NUMBER 35

R. O. A. HOLDS CONVENTION

R.O.T.C. Is Defended

Missouri Department of Reserve Officers' Association Hears Lieut.-Col. Randal and Gen. Stayton

Lieut.-Col. M. G. Randal stated to members of the Missouri Department of the Reserve Officers Association in convention at Columbia "preparedness is not much of a question at this time, but it is important to note, as an eminent historian and military man has pointed out, that not one of the six major wars in which the U. S. has fought was caused by the army. All of these were caused by economic, political and racial jealousies, but the army had to end every one of these."

Those students who are against military training are merely dupes if they believe that future wars can be avoided in any other way than by building up a powerful army and navy that can protect our trade and shipping against foreign powers. The recent appropriation of a billion dollars for the enlargement of the navy and some five hundred million dollars from PWA funds for mechanization and strengthening of the army will go far to make the U. S. impregnable against foreign attack. He severely criticized the recent vote of the faculty of the University of Missouri requesting the Board of Curators to make military training optional and give first and second year students their choice of either physical or military training.

While fourteen planes zoomed and circled overhead in a demonstration of aerial maneuvers for the reserve officers' meeting, the peace delegates at the Anti-War conference, which took place at the same time, found it necessary to cup hands to ears to hear their leaders

(See **MILITARY**, page 6)

NOTICE

School of Mines Students who expect to enter Summer School should report to this office, Room 303 Norwood Hall, at once the courses they wish to take so that an attempt may be made to adjust conflicts.

J. W. BARLEY
Director in Charge

O. C. ('Jack') Garst Elected to Sigma Xi

O. C. Garst, '33, received notice Monday morning that he had been elected to Sigma Xi, national honorary graduate research fraternity.

"Jack" will go to Columbia Friday to attend the initiation ceremonies which will be held in the Tiger Hotel there. Only ten initiates were selected from Missouri U. and the School of Mines this year.

J. I. Moore, B. S., '32, and M. S., '33, was also elected to this high honor. The Miner congratulates both of these men upon their new honor.

Dr. Thomas to Be Sigma Xi Speaker

Dr. Lewis F. Thomas of the Department of Geology and Geography of Washington University, will be the Sigma Xi speaker this year. The address is to be delivered in the Chemistry Lecture room at the School of Mines at 8 p. m. His topic will be "The Geographic Evolution of Missouri."

Dr. Thomas is an outstanding speaker, and has made an extensive study of the geography of Missouri, especially as it affects trade and industry. His lecture, to which the public is invited, should be of interest to many people of Rolla.

DR. ARGOW SPEAKS HERE

Strikes New Note

Pastor of May Memorial Church of Syracuse, New York, Gives Baccalaureate Address Sunday

Dr. W. Waldemar W. Argow, pastor of the May Memorial Church of Syracuse, N. Y., and baccalaureate speaker for the commencement program, struck a new note in his address to the graduates, faculty and guests of the School of Mines last Sunday morning. The title of Dr. Argow's address was "Knights of the New Crusade," and his theme dealt with the new era of the crusading spirit that awaits the graduate of today.

We are again face to face with the necessity for the heroic, sacrificing, pioneer spirit which characterized the early generations of Americans, Dr. Argow said. Also, we are at the dawn of a new social era which shall require the utmost of each man who, today, is trained or is being trained to cope with the problems of the era.

Dr. Argow stated that the crisis of the day was not entirely a crisis of economics, of politics, of industrial management, but rather it is a crisis of character. This problem, which the speaker stated has been brought about by education, must now be solved and solved quickly by the assumption of a new hypothesis—that man is an end in himself and not a means to an end. Each man, each individual, has a place to fill, he knows that he has certain inalienable rights; and he has certain responsibilities which, in this civilization, make him more than a mere cog in the wheels of the complex machinery of life.

Shaking the old theory that man trained in his duty should not do

(See **BACCALAUREATE**, page 6)

R. O. T. C. Battalion Is Rated 'Excellent'

The results of the annual inspection of the R. O. T. C. unit of the School of Mines has been announced by the War Department.

The rating was again "excellent" and the unit was commended for discipline and interest taken in the work.

THE CURRENT SITUATION

TO THE MINER:

The editor of the Miner has asked me for an opinion as to the prospects for the engineer in the immediate and more distant future.

As to the immediate future, I give you the following figures as to the placement of the 1934 (the present graduating) class.

Curricula	No. in Class	Placed	Per cent
Miners	16	8	50
Metallurgists	10	3	30
Civils	24	12	50
Mechanicals	17	2	12
Electricals	9	4	44
Ceramists	4	2	50
Chemists	19	12	63
Science	3	1	33
TOTALS	102	44	43

The information as to the Mechanicals is not yet complete as they are now on their Senior Trip and have not returned.

It can be further stated that many of those who have not yet been placed are now negotiating for jobs and a goodly proportion have excellent prospects of obtaining one. The Civil Engineers in the class are listed on twelve Civil Service rosters, ranging from Galveston, Texas, to Jacksonville, Florida, and from Detroit, Michigan, to Glasgow, Montana. All of the chemists not yet definitely placed are working on what appear to be live applications. There are still foreign jobs available for miners.

Many of the other departments not specifically mentioned are conducting negotiations that give promise of jobs. All heads of departments and the Registrar's office have been active and busy in the effort to place the graduates.

It is interesting to note that the School of Mines in this respect has a more superior organization for effective work than many other engineering schools.

In "Mining and Metallurgy," the official publication of the American Institute of Mining Engineers, for May, 1934, is an article entitled "Are Too Many Students Taking Mining Courses?" by Professor William B. Plank of Lafayette College. In this very complete, analytical article Professor

Plank comes to the conclusion that it is reasonable to predict that there will be a greatly increased demand for engineers and that the demand may exceed the supply, as already 80 per cent of last year's mineral industry graduates are now employed. The mineral industry in many of its branches has shown a very decided upward trend. With the great public works program of the United States now getting under way there will be an increased demand for men with engineering and technical training.

It must be remembered that during the depression all professions and occupations were hard hit by non-employment. The statement frequently made that there was an over abundance of engineers and technically trained men is certainly true, but the same statement is also true of every other profession. Just how to plan for the proper balance between demand and supply does not yet seem to have been solved. I think it is true that the profession of engineering and that of the technologist will be an increasing and rising profession, both in importance and in numbers. Indications point to a recovery of enrollment in the engineering and technical schools. There is no instrumentality operating in the engineering schools of the country at this time which would control the relationship between engineering students and the demands of industry for men. Until such a scheme can be worked out, and I personally doubt its feasibility, it is not possible to predict the prospects for the engineer of the future, especially for the individual, except to say that engineering is an expanding profession, increasing in the public estimation in honor and importance, and that the chances for a useful and successful career in it will increase with time.

Signed: CHARLES H. FULTON,
Director, Missouri School of Mines and Metallurgy

Miner Tracksters Take Third Place

TARKIO WINS

Miners Win Four Events in
M. C. A. U. Meet; Finish
in Tie with Central College
Team

The Miners finished in a tie for third place in the Missouri College Athletic Union track meet held at Marshall last Saturday. Tarkio won the meet with a total of 41 points; Westminster was next with 38 points; the Miners and Central

finished in a tie for third with 31½ points each, followed by Missouri Valley with 11 points, William Jewell with 9 points, Drury with 3 points. Culver-Stockton was not represented.

The Miners placed first in four events. Lange won the high jump with a leap of six feet. The relay team, composed of McGregor, Hubbard, Nickel and Howerton, won the half-mile relay. Towse won the javelin throw with a heave of 180 feet. Irwin came back to form to win the half mile in the good time of 2:02. Howerton and McGregor finished third and fourth, respectively, in the century, while McGregor finished second in the furlong.

Kruse ran third in the high hurdles and came back to tie for second in the high jump. Hall got a fourth in the 2-mile run and the mile relay team finished fourth in that event.

One conference record was broken

en when Henn, Tarkio, threw the discus 135' 6" to surpass the old mark of 133' 3¼", set by McAnelly, Westminster, in 1929.

THE SUMMARIES

100-yard Dash: Edmonds (W) 1st; Chrane (WJ) 2nd; Howerton (M) 3rd; McGregor (M) 4th. Time 10.00.

440-yard Dash: Edmonds (W) 1st; Jackson (C) 2nd; Wilson (C) 3rd; Sullison (T) 4th. Time 50.5.

2-Mile Run: Bennett (T) 1st; Morgan (C) second; Mitchell (T) 3rd; Hall (M) 4th. Time 10:03.5.

Discus Throw: Henn (T) 1st; Ricketts (C) 2nd; Iffenbarker (T) 3rd; Carr (MV) 4th. Distance 135' 6".

Broad Jump: Avis (W) 1st; Capper (W) 2nd; Offenbacker (T) 3rd; Innes (C) 4th. Distance 21' 7¼".

Half-Mile Relay: Miners (McGregor, Hubbard, Nickel and Howerton) 1st; Central 2nd; Missouri Valley 3rd; Tarkio, 4th. (Time is unavailable).

High Jump: Lange (M) 1st; Kruse (M) and Offenbacker (T) tied for 2nd and 3rd; Bayse (WJ) 4th. Height 6' 0".

Mile Relay: Central (Bennett, McKinzie, Wilson and Yodir) 1st; Tarkio, 2nd; Miners 3rd; Missouri Valley 4th. Time 3:34.8.

120-yard High Hurdles: Leech (MV) 1st; Emmons (W) 2nd; Kruse (M) 3rd; Hurst (C) 4th. Time 16.9.

880-yard Run: Irwin (M) 1st; Yoder (C) 2nd; Jacobs (W) 3rd; Harland (MV) 4th. Time 2:02.

Hot Put: Offenbacker (T) 1st; Ricketts (C) 2nd; Henn (T) 3rd; Alyward (M) 4th. Distance 43' 7½".

220-yard Dash: Edmonds (W) 1st; McGregor (M) 2nd; Chrane (WJ) 3rd; Odell (D) 4th. Time 22.5.

Pole Vault: Patterson (W) 1st; Sutton (WJ) 2nd; Glenn (D) 3rd; Rea (MV) and Engleman tied for 4th. Height. 11' 9".

Anti-War Conference Is Held at Columbia

The second student Anti-War conference held in the Methodist Church in Columbia, Mo., last Saturday was led by the Rev. Gibson of Webster Groves, Mo. In his keynote address he pointed out that capitalism inevitably breeds war and that "peace and capitalism are absolutely contradictory terms."

Students representing six mid-western colleges and thirty-five social and religious organizations were present. Many of the out-of-town delegates hitch-hiked to Columbia and were put up in the rooms of the local students. Some of the resolutions adopted by the conference are as follows:

"The imminent war danger is the inevitable result of the social and economic discontents and contradictions which exist because of the very nature of imperialistic capitalism. The ownership of the means of production by a very small minority of the population, and their consequent domination of the government leads to an exploitation of the masses at home and the spreading of this exploitation to the colonies. The imperialistic powers compete for the world markets and the sources of raw materials, constantly seeking to engulf more territory and more population.

"Fascism comes at a time when the rising discontent of the masses drives the rulers to tighten their holds on the means of production. It increases the maladjustments and contradictions of capitalism and, resorting to an emphasis on militarism, results in lowered living standards, the destruction of culture and the formation of national

(See ANTI-WAR, page 6)

Marie Mitchell to Wed G. A. Sellers

G. A. Sellers, '34, and Marie Mitchell, Rolla, will be married on Saturday afternoon at the home of the Rev. E. P. Gabriel, of the Christian Church of Rolla.

George has obtained a short-time position with the County Farm Agent's office where Miss Mitchell is employed, and the couple plan to remain in Rolla for some time.

Arrangements Made for Lectures Series

The General Lectures Committee met last Friday to outline a policy of selection for the program next year. Several numbers were definitely chosen, but the bulk of the program will be filled out during the summer.

The R. O. T. C. Band, the M. S. M. Players (Alpha Psi Omega), the Glee Club, and the Chemistry Department's liquid air demonstration have already been placed on the program.

Also, one of the outstanding speakers of the year has been chosen in the person of Dr. W. Kirkby-Miller, professor at Missouri U. and Rhodes Scholar, will lecture on the history, traditions, and character of Oxford University of England.

Other interesting features are being considered for the program, but as yet the plans are only tentative.

THRU THE TRANSIT

by Pin, who longs for the life of
a Civil Engr. student.

Well, just a few more days now, and by the time this paper gets out school will probably be over for the year 1933-1934.

Before we forget, and we have forgotten this many times before: We would like to ask Rosie to please get a hair cut before next fall. After all, what's the harm, everybody gets one now and then. We will say, however, that Rosie is consistent. Everytime we have asked him when he was going to get a hair cut he would reply "Just had one." He has done that every day for the past school year. Somebody is sure chiseling him if that is so. C'mon, Rosie, let's see how you look. Get some of those raven, or raving locks, sheared or perhaps the town council will get you a muzzie.

It seems like the Sigma Nues have a bug for putting out pins. "Bud" Folsom is the latest to pass out cigars. This is a little old to be news, but Bud put his pin out about a week ago Monday. These girls of Christian, or is it Stephens? have a fatal fascination for Sigma

Nues from Rolla it seems. Snyder's wife (so he claims) [but we don't believe it] is also from Stephens, or is it Christian?

Jimmy Vincent, the Sigma Pi tornado, was out tornading the other night. There was nothing wrong with Jimmy, but that darned sidewalk was crazy or something. It just would not stay steady; it seemed to want to go first thisaway and then thataway.

The pursuit for the elusive grade-point is over for another year. And have the grade points been elusive? We have heard that there is a mess of them just around the corner, but we must be standing on that corner, because we sure can't find any grade points. Here every department, and even the freshmen are through school, but the poor mets and chemists are still plugging away until the zero hour Friday. There ain't no justice. But when eleven o'clock Friday comes we are scrambling in a hurry.

So we bid you "so long" until next fall. And may there be a freshman class of not less than 300.

KRUMMY CRACKS

By H. L. Harmon

These commencement speeches should be like a woman's skirt—long enough to cover the subject, but short enough to be interesting.

Then there's the crack that some famous guy made—"Modern petting has made many girls resemble rock salt placed in a trough for cattle to lick." Can you imagine that guy calling us cattle?

Then there's the sign in the library—

Hellers Clothing House

ANTI-WAR

(Continued From Page 4)

hatreds.

"Planned socialism alone removes this basic cause of war. In such a system no classes or groups exist which benefit from war or war preparations. Complete disarmament and the formation of strong peace pacts, are today the most formidable immediate obstacle to war.

"We pledge ourselves to unite in continuous effective activity against every manifestation of fascism and the growth of imperialism. Toward this end we will rally all students to join us in carrying out the following proposals:

"To refuse to support the United States government in any war it may conduct.

"To struggle aggressively for the abolition of the R. O. T. C. and all military training organizations, and toward the conversion of R. O. T. C. funds to help offset retrenchment in education. We oppose the taking of disciplinary action by university authorities against those who protest against any form of militarism on the campus. We indorse the recommendation of the Missouri University faculty to abolish compulsory military training.

(Continued from Page 1)

MILITARY

discuss proposals for the abolition of war. The roar of the diving planes at times drowned out the speakers.

General Stayton, head of the Missouri National Guard, asserted that "the nation can have full confidence in the ability of the national guard to turn out 180,000 men, fully equipped and reasonably well trained. In the case of an emergency, the National Guard and the regular army could turn out something like 250,000 men."

BACCALAUREATE

Continued from Page 1

else but his duty, Dr. Argow stated that man, fundamentally, does not know right from wrong. His only basic reaction which can be depend-

ed upon to steer him in the proper course in his natural love for excellence, for value, and his natural abhorrence of the base, the inelegant, the brutal.

This last thought, the speaker left as a challenge to the "Crusader." He appealed to the graduates to hold in high esteem the excellent and to put faith in the natural sensitivity to the value of excellence.

The sermon was an inspiring one, one that should not soon be blotted from the memories of those upon whom it was directed. With stirring words of encouragement, free from the padding of flowery phrases, Dr. Argow struck the note of the modern spirit for these "New Day" men.

Rev. O. V. Jackson, of Rolla, gave the invocation and the benediction of the service. J. S. Cullison, of the

Geology Department, sang two numbers, accompanied by Dr. E. A. Stephenson, of the Mining Department. J. W. Scott led the Rolla Orchestra in three numbers during the program.

A large audience of townspeople, students, and visitors in addition to the faculty and graduates, filled the auditorium to hear Dr. Argow's address.

"I THANK YOU—
I thank you ever so much—but I couldn't even think about smoking a cigarette."

"WELL, I UNDERSTAND,
but they are so mild and taste so good that I thought you might not mind trying one while we are riding along out here."
