DON'T FAIL TO HEAR THESE MEN SPEAK FRIDAY AT THE INDUSTRIAL CONFERENCE

Arthur Casey . . .

Director of Public Relations for the Columbia Broadcasting System in St. Louis, left Harvard University in his junior year to become a producer in the theatre. At that time, he was the youngest man in America to hold such a position. He has had his own companies in Boston, St. Paul and St. Louis. Under his able direction he has presented to the American public such outstanding names as Lyle Talbot, Charles Bickford, Allen Jenkins, Guy Kibbee and Dorothy Stickney. Busby Berkely, the eminent dance director of Hollywood, got his start in the profession under Casey.

Wilbur B. Jones . . .

Chairman of the Board of Directors of the Chamber of Commerce in St. Louis, is a member

of the law firm of Salkey and Jones in St. Louis. He received his B. A., magna cum laude, in 1909 from Armherst College, and his LL. B. in 1912 from Washington U.

A first lieutenant in Air Corps in 1918, he is at present Civilian Aide for Missouri to the Secretary of War. A few of his other offices are chairman of the board of trustees, Iberia Junior College; acting president, Phi Beta Kappa Men's Club of St. Louis; and former president of the St. Louis Y. M. C. A.

Gaston DuBois . . .

vice-president of the Monsanto Chemical Company, was born in Switzerland in 1880, and graduated in chemical engineering in 1903 from the Federal Polytechnic Institute of Zurich. He came to the U. S. A. in 1904 to visit

the St. Louis Exposition. While here, he was offered a position in the newly organized Monsanto Chemical Company. He successfully developed the first commercial production of a number of chemical products, particularly dyes and drugs during the war. Figure skates for a hobby, and belongs to a list of chemical societies a yard long.

Enoch R. Needles . . .

Bridge builder extraordinary, graduated from MSM in 1914. Six years later he received his C. E. degree, and a few years ago received an honorary doctor's degree from his Alma Mater. While in school here he was a member of Pi Kappa Alpha, Tau Beta Pi, and Phi Kappa Phi. He had much to do with the engineering of the Triborough Bridge and Pulaski Skyway back

East, just to mention two of many. At present he is a member of the engineering firm of Ash, Howard, Needles, and Tammen, with offices in New York City. Has written innumerable articles in technical journals, and belongs to innumerable engineering societies.

Ray R. Tucker . . .

Commissioner of Smoke Regulation of St. Louis, graduated with an A. B. from St. Louis U. in 1917. Three years later he received his B. S. in Mechanical Engineering from Washington U. From that time until 1934 he was Instructor, Assistant Professor, and Associate Professor of Mechanical Engineering at Washington U. Secretary to Mayor Dickman from 1934 to 1937, he has since been the Commissioner of Smoke Regulation. He is a mem-

ber of Sigma Xi and Tau Beta Pi.

Walter W. Head . . .

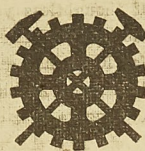

is president of the General American Life Insurance Company, former president of the American Bankers Association, and is now serving his fifteenth year as President of the National Council, Boy Scouts of America.

Born in 1877 in Illinois, Mr. Head was educated in Missouri, and started his career in the teaching profession. In 1901 he entered the banking profession, and his life since has been spent in the business and banking world.

Retirement Plan For MSM Professors Announced

Forty-Six at School Of Mines Eligible

President Frederick A. Middlebush announced last week a retirement plan for the University of Missouri professors. Investigation reveals that forty-six faculty members and administrative officers of MSM are eligible for participation.

Under the plan professors, associate professors, and assistant professors who have been employed for three years are eligible for the program, as well as the business manager, purchasing agent, registrar, assistant registrar and the superintendent of buildings and grounds.

In effect the plan will call for a five per cent deduction in salary for the participants, and the state will match the five per cent. Monthly premium payments will be made by the participants until such payments will provide and income of either \$1500 annually, or one-half his basic salary if it is less than \$1500, upon reaching his seventieth birthday.

Individual participation is optional, with those electing to accept it required to begin not later than September 1, 1941. However, the plan becomes compulsory with a promotion or for new members added to the staff.

Four insurance companies have been chosen to underwrite the plan and each will offer a somewhat different program which may appeal to the individual. The four companies are: The General American Life Insurance Company, John Hancock Mutual Life Insurance Co., New England Mutual Life Insurance Co., and the Teachers Insurance and Annuity Association of America.

President Middlebush characterized the adoption of the plan with the following: "the inauguration of a retirement program is probably one of the greatest strides and university has made in a decade, since, with retirement plans in force in most of the leading universities, it has been increasingly difficult to recruit any new members to the faculty."

Ex-Miner

Raymond W. Boggs, ex-40, who left school here at the end of his junior year, was graduated from Kelly Field, Texas, last week. He is on active duty with the Air Corps at Langley Field, Virginia.

Sergeant Bertram is Commended

Staff Sergeant William B. Bertram, instructor in military science and tactics at the Missouri School of Mines has received a letter of commendation from Lieutenant Colonel Spencer A. Townsend, who was in command of the Rents and Claims Section, Seventh Corps, in connection with the Fourth Army Maneuvers in Minnesota during the past summer. The commendation was received recently by Major Lewis C. Gordon, Professor of Military Science and Tactics, Sergeant Bertram's Commanding officer. The commendation reads as follows:

RENTS AND CLAIMS OFFICE
LITTLE FALLS, MINNESOTA
September 10, 1940.

Subject: Commendation.
To: Staff Sgt. William B. Bertram
See BERTRAM page 3

TO ALL FACULTY MEMBERS:

Attention is called to the Business and Industrial Conference which will be held on the campus on Friday, September 27, starting at 10:00 a. m.

This Conference is arranged primarily for the benefit of upperclass students and it is requested that all teachers make arrangements so that juniors and seniors can attend this Conference either by excusing the class or by accepting attendance at the Conference in lieu of class attendance.

Very truly yours,
H. H. ARMSBY,
Secretary to Faculty.

Miner Changes to Two Issues Weekly

Beginning with this issue, the Missouri Miner will be published twice a week, as a part of the program of improvement for the paper this year. The paper will be received by the students every Tuesday and Saturday morning.

The temporary managing editor for the Tuesday issues is Wayne J. Bennetsen, and for the Saturday issue, Harold Nicholas. Editorial assistants, who take care of proof-reading, copy reading, and the like, have been assigned as follows: Tuesday issue, Charles Zanzie and Otis Banes; Saturday issue, Kent Martin and Wib Lawler.

In an exclusive interview with MINER reporters, Editor Fred W. Finley stated that while the new publication schedule was more expensive than the old, it would greatly increase the news value of the material appearing in the paper, and would make possible a great improvement in page makeup.

Intensified CAA Program Will Begin Soon

An intensified C. A. A. flight training program, which may include advanced as well as primary training, is expected to get under way here during the next few weeks. According to Professor Jackson, administrator of the program at the School of

"Engineer and The Future" Theme of Industrial Conference Friday

Armsby Appointed to SPEE Committee

H. H. Armsby, Registrar and Student Advisor was recently honored by his appointment to the Committee on Undergraduate Adjustment of the Society for the Promotion of Engineering Education. He was appointed to this position by Donald B. Prentice, president of Rose Polytechnic Institute, who heads the S. P. E. E.

Mr. Armsby is also serving his third year on the National Council of the S. P. E. E. This Council is the governing body of the Society, and is made up of the officers, past-presidents, and 21 elective members.

Miner Captain

Captain Dick Cunningham, triple-threat man who will lead the Miners in their 1940 football campaign.

Prominent Leaders to Speak At Meeting

The second Industrial and Business Conference to be held here on the Missouri School of Mines Campus will take place next Friday, September 27, having as its theme this year "The Engineer and The Future."

The program, sponsored by the Economics Department under Professor Orten, will include talks on subjects which will be of great importance to all classes of students and in all branches of engineering, and a large attendance is expected at the meetings. Each of the men speaking is a man of long experience in his particular field and is well qualified to address a gathering of prospective engineers.

Speakers for the morning will be Wilbur B. Jones, Chairman Board of Directors, St. Louis Chamber of Commerce and Mr. Walter W. Head, President General American Life Insurance Company, St. Louis, Missouri. At twelve fifteen there will be a luncheon at the Edwin Long Hotel.

During the afternoon Mr. Arthur Casey, Director of Public Relations, Columbia Broadcasting System, St. Louis, and Dr. Gaston DuBois, Vice-President Monsanto Chemical Company in St. Louis will be guest speakers. A dinner will be given at 7:30 the same night at the Edwin Long Hotel with Dr. Enoch R. Needles of Ash, Howard, Needles and Tammen in New York as toastmaster and Mr. Ray Tucker, Smoke Commissioner of St. Louis as the speaker of the evening.

Students are urged to attend these conferences as they will provide an excellent means for students to become familiar with the opinions of men who are experts in their respective professional fields. Tickets for the dinners, which are open to everyone, will be on sale by members of Blue Key.

Prof. Eugene L. Johnson . . A Tribute

Professor E. L. Johnson of the English Department, who died suddenly in old Mexico this past summer, will not be soon forgotten by his faculty colleagues, nor by his students.

His understanding of the collegiate mind was remarkable. Teaching a subject much-disliked in an engineering school, he succeeded in making it seem even enjoyable. Ask any of his students if they will soon forget his amusing blackboard drawings of such abstract things as monism, romanticism, and dangling participles; or his scrawled remarks at the end of a returned theme; or his extreme Georgian accent.

"Eugene," his students often called him, because he addressed everyone as "Mr." or "Miss". Just to hear him calling his class roll, prefixing a "Mistah" to each name, is unforgettable.

A true southern gentlemen through and through, Mr. Johnson was an example of courtesy and graciousness that will long inspire his students.

REMARKS MADE BY DR. J. W. BARLEY AT PROFESSOR JOHNSON'S GRAVE

The editor of the weekly paper of the Rolla Lions' Club in speaking of Professor Johnson, cited a poem, the theme of which is

"Let me live in a house by the side of the road
And be a friend to man."

He says truly that this was the life philosophy of Professor Johnson. And I believe that much of this kindly spirit of Professor Johnson's sprang from his deep and abiding love of Nature, especially Nature in her quiet genial moods. Professor Johnson loved these kindly aspects of Nature—he loved the animals and birds, the flowers, the sunsets, the stars.

"When only one is shining in the sky."

These feelings were instinctive in him, but no doubt they were deepened by his study and love of the English poet William Wordsworth, whom he knew so well, from whom he so often quoted, and with whom he held very similar conceptions of Nature. Time and again I have heard him refer to Wordsworth's poem Tintern Abbey, and I am going to read from this poem a few lines that I know Professor Johnson treasured and that seem to me to have deeply influenced him in his understanding of the relation between Nature and man.

"These beauteous forms,

Have not been to me
As is a landscape to a blind man's eye:
But oft, in lonely rooms, and 'mid the din
Of towns and cities, I have owed to them
In hours of weariness, sensations sweet
Felt in the blood, and felt along the heart;
And passing even into my purer mind,

Industrial Conference — Your Opportunity

Every no wand then an event of real importance turns up on campus, and such will be the case on Friday of this week. We probably don't realize the fact that it is of importance because as students we have not become familiar enough as yet with the real substance of business and industry. We should realize, however, that some day we will be the ones to run industry and business—if everything goes alright. What better time to learn about such things than now? Here is a chance to receive first hand information about our own professions from men who know, and who are being kind enough to give their opinions to us directly. What better opportunity also to show what kind of a school MSM really is, by turning out, if possible, and giving full support to a program brought about especially for our entertainment and interest? Seniors and juniors will be released from regular classes, but sophomores and freshmen who can possibly attend will find themselves no losers in the long run.

—HN—

Headquarters of the International Labor office have been temporarily transferred from Geneva, Switzerland, to McGill University, Montreal.

Congratulations to Professor and Mrs. Gevecker upon the arrival of a baby girl August 24. The new addition to the family was named Carol Ann.

With tranquil restoration:—feelings too
Of unremembered pleasure: such, perhaps,
As have no slight or trivial influence
On that best portion of a good man's life,
His little, nameless, unremembered, acts
Of kindness and of love. Nor less, I trust,
To them I may have owed another gift,
Of aspect more sublime; that blessed mood,
In which the burthen of the mystery,
In which the heavy and the weary weight
Of all this unintelligible world,
Is lightened:—that serene and blessed mood
In which the affections gently lead us on,—
Until, the breath of this corporeal frame
And even the motion of our human blood
Almost suspended, we are laid asleep
In body, and become a living soul:
While with an eye made quiet by the power
Of harmony, and the deep power of joy,
We see into the life of things.

* * * *

For I have learned

To look on nature, not as in the hour
Of thoughtless youth; but hearing oftentimes
The still, sad music of humanity,
Nor harsh nor grating, though of ample power
To chasten and subdue. And I have felt
A presence that disturbs me with the joy
Of elevated thoughts; a sense sublime
Of something far more deeply interfused,
Whose dwelling is the light of setting suns,
And the round ocean and the living air,
And the blue sky, and in the mind of man;
A motion and a spirit, that impels
All thinking things, all objects of all thought,
And rolls through all things. Therefore am I still
A lover of the meadows and the woods,
And mountains; and of all that we behold
From this green earth; of all the mighty world
Of eye, and ear,—both what they half create,
And what perceive; well pleased to recognise
In nature and the language of the sense,
The anchor of my purest thoughts, the nurse,
The guide, the guardian of my heart, and soul
Of all my moral being.

Student Conscription Undecided

The Missouri Miner, in keeping with its desire to serve the students, has attempted to get some information concerning the status of engineering students with regard to conscription. However, to date we, the staff, have been unsuccessful in this attempt.

The following is an excerpt from a letter from the recruiting officer in St. Louis in answer to an inquiry concerning the status of students:

"In as much as the Burke-Wadsworth Bill was signed only a few days ago, regulations concerning its administration have not yet been made up and distributed. Therefore, we have no information here other than the basic details which have appeared in the press."

However, a short article in a metropolitan newspaper a few days ago stated that students now enrolled in school would be allowed to defer the date of the starting of their service, if selected, until July 1, 1941.

Watch the future issues of the Miner for news of conscription with regard to students.

Wheat Elected Frosh Head

Richard Wheat became president of the Freshman class following an election held in the Parker Hall auditorium Friday September 20. Other class officers elected were as follows: Charles Dick, vice-president; Robert McMath, secretary; Louise Pfau treasurer.

The election period lasted a full twenty minutes, and was in charge of Armin Fick, president of the Student Council.

Yale College was originally located at Saybrook, Conn.

TENNIS SETS, GOLF BALLS, ETC.
ANYTHING THE STUDENT NEEDS.

Players Introduced At Pep Rally

Several hundred students assembled in the auditorium last Friday to practice a few of the old Miner yells, such as, "Rip em up Miners," "Come on silver," and many others.

The pep squad leaders are Jack Doerres, Eleanor Gibson, Jean Lloyd, Bill Thomas, and Jack Domino.

Coach Gill introduced the football men, commenting on each player, as to his position, weight, and class year. Gill also gave a brief preview of coming football games: starting with the first encounter, Arkansas State. The Southern boys promise to give the Miners a good battle, having a string of veterans and a complicated aerial attack to throw against the Engineers. The Old St. Louisians are handicapped having had a turnover in the coaching staff, but with a number of lettermen to start against the Miners, it is evident that it should be a hard fought game for the winners. Warrensburg will have a hard fought game for the winners. Warrensburg will have a heavy team on the field this season, with a full team of veterans to back them up. Kirksville ended up last in the conference last year, but will have a powerful team to throw against the Engineers. Springfield Teachers are blessed with a full team of veterans, and will display a lot of power against the Miners. Cape is a dark-horse, and there is little doubt concerning their chances for a team, but it is rumored that they have none of Missouri U's Taw Bait men, Last, but not least, the Miners, have the heaviest line that has been sent into action for many years. A whole pile of new running plays and passing combinations are in store for the opposing teams, with a powerful defense to back up the aggressive play.

S P O R T S P A C E

Andy Devine, "Big Boy" Williams and Richard Arlen appearing in "THE LEGION OF LOST FLYERS" on the Rollamo Screen Friday and Saturday, Sept. 27-28. Companion feature is Baby Sandy in "SANDY IS A LADY."

Stevens Says

It seems likely that there will be considerable pep at the football games this season, as the students have been displaying a lot of that OLD MINER SPIRIT in several pep meetings lately. However, the turn out at the Friday pep rally was poor, considering that there happens to be almost 900 students in school, in fact, there were more upper classmen than freshmen present, meaning that some of the frosh neglected to show up for the rally. This seems to place a black mark against the frosh as far as their school spirit is concerned; so it seems apparent that they should redeem themselves by making a fine showing at the first home game.

For the first time, the Miners will have a squad of pep leaders to furnish an ample amount of spirit for them during the games. It is undoubtedly necessary for the stands to yell their heads off; so keep your eyes on the pep leaders as well as the game, and give our team all the backing that they need.

Coach Gill gave an outline of the opposing teams Friday morning, and from all points of view the prospects for a swell year are good. Of course the old saying "anything can happen in a ball game" seems to hold true, but just the same, we have a good team and good coaches; so maybe anything will happen this year.

According to a WPA historical survey, the legislature ruled in 1652 that those who failed to keep their pledges were liable for property seizure.

Douglas Hyde, first president of Eire (Ireland), was once interim professor of modern languages at Rutgers University in New Jersey.

Miners Gird For Arkansas Battle

Silver and Gold Line Heaviest In Several Years

With twelve seniors as a nucleus and a total squad of fifty, Coaches Bullman and Gill have been working for the past three weeks to whip the colorful Miners into shape for their opening game with Arkansas State here September 28.

The squad in general is in good physical condition with sore muscles and kinks fast disappearing. The team will be the heaviest one which has stepped onto the gridiron for the Silver and Gold since the arrival of Bullman and Gill here three years ago, six of the tackles hitting well over the two hundred pound mark, and four of the guards 180 or above.

In the backfield is our triple-threat man Captain Dick Cunningham, who runs, passes, and kicks with the best of them. Art Schumacher, Fred Hancock, and Bob Bruce will divide the signal calling post, though Bruce will probably spend most of his time at the end slot. Schumacher, as shown by the movies of the recent inter-squad, is a very shifty ball carrier as well as a heady quarterback. The fullback position will be handled by Keith Cook who has been hitting into the line like a truck lately, and passing with deadly accuracy. Fleet footed trackman Cliff Corneau will continue at the blocking back post,

sharing it with Koziatsek, "the Pup."

Clyde Durphy and Mer Kiburz will share honors at center this year, ably assisted by freshman Don Lepere. The guard position is well filled by Nelson Koerner and Frank Rogers, who will be backed up by Matz Domjanovich, Gene Veale, Wayne Bennetsen, John Mazzoni, Joe Sueme, and John Aimonette.

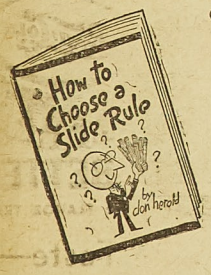

At the tackle the situation is fairly wide open, with only the veteran Ed Kromka certain of a starting berth, however, Leone, Kallmeyer, Hoby, Woods, Johnson, and Taylor will probably see plenty of service. Among the pass snatchers are five seniors; Bruce, Nevins, Strawhun, Stockton, and Nicola as well as sophomore Kane so that spot will be taken care of very well.

In the pep session Friday, Assistant Coach Gill expressed optimism of the prospects of the team for the season, pointing out some of the difficulties the other teams are having.

Harvard University's \$143,000,000 endowment makes it America's richest educational institution.

Missouri School of Mines,
Rolla, Missouri

1. From the time you reported for duty with the Rents and Claims Section, 7th Corps Area, at Little Falls, Minnesota, on June 9th, 1940 until your relief from duty with this section on August 20, 1940, your work has been such as to deserve special commendation.

2. Your good judgement and hard work contributed in a large measure to the successful and prompt acquisition of land in Fort Ripley, St. Mathias and Daggett Brook Townships of Crow Wing County, Minnesota; and also in South Harbor, Onamia, Bradbury and Kathio Townships of Mille Lacs County. You were the only non-commissioned officer on Rents and Claims duty assigned work in two different counties and in seven different townships. It was because of confidence in your ability that you received such an assignment. The efficient manner in which you performed your Rents and Claims duties demonstrated that you were qualified to meet the problems faced in these areas.

3. It is a pleasure to forward to you this well deserved commendation.

S. A. TOWNSEND,
Lieutenant Colonel, 14th Cavalry,
Rents and Claims Officer.

CAA (Continued From Page 1)

Mines, definite arrangements have been made to give primary courses during both the spring and fall semesters of this year. Each of these courses will train a quota of thirty students. Although tentative approval of an advanced course for a quota of twenty students has been given by the C. A. A., a flight instruction contractor, and additional ground school equipment must be obtained before the course can be offered.

Nearly three fourths of the students who will receive primary training this year will be seniors. Only seniors will be allowed to take the fall semester course, while enrollment during the spring term is expected to be about equally divided between juniors and seniors. The training will provide about 35 hours flying time, and will qualify stu-

dent for their private pilot's licenses. The charge for the course is a \$15 fee covering medical examination and insurance costs.

Advanced training is offered those who have completed the primary course. Training consists of 145 hours of ground school, and 45 hours of flight instruction, made up largely of acrobatic training. Heavier airplanes, powered with engines of at least 125 horse-power must be used. Completion of the course may qualify students for a junior instructor's rating, if an expected C. A. A. decision on this rating materializes.

Since the start of the C. A. A. program at Missouri School of Mines last November, seventy-one students have finished the basic training course here, forty-three if whom received their wings in the ten-week summer course ending September 1. In the summer training program, a 100 per cent record, with no "washouts," was established after all those taking the course successfully passed their license exams.

The students who completed the summer course are: Morris Allen, Otis Banes, Robert Boyd, George Cross, Dick Cunningham, Lawrence Hensley, James Kerr, William Mathews, Don Peterson, Clifton Rector, Martin Shaver, Wilson Stair, Richard Weaver, John Wise, Robert Andrews, Clifford Boutin, Lavega Brown, Victor Cadwell, Arthur Guernsey, James Johnson, Clarence Ladenberger, John McClemon, Roland Owens, Eugene Rauch, Austin Schuman, William Smothers, Morris Tague, John Zagata, Harold Aml, Laverne Bishop, Marion Boyer, Basil Compton, Harry Grigsby, Lee Hough, Carl Knoebel, William Nice, Arthur Post, Robert Schoenthaler, Douglas Stark, Russell Summers, Halbert Wilder, Dwight Wilkes, and Harrison Yount. A similar summer course given in St. Louis was taken by Harold Haas, Jack Talen, and Dan Lynch.

There are also five other Miners who are taking advanced training at Lambert-St. Louis airport, who received their primary training here last spring. They are: Carl King, Robert Prokes, Floyd Smith, Robert Smith, and Allan Summers. Most of them expect to return to school sometime in October.

Blue Key to Distribute School Directory Soon

The new school directory, compiled and edited by the Blue Key, is nearly finished and should be in the hands of the student body by October first, it was announced at the meeting of that organization last Friday. Plans were made for a petition to Fred Waring for a new school song for M. S. M. It was also decided that members of the faculty will act as guides for visiting parents on Parents Day, October 19.

Members of Blue Key will act as ticket salesmen for the luncheon and dinner which will be held during the Second Business and Industrial Conference here at M. S. M., Friday, October 27.

New girls' dormitories are being opened this month by the University of Missouri at Columbia.

THE MISSOURI MINER
