Wildberger.

The Lambda Chi team swamped the K. A.'s 22 to 3. Batteries—Lambda Chi: Watson and Burnham; Kappa Alpha: Spiers and Earle.

The Prospectors won from the Kappa Sigs 20 to 9. Batteries—Prospectors: Beardsley and Hinton; Kappa Sigma: Parker, Musick and Machmier.

The Lambda Chi team also won from the Ind. B's 8 to 5. Batteries—Lambda Chi: Fort and Macke; Ind. B: Stanton and Oestrick.

The Sigma Nu team dropped two games last week, losing to the Ind. B's by forfeit, and to the

Merciers, 16 to 5. Batteries—Merciers: Etzkorn and Haffner; Sigma Nu: Gibson and Plummer.

The standing of the teams:

	W	L	%
Ind. A.....	6	0	1000
Prospectors.....	5	1	833
Lambda Chi.....	5	2	715
Merciers.....	5	3	625
Pi K. A.....	4	3	571
Ind. B.....	4	3	571
Triangle.....	3	4	428
Bonanza.....	2	4	333
Kappa Sigma.....	2	6	250
Sigma Nu.....	2	6	250
Kappa Alpha.....	0	6	000

A. S. M. E. Elects

New Officers

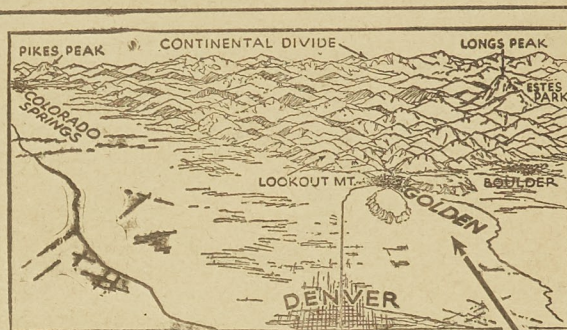

Last Wednesday night the American Society of Mechanical Engineers held a meeting and

election of officers. M. G. Handy was elected to succeed Wyrick as chairman, and Joe A. Cartledge was chosen to officiate in absence of Handy as vice-chairman. For secretary the Society chose R. Latham, and for treasurer, Decker.

Various plans were brought up and discussed for the coming semester next fall.

DO YOU INHALE?

Why is this
vital question so much
avoided by other cigarettes?

EVER since Lucky Strike created that special process for purifying fine tobacco and told the full facts about cigarette smoking—the industry has been in an uproar. For Lucky Strike has dared to mention things that were considered "taboo" in the cigarette trade.

You may have noticed a striking avoidance generally of the word "inhale" in cigarette advertising. Why? Goodness only knows! For everybody inhales—knowingly or unknowingly! Every smoker breathes in some part of the smoke he or she draws out of a cigarette.

That's why it's all-important to be certain that your cigarette smoke is pure and clean—to be sure you don't *inhale* certain impurities.

Do you inhale? Lucky Strike *has* dared to raise this vital question—for it gives you the protection you want... because certain impurities concealed in even the finest, mildest tobacco leaves are removed by Luckies' famous purifying process. Luckies created that process. Only Luckies have it!
