ROLLA, MISSOURI, Wednesday, October 25, 1939

NUMBER 6

500 Guests At MSM For Parents' Day

Sen. McReynolds
Speaks at Banquet
Attended by 354

Approximately five hundred parents were guests of MSM on Parents' Day, Saturday. These parents came from all parts of Missouri and from the bordering states. Parents' Day, which started only last year with Dads' Day, was instigated to acquaint the parents with the instructional staff and educational facilities of the Missouri School of Mines and Metallurgy, as well as to promote a better mutual understanding.

The program for Parents' Day began with the registration which took place from 9:00 to 10:00 in Parker Hall. The rest of the morning was spent in visiting the various classrooms and laboratories, and meeting the instructors.

The dads were guests of MSM at the Miner-Maryville football game in the afternoon. They backed the Miner eleven to the limit and even gave the Detonators their applause for the first drill of the year.

See PARENTS' DAY, Page Four

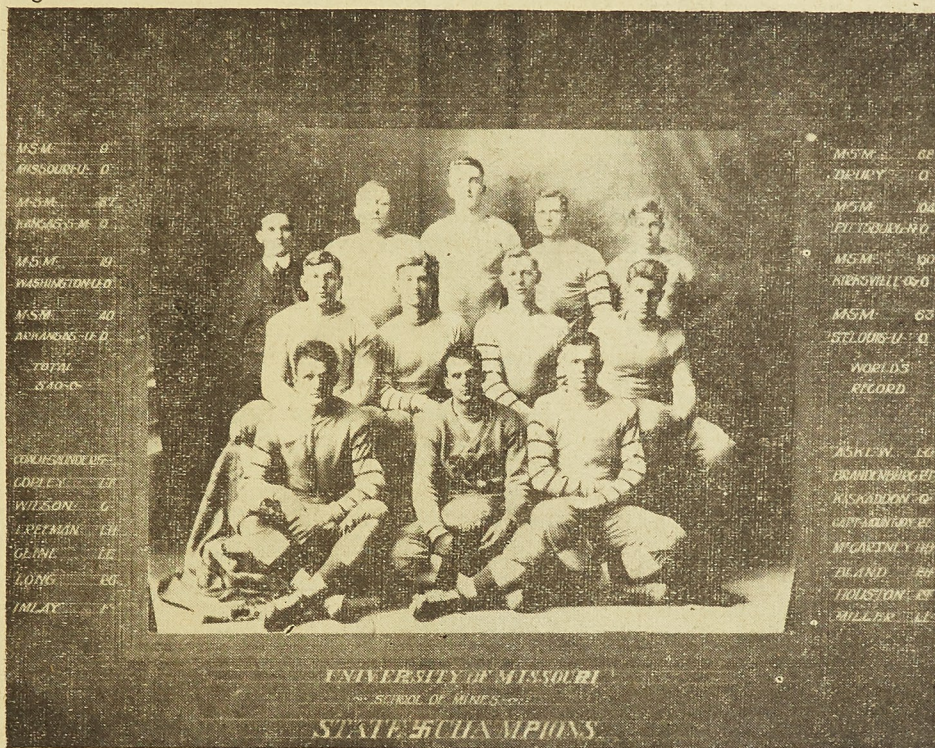

Dr. Kirkpatrick to Speak Tonight

The student chapter of the American Society of Civil Engineers is sponsoring an open house program consisting of a lecture by Dr. R. A. Kirkpatrick, noted traveler, naturalist and educator, who will appear on their program in Parker Hall on October 25th at 8:00 p. m.

Dr. Kirkpatrick has spoken in the auditorium before and those who heard him and saw his outstanding pictures of the western United States speak very highly of the lecture. He has been for many years associated with nationally prominent organizations promoting recreational areas, forest conservation, wildlife protection and kindred subjects. His travels have taken him into the remote places of desert, forest and stream in the United States, Alaska and Hawaii, and he is a recognized authority of matters pertaining to those subjects and places. Few persons, if any, have traversed more trails in the West than he.

His lecture will deal with some of the national parks in western United States. He will show natural color photographs of the outstanding scenes in these parks. The public as well as the student body is invited. There is no admission charge.

1914 Miner Team National Champions

'Welcome Alumni' from Dr. Chedsey

It is with real pleasure that I extend a welcome to returning alumni on their Homecoming Day. I hope that you will have time to see things around the campus that may be new since you left and to renew acquaintance with members of our staff as well as with your classmates and the graduates of other years who may be here.

Especially do I wish this welcome to be known to the Class of 1914 who are making a little celebration of their own in addition to the other alumni activities. Your twenty-five years out in industry must have unquestionably left its mark and I know that you will have a thrill in talking over "the good old days" and also your experiences in the quarter century which has elapsed since your graduation. I hope that future classes will follow your lead in providing some special get-together for the twenty-fifth reunion, and that as time goes on it will be an occasion which an increasingly larger proportion of each class will look forward to.

Cordially yours,

Wm. R. CHEDSEY.

R. O. T. C. Band Gives First Concert of Year

Last Thursday night in Parker Hall marked the first appearance of the M. S. M. R. O. T. C. Band in concert formation this semester. A thirty minute prelude before a meeting of the S. C. M. Teachers association included the following selections played in a manner which showed up real musician ship on the part of every group in the Band:

March "Gloria" by Lsey. "Wedding of the Rose" by Jessel. Trombone solo "The Rosary" by Nevin, played by Mr. Scott. with

See BAND, Page Three

No Homecoming Parade This Year

The St. Pat's Board in their meeting, Wednesday night, announced that there would be no homecoming parade before the game this year. This act was taken at the request of the Alumni Association and the Athletic Association in order to eliminate the disorder and confusion that the parade brings.

Arrangements were made for a more efficient cloakroom at the dances.

Students living in the gym were voted half-price rate on all dances except homecoming and St. Pat's. Ex-members of the St. Pat's Board in school will receive one ticket for St. Pat's.

Miners' Greatest Team Is Reviewed

In 1914 MISSOURI SCHOOL OF MINES had the most successful football team and season in its history. That year the MINERS steamrollered all of their opposition beyond recognition and proved by their fine type of play that they were the best team in the state if not one of the best teams in the nation. They were strong on every point of the game both in offense and in defense. This fact was shown by the total number of points which they had scored during the season. After the scores on the games played were added up, it was found that the MINERS (victorious in every game) had scored exactly 540 points to their oppositions 0!

The lettermen from the 1913 squad that reported for practice were Captain Mountjoy, E. A. Miller, Kiskaddon, Houston Bland, Freeman, Wilson, and J. C. Miller. Others of the 1913 squad to report were McCartney, Kline, and Vogel. There was also plenty of new material. Of these men Imlay, Askew, Copley, Steele, Brandenburger, Rogers, Kleppel, Gordon, Dawson, and Massey looked good. All of them played well during the season. Imlay, the first mentioned, was particularly commented upon by Bob Zuppke, Coach at Illinois University, as the finest back he had ever seen practically equaling the immortal "Red Grange" in his ability.

After the season was over and the MINER team had come through unscratched, the squad, the school, and all other concerned with the team over a miracu-

Miners To Play Bears Homecoming

Second Place at
Stake; Outcome
of Game Tossup

Fighting it out for second place in the M. I. A. A. after both teams have been defeated by Maryville, the Miners and Springfield will square off here Saturday, and if respective scores against Maryville are an indication of the final outcome, it will be a tossup.

Maryville overcame the Bears, 21 to 0, and then swept over the Engineers 17 to 0 which would indicate that both the Miners and Springfield are of the same caliber.

The Bears will be aiming for the Miners and present plans call for a special train to carry 250 rooters from Springfield for the game. Coach Harold Blair is now in the middle of a campaign to revive football interest in Springfield, and although the Bears received a setback by Maryville, interest is still at fever heat.

Injured Players Ready

Coach Gale Bullman said today that none of the Miners were injured in the game Saturday against the Maryville outfit, and that all of the players would be back in the game except Wayne Bennetson, a substitute guard. Bennetson still has a weak knee, and is not able to do much running.

Otis Taylor, one of the half-backs, will probably see action although he missed the Maryville game altogether because of a bad knee. Bob Bruce, Joe Strawn and Bob Nevins, all ends, will be back in action to relieve Kane and Nicola, who have been doing most of the heavy work.

Eugene Hammond, a tackle, has recovered from an infection of the arm, and is able to be in uniform again. Matz Domjanovich, substitute guard, is also back on the practice field.

Assistant coach Percy Gill scouted the Bears in their Kirksville game Saturday and said that he thought the Miners would have a good chance of trimming the Bears if they could devise a method to stop the razzledazzle type of football that Blair's outfit plays. He added, however, that the Bears have a much better team than last season, and it will be remembered that the Miners were beaten on the Springfield field, 19 to 7.

ous season which went down on the record books as follows. The team defeated Washington University 19 to 0, Missouri University 9 to 0, Arkansas University 40 to 0, Kansas School of Mines

WELCOME HOME, YOU MINERS!

Once again that time of year has rolled around for the straying alumni of the School of Mines to return to their old hunting grounds and live again for a day those four short years spent under the wing of their Alma Mater. Once again old grads will wander down Pine St. and recall that time when they snake-danced down the middle or loafed on the corner of Eighth and Pine on a Saturday night cussin' the town out for want of something to do. Once again will that ever-widening wall of the years be swept away and change the hardening engineer into the care-free student of yesterday.

On Saturday, Homecoming for the alumni of the Missouri School of Mines, will the students of today meet those who have gone before, the Engineers of Today. We extend our hand in welcome, you Miners.

IT'S A DELICATE BUSINESS

And now it's the Student Council which has its foot into it! Everything has been going serenely with the Council until some innocent member suggested that the School of Mines hold a Sadie Hawkins' Day celebration and that the Council arrange to import some girls from a neighboring college to make up for the deficiency of that species here in Rolla.

A report of that meeting was published in last week's MINER with the immediate result that the greater percentage of the Rolla girls went up in the air with a bang!

It wasn't the idea of a celebration in good old Dogpatch fashion that riled the weaker sex of our city, but the suggestion of an influx of alien girls to compete with those who have borne the brunt of week-end dances for years, that hurt.

We offer no suggestion as to compromise or pacification, but merely report the status quo. From here on it's up to Messrs. Tiede and his council to supply the girls and at the same time to keep peace at home.

THE MISSOURI MINER

Official publication of the Missouri School of Mines in the interest of the Students and Faculty. Published every Wednesday during the school year. Entered as second class matter April 2, 1915 at the Post Office at Rolla, Mo., under the act of March 3, 1879.

Subscription price — Domestic \$1.50 per year, Foreign \$2.00 per year. Single copy 8 cents.

IT WAS ONE DAY IN A HUNDRED

In retrospect of last Saturday's game with Maryville, we feel that a few remarks are in order. First, Blue Key deserves a lot of credit for the fine job it is doing on the game programs. For a non-profit service in the form of a self-paying publication, the programs are a welcome addition to our football games. It is a thankless job which is well handled.

The crowd which attended the game was one to make Miner history. Overflowing the bleachers, it was one of the most sympathetic audiences the Mienr eleven has ever played for. The large percentage of parents present added a flavor to the afternoon which will not soon be forgotten.

Of course, it is always easier to make decisions on plays from the stands than from the field, but in spite of the recognized superiority of the referees in the technical points of football, we feel that Coach Bullman has quite a bone to pick with one of Saturday's officials.

Alpha Phi Omega has taken a commendable interest in the appearance of the field, starting with the erection of three flag poles above the bleachers for the American flag, the visiting school's colors, and the School of Mines flag.

We feel that a little more activity could have been displayed by the cheer leaders. The crowd was willing, but began to lose interest in cheering because of its infrequency.

Last but not least, the team itself put up a terrific fight against heart-breaking odds and questionable decisions. Actually outplaying the steam roller eleven from Maryville many times during the afternoon, the Miner team displayed that fight and bulldog tenacity for which the School of Mines is famous.

A FEW SUGGESTIONS

It has been suggested by Dr. Miles of the Mechanical Engineering Department that someone be delegated to make a small cannon to be used at football games and other appropriate times during the school year. The full facilities of the machine shop would be available, plus most of the material needed. If approached in the right manner, Professor Kilpatrick would be glad to help in the project.

Another addition to our field would be a larger, semi-automatic score board. Surely such a thing would not be beyond the ken of at least a few of the eight hundred or so engineers on the campus.

A revamping of the sidewalk system on the campus has been repeatedly begun and left hanging fire. It is a needed improvement, and should receive more attention now than ever with our unusually heavy enrollment.

From the DIRECTOR'S OFFICE

by
DR. W. R. CHEDSEY

To those whose parents were able to come to our Parents' Day last week there is the undoubted reaction that the day was a pleasurable and successful occasion. To those others whose parents for any reason could not get here I want to express my feelings as many parents wrote in saying that they would be with us in spirit rather than in person, and that even in the cases where they did not happen to write we feel that they still were appreciative of the occasion. I also want my pleasurable feelings to be known to those students who helped out markedly in the program even though their own parents could not come.

Our next occasion is Alumni Homecoming and I know that our present students can get a good deal of background information by mixing whenever possible with the returning alumni. Furthermore, as these years roll around remarkably fast, it won't be long until you, too, will be looking forward to the possibility of returning as an alumnus on Homecoming Day.

In many schools the graduating classes and the alumni on certain five or ten-year reunion periods have little exercises in which they leave their mark on the school by some little gift: a tree planted, or ivy started in certain places, or a stone seat, or some other little memorial to the class. Such memorials serve as a center about which to renew memories as the reunion days and return trips to their alma mater take place, and it might be worthwhile thinking about what you and your class might want to have as a central theme when you return here as alumni in the years to come.

Wm. R. Chedsey.

HOSPITAL NOTES

Those in the hospital this week with various troubles are: J. Karbosky, N. Jaffe, R. S. Burberry, M. Domjonovich, Jane Hall, E. F. King, E. C. Null, E. R. Dowling, J. Link, G. Dahm, Don Lindberg, E. C. Meyer, D. J. Creelius, G. MacMurray, P. Chapman, Kenneth Hardine and R. L. Topper.

So They Say—

Prof. Orten, economics expert: "My favorite corporation is the Rubber Keyhole Company, Inc., which manufactures rubber keyholes that automatically close when the key is withdrawn, thus preventing embarrassment from keyhole peeking."

Bob Fields, junior Shamrock: "Go to war? Why, we can't go to war now, not right in the middle of the football season."

Clyde Cowan, Miner editor: "A paper cannot be published late and continue to exist."

Lieut. Powers, military man: "Every time I go home, my mother buys about three dozen ash trays to keep me from burning up the furniture with my abandoned cigarette butts."

Dr. Monroe, p. chem mentor: "This point is almost perfectly exactly in between the middle."

'Boys May Be Boys', but Miners Are In a Class by Themselves

By Charles Koch

"Boys will be boys." How often we have heard that expression used to justify the pranks of a group of red-blooded boys. Miners, certainly, can not be placed in the same category with every other college group simply because they are of the same age or have similar interests and ambitions. Several tales from the past will well exemplify this Miner spirit that sets the Miners apart from other college students.

We old-timers will never forget the morning when Prof. Dean walked into his office in the old Rolla Building and found to his dismay a good sized bull calf in full possession.

A few years later the boys stripped Prof. Dean's white horse "Columbus" with bright green paint and led him in the St. Pat's parade.

Painting the water tank with freshmen class numerals is an old custom which was climaxed a few years ago when the boys balanced a wheelbarrow on the very top.

Dr. Drake, deceased head of the geology department, had a very fine petrified tree stump of which he was quite proud. Imagine his dismay when he discovered that during the night it had been painted a brilliant shade of green in preparation for St. Pat's.

Many of these pranks were played back in the days when the seniors dressed in green caps and gowns for the St. Pat's Nighting Ceremony.

The boys used to cut classes after each football victory. For years the faculty dreaded the

coming of the circus because the entire student body cut classes to go see the performance. Back a good many years on the record card of each student in the entire school we find one negative hour for a "circus cut". These cuts were not removed in any instance and several fellows failed to graduate due to the lack of one credit hour. Needless to say, this put an end to the circus cuts.

The Triangles believed in keeping a check rein on the first summer school teachers. They painted instructions on the bleachers of the athletic field explaining in terms that only a Miner would use, just how the teachers were to conduct themselves on our campus.

The boys who hoisted the roller for the track up on the flag pole did a nice job of permanent waving, but a "slicker" job was done by the boys who hoisted their class flag, tied up the rope, and greased the pole as they came down.

Free shows are now a thing of the past with insurance laws requiring that a small charge be made, so a new phrase is coined, "free for a nickel." Years ago the students tried to "crash" the show upon numerous occasions. Refusal was occasionally met with a barrage of rotten eggs and tomatoes. Upon one occasion the boys obtained entrance on a cold wintery night, so the management refused to show the picture, turned off the heat, opened all the doors and froze the "first sit-downers" out.

We've reminisced long enough and leave after saying that "boys may be boys," but Miners are in a class to themselves.

Collegiate Review

(By Associated Collegiate Press)

Salaries of Barnard College graduates and undergraduates who were given positions through the college occupation bureau last year totalled \$173,443.

The University of Illinois is constructing new campus buildings at a cost of \$3,400,000.

Portuguese has been added to the long list of foreign languages taught at the University of Texas.

The Ohio University football team was undefeated in a home football game from 1927 to 1937.

A special course in the Russian language and literature has been added to the Cornell University curriculum.

University of Wyoming students last year spent \$64,500 in membership dues in student organizations. \$23,373.75 was for national dues, pins and initiation fees.

Thirteen University of Texas students were on the British ship Athenia when it was torpedoed at the opening of the European war.

Cinemas Fredric March is leading a drive for funds to provide technical equipment for the new University of Wisconsin theater.

Of Capital University's 1939 education graduates, 72 per cent

have been placed in teaching positions.

It would take one person 141 years to complete all of the courses offered by the University of Texas.

Of the 1,500 different types of positions for which the U. S. civil service commission offers examinations, only approximately 200 require a college degree or its equivalent.

Louisiana State University has been placed on probation for six months as regards federal student aid.

New York City's four municipal colleges enroll more than 52,000 students yearly.

This year's college and university enrollment in the U. S. is expected to total approximately 1,400,000.

Exactly 260 college and universities are participating in the pilot training program of the Civil Aeronautics Authority.

The libraries of U. S. institutions of higher learning contain more than 62,000,000 bound volumes.

During the 1938-39 school year 200 colleges created some 300 scholarships for foreign refugees.

Twelve special students have been selected to take every course offered at Oglethorpe University. It'll take each one six years to complete the task.

Theta Kappa Nu and Lambda Chi Alpha, national social fraternities, have combined under the name of the latter group.

Pennsylvania State College is considering establishing a special training course for truck drivers.

The only Gaelic college in North America is located at St. Anna's, Nova Scotia.

The Universities of Texas, Oklahoma and California at Los Angeles have been given special Will Rogers Memorial Scholarship funds.

Forty-one foreign nations were represented in the student body of Columbia University's summer session.

A monumental Concordance for the work of Ovid, the Latin poet, has just been completed at Catholic University. It weighs 13 1-2 pounds.

Talladega College had adopted a program whereby all members of the student body, staff and faculty participate in making and executing the controlling policies of the institution.

A University of Illinois scientist has discovered a method of determining the taste of cheese by x-ray photos.

The Harvard University chapter of Phi Beta Kappa has voted to have "spirituous liquors" at its annual banquets.

American foundations in 1937 (latest year for which statistics are available) gave \$9,170,318 to educational institutions.

Mayor F. H. LaGuardia and all of his commissioners will give a lecture course this year at New York University on the city's government.

Goddard College is believed to be the only institution of higher education in the U. S. that does not use academic regalia at commencement exercises.

Each Hunter College (in New York City) student spends an average of 1,650 hours riding subways during their four years in college.

The University of Chicago has an endowment fund of \$65,400,000.

Some 70 college and university presidents are graduates of Indiana University.

Some University of Louisville buildings originally housed a juvenile reform school.

The federal government spends \$14,000 for every student graduated from the U. S. Naval Academy.

Glider Club to Have New Winch

At the last meeting, Wednesday, the Glider Club voted to have a new power winch made to replace the tow car which has been used to launch the club's glider. The glider itself is to be thoroughly overhauled, and new cables installed.

The club announces that, although the membership is limited, there are several openings at present due to the graduation of some members last year.

QUESTION:

Why are Brackett, Heinecke, Farrell, Perry, Fillo, Carr, Peters, Ladd, Hall, Kozy, Burgess, Leake, Bruce and Andrea living high this week?

ANSWER:

Because they cleaned the Triple-N Syndicate last week. Why not you?

R. O. T. C. Plans Observance of Armistice Day

Tentative plans for the R. O. T. C. include a parade in Rolla by the regiment and band, most likely to be given in the morning. There will also probably be an exhibition of platoon drill to interest visitors, showing the features of the new infantry drill. Some consideration is being given to a exhibition by the Detonators, at a street intersection in Rolla, some time during the day.

The local post of the Veterans of Foreign Wars again this year is offering a slide rule to the winner of the individual competitive drill. This competition is open to all basic military students, and will be run off in the early afternoon.

The R. O. T. C. is cooperating with the V. F. W. in arranging the Armistice Day events. Final plans will be announced during the latter part of this week.

BAND

(Continued From Page 1)

band accompaniment. Overture "Poet and Peasant" by Suppe.

We are informed by Mr. Scott, the musical director of the band that the ten new members are hand-picked from this year's crop of applicants and are doing good work.

At the St. Louis U. game recently this band was the only one on the field. This meant twenty-eight more rooters as well as tooters (in the rain) for our team.

Following is the new personnel: Clarinets: Stewart, Smith, Katz, Lindberg, Mackey, Heddel and Coolidge.

Trumpets: Stewart (R. S.), McFarland, GaNun, Meyer, Hubbard and Smothers.

Altos: Jones, Beveridge and Barton.

Trombones: Hall, Dunn, Wilson, Steen and Peterson.

Baritones: Engle and Wilson (A.)

Basses: Stowell, Miller and Schuman.

Drums: Collier, Eater and Johnson.

Lieut. W. F. Powers, Manager

D. S. Lindberg, Drum Major.

Jno. W. Scott, Musical Director

Rolla Girls Coed Officers at MSM

Miss Virginia Schultz, daughter of Mr. and Mrs. Jack Schultz of Rolla, has been elected president of the Coed Club at the Missouri School of Mines, and Miss Marie Davis, daughter of Mr. and Mrs. Chester Davis of Rolla, has been elected secretary-treasurer.

The club this year is composed of nineteen members. They are planning a dance at the Parish House on November 10.

Presbyterian Young People

The Young People's Society of the Presbyterian Church are planning a Halloween party for Oct. 31. It will probably be held at Nagagomi Lodge. Those wishing to go will meet at the Westminster Club at 4:30 p. m.

PARENTS' DAY (Continued From Page 1)

Three hundred and fifty-four parents were present at the Parents' Day Banquet which was held at the Sinclair Pennant Hotel at 6:00 p. m. Dr. Chedsey, as toastmaster, welcomed the visitors and introduced Senator Allen McReynolds of Carthage.

Senator McReynolds told the group that the day of the three R's and the little red schoolhouse no longer exists. He said that in their place come the highly trained men from the best universities in the country. "The engineers, he said, 'have solved their problems of production of wealth and it is up to the lawmakers to solve the problem of distribution of wealth so that it would be available to all people'". Senator McReynolds went on to say that due to the foresight of our forefathers who wrote into the constitution that a certain proportion of state revenue be allotted to education, Missouri is doing more for education than any other state similarly located.

Senator McReynolds, a graduate of the University of Missouri, has been prominent in state politics for years. He was first elected to the Senate in 1934 and since then has become an important figure in senatorial work. He has served as chairman and member of committees including the committees on Mines and Mining, the University, and the School of Mines.

After Senator McReynolds' talk Dr. Chedsey turned the meeting over to Mr. H. T. Cross, the President of the Association for the Advancement of the Missouri School of Mines, who told the parents the purpose and activities of the organization since it was first started last year. Its prominent activity at the present is sponsoring the drive for appropriations for the new chemistry building.

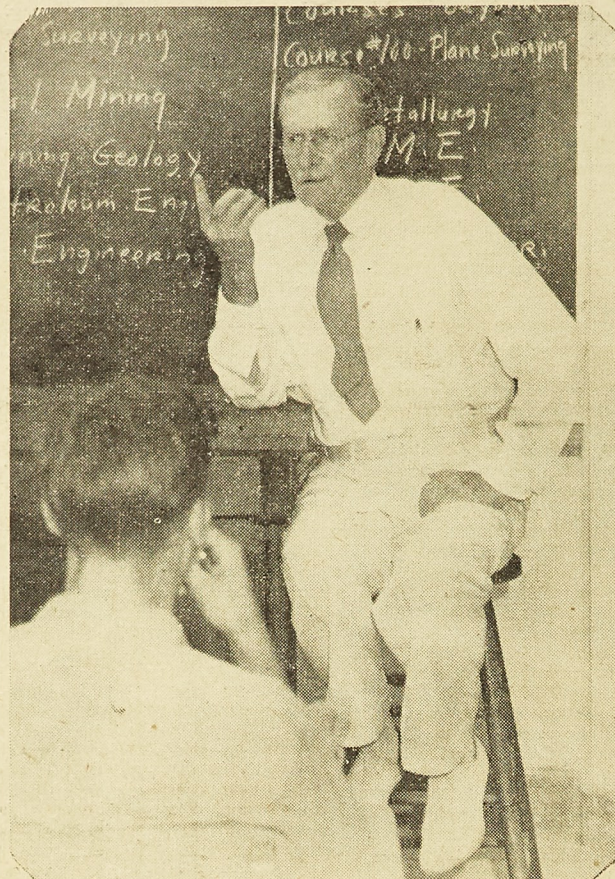

INTRAMURAL Sports

By C. M. Stevens

The Frosh gridders lost their second game of the season last Monday to the Sigma Pi team by a score of 20 to 7. The Frosh were in there battling every minute of the game, and were on the Sigmas' ten-yard line at the end of the game. Three passes to Tonski, Dieter, and Allen respectively netted the Sigma Pi nine their total score. The Frosh's lone counter came from a pass, Keller to Neustaedter, and Antone kicked the conversion.

Alpha Lambda Tau dropped their first encounter of the season to Lambda Chi with a score of 19 to 0. There was no scoring by the Lambda Chi team in the first half, but they scored at the opening of the second half when Lyons intercepted a pass and crossed the line. Wild Bill Romine scored the second touchdown on a returned kick, and Fort took a pass for the third. The A. L. T. nine had outstanding passing attack and completed considerably more than the Lambda Chi team. The Pi K. A. team came through with their second straight vic-

Historical Lecture Commemorated

An enlargement of the above picture of Prof. Harris lecturing to the first class in the new Harris Hall is to be presented to the Civil Engineering Dept. by the A. S. C. E. chapter here for hanging in the new building.

tory Tuesday evening by defeating the Sigma Pi outfit, 13 to 0. The Sigma Pi team had won two games previous to this one. Tex "Flash" Gordon delivered the first touchdown when he crossed the goal line on the long end of a pass. Ridley crossed the stripe for the second counter and booted the conversion.

The Sigma Nu's won their second game of the week by handing the Kappa Sig's their second defeat of the year with a 6 to 0 score. The game was played up and down the field and it was a question of who crossed the line first. The blow fell when Johnny Wise wound up across the Kappa Sig's goal line with the ball in his hands. Johnny scored when a pass from Winkle was knocked down and Johnny caught it while looking for a quarter he lost last year.

The Juniors defeated the Theta Kappa's last Tuesday 7 to 0. The two teams battled up and down the field for three quarters of the game before any score was obtained. In the heat of excitement, when it looked as though it might end up in a tie, McGhee, brilliant Jr. back (Cross, stated the former) picked up a punt and gracefully bounded across the goal line. Ramming Red Cross booted the conversion. (This summary is based entirely upon Red's word.)

The second victory for the Sophs came through a 12 to 7 victory over the Sigma Nu's. John Nevin starred for the Sophs by chalking up a pair of touchdowns, on passes from Comoglio. Johnny Wise and Winkle formed the passing attack of the Sigma Nu's.

This game leaves the Sigma Nu's with a total of two wins and one loss.

The A. L. T. outfit met defeat for the second time this week by taking a 12 to 0 trimming at the hands of the Seniors. Jack Tiede played a bang up game for the Seniors, delivering two long passes into the hands of Stewart to give the four year men a 12 point lead, which was held throughout the game. Jack tossed a number of completed passes throughout the forty minutes of play.

The Lambda Chi's defeated the Frosh nine Friday night 25 to 0. The Frosh were in there every minute of the game and played a nice game. They just lacked that punch when it was actually needed. The Lambda Chi team scored two touchdowns on four straight plays at the beginning of the game, but were held to that score throughout the first half. Romine and Walker tallied a single each and Fort scored a pair. Walker kicked the extra point.

The Kappa Sigma team overpowered the Kappa Alphas Friday, 28 to 0. This gives the K. A.'s three straight losses, while the Kappa Sigma's stand one win to two losses. Al Sindel connected with Myrick, Newman, and Blair, Blair handling a couple of Al's passes, to tally the Kappa Sig's four touchdowns. Sindel also

Scientific World

By Gene Martin

Sunshine can now be "canned" and carried from place to place. Florida sunshine shed its glow at the New York World's Fair one day, playing a role in ceremonies at the Florida State Exhibit Building. Flown from Jacksonville in inert form, the sunshine had been absorbed by luminescent powder and "canned" by being frozen in liquid air. The feat of transporting solar energy inert was accomplished successfully for the first time by Samuel G. Hibben, lighting engineer for the Westinghouse Electric Co. In absorbing light energy, scientists believe, the luminescent powder actually undergoes a change in physical structure. The theory is that the outermost orbits of electrons, which make up the atoms of the powder, are moved from one energy level to another when excited by impinging light actually imprisoning some of the light. Then the electrons return to their normal positions, and in so doing, give out the light energy which they have imprisoned.

Diamonds actually fall from the sky. That diamonds really exist in meteorites has just been demonstrated for the first time by X-ray examination of hard,

black crystals from the large meteor crater in Arizona. The present specimen was obtained by the Smithsonian Institute in Washington, D. C. The suspected diamond inclusion was ground out and studied by the most refined methods. They were found to be genuine diamonds. The diamonds in the Smithsonian specimen, although not of gem quality, are more valuable than medium-rate gems because of their important use in industry.

Tests Given by Dr. C. V. Mann

Dr. C. V. Mann, head of the drawing department, and two student assistants, K. L. Hardine and W. P. Leber, went to University City Friday to give strong interest tests in the high school.

Hardine and Leber returned to Rolla Saturday morning, but Dr. Mann was detained by business until Sunday afternoon.

Rollamo Copy Is Being Turned In

The first installment of Rollamo copy was turned in at the Rollamo meeting held last Thursday night.

This year's Rollamo will be printed by the Carpenter Press at Oswego, Kansas, instead of being printed by the Arcraft Press which did the job last year. The color scheme for this year's Rollamo is to be red and black.

Maryville Sweeps to 17-0 Win Over Miner Grid Team

The hard running of Bill Bernau of the Maryville Bearcats spelled defeat for the Miners here last Saturday as the Teacher team swept on to win 17 to 0. Maryville's big line was able to open gaps in the Miner line to allow the backs to make sweeping gains also holding the Miners to a virtual standstill for the first half.

The Miners opened up in the second half and had control of the game but were unable to push over a score when "H" Ladd broke through to make a beautiful 56 yard run but was forced out on the 8-yard line. The Miner defense clicked in the necessary pinches but Maryville's heads-up ball players were always on the alert for an interception and played every break to its full advantage. Time after time the Miner defense staved off a goal line rush only to be forced into another defensive stand from an interception or a misplay.

The first score came in the opening minutes of the game when Bill Bernau booted a well placed kick out on the 5 yard line. Dick Cunningham, forced to kick from behind his goal kicked out and McLaughlin, running behind beautiful blocking ran the ball over for the first score. Kurtwright was brought into play and his educated toe added another point.

Soon after Bernau intercepted Cunningham's pass on the 17 yard line and on the next play drove it to the one yard line. The staunch Miner defense forced the Bearcats back 15 yards in 3 plays so Kurtwright was again brought into play and a field goal was kicked placing Maryville in the lead by 10 points.

The Miners opened their aerial attack and brought Bob Nevins, who has been on the injured list since the St. Louis game, in to catch the passes. The Maryville pass defense and the inaccuracy of the passing allowed many passes to be intercepted and most of the gains by the Miners had to be made on the ground.

The Miner secondary defense held out good with Spafford, Cook and Schumacher doing a great job until four minutes left in the game the Miners found Maryville knocking on the goal line door from the 1 yard. Forced back once and a 15 yard penalty found Maryville far back from their original position but in 4 plays Bill Bernau brought the ball over the line for the last score of the day. Kurtwright again kicked the point making the final score 17 to 0.

B. S. U. Hayride

About thirty young people attended the hay ride sponsored by the Rolla Baptist Student Union Saturday night. Due to a seeming scarcity of hayracks in this community, a flat bed truck was used, and in lieu of hay, a quantity of straw was put thereon. Despite the substitutes, a fine time was had by all. The party rode to the Walnut Grove woods, where games were played and refreshments served.

Round the MIAA

By W. J. Bennetson

Maryville's Bearcats invaded Rolla Saturday to capture their 18th victory in as many games, and gain undisputed possession of first place in the Missouri Intercollegiate Athletic Association race. McLaughlin and Bernau counted for the Cats touchdowns with Kurtwright booting the extra points. Vogel chalked up three points with his field goal to round out the 17-0 score. The Miners threats were stopped by a hard fighting Maryville eleven. At Springfield the Bears trounced the Bulldogs of Kirksville 27-0 before a large homecoming crowd. Brasher chalked up two touchdowns, while Rimmer and Grider hung up one apiece. Kirksville was unable to get past the 30 yard stripe in the Bears territory. Thus the Bears moved into a tie with the Miners for third place. Warrensburg and Cape Girardeau battled to a scoreless tie on the Indians field. Each team penetrated past the 10 yard stripe only once in the game. Twice the Mules unsuccessfully attempted field goals in an attempt to break the deadlock, once in the closing minutes of the game. The Indians are now in possession of second place at the end of the second week of conference play.

Next Saturday the Springfield Bears will appear in Rolla as part of a homecoming celebration and will again attempt to upset the Miners as they did last year. Boosters of the Bears have chartered a special train so that they may attend the game and support the team which is heralded as the best to come out of Springfield in a number of years. The Miners should emerge victorious and move into second place in the race. This is the only conference tilt scheduled for this weekend. However, three of the teachers colleges are taking on non-conference foes. Maryville is host to the Teachers from Chadron, Nebraska; Warrensburg journeys to Kansas City to meet Rockhurst, and a Carthage College eleven invades Cape Girardeau.

Present Team Standings

Team	P	W	L	T
Maryville	2	2	0	0
Cape Girardeau	2	1	0	1
MINERS	2	1	1	0
Springfield	2	1	1	0
Kirksville	2	0	1	1
Warrensburg	2	0	2	0

1914 TEAM

(Continued From Page 1)

87 to 0, Drury 68 to 0, Pittsburg Normal 104 to 0, Kirksville Osteopath 150 to 0, and the last game held on Thanksgiving Day ended in a 63 to 0 score in favor of the MINERS. The team easily carried off honors as "State Champions" and they were in line for the "Missouri Valley Title." Many of the men who once played upon these will be here this week-end to see the MINER Team take on Springfield Teachers. This years MINER team is confident that they can give the teachers quite a struggle and maybe show the members of the 1914 championship team a few new tricks. It is slated to be quite a game and Coach Bullman's charges are prepared for the contest.

In The SPORTLIGHT

By Les Payne

Letter men in three sports at M. S. M. are about as rare as the proverbial snowball in July. This week we take up one of those rarities for consideration in the person of Joe Oliver Strawn, football man, basketball man and track man.

Strawn was born at Newburg, Missouri, November 20, 1916. He moved to Morrisonville, Illinois, while still quite young, and has spent most of his life in that town.

At Morrisonville High School, Joe "majored" in track, baseball and basketball. He even studied, he admits. In addition to lettering all four years in each of the three sports, Joe was captain of the baseball team in his Senior year. It is quite possible he would have been a four letter man in high school had football been on the school's athletic calendar. As it was, he had to wait until coming to Rolla to take up football.

"Tarzan" Strawn, as he has been appropriately nicknamed, is the only three-letter man in school (if our information is correct), and is one of the few men to win letters here in three sports. He lettered in football in his Freshman year, was out of school the following fall semester, and lettered again last year. This year he has played in every game to date, and is playing a much improved game at the end position. His letter in basketball was earned in his Freshman year. Since then he has not played as a regular, largely because he missed one semester of school. Track letters were earned in the spring of 1938 and last spring, both in the discus event.

Joe's activity list shows membership in the Independents, Engineers Club, A. S. C. E. and "M" Club. Last year he was on the Independent Board of Control and also a student assistant in Phys. Ed. He is, in addition, an active worker in Christian Endeavor work at the Christian Church.

Strawn is enrolled in Civil Engineering and has completed five semesters toward his degree. He will graduate in 1941, rather than next Spring, and hopes to get work out of doors after graduation. Joe is just another hard working boy trying to work his way through school and take an active part in school activities at the same time.

Dick Cunningham is the type of football player who plays for the sheer love of playing. He is a fighter all the way through—a typical "fighting Irishman"—and can take it as well as dish it out. As a football man, he is noted for his hard tackling and all round rough and ready style of play. His favorite plays are off-tackle plunges and spinner plays. He is also an excellent passer.

Cunningham is another St. Louis product who has made good with the Miners. Born in St. Louis on March 23, 1917, he received his high school training at Ben Blewett High School in St. Louis where he saw action in

three major sports. Dick lettered two years in football, three in baseball and three in basketball at Blewett. In his Senior year he was co-captain of both the football and baseball teams.

Since coming to Rolla, Dick has missed but one game of football, and that was due to an injury sustained in his Freshman year in a game against Maryville. This is his third season as a regular at the left half back position.

According to Dick, the team this year is the best in the three years he has played. He bases this statement on an improved line and a stronger and more experienced backfield.

Cunningham's basketball playing at Rolla has been restricted almost exclusively to intramural competition. Last year he was high point man for the season in this sport. He has also won the boxing title in his weight for two straight years in intramural competition, although he fought in different weight divisions each year.

Dick's activities include membership in the Independents and Student Council alternate for this year.

Turning to the more serious side of school life, we find that Dick is enrolled as a Junior in Civil Engineering in which he expects to receive a B. S. degree next year. However, he admits he

Triangles Win Softball Trophy

The Interfraternity softball trophy for last spring was awarded to Triangle by the flip of a coin at the Interfraternity meeting last Thursday. This was necessary because a playoff could not be arranged between the two tied teams.

An interfraternity dance was discussed but the final matter was deferred until each representative could obtain the sentiment of his fraternity on the details.

Farnham Is Head of Phi Kappa Phi

Election of officers took place at the first meeting of the Honor Society of Phi Kappa Phi, held Tuesday, Oct., 17. Elmond Claridge, who graduated last year, was elected president. Other officers are F. C. Farnham, vice-president; W. J. Jensen, secretary-treasurer; J. M. Wilson, journal correspondent.

The society also discussed plans for the coming year before adjourning.

would rather have a job coaching football than work as a civil engineer.

READY FOR WINTER

MODERN CLEANING

Insures Fine Appearance!

We'll put life back into your winter clothes... and make them good looking for winter wear. Strictly modern cleaning methods are your guarantee of good results—garments are so perfectly cleaned that the original color and pattern of the fabric will be restored as good as new. And yet, Modern Cleaning costs no more than any other.

THIS COLLEGIATE WORLD

(By Associated Collegiate Press)

"No. 1 Dodo Boy" is the new title of Slapsie Maxie Rosenbloom, actor-fighter-night club operator. He has been voted this new honor by the University of Southern California chapter of Alpha Gamma Delta because "he is the one actor in the film industry with whom we positively would not wish to be stranded on a desert island."

A bit of a wag is C. C. Hurd, mathematics instructor at Michigan State College. On the door to his office is the following injunction:

"Please knock before entering. If you don't give a rap, you won't get an answer." Maybe the last part of that should have read, "you won't get Hurd."

Rules from the 1860 student handbook of Westminster College that make us glad we're collegians in 1939: "Attendance on circuses is not allowed, and students are never allowed to be on the streets nor in the stores, about town, except on business, which is to be promptly attended to; nor to be away from their own rooms, except at appropriate times for recreation in some inoffensive and honorable manner."

Practice Court-Martial Held by Senior R. O. T. C. Officers Here

By Van

Amid all the ceremony of a military procedure, and under the meticulous criticism and direction of Major Gordon, the senior R. O. T. C. officers played at court-martial Monday, Oct. 16. The accused in the case was Private Eugene Light, who was charged with burglarizing the home of Lt. Kelly and stealing a gold watch, and further, with absence without leave.

As witnesses were presented, questioned, and cross-examined, the story behind the trial unfolded.

Pvt. Light was reported missing on the morning of Sept. 2, 1939. He failed to reappear until Sept. 16, 1939. On the former date Lt. Kelly reported that his house had been broken into but it wasn't until later that he told of losing a watch. Light had

Left to Right: Cotterill, Sturgis, Dennis, Rushing, Andresen, Alford-President, Riege-Law Member, Cowan, Donahue, Lorraine, and Welch.

The proceedings opened when the President of the court, Col. Rex Alford, called the court to order. The trial Judge Advocate in the person of Capt. A. Tucker read the court order and offered the defense, Capt. Clyde Cowan, the opportunity to challenge any member of the court which was previously appointed. Cowan first dismissed Capt. Coon. Each side is allowed one such preemptory challenge in which the reasons need not be given. Lt. Cotterill and Maj. N. Tucker were challenged, but neither charge was sustained. Capt. Buck was excused for having drawn up the charges. From time to time during the proceedings Maj. Riege, the law member of the court, was called on to interpret various points of the law. The trial progressed much the same as a civil trial. worked around Kelly's house so that at Sgt. Rakaskas's suggestion, Kelly sought and found his watch in Isaac (Les) Payne's pawn shop.

Pvt. Light testified that he had found the watch on Kelly's lawn. That night he lost considerable money in a crap game. When his sister was taken sick he was forced to pawn the watch so he might take her home. He was acquitted of the Larceny and Burglary charges but was found guilty of AWOL.

A little humor crept into the strict proceedings when the double

personality of Sgt. Lorraine and Lt. Kelly suddenly found he was married and had 3 children.

This mock Court-Martial is a practical application of the Advanced Military Course in Law.

Working Our Way Through College

By Gene Koeller

Our man of the hour at present is Allen Summers, that studious junior with a 2.8 grade point average. He comes from Swamp-East and therefore is alleged to have webbed feet. Maybe this is the reason he is able to wade through these brain wracking classes at M. S. M.

Allen's home town is Tallapoosa; don't mind if it is spelled wrong as the natives can't do any

better. He went to Gideon High School.

After working around here and there he entered Gen City Business College at Quincy, Ill., in 1933. He studied there until 1935.

In 1935 Allen went to work in the office of A. P. Green Fire Brick Co., at Mexico, Mo., and stayed in their employ until 1937. At this time the Engineering bug bit Allen and he enrolled at M. S. M.

During his freshman year Allen obtained a job in the Physics Department and has worked there for three years. He does stenographical work such as typing quizzes and other material for class work. He jokingly says that a nominal sum paid him will pass anyone with an E or according to the amount paid any other grade. Fs' of course, are omitted.

During the summer Allen has a standing job with the A. P. Green Fire-Brick Co., as a stenographer. Nice work if you can get it.

When not working or studying, Allen is a high flier. Anyway, he is president of the glider club, but we can't say how high he flies. Allen is also president of the Baptist Student Union Council, a member of A. S. M. E. and S. A. M. E., and also a member of the Independents.

YOU KNOW THEM TOO

by Jane Hall

The spotlight this week turns toward Eugene Olcott, who finds the life of a senior a busy one. He believes in not letting studies interfere with other activities, but in the past three years he has found out there was nothing much else to do except study. This boy, whose home is in Webster Groves, Mo., thinks Rolla is conducive to studying but undesirable generally.

Mr. Olcott is president of the Shamrock Club, Renget of Theta Tau, Vice-president of Independents and a member of Tau Beta Pi, St. Pat's Board, Blue Key, Student Council, and the General Lectures Committee. Last year he received a letter for being on the rifle team.

Through his work with the Student Council and Theta Tau, Mr. Olcott has come to the conclusion that there is a great deal of room for improvement at M. S. M.

He thinks not only the equipment could be bettered, but some modifications within the faculty might raise the general standards of the school. He marked that it is practically possible to amend these ills cause the responsibility can be fixed upon a certain person definite group.

In a less emphatic manner Gene complains that the class are too large for the size of school. Too much emphasis placed upon studying and not enough upon social life. Olcott leaves the presence and influence of co-eds is an improvement in school, for he thinks it helps rowdiness at a low ebb.

Eugene would like to set down after graduation and become a family man. He does look forward to a big career, cause he feels as though it requires too much worrying, which he definitely doesn't want.

Before he came to school, Gene spent most of his time and money on radios. He is very good radio repair work. Now in spare time, he goes bicycling "get away from it all, and relaxation of mind and exercise of body". Gene "dabbles" in the sports but prefers hunting and fishing.

Eugene is not a moody person and has a remarkable control of his temper. He lives a balanced and well planned life letting few things interrupt original intentions. He has excellent managerial ability.

An example of this can be found in his control of finances of the Shamrock Club last year. The prosperity of this new organization is due to him in a large part. Olcott treats his time and his money, he uses it to such advantage so as to get maximum returns. Cramming isn't in his dictionary. He will start to study several days ahead of tests. Another trait of his that makes good study habit, is his ability to concentrate. There can be a most interesting "bull session" going on in his room but this does not disturb him. When he studies he always has something to show for it.

In The Bench

By Bob Nevins

I guess the less said about last Friday's game, the better it would be, but there are a few points that caught my attention which I thought I might pass on to you. Thirteen inches meant the difference between defeat and victory on Saturday. The ball which Bob Bruce recovered after Cunningham had touched Cunningham's high punt, rolled just foot out of the end zone. Had he recovered the ball 12 inches further we would have had 6-0. The other inch which beat us on Harley Ladd's swell yard run. He just barely had the chalk line on the 13-yard line, so 6 more points were tied. Those points would have us in the lead and it is doubtful that they would have scored last touchdown if we had something to fight for. The opinion of most of the squad, this year's Maryville team would not stack up very well against their outfit which is 21-0 in the dark at Maryville last year. This may be because Stanley Pele, Bernau's roommate last year, took his ball talents to a more fertile field (financially). For our team—Cunningham's game has greatly improved but opposition has a knack for being on the spot to return fumbles. Passing attack seems to be lost since last year. Three passes were completed afternoons and about 20 were intercepted. Take it from me, it'll be a different story next year. Last week our injury situation was beginning to be manageable. Hammann had an abdominal elbow; Bruce, Strawhun, yours truly were laid up with bum knees. Bennetsen and Nett had sprained ankles; Taylor has a chipped bone in his knee. He may not see in for 2 or 3 more weeks. We'd be a little stronger, physically, against Springfield than we are against Maryville. I vote for the All-American to go to "Kozy the Pup" stance and cigar at the half. We were getting our 2nd instructions, was a riot. Bull had to detour around him.

Westminster Club Open to Miners

The Westminster Club maintains recreational and social rooms at 709A Pine Street. The facilities are available each day for men attending the Missouri School of Mines. There are no dues or other obligations attached to the use of the recreational features. According to the management of the Club it is operated solely for the pleasure and socialability of the Miners.

Once a month on the First Sunday evening refreshments are served at 6:00 and those wishing may remain for a forum at the 7 o'clock hour. The Westminster Club is supported by the St. Louis Presbytery and the local Presbyterian Church.

If you have not visited the Club you are cordially invited to do so in the near future. Suggestion which will make the Club more serviceable to the Miners is solicited.

Radio Club Will Stop Announcing

It was announced at the meeting of the Radio Club, Tuesday, that there will no more announcements at the games because the athletic board has refused further financing of the public address system.

The club this week altered two points in its constitution. The first was to make the station manager's job an appointment of the Electrical Engineering department. The second alteration stated that members not present at one half or better of the club's regular meetings will be subject to expulsion.

The club heard talks by Ralph Alsmeyer on frequency measurement and by Dan Lynch on vacuum tubes. Alsmeyer and Lynch were appointed to present a list of topics for discussion at the next meeting.

every time he passed Kozy in his pacing.

Don't forget what I said about our passing attack. Unless someone looks at me hard during the coming week and I throw an ear or something out of joint, I'll see you from on the Bench on Saturday.

Off the Campus

By George

The Triangles ought to hold their dances in a larger place. What do you think? Football players who come to a dance to sleep ought not to come. Gene Veale was not only tired. The Varsity Orchestra is still hooting but one of the members is getting rather tired of it all, could it be that sour note we heard.

Pi Kappa Alpha is getting things in shape so they can hold their pledge dance next Friday. We'll be seeing you there.

Among the week-end guests at Sigma Nu were Mr. and Mrs. J. V. McConnell, Mrs. Weeks, Mr. and Mrs. Paul Anderson, Mr. and Mrs. P. J. Hoener and their sons Ted and Alan, Mr. and Mrs. Milton and their daughter, Dr. Dorsett and Mr. Moll.

The alumni were represented by Mr. F. O. Blake, 1910; Alan Hoener, 1936; and James Miller, 1939.

On Friday, October 20, Sigma Pi Fraternity held its pledge dance for its pledges Joseph Zagata, John Walker, Robert McCallum, Charles Patton, Eugene Shaver, Leroy Allen, Edmund Butch, Anthony Gonski, James Prall, Richard Schmaucher, Carl Thompson, and Benjamin Weidle. It was a costume dance with prizes going to John Allen for having the best costume among boys and to Theta Finley and Mary Weideman who tied for the first prize among the girls. The rooms were decorated with strips of white and orange crepe paper and many balloons of all colors. It was the first dance of the season of its kind and this house received many compliments on its originality and the great amount of fun it held in store for everyone.

The parents of Charles Patton and Benjamin Weidle visited them Dad's Day.

The Theta Kappa Phi held its formal pledging Sunday, October 15. That evening the Knights of Columbus held a party at the house. There were also five out of town members present.

There was quite a commotion in front of the Pi K A house last Friday afternoon, when an informal bugle vs. trumpet contest was held. The only entries were Nelson GaNun representing the Pi Kappa Alpha House and Pvt. Martin, entering for Company B, 6th Infantry of Jefferson Barracks, Mo. It all started when the army started tooting away. However, it wasn't long before people for miles around noticed that there was an echo of every call given by the army. When Bugler Martin noticed that he had competition he demanded something hot. Straight bugle calls were barred. At least they weren't recognizable. Well, Nelson gave all he had, which was plenty. This continued for the better part of 15 minutes. The show was called off by Sargt. Gholsan, who didn't want the neighbors to complain while he was in command in the absence of Lt. Richards. It wouldn't do at all for the Lieutenant to get complaints when the purpose of this little gathering is to enlist a few men. It might look bad at headquarters.

Oh yes! All, including Bugler Martin, agreed that Nelson won the fur-lined syrup pitcher for the Pi K A's when he swung out on the Bugle Call Rag.

Glee Club to Meet Weekly

The second meeting of the Missouri School of Mines Glee Club was held last Thursday night in the auditorium of Parker Hall. Plans were made to meet in the Parish House every Thursday night. Sheet music was distributed, and after an hour's practice, the meeting was dismissed. The meeting, as the first, was characterized by a large turnout.

There is a great need for tenors, but anyone who wishes to join may become a member by coming to the next meeting which will be held in Parker Hall next Thursday night at 8:30.

Alpha Chi Sigma To Meet With Other Chapters

Alpha Chi Sigma made plans for a joint meeting with a professional group from St. Louis and the collegiate chapters at Washington U. and Missouri U. to be held at Rolla at the last meeting of Alpha Chi Sigma held Tuesday, October 17. These included plans for a banquet and additional entertainment for the visitors while they are in Rolla. The date of the joint meeting is November 5.

Plans were also made for a close dance. This dance will be held in the gym November 11, in conjunction with Tau Beta Pi and Theta Tau.

Reports were also given by the members who underwent the initiation at Kansas University.

Theta Tau Dance Set for Nov. 11

Theta Tau discussed plans for a dance at a short meeting held last Thursday at 7:30. This dance is to take place on Armistice Day, November 11th, at Jackson Gymnasium. It is to be held co-operatively with Alpha Chi Sigma and Tau Beta Pi.

Christian Endeavor

The Christian Endeavor of the Rolla Christian Church is holding a Halloween party in the Church basement Friday night, October 27. Those wishing to attend notify Martin Bowman before Thursday.

Patronize Our Advertisers

Norris Dam Is Subject of Talks

Robert Roepke and Charles White gave talks at the A. I. E. E. meeting held Wednesday. Roepke showed slide pictures of generalities of the plans, construction, and operation of the Norris Dam and explained a few power plant. He spent part of last summer in Norris.

Charles White, a transfer student from Cape Girardeau, told of some of the types of jobs which Juniors may expect to get for summer work. He has been working at an electrically operated water works for some time, and is in a position to advise those who have not yet had jobs in the field.

Cider and ginger snaps were served after the talks.

Academy Will Meet Thursday

The Academy of Engineering Science will hold its next meeting on next Thursday night. All freshmen are invited to attend as this organization is primarily for the freshmen. At the last meeting members decided on a membership drive to spread the club to more of the students on the M. S. M. campus. The purpose of the club is for the advancement of engineering on the campus and to acquaint the freshmen with it. A speaker will be acquired for this meeting.

DANCE DATES

- Fri., Oct. 27—Pi Kappa Alpha
- Sat., Oct. 28—St. Pats Board
- Fri., Nov. 3—Junior Club
- Fri., Nov., 10—Alpha Lambda Tau

MSM Graduated 27 Men, 25 Years Ago

In the spring of 1914 twenty-seven Miners graduated from the Missouri School of Mines. At that time the school had only four graduating departments and of the twenty-seven students who graduated, sixteen were studying mining, four General Science, five Chemistry and Metallurgy, and two Civil Engineering.

At the present time three of the 1914 graduates are dead. The rest are almost all occupying high positions in their chosen fields. The following is a list of the graduates of 1914, their addresses, and their present occupations.

1. George E. Abernathy (General Science) Professor of Mines, Kansas State Teachers College, Pittsburg, Kansas.
2. Leonidas J. Boucher (Mining) Universal Atlas Cement Company, Northampton, Penn.
3. Lawrence Collins (Mining) County Surveyor, Iroquois County Watseka, Illinois.
4. Gerard H. Cowman (Mining) Operating a chain of drug stores with headquarters at Bellfontaine, Ohio.
5. Claude C. Cushwa (Mining) Unknown.
6. Clyde V. Downing (Chemistry and Metallurgy) City Engineer, Kirksville, Mo.
7. Joseph C. Finagin, Jr. (Chemistry and Metallurgy) Van Ess Avenue, Tempe, Arizona.
8. Thaddeus R. Goldsborough (Chemistry and Metallurgy) Unknown.
9. Clyde W. Hall (Chemistry and Metallurgy) Vice-president of United Clay Mines Corporation, Trenton, New Jersey.
10. Howard G. Halsey (Mining) Resident engineer of the Resettlement Administration at Monticello, Georgia.
11. Sidney R. Hatch (Civil) Douglas, Arizona.
12. William C. Hogoboom (Mining) Structural Engineer, City of Los Angeles.
13. Mervin J. Kelly (General Science) Director of the Bell Research Laboratories, New York City.
14. Llewellyn Lodwick (General Science) Poland Ohio.
15. Roy N. McBride (Mining) Superintendent Rouse Construction Company, Chillicothe, Mo.
16. Gilbert F. Metz (Mining) Engineer in charge of sales of the Hardinge Company Inc., York, Pennsylvania.
17. Julius C. Miller Jr. (General Science) Oil Operator in Owensboro, Kentucky.
18. Frederick G. Moses (Mining) T. V. A. Knoxville, Tenn.
19. Orion O. Neal (Chemistry and Metallurgy) With Manufacturer's Laboratories, New York City.
20. Enoch R. Needles (Civil) Ash, Howard, Needles, and Tammen Construction Engineers, New York City.
21. Thomas C. Robson (Mining) St. Louis, Mo., Mill Production Department of Purena Mill.
22. Riley M. Simrall (Mining) Unknown.
23. Clinton D. Smith (Mining) Deceased.
24. Edmond D. Staliker (Mining) Deceased.
25. Thomas K. Thomas (Mining) Works in U. S. Engineer's office at Lexington, Mo.
26. Arthur F. Truex (Mining) Seven States Oil Company, Tulsa, Oklahoma.
27. Walter H. Wager, (Mining) Deceased.

Dr. R. A. Kirkpatrick, who will lecture at Parker Hall tonight.

Homecoming Plans Near Completion

Registrations of the alumni by Blue Key, a service fraternity, will take place Saturday morning in the lobby of the Hotel Edwin Long and in the club room of the Metallurgy building.

Saturday afternoon the Homecoming parade will march up Pine Street and on up to the football field where at 2:00 p. m. the Miners will show their stuff against the Springfield team.

Fraternity houses will be decorated and will give dinners for their returning grads. The annual alumni banquet will be given at the Edwin Long Hotel at 6:30 p. m.

To climax the day the Homecoming dance given by the St. Pat's Board will begin at 10:00 p. m. This will allow the old grads to get the feel of the Gym floor under their feet once again while dancing to the strains of Geo. Mirror's reflected rhythm.

Bureau of Mines Gives Fellowships

The U. S. Bureau of Mines this year has awarded three fellowships. The first, a reappointment, went to James H. Jacobs. The State Mining Experiment Fellowship was given to R. T. Rasmussen, and the U. S. Bureau of Mines Fellowship was awarded to Peter Simons. Mr. Rasmussen is a graduate of Minnesota, Mr. Jacobs of Pennsylvania, and Mr. Simons from the University of British Columbia.

Rayl Named to Lead Sophomores

John Rayl was elected to lead the Sophomore Class for the coming year in the class election held Friday, October 20.

The other officers elected are as follows: Oscar Muskopf, vice-president; Jack Witt, secretary; and Robert Guilfoey, treasurer.

Tobacco...opens Doors to Fields where People Live, Work & Achieve

Today there are about 1,000,000 cigar stores, drug stores, country and grocery stores where you can buy cigarettes in the United States. These retailers, and the jobbers who serve them, have built up a service of courtesy and convenience unmatched by any other industry catering to the American public's pleasure.

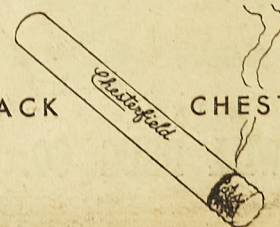

THERE ARE ANOTHER MILLION people who are engaged directly or indirectly in the transportation of cigarettes to every town, hamlet and crossroads.

IT IS ESTIMATED that there are 1,602,000 tobacco farmers raising tobacco in 20 out of the 48 states. Good tobacco is one of the hardest crops to raise and bring to market, requiring great skill and patience from seed-bed planting to harvesting and curing. The modern tobacco farmer has done well the job of constantly improving the quality of his product.

THE AVERAGE LENGTH of service of the 13,230 people working in the Chesterfield factories, storage houses, leaf-handling and redrying plants is over 10 years. This means that every step in the making of Chesterfields, regardless of how small, is handled by people who have had 10 years of experience and ability in knowing their jobs.

TRULY TOBACCO OPENS DOORS to fields where people live, work and achieve, and Chesterfield takes pride in its ever increasing part in this great industry that is devoted entirely to the pleasure of the American public.

TO SMOKERS, Chesterfield Cigarettes have always said, and now repeat, that in no other cigarette made can you find the same degree of real mildness and good taste, or the same high quality of properly cured and aged tobaccos. Chesterfield Cigarettes are made with one purpose only...to give smokers everywhere the Milder, Better-Tasting Smoking Pleasure they want. You can't buy a better cigarette.

MAKE YOUR NEXT PACK CHESTERFIELD
