## "The Sap" Given Last Thursday A Huge Success

Play, Directed By Mrs. C. J. Millar, With "Doc" Maise As Leading Man Kept Audience In Uproar.

As a continuance of the outstanding programs on the General Lecture series this year, the Delta Pi cast of Alpha Psi Omega, national dramatic fraternity, presented for its contribution to the thespian art last Thursday evening "The Sap", directed by Mrs. C. J. Millar. Replete with laughs and hilarious situations, and played by an able cast of drama lovers, "The Sap" was a rare treat for the large delighted audience of play goers who filled to capacity the auditorium of Parker Hall to see, hear, and enjoy. With Clemens R. Maise giving one of the best performances of his M. S. M. theatric career as the central character of the play, the uproarious comedy swept along for two breathless hours of fun (yes—breathless, for who among the many present could have been otherwise after such a one hundred and twenty minute seige of repartee and buffoonish antics by "Doc" in his title role of "The Sap"?)

"The Sap" was a New York success written by William A. Grew, but it still necessitated hard work by everyone in the cast and full co-operation by many others. The whole cast, of which Robert M. Stewart was a minor character, the stage manager, Bill Maloney, the properties man, W. T. Moore, and all others who helped in any way deserve much credit for having put forth a splendid performance and a screamingly

## Fire Brick Company Shows Pictures

Manufacturing Processes of Fire Brick Shown To Orton Society

A regular meeting of the Orton Society was held last Wednesday evening. A motion picture was shown in the geology lecture room by Mr. Reed of the advertising department of the A. P. Green Fire Brick Company of Mexico, Missouri. The picture showed recent pictures of the manufacturing of fire brick and also the work carried on in the refractories from the time the clay is taken from the mine until it is placed in cars for shipment.

Dr. Green of the Fire Brick Company, was granted the honorary degree of Doctor of Engineering by the Missouri School of Mines two years ago for his outstanding work in developing high alumina refraction from Missouri clay. The Green Co., has always been very kind to MSM and was instrumental in the establishment of the ceramics department on this campus.

After the showing of the splendid picture, which was viewed jointly by the Orton Society and the AIME Society, the ceramists adjourned to the ceramic department lecture room. There, with Mr. C. A. Freeman, MSM '28, leading, a discussion was held concerning the manufacturing of fire brick. Mr. Freeman is the sales engineer for the A. P. Green Co.

## JUNIOR CLASS DANCE

The first Junior Class Dance, sponsored by the Class of '38 proved to be one of the most successful and enjoyable dances ever to be held in the gymnasium. On a not too crowded floor forty-five couples danced to the smooth and lilting rhythm of Jimmie Gilmore's band while a few stags sat in the corner and watched.

The gym was slightly decorated with clusters of autumn leaves about the lights and streamers hanging in the middle of the floor giving a pleasing effect to the eyes. The floor was in one of the best conditions it has been found in this year.

Contrary to most "Junior Proms" held at other schools, the dance was not given in the honor of the senior class and the dance was not formal.

Because of the lack of stags fellows were free to enjoy many uninterrupted dances with their dates.

Since the first dance has been such a success, it is to be hoped that the junior classes in years to come will carry out this tradition maintained by so many other schools.

M.S.M.

## Pictures Presented At Joint Meeting

Ira Remsen And Alpha Chi Sigma See Petroleum Pictures By Shell Company.

The Ira Remsen and Alpha Chi Sigma met in their second joint session of the year last Wednesday, November 18. The program at this meeting consisted of dynamic motion pictures on petroleum engineering and were presented by Mr. M. L. Griffen of the Technical Research Division of Shell Petroleum Corporation, and Mr. T. M. Pallett of the Sales Promotion Department of the same company. Short lectures were also presented by Mr. Griffen on points raised in questions by the audience.

A film was also shown entitled "Everybody's Business". It was an appeal to all motorists for careful driving, impressively illustrating the danger of false security by showing typical accidents which could happen to anyone through just slight carelessness in driving.

The program humorously ended at quarter past ten o'clock with a Mickey Mouse picture.

The Shell Petroleum Corporation at this meeting generously donated sixty samples of petroleum derivatives and by products produced in refining crude petroleum to the School of Mines. These samples are bottled and plainly labeled. On behalf of the student body the Miner heartily thanks the Shell Corporation for its highly useful gift.

Attendance at this meeting surpassed the attendance at the previous joint session, totaling about eighty persons. The program lasted about two hours and fifteen minutes.

The Ira Remsen and the Alpha Chi Sigma wish to express their deep gratitude to the Shell Petroleum Corporation and to Messrs. Griffen and Pallett for the most pleasurable program which they presented and hope to have another in the future.

M. S. M.

It's great to be great, but it's greater to be human.—Will Rogers.

M.S.M.

Cheerfulness means a contented spirit; a pure heart, a kind and living disposition; it means humility and charity, a generous appreciation of others, and a modest opinion of self.

## Eight Initiated Into Phi Kappa Phi On November 11

Prof. Dodd Supervises Banquet Held at Initiation; Several Faculty Members Speak.

Wednesday, November 11 was a thrilling occasion to the initiates of the Missouri School of Mines Chapter of Phi Kappa Phi, a national honor fraternity. At 6 o'clock the members and pledges were present at the club room for the initiation of the following pledges for this year: R. P. Alger, W. F. Bruer, W. C. Busch, W. W. Culbertson, A. P. Hausmann, E. W. Logan, J. B. Woodward, and E. W. Volz.

The requirements for election to the fraternity are: First, a scholarship ranking among the upper tenth of the class, and, secondly, extracurricular activities and good personality. Membership is very highly prized, because it is a permanent recommendation.

The initiation and banquet were under the supervision of President C. M. Dodd; Vice-president, M. H. Cagg, and Secretary-Treasurer, Paul Howard.

After the pledges were duly initiated, everyone proceeded to the Presbyterian Church for the second feature of the evening: The banquet. The first speaker of the evening was Major L. C. Gordon, head of the Military Department, who spoke on "The Government of the Panama Canal." The canal zone was leased

## Three Films Shown At Civil Meeting

Highways, National Parks And Forests Are Subjects of Pictures.

The A. S. C. E. held a very interesting meeting last Tuesday night. They showed motion pictures of great interest to the Civil Engineers as well as to others.

The first film showed in full details the improvement of roads in the Yosemite Valley; to accommodate the thousands of motorists that visit the Yosemite every year. This film interested the Civil Engineers because it showed how the different kinds of machinery used in highway construction were used.

The second film showed the before and after effects in the beautification of public roads. It showed how the public roads could be made to look beautiful and at the same time cover the scars caused by cuts and fills. The plants along the highways also prevent washouts.

The third film showed the great importance in maintaining our forests; preventing their destruction by fire. Our forest not only supply us with lumber but also help to store water which is a very important necessity in our life. The forest prevents the water from heavy rain storms from flooding our cities and farm land and at the same time stores our drinking water.

A film was also shown on the destruction of our wild life and how our national parks are trying to save them. The meeting was closed by serving refreshments. The next meeting will be announced in the near future.

## MR. HOWARD SPEAKS

Mr. Paul Howard, head librarian, spoke to the sections of the Freshmen class on Nov. 12, a. m. and Nov. 13th, p. m. in the auditorium. Mr. Howard gave each freshman a homework assignment sheet on which he is to fill out certain blanks with the correct information obtained from the library. The prize to the freshman answering the questions most correctly is either "Roget's", "Thesaurus" or Bartlett's "Familiar Quotations".

The talk was about the use of the library and its workings. "The best procedure to follow to obtain information about any subject", Mr. Howard explained, "first to look up the subject in encyclopedia, and then to use the references it gives for further information. A great deal of unnecessary work can be eliminated by looking into the catalog to see how many of the reference books are in the library and then using the files to find where the ones present are placed. The books are numbered," he continued, "on the first floor racks from 0 to 599 and on the second floor racks from 600 to 999". He spoke also on the contents of the papers he handed to the classes and concluded by saying that the winner will be announced on the third of December.

## Mechanicals Attend St. Louis Meeting

Party Returns After 3 Days Convention of International Acetylene Association.

On Tuesday, November 17, the Senior Mechanicals left for St. Louis to attend the 37th Annual Convention of the International Acetylene Association. The personnel of the group included Professors Jackson and Underwood, P. B. Ellis, W. L. Holz, M. S. Alexander, A. F. Bockenhok, W. A. Kopp, W. E. Luder, J. W. O'Neal, A. K. Shores, and S. R. Price, Jr.

Wednesday morning was spent in registering at Hotel Jefferson. Thomas N. Dysart, President, St. Louis Chamber of Commerce, welcomed the members of the association at the opening luncheon on Wednesday. Wednesday afternoon, the Miners visited the National Candy Company and the General Industries Session of the convention. That evening everyone attended the Welding and Cutting Forum held at the Soldan High School Auditorium. Demonstrations of the uses and materials of oxy-acetylene welding were given by engineers of the Modern Engineering Co., of St. Louis and the Air Reduction Sales Co., of New York.

An inspection trip of the Midwest Piping and Supply Company was taken Thursday morning. That afternoon the Mechanicals were conducted through the entire plant of the Anheuser-Busch Brewery, the largest brewery in the country. Five papers were presented to the convention. The uses of welding in mining operations, heavy construction industries, and in the metal mining industries were the main topics of the papers. A Round Table Discussion of Welding and Cutting Practices was held that evening.

Friday morning an inspection trip of the Curtiss-Wright Airplane Manufacturing Company was taken. Ned

## Merciers To Be Installed As Theta Kappa Phi Friday

Last Local Fraternity on The Campus Will Affiliate With National Catholic Fraternity.

When the Mercier Fraternity is formally installed as the Mu Chapter of Theta Kappa Phi, National fraternity, this coming week-end, the last local social fraternity will disappear from the Missouri School of Mines campus. For the past ten years the various local fraternities have been gradually dropping their local status and affiliating themselves with national organizations. The old Grubstakers started the ball rolling when they became a Chapter of Triangle in 1927. They were followed in 1933 by the Prospectors, who affiliated with Sigma Pi. Alpha Lambda Tau was the last national to establish a chapter here. This was in September 1935. When the Theta Kappa Phi chapter is granted there will be eight active National fraternities, and no local groups at the Missouri School of Mines and Metallurgy.

The active negotiations between the Order of Cardinal Mercier and the national organization of Theta Kappa Phi, which have been under

## Interesting Student Speakers at AIEE

Trip To Dallas Reviewed By Baxter. Three Other Members Speak on Technical Subjects.

Last Tuesday evening at Norwood Hall, the A.I.E.E. held one of the best meetings that has ever been held at M.S.M. The meeting was opened by E. W. Logan, and the minutes of the last meeting were read by R. C. Seibel.

The first speaker of the evening was T. L. Baxter, who was one of the several students to make the A.I.E.E. trip to Dallas, Texas. A report of the trip, the purpose of which was to attend an A. I. E. E. convention, was given and the trip as a whole was described.

Following the report on the A.I.E.E. trip, a talk was given on high fidelity broadcast receivers by J. S. LeGrand. In his talk, LeGrand explained the characteristics of the high fidelity broadcast receiver and of what it consisted.

Induction motors was the next topic of the evening, and it was spoken on by Seibel. The recent development was the basic part of the talk, and it was stated that most of the improvements to date have been mechanical and not electrical.

The last speaker of the evening was J. W. McLaughlin, who spoke on acoustics, and how they could be improved. This talk was derived from a paper, which was read at the A.I.E.E. convention in Dallas.

President Logan in closing remarked that if the members of the A.I.E.E. would only give talks, like those given, there would be no need to engage outside speakers.

After the meeting was closed, refreshments were served. The hot cocoa for the occasion was made by Mrs. Lovett.

## "JUNIOR PROM"

According to posters which were conspicuously placed around town the Junior Class staged a grand hoax last Friday evening. It seems that the Junior Class assumes that because they give a dance it is naturally a "Junior Prom." I suppose we were wrong as usual, but every "Junior Prom" that anyone has ever heard of was given to the graduating class. This "Junior Prom." however, was given in honor of the Junior Class.

We will give the class credit for being original; they are not following tradition at any rate. Probably they are the first to follow some policies advocated by the Miner; that of doing away with outmoded traditions.

It is not known just how this dance will affect the St. Pat Board's finances. However, it is just one more dance from which the Board will not realize any profit.

M.S.M.

## HELLO CHILDREN

There may be some of us who remember the day when we learned to sail our first paper glider which we made under the guidance of our first grade teacher; there may also be some who remember their first balsa wood airplane and finally those who gradually escaped the fascination of these toys.

Some of our students are still working on their first grade project which they displayed to those who came to see the play last Thursday night.

To some people this display of childish skill may be amusing but to others, who have outgrown this stage in life, it is annoying.

The members of Alpha Psi Omega who worked hard to present an evening of entertainment to the school deserve the attention of the entire audience including those who came to steal the show by the display of their childish art.

Probably at the next play some one could give the points of interest to the audience verbally thus eliminating the material which our children use for the manufacture of their toys. This would save the players producers the trouble and expense of a program and also eliminate the gliders.

We are glad to say that the cast knew their parts so well that they were unaffected by those in the audience who were hoping to disrupt the play. "The Sap" was a sensational success in spite of the gliders, not because of them. The cast is to be congratulated on their ability to carry their parts and hold the attention of the audience under these trying circumstances. Next time children, if you intend to be rude stay home.

M.S.M.

## THANKSGIVING

The life of an editor is just one busy round after another keeping up with all special occasions. Here it is Thanksgiving already. It really seems that school has just started instead of being in season about three months.

At this time of the year let us all take time to be thankful for all the many advantages which are ours. First of all may we be thankful to those who are making our education at M. S. M. a reality. We all have so many things for which to be thankful that it is much easier to list our own blessings than to list some

one else's. Just keep in mind the reason for the day then fulfill its purpose.

M.S.M.

## THE MINER APOLOGIES FOR "JUNIOR PROM"

This issue carries the humblest apologies of the Miner for the gross misstatement printed in the past two issues. Our attention has been called to the fact that the so-called "Junior Prom" was intended to be nothing more than a Junior Class dance. It was intended to swell the treasury of the Junior Class, not to entertain the seniors. It is hoped that not too many seniors were induced to part with a gate fee simply because of this misstatement.

The Miner has made many mistakes but terming the Junior Class dance a "Junior Prom" is the greatest.

## Thru The Morning Mail

To The Editor:

My good friend, K:

Last week, I read your little article in the Miner with a certain degree of interest. To me, Mr. K, it sounded as if you are a freshman. Well, if you are, put 'er there, for I'm a freshman myself.

Now in regard to this matter of hazing. I don't think that I missed any of the entertainment provided for the freshmen by the sophomores. To me, it was all very interesting, yet I'm still alive and doing fairly well. I can't see that what I went through with the first of the year hurt me in the least. Nor the rest of the things which have taken place since then, for that matter.

In my opinion, when Doctor Fulton posted that notice about hazing, he had reference to the ancient meaning of the term, i.e. what hazing meant in the days when your dad and my dad went to college. I also believe that Doctor Fulton is not so old but that he can recall the days when he was a college student; a freshman, and an upper-classman. I'm sure that he remembers what fun boys have in playing pranks on one another. (When I refer to pranks, I do not mean half-killing and another, understand. Don't get me wrong.)

After all, your only a freshie once. So why not take it on the chin and make the upper-classmen think that you like it?

You asked for a good reason why hazing should continue. Well, to be perfectly frank with you, I haven't any in mind. These are only my sentiments.

M.S.M.

## THE LETTER "E"

Someone has advanced the opinion that the letter "e" is the most unfortunate character in the English alphabet, because it is always out of cash, forever in debt, never out of danger and in hell all the time. For some reason, he overlooked the fortunes of the letter, so we will call

## Fraternity Highlights

By Ruemmler

### TRIANGLE

Triangle is a fraternity of engineers whose men have a brotherly interest in each other and are devoted to high professional and personal attainment in the field of engineering. It is a national collegiate fraternity which affords its members the advantages of fraternal life while in school and perpetuates that spirit of brotherhood through later years by virtue of common interest, the field of Engineering.

The fraternity has a national administrative group of alumni, who keep in close touch with all chapters and help them in an advisory capacity. Each chapter also has a group of honorary members upon whom they can depend to give them a "vice" upon their more difficult problems. The honorary members of the Missouri Mines Chapter are: Professor Carlton of the Civil Engineering Department, Professor Walsh of the Metallurgy Department, and Professor Dodd of Ceramics Department.

Triangle was founded at the University of Illinois on April 15, 1907, by a group of six civil engineering students. There are now fifteen chapters. Triangle Fraternity has grown out of the small nucleus of junior civil engineering students who found that they had sufficient interests in common to form a club and live together during their senior year at the University of Illinois. There are now more than two thousand Triangle men who have received

his attention to the fact that "e" is never in war, and always in peace. It is the beginning of existence, the commencement of ease and the end of trouble. Without it there would be no meat, no life, and no heaven. It is the center of honesty, makes love perfect, and without it there would be no editors, devils, nor news.

—Charleston, W. Va., Gazette.

## FIVE YEARS AGO TODAY AT MSM

### M.S.M. Co-eds Organize and Petition Council For Recognition

Several weeks ago the co-eds of the Missouri School of Mines met for the purpose of organizing and electing officers in order that the young ladies of the campus might become officially recognized as active participants in campus activities. It is the intention of the co-eds to be recognized, with the hopes of some day organizing a Greek letter sorority. To become an official campus organization a petition must be submitted and passed by the Senior Council and Faculty. The ever increasing number of co-eds makes such an organization possible.

The following were elected to office for the year: Ellen Woodman, president; Mary Lee Johnson, vice-president; Melba Coffman, secretary; Margaret Matlock, treasurer.

Scrappy Miner footballers completely outclassed their old rivals, and won decisively from Drury in a game played at Springfield on Friday, November 13th. The score was 18-0.

### Depression Day

In view of the world-wide depression about which so many rumors have been circulated, the students dressed according to their idea of a person on whom all the evils of a depression have descended.

### G. W. Stephens to Speak to Students

their engineering degrees, most of whom are now following the engineering profession.

The organization was originally Grubstakers Club, one of the older local clubs, founded September 15, 1902. It was installed as the Missouri Mines Chapter of Triangle on December 10, 1927. It is the only professional fraternity on the campus that maintains a chapter house, and in addition offers all the advantages of a social fraternity. Triangle is noted for its deferred pledging and it is of interest to note that the local chapter led all the fraternities on the MSM campus scholastically both semesters last year. It has the maximum number of members on the various boards of the school and also is well represented in athletics. At the present time the local chapter has fifteen active members and twelve pledges.

The officers of the MSM Chapter of Triangle are:

Richard C. Reese President.  
John C. Radcliffe, III, Vice-Pres.  
Richard G. Pough, Treasurer.  
Jack R. Glatthaar, Steward.  
Richard R. Hynes, Recording Secy.  
Raymond S. Stewart, Cor. Secy.  
Marion S. Alexander, Librarian.

## Gleanings From Our Exchanges

One of the great engineering attempts which seems likely to be accomplished is the great 12,000 mile highway planned from Alaska to South America. It is to be built through Canada, the United States, Mexico, and the Central American republics. The highway is expected to be completed in two years more as the part through United States, Canada, and part of Mexico is already completed.

According to a western university newspaper we notice that in case you should desire a set of E's the following formula is offered:  
(1)—Laugh at every joke your professor makes even if it doesn't have point.  
(2)—Ask him only easy questions, as you probably know he can't answer the difficult ones.  
(3)—Call each professor Doctor, even if he is only assistant professor.  
(4)—When you go to a dance let your date dance with him and meanwhile make a good impression on his wife.  
(5)—If you have a nickname for him don't let him hear you call it unless you want to flunk the course.  
(6) During lecture always keep scratching in your notebook no mat-

ter how worthless the lecture is, (7) Never throw stones at his door or car.

(8) Remember, your professor is infallible even if he multiplies 3x2 and gets 8. (It is just a slip for he is always right).

(9) When handing in written work always fill all the white space you can because he grades on the number of pages and not on the content.

(10) When you feel a bit sleepy during lecture period always be sure your neighbor will wake you up when the buzzer sounds.

John the cop, a New York University policeman, was presented with a mahogany-silver night-stick by the students: A rather diplomatic move I'd say.

A unique, if not practical, idea has been originated in the campus benches at Baylor University which are equipped with an accessible slot for putting in five cents which allows the sparkers to use the bench for one hour at which time an electric shock is automatically set off. Our guess is that it has fleeced many a person of fifteen cents to bid his girl friend goodnight.

The difference between Spain and the United States is that we tell little boys they will have a chance to be president, while in Spain they are told that when they grow up they will have a chance at the president.

Do you know... that Notre Dame's football captain did not play one minute of last season... that of an actual poll taken of American college students, fifty percent reported that they would just as soon be captain of Notre Dame's football team as to be president of the U. S. that in 1865, according to a certain college paper, a football team had twenty-five players on each side.

To prevent students loaning their activity tickets at University of Southern California, the faculty has required the owner's picture to be attached.

### Modern Proverbs—

Success has turned more heads than halitosis.

If a man knows and knows he knows, he is a wise man, if he knows not and knows not that he knows not, he is a fool.

A bird in the hand is bad table manners.

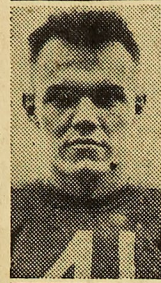

The Gleaner.

## You Know Them Too

By Mac

Friday afternoon a 'Fighting Mining Engineer' played his last football game for M.S.M. For four years he has played a hard, steady game in the Miners line; always giving his best. Frank Appleyard has appeared in the starting line-up of every game for the last three years. He will leave a hole in the line that will be hard to

**MERCIER**  
Continued from page five  
way for the past three or four years, were concluded recently when the formal petition of The Mercier Fraternity was accepted by the active and alumni chapters and the National officers of Theta Kappa Phi.

The formal installation ceremonies

**C. D. VIA**  
The House of a 1000 Values  
ROLLA, MO.

**Rolla State Bank**

of The Order of Cardinal Mercier into Theta Kappa Phi will take place during the Thanksgiving holidays, on Friday, Saturday and Sunday, November 27th, 28th and 29th. Friday evening there will be an informal reception for the degree team, which will be drawn from the University of Oklahoma, Ohio State University, the University of Illinois and Ohio Northern University. Inspection of the campus will be made on Saturday afternoon, followed by a dinner at the Chapter House in honor of the National officers and visiting Theta Kappa Phi men.

A formal Installation Dance will be held at the Chapter House on Saturday evening from nine until one o'clock. Two representatives of each fraternity on the campus and of the Independents have been extended invitations to the affair. The Varsity Orchestra will furnish the music.

The entire Chapter and visiting delegates will attend Mass and receive Holy Communion in a body at the ten o'clock Mass at St. Patrick's Church.

An informal dinner will be held at the Chapter House Sunday noon, in honor of the alumni members of The Order of Cardinal Mercier, who will be here for the affair. The formal initiation ceremonies will be held Sunday afternoon at the Chapter House.

Sunday evening the scene of festivities will change to the Pennant Tavern, where the formal Installation Banquet will be held at 6:30 p. m. Several prominent guests, alumni members and representatives of the various chapters will attend. Mr. Harold Bolton Finn of New York City, the National President of Theta Kappa Phi is expected to be here to officially present the charter to the new organization at the Installation Banquet.

Mr. Edward J. Kirchner, of Pittsfield, Massachusetts, the National Executive Secretary of Theta Kappa Phi, has been in Rolla for the past few weeks making the necessary arrangements for the installation.

The Mercier Fraternity, whose incorporation title is The Order of Cardinal Mercier was formally organized on September 12, 1925, by Rev. Sidney P. Stocking, pastor of St. Patrick's Catholic Church, with seven charter members and eleven pledges. The fraternity chose for its patron, His Eminence, Desire Cardinal Mercier, Archbishop of Malines and Primate of Belgium.

Theta Kappa Phi, a national fraternity for Catholic men, was founded October 1st, 1919 at Lehigh University, Bethlehem, Penn., as the outgrowth of the X Club founded on the same campus in 1914.

A few of the prominent alumni members of Theta Kappa Phi are: His Excellency, Francis C. Kelley, Bishop of Oklahoma City and Tulsa; Dr. James E. Hagerty, former Dean of the Commerce College, Ohio State University; Dr. Frank A. Schrepfer, Exchange Professor of Art, University of Heidelberg, Germany; His Excellency, James M. Curley, Governor of Massachusetts, and the Hon. David I. Walsh, U. S. Senator from Massachusetts and former governor of that State.

from the Republic of Panama for 99 years by the U. S. Government, which owns all stores and property inside the 48 mile wide zone. The Canal Zone is governed by a governor appointed from the Corps of Engineers by the President of the United States. The government is a form of Socialism, since the government owns everything. There are NO TAXES because the government

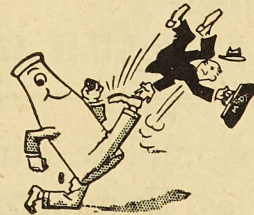

expenses are paid by the tolls collected from the canal. According to Major Gordon, the courts are as nearly impartial as is possible because of the absence of policies.

Dr. S. R. B. Cooke, of the State Mining Experiment Station, presented a comparison between the schools of the U. S. and those of New Zealand in the topic, "New Zealand Schools". He pointed out that their high schools offer two courses to the student; namely, the Business Course for those who do not intend to go further than high school, and the Matriculation Course for those desiring to attend college. Entrance requirements to the universities are based on an examination which only about 20% of those who take it pass. The only two universities in New Zealand are the University of Otago and the University of New Zealand. The college student takes only one examination, which is given at the end of the course with questions prepared in English universities. The exam papers are then sent back to England to be graded, and the grades sent back in about three or four months.

Prof. C. R. Forbes, from the Mining Department, analyzed the subject: "Success in Engineering," and found that the main fundamental contained was that one of self-confidence; other important factors were the possession of an "above-average" scholastic ability and personality. Personality is the lubricant which prevents friction between two persons. Success itself is hard to define as it is dependent upon the individual giving the definition. Some people think of making a comfortable living and feeling comfortable as success, while others think of money, friends or power as the measure of success.

"The Scholar and the New Job" was the subject chosen by Mr. J. B. Woodward on which to address the meeting. The scholar should not feel egotistical merely because he was graduated from a college, but rather he should remain open to adjustments and new knowledge when first starting on his new job, and he should learn to cooperate with his fellow workers.

Mr. E. W. Volz in explaining "The Significance of Honor Societies" showed that honor societies, such as the Phi Kappa Phi, offered a goal for the undergraduate to work toward and one he may well be proud of attaining, because all through life his membership in the honor society will be a help and inspiration to him.

## A Quart a Day Keeps the Doctor Away!

There's an easy answer. Build up resistance to winter ills. Give the whole family the energy they need to see them through.

It's a simple solution . . . and one that your family will enjoy, for you'll find dozens of delicious ways to serve Tucker's Milk.

Try it tonight, and plan on serving it often all through the winter. Make your motto a quart a day . . . for every member of the family!

P. S.—Incidentally . . . a month's supply of Tucker's milk will probably cost less than one professional call by the family doctor!

## SENIOR MECHANICALS

Continued from page four

Foster, a graduate of the School of Mines, and engineer in charge of productions at the St. Louis plant, conducted the Miners throughout the trip. That evening the Mechanicals were guests of the American Society of Metals at their annual banquet. After the banquet, a picture of the Manufacture of Alloy Steels was shown through the courtesy of Bethlehem Steel, Inc.

The trip was a very successful one as it gave the students contact with work in which they may be engaged upon graduation.

## Miners Lose Thriller to Cape, 19-16, in Final Game

By B. C. Compton  
Missouri Miner Sports Writer

It can snow in the state of Missouri now. The coaches can pack the football uniforms in mothballs. They can pick all-conference teams, and award letters. They can start basketball practice. They can forget about the gridiron sport until spring practice. Or they can sit in a comfortable armchair before a warm fire and dream of the new plays that they can pull on their opponents next year.

Why can they do this? Because my friend, Turkey day is just around the corner, and that means the end of King Football for another year. The runs that thrilled millions of people this year, the upsets where small teams came from behind to trim stronger elevens, the strong arm passing tactics of many teams, are all lost in the already fading pages of the newspapers. Only there, and in the memory of the players themselves, will football live.

defeated the Miners 19 to 16. Kirksville was hard pressed to win their fifth straight championship, the Warrensburg Mules providing most of the opposition. There was plenty of thrilling games, and plenty tough too, both from the players standpoint and the coaches.

M. I. A. A. football this year, was the kind that prematurely whitens

the coaches hair, and gives the fans who follow the teams closely, that tingling feeling when they see the team in action.

The Cape-Miner game was that sort of an affair, with two hard hitting lines clashing in front of hard running backs. Torchy Godwin and Louis Bona provided most of the fireworks for the Indians, while Otis Taylor and Wally Koziatsek provided the touchdowns for the Miners.

The Indians kicked off to the Miners at the start of the game. Grenia immediately punted as the strong wind was in the Miners favor. Then on the first play Louis Bona slipped over his own right tackle, cut out to his left and squirmed his way into the open for 70 yards and a touchdown.

Parker's try for the extra point was wide.

Later in the first quarter after an exchange of kicks, Stooze Kiesler and Kozy, collaborated in hitting the line and advanced the ball from Cape's 38 to their 2-yard stripe where the Indians held for downs.

After the Indians kicked out Taylor, substituting for Kozy took the ball over right tackle for 40 yards and a touchdown. Pete Mattei placekicked the extra point to put the Miners in the lead 7-6.

Soon after play started in the 3rd quarter the Miners were forced to kick from their own 12-yard marker. Grenia punted out to the 35 where Godwin took the ball and scampered the left side of the field to cross the goal line untouched and standing up. Parker then kicked the extra point.

In the same quarter Grenia was forced to punt from the Miners 27 when a husky Cape lineman broke through to block the ball. Millett, right tackle, scooped the ball up on the 13 and went over the goal line. Parker's kick was wide.

As the third quarter drew near the end, Koziatsek threw a long pass from midfield to Taylor who went to the Cape 10-yard line. Koziatsek then drove to the 1-yard stripe, but again the Miners were held for downs and the Indians took over the ball.

Parker then kicked to Kozy who took the ball on the 40 and ran around his left side for a touchdown. He then kicked the extra point.

With but three minutes left in the game the Miners kicked off to Cape. On three plays the Indians were thrown for about a 20 yard loss. Then Parker took the ball from center and ran it back over his own goal line for a safety, giving the Miners two points.

The game ended shortly afterwards.

### Notes on The Game

Capt. Frank Appleyard ended his playing career by playing the best game this writer has ever seen him in.

Dick Prough also played his best game of the season. One of the Miner defenses is set up so that Prough is a free lance, and he showed up well against the Indians.

Other standouts in the line were John Kirwan, scrappy guard, and Joe Murphy, end. Wilson and Littner, ends, also played good ball.

Wilson spent the week-end in the hospital with a bad charley horse.

Stooze Kiesler was knocked out in the third quarter on Godwin's run-back of Grenia's punt. Incidentally Stooze was the spearhead of the

## Appleyard On All-MIAA Team--

Capt. Frank Appleyard, who played his final game last week, was the choice of all the sports editors of the student papers for all-M. I. A. A. tackle, except one according to the team released last week.

Sports Editor Jimmie Evans of the Miner participated in the poll, as well as writers from Springfield, Warrensburg, Cape Girardeau, Kirksville, and Maryville.

Pete Mattei, Miner guard was placed on the second team, while several of the Silver and Gold men were given honorable mention.

Dwight Diller, Warrensburg was the only unanimous choice and therefore was elected captain of the all-star team.

### 1936 ALL M. I. A. A. TEAMS AS SELECTED BY THE CONFERENCE SCHOOL SPORTS WRITERS FIRST TEAM

Position	Player	School	Wt
Left end	Dwight Diller	Warrensburg	178

## Cage Squad Starts Daily Workouts

With the end of the football season all interest turns to the cage squad and the prospects for this season's team, and for the other conference teams. For the past week Kirchoff has been holding practice and now that the Miners grid season is over regular practice has begun.

From their last season's team the Miners have lost three lettermen; Captain Jimmie McGregor, and Herman Pfeifer, forwards and Bob Prange, center. Jenkins who also played part of the season at center not be back.

In all the Miners had seven men to letter last season and all of those who did not graduate have returned to school this season. Among the lettermen "Kirch" has left Paul Ellis and Bud Clayton forwards, Bob Lange, center, and Bill Busch, guard. Lange, while not the giant in stature like the Warrensburg and Maryville pivot men, holds the state record in the high jump and should be able to get far enough off the floor to give these tall boys a work out. Paul Ellis, a senior and one of the squads best ball handlers has lettered all the years that he has been in school. "Bruiser" Busch came out of the re-

serves when "Chick" Moreland left school and developed into one of the steadiest guards in the circuit. Buddy Clayton is a junior and lettered for his first time last year. He started his good seasons work when he helped the Miners win in an overtime against St. Louis U.

Among the new men Coach has H. G. Kamper a freshman and all-city forward in St. Louis last year, Kieth Miller, freshman and Macon high school star; Vic Spaulding, junior two year letterman at Moberly Junior College; Timberman, Rolla High school star; Jim Wilson who was injured last Friday is also a new man would probably have made first string guard.

Besides the lettermen and new men several of last years reserves will give an account of themselves. The list includes Herb Prange, center; Joe Carroll and Eddie Ballman, forwards and "Duch" Tittle guards.

While the Miners will not have a bad team this year, the conference will probably be just a little to strong for them to show up too well. The conference leaders will probably be Maryville and Warrensburg, both being big, fast teams. The Maryville squad will average about six feet 4 inches, and the Mules not much less. Cape, last years champs, will still have a good team but not strong as last season and they should probably snare third place.

The Miners will have a team much

like Cape had last year, a fast little bunch of boys—not to little but still averaging under six feet.

The Miners will begin their season on December 8th, when they meet Central Wesleyan here.

M.S.M.

## Wilson Injured

Jim Wilson, playing his first season at end for the Miners, was injured last Friday in the Miners last game of the year against the Cape Girardeau Indians. The injury seemed to be a ruptured muscle with hemorrhage. The X-Ray picture did not indicate clearly as to whether there was a fracture of the hip.

On recommendation of Dr. S. L. Baysinger he was transferred to the Missouri Baptist Hospital in St. Louis, under the care of Dr. Klinefelter.

Wilson is a junior and a transfer student to Rolla this year. He is a star football and basketball player, having lettered for the Miners on the gridiron this year.

M.S.M.

## FOOTBALL

Continued from page five

one of the best punters in the state, while Lewis is one of the best passers, although both are over 20 years out of college. When the two work together they usually put on a ex-

hibition between halves, which is well worth the sight.

A strong wind called off the act Friday.

Lewis and Prof. "Spike" Dennis, worked in the Washington-Missouri game at Columbia Saturday. About 10 players and the coaching staff journeyed to Columbia to see the game.

Miners	Cape Girardeau
Folsom	LE Jones
Appleyard (c)	LT Godard
Curtis	LG Conrad
Middaugh	C Harrison
Kirwan	RG Best
Prough	RT Sherfield
Wilson	RE Edmundson
Kiesler	QB Godwin
Koziatek	LH Hall
Grenia	RH Bona
Axthelm	FB Parker (c)
Score by quarters:	1 2 3 4
Miners	0 7 0 9—16
Cape Girardeau	6 0 13 0—19

Scoring: Touchdowns—Miners, Taylor, Koziatek; Cape Girardeau, Bona, Godwin, Milfelt. Extra points—Miners, Mattei and Koziatek (place kicks); Cape Girardeau, Parker (place kick), Safety—Parker. First downs—Miners, 18; Cape Girardeau, 6. Yards gained from scrimmage—Miners 223; Cape Girardeau, 254. Forward passes attempted—Miners, 6 Cape Girardeau, 4. Passes completed—Miners, 5, for 34 yards; Cape Girardeau, 2, for 10 yards. Passes in-

tercepted—By Miners, 1; by Cape Girardeau, 1. Kicks—Miners, 7 for 38 yards; Cape Girardeau, 7 for 40 yards. Penalties—Miners, 2 for 10 yards; Cape Girardeau, 4 for 15 1-2 yards.

Substitutions—Miners, Taylor Murphy, Volkmar, Jannett, Mattei, Flanary, Littner, Spafford, Nickel, Wilkey, Milfe and Strawhun; Cape Girardeau, Ferguson, Crites, Milfelt, Coermiller, Metje, Lewis, Reid and Stanley.

Officials: Referee—Klein, (Missouri), Umpire—Lewis, (Washington), Head linesman—Brickbauer, (Wisconsin).
