## SENIOR COUNCIL AP- PROVES FRESHMAN RULES FOR NEXT YEAR

At the last meeting of the Senior Council the rules and regulations for Freshmen next year were approved. There were no drastic changes from the rules that have been in for the last few years. They are as follows:

1. During Freshman Week freshmen will not be molested in any manner whatsoever.
  2. Any breach of the above rule will be liable for discipline by the Senior Council.
  3. Freshmen will spend the night of September 13 at the Phelps County Fair Grounds.
  4. Freshmen must be present at the Class Fight and Initiating ceremonies at Jackling Field; 9:00 a. m. September 14.
  5. Freshmen must purchase official caps and suspenders at September 14 and 15, and shall wear the same until notified to remove them by the Senior Council.
  6. Freshmen must carry matches for the upperclassmen at all times.
  7. Freshmen must not wear silk socks, supporters, spats, derbies, high school athletic letters, M. S. M. jewelry, or belts except to complete a full R. O. T. C. uniform.
  8. Freshmen must not wear moleskin, khaki, corduroy pants or knickers.
  10. Freshmen must keep off the grass of M. S. M. campus.
  10. Freshmen must not smoke a pipe on the campus.
  11. Freshmen must attend all mass meetings.
  12. The Freshman Class must give a free dance at some time during the first semester.
  13. These rules are to be enforced by the class of '35.
  14. Freshmen must button to all faculty members and seniors.
- CLASS DAY—**  
9:00 a. m., class fight at Jackling Field, followed by parade and bath in Frisco pond.

## Tennis Club Tournament Reaches Final Round

### COACH BROWN AND LENZ TO PLAY FOR CHAMPIONSHIP

Playing a hard driving game coupled with a tantalizing twist service, Coach Junior Brown defeated Mertz in the semi-final round of the M. S. M. Tennis Club Tournament by scores of 4-6, 6-4, 6-3. He thus earned the right to

Continued on page four

## Prospectors Entertain With Spring Formal

On Saturday evening, May 14, 1932, the Prospector Club entertained with a Spring Formal. The dance was given just in time to enable the returning C. E. seniors to lend their august presence and it was this fact, coupled with the numerous girls imported for the occasion, which made it a pronounced success.

These last dance of the year affairs have a habit of being the best of the lot and the Prospector dance was no exception. The music was furnished by Babe Clemons and his Varsity orchestra in one of their last appearances for the year.

Lieut. and Mrs. Hardin, Prof. and Mrs. Lloyd and Mr. and Mrs. X. Smith chaperoned the dance.

MSM

## MINERS TAKE SECOND IN M.C.A.U. TRACK MEET

### WESTMINSTER TAKES FIRST PLACE BY GOOD MARGIN

The Miners scored 30½ points to place second in the Missouri College Athletic Union track and field meet held at Columbia, May 13. The meet was won by Westminster College, this being their seventh consecutive victory in the meet. They scored 51 points and exhibited a well balanced team, winning seven of the sixteen events and scoring in five others.

William Jewell, with 26, was third, and the other teams scored as follows: Culver-Stockton, 17; Drury, 16½; Missouri Valley, 14; Tarkio, 12; Central College, 9.

The Miners scored in nine events, winning three of them. The most sensational race of the day was the half mile run in which Irwin of the Miners set a new conference record of 1:59. Jenkins won the discus with a throw of 125 ft. 9¼ inches, defeating Ray of Drury who won in the meet here two weeks ago. The Miner mile relay team won their event by a large margin. The team was composed of Coghill, Pfeiffer, Irwin and Monroe.

Three new records were set in the meet. They were: 880-yard run: Irwin, Missouri School of Mines, 1 min. 59 sec. Former record held by Monroe of the Missouri School of Mines, 1 min. 59.3 sec.

Javelin throw: Dunkin, Westminster, 189 ft. 10¼ in. Former record held by Van Winkle, Missouri Valley, 183 ft. 11 in.

Half-mile relay: Westminster

## Mercier Club Holds Spring Formal

The Mercier Club gave their last dance of the season, Saturday night, May 14, 1932. The Merciers have always thrown good dances and this was not a discredit to their record.

This dance was a spring formal—the very popular dance of the season—and every one that attended had a delightful time. The hospitality the Merciers always show their guests added greatly to the dance, and all present were very sorry when the orchestra played "Home Sweet Home" for it meant the end of a very enjoyable evening.

The Rhythm Kings, under the direction of Hack Hackman, from Jefferson City, took care of the music in a very capable manner.

Dr. and Mrs. Zoellner, Prof. and Mrs. Dodd, and Mr. and Mrs. A. J. Paul chaperoned the party.

MSM

## INDEPENDENT A'S WIN INTRAMURAL BASEBALL CHAMPIONSHIP

### UNDEFEATED IN PLAY, LOSE ONE GAME BY FORFEIT

First place in the intramural baseball league goes to the strong Ind. A team, thus adding to their string of victories in intramural sports this year. They lost only one game, and that by forfeit, last week. Second place in the league goes to the Lambda Chi team, which had eight wins and two losses.

Final standing of the teams:

	W	L	%
Ind. A.....	8	1	889
Lambda Chi.....	8	2	800
Prospectors.....	7	3	700
Ind. B.....	6	3	667
Merciers.....	6	4	600
Pi K. A.....	5	5	500
Bonanza.....	4	6	400
Sigma Nu.....	3	6	333
Triangle.....	3	7	300
Kappa Sigma.....	2	7	222
Kappa Alpha.....	0	8	000

## Miner Tennis Squad Loses In First Round of Con- ference Tournament

Playing under the handicap of poor physical condition, Bill Lenz, singles representative of M. S. M., lost a hard-fought three-set battle to McCorkle of Central College in the semi-final round of the M. C. A. U. tournament by scores of 3-6, 6-1.

## BACCALAUREATE SERV- ICES WELL ATTENDED

### RT. REV. WILLIAM SCARLETT DELIVERS FINE ADDRESS

Did you ever look up the word "baccalaureate" in the dictionary? Webster applies it to mean "bachelor of arts", and the baccalaureate sermon naturally means the address given the men who are about to receive degrees. Maybe "baccalaureate" is a misnomer in the case of M. S. M., but the services held Sunday morning at Parker Hall were none the less impressive.

All the churches of Rolla united in this annual occasion, which should remain a long time in the memories of this year's graduating class. The Right Reverend William Scarlett, Bishop Coadjutor of Missouri, (Episcopal), delivered an eloquent and inspiring sermon—not on the religious problems of engineers, or anything of the sort, but on the position of man in the general situation of the world today.

Can each one of us rush for an exit when fire breaks out in a crowded building? That wouldn't help very much; neither would there be any use in everybody's sitting down and waiting for the others to move. Thus it is with the world—it is not through sheer individualism nor through foolish self-sacrifice that world problems are to be solved—intelligent use of the faculties with which man was endowed by the Creator will go farthest toward breaking up wars and depressions \* \* \* \* "Misery leads to Communism, and War bring misery on a titanic scale."

Those are but two of the thoughts suggested by Bishop Scarlett. His sermon was interesting, and it was an eloquent appeal to the future heads of industry to use their heads in keeping the world on an even keel.

The invocation and benediction were by Rev. O. V. Jackson, of the local Episcopal church. Music appropriate to the occasion was rendered by Mrs. E. A. Stephenson at the piano and a quartette composed of Messrs. Cullison, Bury, Achuff and Brauetigam.

The seniors were in Academic costume (caps and gowns) during the services, and occupied the center section of the auditorium, while members of the faculty sat in the outer sections.

### Thru The Transit

It is this time of the year that we dread to see approach. It means leaving the dear old Alma Mater for a whole summer. And as we get farther away from Rolla, we will be able to remember the familiar scenes. Rolla—that beautiful little hamlet nestled in the rolling foothills of the Ozarks—its many beautiful girls—the wide, spacious, smoothly-paved, tree-lined avenues on which are all of the beautiful homes—the numerous and divers ways of amusing ones self—and last and not least, that fellow you knew out in the hills who raised—oh, well, he raised something.

And then for those who are going home on the train and are contemplating asking the porter for ice, we suggest that the following old anecdote be carefully considered:

"Porter, fifty cents for another pitcher if ice water."

"Sorry, suh, but effen ah takes any mo' ice, that corpse in the baggage car ain't gonta' keep."

An then we should offer a toast to Lady Godiva, the greatest gambler of all time—she put all she had on a horse.

The latest fashions in women's clothes are rather silly looking, especially the shoes with all the string tied about the ankle. But the only fashion most women know is to look the hottest and feel the coolest.

And dear old C. E.'s have again returned to grace our fair campus and lend their dignity at the graduation exercises. We greatly regret that due to a law having something to do with censors, we are unable to retell the tales of their adventures as they were related to us. However, one of them was kind enough to write us encouragement on our beer campaign. He stated that he didn't care whether it succeeded or not as he was graduating and anyhow, being as he was in Milwaukee at the time, the beer was plentiful. Now that's a pal for you. Imagine a guy describing the swell time he's having drinking beer and then not bringing back a sample.

Does your beer burp? At last we have dared to raise the question that beer companies have been dodging for years. Only the burp-

less bottle company would dare broach such a question. And the bottle is really a thing of infinite beauty. It comes in sizes to suit every capacity, from 10 cc. size to fifty gallon size. The larger ones are so heavy that they must be shipped by boat but you usually get them eventually.

These lovely containers are absolutely guaranteed to remove all the burps from your beer. In fact they remove the yeast too. How this is done is, of course, kept secret. So secret, that even we do not know.

And to appeal to the feminine purchasers they come wrapped in cellophane and in all shades—chartreuse, mauve, puce, or burnt ember. The lovely bottle is good for at least 2,974,638,253 drinks. Of course it has to be filled up every so often. We are unable to give more definite figures on the length of its lifetime due to the fact that so far we have only tried it that many times.

This container is designed for use anyplace. It is as much at home in the gutter as in the drawing room. The beautiful object is lined with gold, outside plate of platinum, and studded with pearls, diamonds and rubies. Imagine such a picture. We dare you to. Just imagine the sun rays flashing about fantastically from such highly polished surfaces as can be procured with this bottle.

Of course the beautiful construction makes the price slightly higher and thereby places it out of reach of the hoi polloi. It is truly swanky.

And we might mention that this necessity for your home can be secured at the ridiculously low price of one dollar down and a hundred a week for the rest of your life. All features are designed and patented by the firm of Burp and Zilch, sole owners and distributors of the darn thing.

MSM

### AND DO YOU KNOW—

That ninety-five per cent of all the civills that graduate get jobs? For more accurate figures we refer you to Maehl, who used to be an E. E.

That it is rumored that several of the seniors will be married by this time next week? Guess who?

That Hahn likes berets and that Al Parker likes farming?

That there has been rumors of a depression?

That the editor of this sheet is a big bum and if he wasn't looking over my shoulder I'd tell him so?

And the colleges have devised a new way of conjugating the verb drunk. They have changed it

to dring, drank, drunk, expelled.

And Joe Campus says that if all the co-eds who don't neck were gathered together in one room, what would we do with her?

And now as a special concession to the E. E.'s we print their advice:

If your girl won't talk.....Exciter  
If she gets excited.....Controller  
If she goes up in the air.....Condenser  
If she gossips.....Regulator  
If she can't cook.....Discharger  
If she comes half way.....Meter  
If she wants to go further.....Conductor

If she gets too hot.....Insulator  
If she is contrary.....Transformer  
If she is wrong.....Rectifier

An then she was only a rich man's daughter, but what the hell more could you want?

And they all laughed when I said I could tell a joke. But they threv me out when I told it.

And when ye Ed saw the above he immediately says "terrible."

(Ed. Note: I did not say "terrible." I said "lousy" in no uncertain terms).

MSM

Pittsburgh, Pa.—(IP)—While it seems entirely possible that the population of the State of Kentucky may be doubled after June 1 by the influx of colleges students from everywhere intent on finding out what the mine strike is all about, at least one college president thinks that mining conditions in Kentucky are none of the students' business.

He is Chancellor John G. Bowman of the University of Pittsburgh—a university which many charge is no place for liberals—who said that any group of students leaving for the scene of the strike from his university were going entirely without his sanction. Said he:

"I do not think it is the concern of the students how the mines are operated. The university is not officially interested and will not sanction such a movement as this."

However, Helen Heick, a Pitt member of the national committee of the National Student Movement, started some weeks ago at the University of Chicago, announced last week that several Pitt men and women would join the protest caravan as soon as college lets out in June.

## Miner Tennis Squad Loses In First Round of Conference Tournament

Continued from page one.

6-4. Lenz won the first set handily, but due to physical exhaustion was unable to keep up the pace. McCorkle later carried the defending champion, Stevenson of Tarkio, to three sets in the final round. Lenz drew a bye in the first round.

Lenz and Schuhmann, representatives of M. S. M. in doubles, had the misfortune of facing the defending doubles champions in the first round. However, they lost only after a hard fight, the Tarkio players winning by scores of 10-8, 6-3. The Tarkio doubles team have been champions for the past two years, last year defeating Lenz and Thiemann of M. S. M. in the final round. However, this year they lost to McCorkle and Hackley of Central, 4-6, 7-5, 6-2.

This was the last meet of the year for the Miners, and while they won only one meet this year out of three played, the members of the team are to be congratulated on their fine showing against such stiff competition. With three of this year's team back next year (Lenz, Schuhmann and Mertz) it looks like a season of victories next year.

—MSM—

## A New Idea In Aeronautics

The other day we had a visit from a man who is promoting a company that plans to furnish a new form of air transport between New York and the Pacific coast. He says that for east bound passengers the saving of time by his plan puts the present service out of the running, and that he can make a substantial saving on trips in the other direction. His name is James W. Bowersox.

Mr. Bowersox uses a modification of the autogyro, which, in

recognition of the pioneering essays of the helicopter, he calls the heliogyro. The passengers for New York enter the heliogyro at the airport at San Francisco, it ascends vertically to a great height, at which it is expected that the machine will remain, like the old helicopter, suspended in air. Meanwhile the earth, rotating beneath him at the rate of 1,000 miles per hour, brings the longitude of New York directly under the plane in a trifle under three hours, and a few minutes journey along the meridian puts the machine right over Roosevelt Field.

There is no service making the transcontinental trip in anything like three hours. No plane could

safely travel that fast, but by utilizing the rotation of the earth Mr. Bowersox is tapping a source of what practically amounts to energy not heretofore resorted to.

Of course the journey from New York cannot be made so quickly, as the earth is running away from the machine instead of approaching it. Travellers going

### Tennis Club Tournament Reaches Final Round

Continued from page one.

play Lenz in the finals for the title. Lenz reached the final round by defeating Lieut. Hardin in the semi-finals, 6-1, 6-1. Lenz played his usual steady game. The finals will be played off sometime this week, with Lenz the favorite to win the title. Play in doubles will also be completed this week, with the team of Lenz and Mertz the favorites. This has been the first tournament sponsored by the M. S. M. Tennis Club, and has been very successful in view of the enthusiasm shown. The Tennis Club has just been organized this year, and has made remarkable progress toward the development of tennis at M. S. M. Under the able guidance of Lieut. Hardin, they have constructed two fine courts in front of Parker Hall, and have successfully petitioned the student body for recognition of tennis team members, so that they may be provided with letters for their efforts. These things were made

possible by the enthusiastic interest of the club members and the unselfish cooperation of Lieut. Hardin. If this enthusiasm continues, M. S. M. is certain to be represented by good tennis teams for years to come.

and Mr. Bowersox tells us that the engineers are working on these and expect to surmount them before the last payment on the stock subscription falls due. One is that the machine could not be raised to a height where it would be beyond the influence of the earth's rotation. This is declared to be in what in thoughtful discussions is called the last analysis nothing but a question of available power. Mr. Bowersox points out that for no machine yet worked has there been such an enormous amount of power available, and none at so little cost. In descending from the great height to be attained, the machine, on returning within the gravitational field, will attain a terrific velocity, which will be used to store up power for the next upward trip, much as an automobile while running generates electric power for its own batteries.

The difficulty is in procuring power for the first ascent. After that everything is automatic, but for the first trip the power cost will admittedly be enormous. This, however, is a mere detail.

The second difficulty is that after the heliogyro has got so high that it is no longer affected by the earth's rotation it can't get back, for it will be too high for gravitation to pull it down. To this Mr. Bowersox replies that the machine will drive itself down under its own power for the first few thousand feet, coming gradually under the influence of the attraction of gravitation.

How will the passengers live and be able to breathe at such a vast altitude? This, Mr. Bowersox tells engineers and accountants.

We have not had time to make an exhaustive investigation of Mr. Bowersox's invention, and it is only fair to our staff to say that they have not yet reported favorably on it. The idea is new, but Mr. Bowersox says we should not be prejudiced by that.—Commerce and Finance, March 23, 1932.

Miners Take Second In  
M.C.A.U. Track Meet

Continued from page one.

College (Wagner, Edmonds, Bell, Thompson), 1 min. 31 sec. Former record held by Westminster, 1 min. 31.4 sec.

## Summaries:

100-yard dash: Won by Robb, Drury; Browning, Tarkio, 2nd; Nickels, Rolla, 3rd; Thompson, Westminster, 4th. Time—10.1.

Mile run: Won by Toney, Westminster; Mertz, William Jewell, 2nd; Bullington, Central, 3rd; Stoneman, Central, 4th. Time—4:36.5.

440-yard dash: Won by Bell, Westminster; Dammell, William Jewell, 2nd; Spotti, Rolla, 3rd; Edmond, Westminster, 4th. Time—50.4.

Two-mile run: Won by Mertz, William Jewell; Buck, Culver-Stockton, 2nd; Ware, Central, 3rd; Thornton, Culver-Stockton, 4th. Time—10:08.

Pole vault: Won by Yantis, Westminster; Grant, William Jewell, 2nd; Patterson, Westminster, 3rd; Garrison, Culver-Stockton, 4th. Height—12 feet.

880-yard run: Won by Irwin, Rolla; Monroe, Rolla, 2nd; Peverstorf, Westminster, 3rd; Page, William Jewell, 4th. Time—1:59 (new conference record).

Shot-up: Won by Morrow, Westminster; Hollis, Culver-Stockton, 2nd; Sharp, Westminster, 3rd; Tracy, William Jewell, 4th. Distance—41 feet, 10 inches.

120-yard high hurdles: Won by Steele, Missouri Valley; Acker, Drury, 2nd; Moore, Culver-Stockton, 3rd; Grant, William Jewell, 4th. Time—16.

Discus throw—Won by Jenkins, Rolla; Ray, Drury, second; Goodson, Missouri Valley, 3rd; Nichols, Missouri Valley, 4th. Distance—25 feet, 9 1/4 inches.

220-yard low hurdles—Won by Thompson, Westminster; Steele, Missouri Valley, 2nd; Dunkin, Westminster, 3rd; Grant, William Jewell, 4th. Time—25.6.

Mile relay: Won by Rolla (Coghill, Pfeiffer, Irwin, Monroe); Westminster, 2nd; William Jewell, 3rd; Culver-Stockton, 4th. Time—3:27.6.

High jump: Won by Maul, William Jewell; Garrison, Culver-Stockton, 2nd; Jones, Westminster, 3rd; Jenkins, Rolla, and Golden, Drury, tied for 4th. Height—5 ft. 9 inches.

Javelin throw: Won by Dunkin, Westminster; Chiles, Central, 2nd; Towse, Rolla, 3rd; Billings, William Jewell, 4th. Distance—189 feet 10 1/4 inches. (New conference record.)

Broad jump: Won by Browning, Tarkio; Daugherty, Missouri Valley, 2nd; Garrison, Culver-Stockton, 3rd; Perry, Westminster, 4th. Distance—21 feet, 5 inches.

880-yard relay: Won by Westminster (Wagner, Edmonds, Bell, Thompson); Rolla, 2nd; Tarkio, 3rd; Central, 4th. Time—1:31.

220-yard dash: on by Robb, Drury; Howerton, Rolla, 2nd; Browning, Tarkio, 3rd; Winn, Culver-Stockton, 4th. Time—21.8.

—MSM—

## AT THE THEATRE

Continued from page four

and her latest, Emma, is her best. The picture should appeal to the entire family. The story was made perfectly for Marie and she carries it perfectly.

## UNEXPECTED FATHER

Imagine Slim Summerville and Zasu Pitts co-starring in any picture and you have the basis of their latest picture, "Unexpected Father." Imagine Slim Summerville all dressed up as an oil financier. Slim runs down a small orphan and adopts her temporarily. Zasu is en-

gaged as the nurse and takes a liking to Slim and the child. What chance did Slim's beautiful fiancée have?

## BEAUTY AND THE BOSS

Marian Marsh, the youngest and one of the most beautiful leading ladies on the screen, co-stars with Warren William in a very modern picture, "Beauty and the Boss." It is a treat to watch Marion change from an attractive secretary to a beautiful maiden in her efforts to catch the eye of the man of her desires, who happens to be Warren Williams. How could she fail. She didn't.

## FORBIDDEN

No stone was left unturned in an effort to make Barbara Stanwyck's latest picture a truly great production. Her work with Adolphe Menjou is exceptionally brilliant. She performs as only Barbara knows how to. The perfect loving pair furnish entertainment such as can be seen only upon occasions. Another case of a deep love which leads the lady

astray. Barbara shows splendidly the thoughts and doings of a lady who truly loves her man.

Engineering Summer  
School of the Rockies

Students of Engineering who wish to make up work or secure additional credit during the summer are offered an unusual opportunity to combine work and recreation in Golden, the Gateway of the Rockies.

July 11 to August 26, 1932

For detailed announcement of courses, write to the Registrar for Bulletin S-2.

Colorado School of Mines  
Golden, Colorado

## THE ENGINEER

If you want a receipt for that quite egotistical Person that's known as the great engineer  
Take lots of data that's seemingly mystical—  
Throw it at someone apparently queer:

A whole flock of integrals, sine curves and alpha-rays,  
Symbols which look like some primitive script;  
Formulas giving the speed of beta rays—  
See that you have him completely equipped.

Sky-scraper, steam engine, turbine, and factory—  
Fill him with facts that are deadly and dull.

Expects him to know about salts and hydrolysis,  
Thermodynamical laws, electrolysis—

See if he catches the drift of petrography,  
Show him the mysteries of metallography;  
What if he balks and displays his preciosity?  
Tell him that light has an awful velocity!

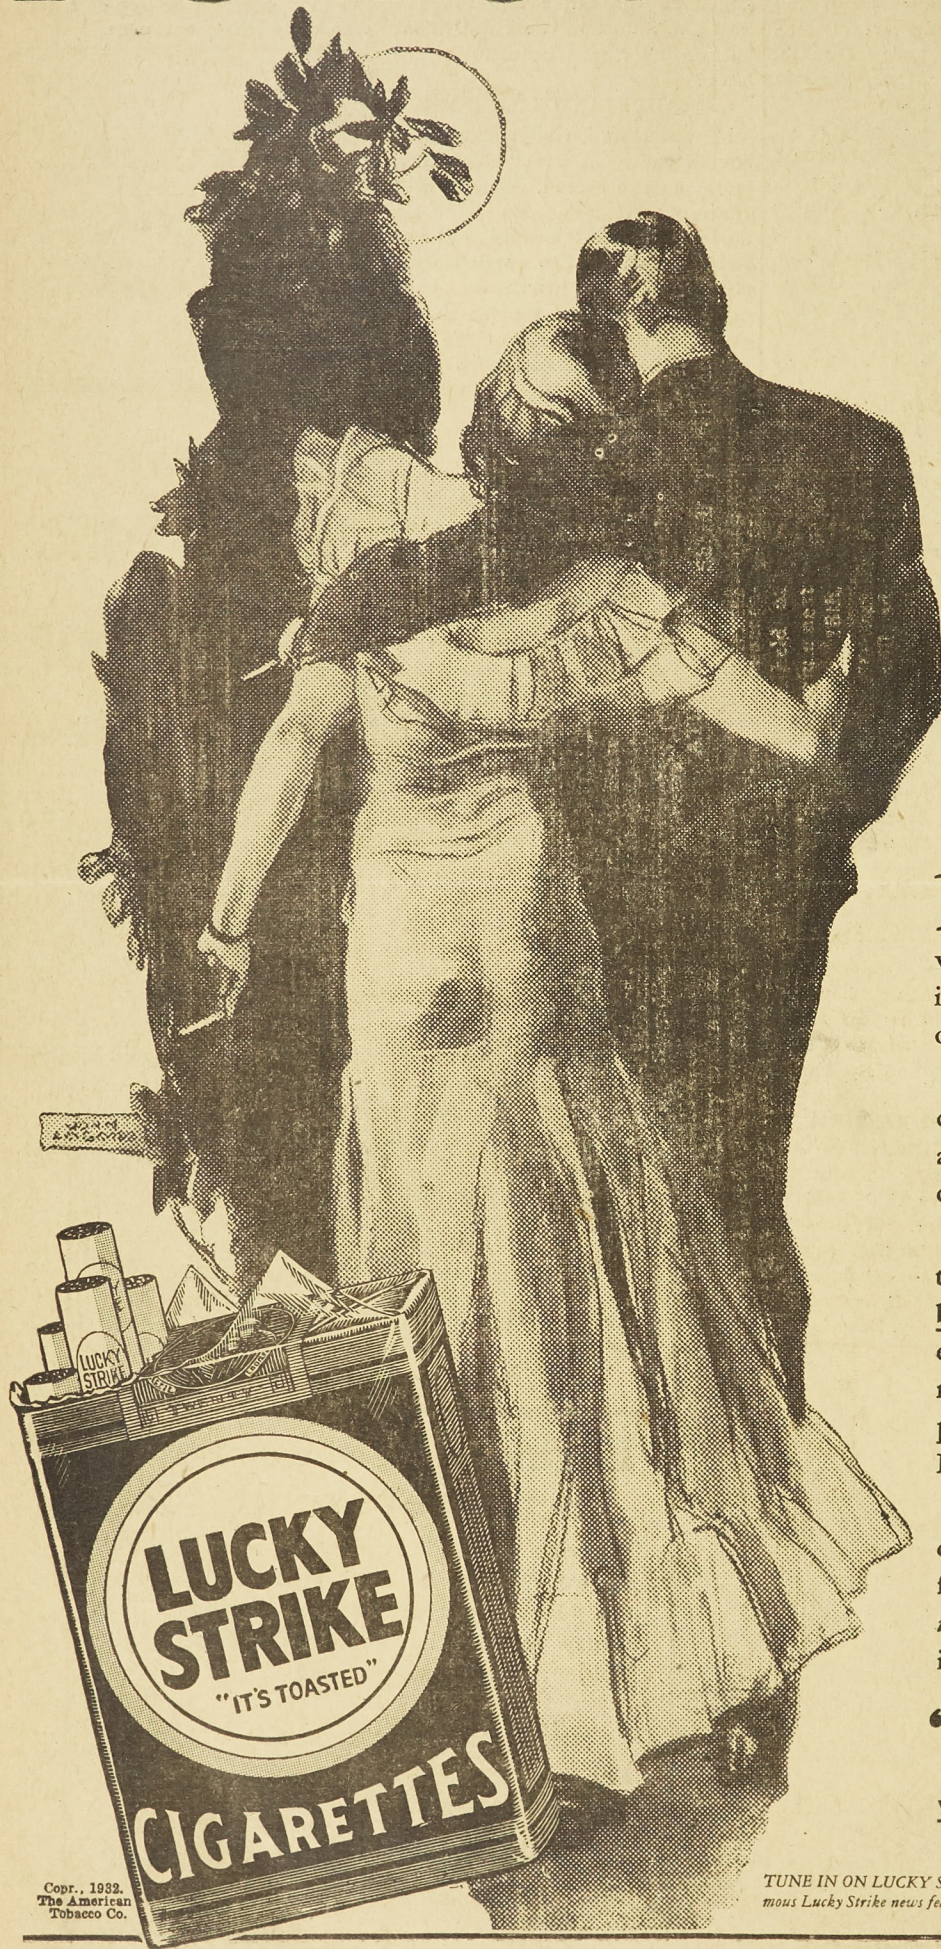

Take of these elements all that are suitable,  
Put each in its own little niche;

Then you will have (this is quite irrefutable)  
A man who could probably dig a good ditch.

—M. I. T. Voo Doo.

# DO YOU INHALE?

Certainly . . .

7 out of 10 smokers inhale knowingly... the other 3 inhale unknowingly

**D**O you inhale? Seven out of ten smokers *know* they do. The other three inhale without realizing it. *Every* smoker breathes in some part of the smoke he or she draws out of a cigarette.

Think, then, how important it is to be certain that your cigarette smoke is pure and clean—to be sure you don't inhale certain impurities!

Do you inhale? Lucky Strike has dared to raise this much-avoided subject . . . because certain impurities concealed in even the finest, mildest tobacco leaves are removed by Luckies' famous purifying process. Luckies created that process. Only Luckies have it!

Do you inhale? More than 20,000 physicians, after Luckies had been furnished them for tests, *basing their opinions on their smoking experience*, stated that Luckies are less irritating to the throat than other cigarettes.

**"It's toasted"**

Your Throat Protection — against irritation — against cough
