THE MISSOURI MINER

Z-385

Missouri School of  Mines & Metallurgy

VOLUME 27

ROLLA, MISSOURI, THURSDAY, SEPT. 19, 1940

NUMBER 1

Industrial Conference Here Sept. 27

Prominent Leaders On Program

Students of all branches of engineering will be interested in a business and industrial conference to be held here at the school, featuring several prominent men of industry as guest speakers. The program is under the sponsorship of the Economics Department headed by Professor M. D. Orten and will take place September 27 with "The Engineer and the Future" as its theme.

The chief purpose of the conference will be to bring about a contact between Missouri School of Mines students and men who are in intimate contact with the business and industrial fields and who have distinguished themselves in those fields. The program will allow students to learn the attitudes of these men towards the future of engineering or closely allied subjects, and allow the guest speakers to become acquainted with the activities of the school. It is hoped that round-table discussions may take place during the conference also.

The program will include talks by Wilbur B. Jones, chairman of the board of directors of the St. Louis Chamber of Commerce; Walter W. Head, president of the General American Life Insurance Company and of the National Boy Scouts Organization; Arthur G. Casey, general manager of the Columbia Broadcasting System; Gaston Du Bois, vice-president of the Monsanto Chemical Company, and Ray Tucker, St. Louis Smoke Commissioner.

Members of all classes, especially the junior and senior classes, should attend this conference, since the talks will be of special value to engineering students, dealing directly with engineering views and aspects. The program will be as follows:

PROGRAM

Second Business and Industrial Conference

The Theme: "The Engineer and the Future." September 27, 1940.
10:00 a. m. Mr. Wilbur B. Jones, Chairman Board of Directors, St. Louis Chamber of Commerce.

10:30 a. m. Mr. Walter W. Head, President General American Life Insurance Company, also President, National Boy Scouts Organization.

12:15 Noon to 1:15 Lunch.

2:00 p. m. Mr. Arthur G. Casey, General Manager Columbia Broadcasting System, KMOX.

3:00 p. m. Mr. Gaston DuBois, Vice President Monsanto Chemical Company, "Engineering Contributions to National Defense."

7:00 p. m. Dinner Speaker, Ray Tucker, St. Louis Smoke Commissioner.

Fraternities Announce Pledges

Kappa Sigma Leads In Men Pinned

Pledging got off to a flying start this fall with 108 boys accepting pledge pins. These pledges are fairly well divided among the nine social fraternities on the campus.

Kappa Sigma Fraternity again took the lead on the campus by pledging 21 men. In second place is Theta Kappa Phi, while third place goes to Pi Kappa Alpha.

Following are the lists of pledges of the Kappa Sigma Fraternity, Triangle Fraternity, Lambda Chi Alpha Fraternity, Sigma Nu Fraternity, Pi Kappa Alpha Fraternity, Sigma Pi Fraternity, Kappa Alpha Fraternity, Theta Kappa Phi Fraternity, and the Alpha Lambda Tau Fraternity.

Kappa Sigma

Gilbert Naert, St. Louis; Carl Knoebal, Kirkwood; Bob Koenig, Kinton, Ark.; George Hawk, East St. Louis, Ill.; Duke Blair, Alton, Ill.; Bob Dietz, St. Louis; Bill Bassett, Signal Hill, Ill.; Walt Benjamin, Mattituck, N. Y.; Mac Obourn, Webster Groves; Tom Gettys, St. Louis; Roy Clansky, Wheaton, Ill.; Bill Hubbard, Rolla; Alan Fuchs, Gardenville; Bill Helm, Macomb, Ill.; John Domian, Gardenville; Odie Walker, Centralia, Mo.; Don Brand, St. Louis; Glen Garvey, Webster Groves; Russell Frame, Rolla; Art Scholz, Newark, N. J.; Robert McDuff, Padunk, Ky.

Triangle

J. Hartley Locker, East St. See FRATERNITY Page 8

NOTICE

All students who have not yet taken their physical examination should report to the school hospital between Sept. 24 and Sept. 27, 4:30 to 6:00 p. m.

Officers Elected For Rollamo

Bill Lies, senior met, was elected Editor in Chief of the Rollamo, the Missouri School of Mines year book, at an election held shortly after school let out in May. Other officers elected for the ensuing year were Bill Kilgour, Business Manager; Charles Zanzie, Sports Editor; Wig Lawler, Humor Editor; and Jim Carroll, Advertising Editor; and Bob Westwater, Organizations Editor.

Work is already in progress on the 1941 Rollamo, and a meeting will be held soon for tryouts to the board. No theme has been definitely chosen as yet, but work is proceeding rapidly according to report.

Student Council Charters Train For St. Louis

The Student council has announced that a special train has been chartered for the students going to the St. Louis U. game. The cost is \$2.30, and lots of fun for nothing. Tickets will be put on sale in the near future; so watch the Bulletin boards for announcements concerning the place and time of sale.

ARMIN FICK,

Student Council President.

Two New Buildings On MSM Campus

The Missouri School of Mines now has two new buildings, one almost completed and the other more than half built. The first, Harris Hall, is practically finished, only a few small details inside and the landscaping remain to be done. The other, the new chemical building, is just a little behind schedule due to the failure of the brick to be delivered when specified. This, however, is causing no serious delay, and the building is expected to be finished sometime before the middle of December.

Harris Hall will house the whole civil engineering department. In addition it will contain the mechanics department, part of the bacteriology and biology, and certain units of the U. S. topographic mapping division. The south end of the third floor is given over to the mapping division for making ordinary maps. The large room on the first floor will contain an unusual method of map making. It will be divided into several small rooms for the projection and making of aerial maps. This work has to be done in dark, air-conditioned rooms.

The chemistry building will house all of the chemical engineering work. It will also probably contain the organic and organic processes laboratories

See BUILDINGS Page 4

Blue Key Backs Pep Squad

Harold Wampler, President of Blue Key, announced that the Fraternity is backing the school spirit movement one-hundred per cent, but success can be attained only by the support of the whole student body. Five pep leaders have been appointed to conduct the leading of the stands, with the hope that eight-hundred Miners blast cheers for the engineers athletic teams.

It will be necessary, for the inducement of school spirit, that the town people turn out for the home games as well as the students. Therefore, a thousand or more fans should make up the Miner stands. Win or lose, the team will play a better brand of ball, when the applause is for them, and not against them.

MSM Men Join Fighting Forces

During the past summer several Miners have joined various branches of Uncle Sam's fighting forces in connection with the current preparedness program. Apparently the Navy is more popular with the Miners than the Army, for only one of our boys joined the Army, with three tying up with the ocean forces.

Virgil Johnson, who would be a senior this year, thought that he would enjoy a summer with the National Guard being called on active duty. Johnson found it necessary to report to Fort Robinson, Arkansas, for a year of extensive training. He plans to return to school next year, however.

Then there is Charles Clarkson, who became affiliated with the Navy Reserve and is now on back on the campus.

Another of the boys joined the Naval Air Corps, and after some preliminary training Bev. Johnson, who is the young man in question, expects to report to the Naval Air Base at Pensacola, Florida, sometime in November.

Don Lindberg, who would have been a senior E. E. student this year also joined a branch of the Navy. According to report he will tie up with the Naval Academy at Annapolis.

St. Pat's Board Dance

This Saturday, September 21, the St. Pat's board will give their first dance of the season in the gymnasium and since it is being given in honor of the freshmen, will be called the "Forty-four Frolics". Come one, come all. First down beat at 9:00 p. m.

Photo Exhibit Planned by Club

At its first meeting of the present school year, M. S. M.'s Photography Club came to order last week and formulated several ideas to be carried out through the school year. Among these was a decision to post a monthly exhibit on the Photography Club bulletin board in Norwood Hall. All prints are to be furnished by club members. It is hoped that the 1940 Collegiate Photo Contest Salon will be obtainable for exhibition in the near future. Prize winning photos of the Salon were printed in the May issue of the Collegiate Digest, the picture supplement to the Missouri Miner.

Rules and regulations of the organization were reviewed for new members and visitors, and possible membership was discussed. The meeting concluded with a visit to the club's dark room with its various photography equipment.

Enrollment Hits New High Mark

850 Register for Fall Semester

First day statistics from the Registrar's office seem to indicate that more men of college age are following FDR's advice to receive specialized training as a preparation for national defense whether or not world war II had direct influence on increased percentages the total enrollment of M. S. M. shows an increase of 11 per cent over the registration total for the first semester of last year.

Freshman statistics show an enrollment of 250 against 226 last year. An all-time record was established for advanced standing. So last year shows a 15 per cent advance in this direction. This one figure is important in that this increase in transfers seems to indicate increasing merit in the instructional facilities of this institution.

Continued late registration is responsible for incomplete total figure. Approximately 850 students have enrolled to date. Breaking down the 818 included in the first day of registration, the following curricular enrollment is shown:

Mining Engineering—77
Mining Geology—29
Petroleum Engineering—45
Metallurgical Engineering—84
Civil Engineering—75
Mechanical Engineering—152
Electrical Engineering—27
Chemical Engineering—123
Petroleum Refining—14
Ceramic Engineering—32
Engineering (no option)—68
Science—3
Unclassified—11
Graduate—8
Total—818

This tabulation shows the Mechanical Department leading with 152; Mining, including options, second with 151; and Chemical third with 137, inclusive of the Petroleum refining option.

Theta Tau House Plans Discussed

Theta Tau discussed plans for establishing a house on the campus at their first meeting, appointing Herb Stockton head of a committee to investigate the possibilities of acquiring such a place.

Plans were formulated for a smoker to be held later in the month for the purpose of better acquainting the members with men who are eligible for election to the professional engineering fraternity.

THE MISSOURI MINER

Official publication of the Missouri School of Mines in the interest of the Students and Faculty. Published every Wednesday during the school year. Entered as second class matter April 2, 1915 at the Post Office at Rolla, Mo., under the act of March 3, 1879.

Subscription price — Domestic \$1.50 per year, Foreign \$2.00 per year. Single copy 8 cents.

Undue Regulation of Old Customs

What on earth is coming to pass around here when it is no longer permissible for a senior to ask a freshman to "button" on the streets of Rolla? Since when has the long established privilege of the upper classmen to exercise any prerogative or new men been abolished except on campus grounds? Reference is made, of course, to a recent case where a senior asking a freshman to "button" on Pine Street was reprimanded by town authorities who, so it seems, exercised an undue privilege themselves.

None of us likes this process of "hazing" a great deal, especially where we first enter school, and when it is carried to a point where injuries and equally unpleasant incidents are likely to result, somebody has to step in. This has been done at the Missouri School of Mines, and a fortunate thing it was, too. The annoying business of "pantsing" has been reduced, and even eliminated from the streets of Rolla. Traffic tie-ups are no more and there have been no decided unpleasanties. Why then curb every activity? If what takes place is harmless and not interfering with normal town progress, why stop it?

H. N.

From Us To You

Welcome back fellows! To the Freshmen, Hello, we're glad to make your acquaintance. Hope you have a perfect scholastic year.

May we at this time point out that the Miner is a student publication of the Missouri School of Mines, published by students for the student body.

As journalists we doubtless leave much to be desired, but as men who are interested in putting out paper which will draw and hold the interest of the student body we are second to none.

We therefore invite the criticism of all on every issue of the Miner for the ensuing year, if you think a paper which will draw and hold the interest of the paper lacks the proper punch, editorially, in news, and we'll attempt improvement. When you feel that this publication does justice to the best engineering school in the middlewest, we will be satisfied.

With increased enrollment again this fall, students are finding a new inducement to reaching classes on time. In a number of lecture halls the last few students to arrive have their choice of sitting on radiator, window-ledge, or just standing. MSM at this time bears a resemblance to the boy who is just growing out of his brother's old suit. With legs and arms protruding from a fit that's sizes too small, MSM (clad partly in hand-me-downs!) still pleads for MORE ROOM. The new Chemistry Building is a promising addition, but alas, we need a complete ensemble. Would that MSM's guardians had more time for knitting!

Someone deserves a compliment on one result of the new system of initiation. In past years the freshmen who survived the rigors of Class Day were too exhausted, sick, and defeated to even smile. The crews engaged in cleaning 44's from the campus sidewalks in the most recent Class Day gave forth some vocal efforts which showed spirit and morale still left in their bodies. Here's one observer who likes this new initiation where there's a little life left in the freshmen.

A Letter To The Editor

Dear Ed:
What is this world coming to? What has become of the traditional hazing of the freshman? In years past they received much better training at the hands of strict upperclassmen. Lately, freshmen have been seen strolling down the west side of Pine Street wearing their hats cocked on the back of their head—often no suspenders—and to top it off they may be heard talking back to upperclassmen and giving all sorts of snappy comebacks when asked the identity of "Yahoodi." It's also harder to pick out freshmen nowadays since they are all wearing pants, all the time, instead of as in times past. Also I think the Freshmen could stand some of those molasses and rotten egg shampoos but if their hair is kept short enough maybe they can do without the shampoos.

An Oldtimer.

Prof. Carlton Honored by S.P.E.E.

Professor E. W. Carlton has been appointed to the Committee on Surveying and Geodesy of the Society for the Promotion of Engineering Education, according to an announcement from Professor Lorenz G. Straub of the University of Minnesota, Minneapolis, who is Chairman of the Civil Engineering Division. The principal function of the committee is to arrange for a technical program of interest to teachers of engineering for the annual meeting of the Society. Other

ON THE BENCH

By Bob Nevins

As long as this is the first edition of the 1940-41 Miner, I think it would be well to have everyone know the purpose of this column right from the beginning. It is designed not to give news, but rather to give little inside happenings on the team that may slip past the regular news hawks. In short, it is a bench warmer's view of stuff.

"What'cha do during the summer?" is the usual return to school in the fall; so I might as well tell what some of the footballers were doing to toughen up for the eight game schedule.

Among the backs: Captain Dick Cunningham and Keith Cook stayed in Rolla to brush up on the books. Dick amused himself by getting his C. A. A. license and Cook was amused. (Need I say more?)

Fred Hancock was again a life guard in Cleveland.

Bob Bruce worked for Phillips Petroleum Co., in Odessa, Texas.

Ralph Eads was in Birmingham, Ala., helping T. C. and I. stay out of the red.

Paul Fullop and Harold Kruger also summered in Rolla.

Cliff Corneau did a bit of mining in Arkansas.

Art Schumacher and Jim Glover worked in St. Louis.

Most of the lowly linemen were also more or less profitably employed.

"Carmichael" Murphy was a mechanic in St. Louis.

Mer Kiburz surveyed for Jablonski in St. Louis.

Frank Rogers and Paul Bouch-

Faculty Includes Noted Men

Among subjects which are discussed in some of the incessant campus, and off-campus, "bull-sessions" are the facts of interest about individual departments and the faculty members associated with each of these divisions. Because of stringent regulations imposed by the Miner censor, the off-color stories on these topics will have to be transmitted via word-of-mouth.

However, for the benefit of the incoming freshman and transfer students, the following list is but part of those faculty members represented in the various listings of notables in the professions represented on the M. S. M. faculty. For lack of space, only those men included in Who's Who in America, and Who's Who in Engineering have been included. It is of note that numerous other men on the faculty are represented in other listings of men in their individual professions or fields of interest.

Who's Who in America
Butler, Joe B.—Civil Engineer.
Chedsey, Wm. R.—Educator and Consulting Mining Engineer.
Frame, Floyd H.—Physicist and

Electrical Engineer.

Fulton, Chas. H.—Research Metallurgist, Consultant.

Hanley, Herbert R.—Consulting Chemical and Metallurgical Engineer.

Mann, Clair V.—Educator and Civil Engineer.

Mullenburg, G. A.—Consulting Geologist.

Who's Who in Engineering

Armsby, H. H.—Educator

Butler, Joe B.—

Carlton, E. W.—Civil Engineer.

Clayton, Chas. Y.—Metallurgical Engineer, Teacher, Consultant.

Decker, E. E.—Educator and Surveyor.

Frame, F. H.—

Fulton, C. H.—

Grawe, O. R.—Mineralogist, Geologist.

Hanley, H. R.—

Harris, E. G.—Civil Engineer and Educator.

Jackson, R. O.—Consulting Mechanical Engineer.

Kilpatrick, A. Vern.—Mechanical Engineer.

Lovett, I. H.—Electrical Engineer.

Mann, C. V.—

Mullenburg, G. A.—

ier shoveled in Dumas, Texas for American Zinc Co.

"Nellie" Koerner and Gene Hammann were wardens for the St. Louis playgrounds.

Gene Veale worked for Youngstown Sheet and Tube Co., near Chicago.

The Wright Airplane factory in Patterson, New Jersey is chiefly responsible for Ed Kromka's new clothes.

Matz Domajanovich returned Sunday from a swell summer's work in Iowa on a dam (please note spelling).

"Killer" Kane sat around and gained 30 lbs., while Joe Strawum worked in Washington, Mo., on the river.

Nick Nicola worked for roofers in St. Louis and Herb Stockton was Assistant City Engineer (some title) in Sedalia.

The U. S. Gypsum Co., put up with me in their Chicago Steel Products plant.

Of last year's gang—Capt. Ladd and Wally Baumstark are also working for the Gypsum Co., "H" is in Sweetwater, Texas and M. B. is in the Chicago office.

Rumor has it that Joe Spafford is in Schenectady, (Sp) New York with Bethlehem Steel Co.

Otis Taylor designed new Illinois roads but likes school so much he's back for more.

The last I heard Bob Klug was working for St. Joe Lead Co.

As for the new men, I think it best that we withhold comment on them until they have been around a little while longer.

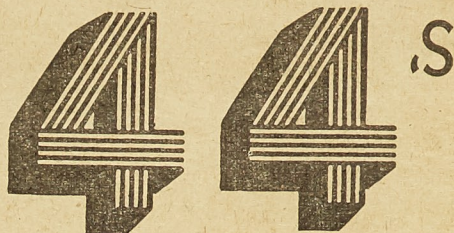

It's no gag!

A Freshman Visits The Lions Carnival

An evening of fun was in store for me, I thought, as I slowly and sneakily made my way toward the Lions carnival over across the street from the Pi Kappa Alpha house. Surely the upperclassmen wouldn't bother me tonight in front of all the towns people. Why, that would be indecent and besides that, they would not be able to tell me from anyone else without my green cap and suspenders. An evening in peace. What a relief not to be troubled by those sophomores. Maybe I could even get a date for the evening, anyway I could try. The light of my love in Rolla was at home this evening and soon we were on our merry way to take in the sights and to play the games.

Twice enroute, suspecting upperclassmen gave me a non-too-social look but due to the lack of evidence, turned away. Oh happy day! I thought, as we went along. If they didn't recognize me, then no one would, and we proceeded on unmolested by the thoughts of sophomores.

There was a crowd of people "milling" around the booths as we entered the mid-way. Cries such as, "Try your luck! Everyone wins! Just a dime for a really good time," were unsparingly yelled at us as we passed among the Miners. I saw several professors from the school beckoning me to play their games, and as I walked along, no one paid any special attention to either my date or myself. We played "Bingo" and won a doll, pitched rings at poker chips but won some little dogs instead, rode the "octopus" and the merry-go-round and were having a swell time until I heard a cry uncommon to most carnivals. It was that of, "Hey freshman." I tried to ignore the command but soon a scolding sophomore tapped me on the shoulder and said, "Where is your green cap and suspenders?" I was discovered. My doom was sealed. I had no cap or suspenders, had on a pair of very loud socks, and worst of all I didn't remember the answer to a single question. Just the type of a freshman that my fellow (?) students were looking

Blue Key Begins Year's Work

Blue Key, started the year with their annual refreshments for the freshmen and are working hard to help organize the Freshman class.

Blue Key is also working on some new grass signs to be located on the campus; are finishing the scoreboard; and are undertaking the job of helping Doctor C. V. Mann to publish his history of the School of Mines.

Blue Key hopes to get started on the school directory immediately, and would like for all students to report any change in their address or telephone numbers to the office.

for. My fate was revealed.

First came the lipstick on my face. I guess I was suppose to resemble Hitler or Falstaff but at any rate my face was covered from ear to ear with that bright red lip stick. Then, unfortunate for me, some sophomore recommended that I carry my socks on a stick above my head like a flag and walk around the carnival saying, "Hear Ye! Hear Ye! I am the freshmen about whom they talk. Wear no suspenders but do wear loud socks."

For hours, it seemed, I walked the length and width of the fair grounds shouting this unfunny verse and wondering who had taken over my girl. Soon, when the boys had began to tire of the verse, I was told to stand up on the ferris wheel and sing "God Bless America" to the people in St. James. The proprietor of the concession however, was not in full accord with this idea and soon made me get off. To my surprise, I found that the sophomores had found another offender while I was singing and had removed their attention from me for a moment. This was my chance so making my way as fast as possible to the nearest exit, I left the crowd and my girl in favor of the private seclusion of my room, a fugitive from the onslaught of the class of '43.

Harvard University has an 85-ton Cyclotron capable of producing atomic projectiles of 11,000,000 volts energy.

BUILDINGS

INTRAMURAL Sports

To start the ball rolling in the 1940-41 intramural sports league, Coach Gill has announced that a table tennis tournament will start on Friday, Sept. 20. The matches will be a double elimination series, meaning that each team in the league will have to be defeated twice before it is eliminated entirely. There will be three tables set up on the gym floor for the matches.

Each organization will have to enter a three man team for each match (for example, if the Lambda Chi team were matched against the Seniors, three men from the Lambda Chi house would play three men from the Seniors. If the Lambda Chi Alphas won two of the three games, then they would advance to the winning bracket.) If any organization wishes to use three different men for each match, it will be permitted. Each individual match will be played for the best two out of three. Also, gym shoes must be worn for each of these matches.

The parings are as follows: Theta Kappa Phi vs. Kappa Sigma; Freshmen vs. Pi Kappa Alpha; Sigma Pi vs. Seniors; Sigma

Nu vs. Triangle; Kappa Alpha vs. Juniors; and the Lambda Chi Alpha, Sophomores, and Alpha Lambda Tau teams are all byes for the first matches.

The times for the games are: 4:30, Friday, Sept. 20, Theta Kappa Phi vs. Kappa Sigma, and at 5:15 the Frosh will meet the Pi Kappa Alpha team. At 2 p. m. on Saturday, Sept. 21, The Sigma Pi team will play the Seniors, at 2:45, the Sigma Nu team vs. Triangle, and at 3:30, Kappa Alpha meets the Junior team. The rest of the schedules will be posted on the Intra-mural bulletin board in the Gym.

Every student at M. S. M. is permitted to play on a team, so watch the bulletin boards for further announcements.

Watch next week's Miner for rules, schedules, and other information regarding touch football, which will start on Monday, Sept. 30.

Miner Board Tryouts Meet

About sixty tryouts for the Missouri Miner staff met in Norwood Hall last Thursday night, and were assigned to the various departments.

Other students interested in trying out for the MINER are invited to the regular tryout meetings every Tuesday evening in Room 104, Norwood Hall.

Varsity Trims Frosh Team, 48-7

Coach Bullman sent his gridmen into inter-squad competition last Saturday afternoon, with the Varsity team hanging up a 48 to 7 victory over the Frosh. However, the Frosh displayed some fine line play, and many of them should see varsity action this season.

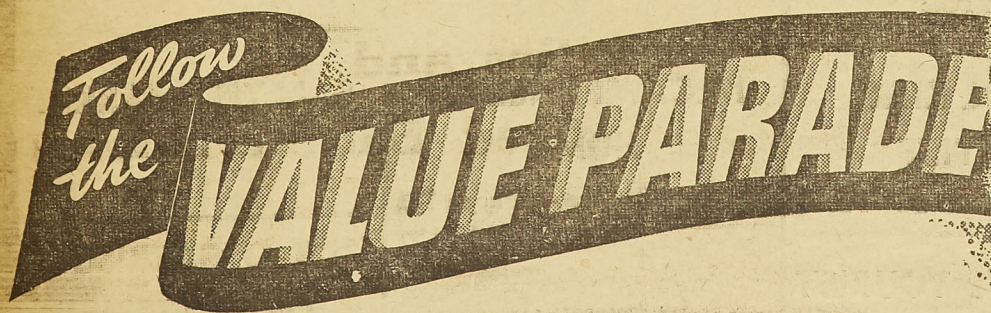

The Miners have developed a good passing team, completing about fifty per cent of their attempts in the pre-schedule affair, and with all their prospective freshmen, they should develop some fine passing material. Frederick, freshman, displayed a spectacular bullet pass to the fans Saturday, by completing a number of over-center passes. He appears to be one of the up and coming boys for the Miner gridmen, and should see some action in the coming games.

Bob Bruce has been shifted from end to quarterback, showing considerable speed and driving power on both offense and defense. Mike Cantanzaro was forced to give up the game due to a bad knee, which is undoubtedly a tough break for the team, as Mike was scheduled for the fullback position on the varsity. Art Schumacher showed up in his same old fighting form during the fray, promising a shiftier and harder hitting man for opposing teams to worry over. Ed Kromka, Murphy, and Veale are filling their old positions, displaying a type of fighting line play that every fan enjoys. Cunningham showed up in fine form still as shifty as ever, and possibly harder to handle than last season.

Many of the Frosh are in line for varsity berths, being backed by lots of weight and speed, but of course they lack the seasoning that many of the older fellows have, and will have to develop.

MINERS, OLD AND NEW

Welcome back to Rolla after your summer vacation. We hope that everyone of you had an enjoyable and profitable summer.

We are proud of the large enrollment this year and of the excellent record the M. S. M. is making in the engineering world. Keep up the good work.

As a MINER Sees it

Well here we are subjecting ourselves to the wrath of the faculty, the stupid council, mothers of the innocent girls of Rolla, Chedsey's "Axe Man" Armsby, and the mighty Class of '41, to say nothing of the Editor (bless his little soul).

The latest addition to the cheer leaders ranks, the inseparable Arduth and Eleanor together with Sam Lloyd's "Tiny Atom," may give new impetus to the now dormant cheering section.

Lipstick has proved to be very satisfactory when applied to sev-

eral male members of the class of '44. Has anyone tried it on the female element? It's an idea anyway.

Some of last years grads have strayed a bit from the engineering field. Dickie Followill is a playboy aviator and Ed Kuhne joined the Marines in San Diego, Cal.

The Triangles might do well to keep an eye on Charlie Koch who has been seen lately with Eleanor H. Wasn't she supposed to be Dowling's little heart beat?

Speaking of Triangles, "Bad" John Mazzoni was really poison for the frosh on Class Day, especially as their swimming coach.

"Stunt Afternoon," presented by the freshmen, might be termed a stinking success. The prize was awarded to a one man show rather than to the winning group.

Have you heard the Rogers-Stair romance is a thing of the past?

Independents Hold Initial Meeting

Last Monday the Independents held their first meeting of the year, in the chemistry building, Harold Wampler presiding. Wampler pointed out the advantages of active membership in the Independent organization and outlined orders of business to come up during the year.

Due to the fact that several men failed to return to school this year, Ken Mooney, Jack Olsen, and Rene Rasmussen were elected to the student council to fill vacancies. Wampler and Dimk, both freshmen were elected to the Independents' Board of Control, and Pfau was made freshmen intramural representative.

A man went to visit an old friend of his and as they chatted suggested that they have a drink. "I tried that once and didn't like it," was the reply. Later he offered his friend a cigar. "I tried one once and didn't like it," said his friend. "Say, how many children did you say you have," "Just one," was the reply.

Sweet and charming Marian Claridge is back in town for a short visit. Incidentally she was diamond-ringed this past summer by Russ Gund, Pi K A of the class of '40.

Sh—Nelson Koerner has a girl! (Back home)!

Handsome Jim Glover seems to prefer St. Louis to Rolla too, wonder why?

Zeke, Falkingham, and a few petrels sure seemed to enjoy the football game Saturday, what with their own refreshments.

There seems to have been an over abundance of "pacifists" among the sophs this year. Of course there are the usual radicals like Fleischli, but a few more softies and the freshmen would have the run of the campus. What was bothering you, boys? were there too many frosh?

President Roosevelt said in a speech not long ago that the youth of America was becoming soft. By abolishing the traditional use of the "long green" weed for freshmen, H. H. A. has aided the disintegration and decay of the "cream" of the engineers. Why down thar in Skunkum Holer the kids cha wit fer fun and at thutteen yahrs they's MEN.

The Nevin clan is bigger than ever now that brother Gene has joined the crowd. Don't tangle with them in a dark alley or you'll think you are in a telephone booth with an octopus.

Orchids to Coach Percy Gill for his fine showing in the world of golf during the past summer. You are a fine advertisement for the school, coach; keep up your good work.

New Series of Chesterfield Ads

Many famous personalities appear in the Chesterfield Cigarettes campaign for early fall, released this week by Liggett and Myers Tobacco Company.

This campaign will tell America that Chesterfield is "the smoker's cigarette, because it combines milder, cooler, better taste in one satisfying smoke."

From the screen world, Fred MacMurray, Robert Rapelye and George McKeen "star" for Chesterfield. Heading the list of sports celebrities is Gene Sarazen, great veteran of champion golf tournaments who tied for the National Open this year.

Three pretty aviatrixes from the newly organized Women Flyers of America and a cheerful World's Series baseball advertisement complete the schedule.

National magazines, billboards, cut-outs and the famous Chesterfield radio network programs, featuring Glenn Miller's "Moonlight Serenade" on CBS and Fred Waring's "Pleasure Time" on NBC, support the newspaper advertising.

Dartmouth College registers all automobiles owned by students.

TAXI?
