## MASSIVE MINERS WHO WILL MAUL THE RED AND BLACK OF ARKANSAS STATE TODAY

Junior Harold Krueger, 183 pound Pi K A, who will see action at the tackle position today.

Three year letter-man Frank Rogers, will be in the starting lineup against Arkansas today.

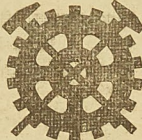

Nelson Koerner, who tips the scales at 190, will begin his third year at guard.

187-pound Ed Krompka will fill the guard slot against the red and black.

### Industrial And Business Group Meeting Held

Prominent Men Speak  
At Second Conference  
On M. S. M. Campus

With Professor Forbes of the Mining Department as Chairman of the morning session, the Second Industrial and Business Conference on the Missouri School of Mines campus got under way Friday, September 27 in Parker Hall. After a brief introductory message by Professor Orten, sponsor of the program, and one by Director Chedsey, Prof. Forbes introduced Wilbur B. Jones, Chairman Board of Directors, Chamber of Commerce, St. Louis, Missouri, whose address pertained to "The Future of The Missouri School of Mines."

Early in his speech Mr. Jones made the statement, on behalf of himself and the St. Louis Chamber of Commerce, that "we are proud of you," referring to M. S. M. Mr. Jones' experience with the school has been long and widespread and during the course of his address the names of Jackling, McNutt, Kelly, Brackett, and Easley were mentioned, all of these men being outstanding M. S. M. alumni. The effect of the European situation was discussed, and our possible course in the future, when events of serious importance will have been happening was suggested.

"Americans Are Soft," says Jones. According to Mr. Jones there has been "a softness of the American people" developing, and only a toughness to survive what will come can help preserve our Democratic principles. We as engineers were urged to move into unexplored industrial fields; it is our job to develop new resources and new ways to use them. He spoke of many developments which would not have

## Miners Meet Arkansas State In First Game Today; Gold And Silver Squad Favored To Scalp Redskins

### Ten New Men On Faculty

Ten additions were made to the Missouri School of Mines faculty during the past summer. A complete list of these additions and other changes follows:

James Ralph Coleman, Instructor in Petroleum Engineering B. S. in Petroleum Engineering, University of Texas, 1935. Engineer, Gulf Oil Corp., Gypsy Division, 1935-1939. Graduate Asst., University of Texas, 1939-40.

Charles Boyd Guest, Assistant Professor of English B. S. in Education, Delta State Teachers College, Cleveland, Miss., 1931 M. S. in English, Alabama Poly. Inst., Auburn 1932.

Robert M. Mains, Instructor in Mechanics B. S. in C. E. (with special honors) University of Colorado, 1938 M. S. in C. E., University of Illinois, 1940, 1938-40 Research, Graduate Assistant in Engineering Experiment Station at University of Illinois.

See FACULTY, Page 5

### Gordon Becomes Lieutenant-Colonel

The War Department issued orders on Sept. 23 announcing the promotion of several officers, among which was the promotion to Lieutenant-Colonel, Corps of Engineers, of Major Lewis C. Gordon, Professor of Military Science and Tactics here at the School of Mines.

### Ceramic Society to Publish Paper

The American Ceramic Society voted to publish a news and gossip sheet at their first meeting of the year held Wednesday, Sept. 25.

This paper is to contain information which will be of particular interest to the Ceramic students. The details for publication have not been arranged as yet.

Leonard Stern, graduate assistant, told of his experiences in the ceramic industry.

### Excellent Rifle Squad Predicted

Range Ready Soon  
Says Sgt. Bertram

The M. S. M. Rifle team will be stronger this year than at any time in its history, says St. Sgt. W. B. Bertram. The complete varsity is expected to be available and ready to begin practice as soon as the work that is now in progress on the range is completed.

The range is being thoroughly renovated and will be equipped with commercial traps instead of the old backstops and bullet-catchers. This will be completed before any practice is held.

Quite a bit of good material was uncovered on last year's freshman team, and several boys in the present class have done outstanding range work previous to their enrollment here. All facts now available point the way to a championship team.

### Veterans Compose Miner's Squad; Cunningham Capt.

Coach Bullman's griders will be in quest of their first victory Saturday when they open the season against the Arkansas State Indians who journey here for their second encounter of the season. The Indians' first tilt with the North West Mississippi Rangers ended in a 6 to 6 tie.

The Miners will have the edge on the Indians in that all the probable starters will have had two or more years of experience. Besides the men slated to start the game, many other veterans will be on hand. The heavy silver and gold gridiron men are well balanced with respect to reserves, and many of them will probably see action.

The Indians who had a record of five wins to three losses for last season will bring a team featuring such stars as: Callahan, 198 pound Sophomore full back, co-captains Settemire and Metzler, Tilley, a second team all-state half back, and Bolton who is considered one of the best wingmen in the state of Arkansas. Coach Bill Adams' team will have five freshmen as probable starters. Among those who were defeated by the Indians last season were: Southern Illinois Normal and the University of Tennessee Junior College.

The Miners line will average 181 pounds while the backfield of Schumacher, Cook, Cunningham, and Hancock will tip the scales at a 162 pound average. The starting team will average 174 pounds with reserves adding extra poundage. The Indians have a slightly heavier backfield.

See FOOTBALL, Page 8

### Thirty Seniors Selected For C. A. A. Training; Students Will Start Ground Course Monday

Thirty seniors began this semester's Civilian Pilot training yesterday at the Rolla emergency field under the instructors of the Campbell Flying Service of St. Louis.

These thirty were selected from the thirty-five who had survived the physical examination. This selection was made by drawing lots last Thursday evening under the direction of Professor Jackson and Dr. Miles of the Mechanical Engineering Department, who are supervising the training here.

The men are divided into three groups of ten each, each group under one instructor. After about eight hours of dual instruction, each student is allowed to solo. After about 35 hours of solo and 72 hours of ground school, the student is awarded a private flying license, provided he passes his examinations.

Ground school will begin Monday, and the entire course should be completed by Christmas, according to Prof. Jackson.

The students who were select-

ed to participate in the local C. A. A. program are as follows:

A. A. Andrae, M. E. Bowman, C. H. Brown, J. V. Heddell, F. H. Hoener, C. E. Jennings, K. E. Krill, F. K. Kyle, J. M. McAnerney, R. C. Wright, G. Ambrose, W. F. Bowman, W. R. Danson, F. W. Finley, W. S. Kilgour, R. F. Miller, A. C. Poutler, J. Pourx, C. F. Schwab, J. H. Shankland, F. F. Burgett, D. H. Falkingham, L. A. Kneker, J. R. Lambeth, M. L. Loveridge, J. D. Mack, D. C. McLean, J. K. Oken, O. H. Taylor.

## THE MISSOURI MINER

Official publication of the Missouri School of Mines in the interest of the Students and Faculty. Published every Tuesday and Saturday during the school year. Entered as second class matter April 2, 1915 at the Post Office at Rolla, Mo., under the act of March 3, 1879.

Subscription price — Domestic \$1.50 per year, Foreign \$2.00 per year. Single copy 4 cents.

### A Suggestion For Fraternity Pledging

During the past few years the student body of Missouri School of Mines has made definite steps forward towards the improvement of their social and economic well being. While there are still many steps that we must tread on the road of progress, the next one we should take in our stride is the matter of fraternity rushing. Many fraternities, as you probably well know, engage in rather unfair practices and take the word, "rushing," quite literally.

Oftimes a man suddenly discovers that he is wearing a pledge button and has no realization of the important step that he has made in his life, and of the responsibility that he has assumed. In a sense, it is rather unfair to both the fraternity and the man to have him realize later that he has been forced into a decision when he has insufficient information to make a sound decision. It is our belief that the fraternities themselves will be the ultimate benefactors of such a program.

This campus has nine social fraternities, enough, we believe, to support a regular "Rush Week." A tentative plan would include having this "Rush Week" during the week preceding registration by the upperclassmen, and during which the freshmen are to orient themselves. There is plenty of time in the school's program for this week during which these men new to M. S. M. have nothing to do. This wasted time could be well utilized by having prearranged and regularly scheduled dates with each of the nine houses on the campus. For example, each house could have one party or smoker at the house and a swimming party or picnic outside of the house.

Of course, it is understood that no man could be pledged until after the close of "Rush Week." It can be readily seen that a man would be better equipped to judge which fraternity he would care to pledge after being subjected to such a program than he is under the present system.

## 1940 Rollamo Financial Report

—And Mr. Armsby's Comment

### FINANCIAL STATEMENT

May 25, 1939 to June 11, 1940

#### RECEIPTS:

On hand May 25, 1939	Bank 10.85
On hand May 25, 1939	Bank 10.85

Bank Charges	2.00
Split of Profits to Board Members	596.00
Unaccounted for (Cash on hand May 25, 1939)	1.06
Cash on hand June 11, 1940	9.10
	\$3811.91

#### ACCOUNTS RECEIVABLE:

A. S. Cer. E.	\$ 3.50
Kappa Alpha	30.00
Class of 1934	30.00
Class of 1942	43.10
Class of 1941	41.00
Independents	20.00
St. Pat's Board	20.00
A. I. M. E.	20.00
A. S. C. E.	20.00
	\$227.60

#### ACCOUNTS PAYABLE:

None Listed.

The above statement was prepared by me from an examination of the Rollamo books, which were left in my office during my temporary absence by the Business Manager of the 1940 Rollamo.

The split of profits to board members had been paid to the members and the checks cashed before the books were left in my office. This was done in spite of the fact that the Rollamo Board had been advised that they must submit to the Board of Control their request for a split of profits, and that their request should be accompanied by my audit of their books.

In the future, no money will be paid over to either the Rollamo or the "Miner" Boards by the Business Office of the school without a written order from the Board of Control. No split of profits will be authorized by the Board of Control until an audit has been made by me and until sufficient time has elapsed following the closing of the books to make sure that there are no outstanding bills.

H. H. ARMSBY,  
Student Advisor.

### More News On Conscription

For the benefit of those students who have never taken the time to read the new selective service act in its entirety or any abstract thereof, we call attention to the following items:

Section five of the "Selective Training and Service Act of 1940" defers the draft of college students until the end of the 1940-41 college year, provided the student matriculated by December 31, 1940.

The base pay will be twenty-one dollars per month for the first four months and thirty dollars thereafter except that for determined inefficiency the pay may remain twenty-one dollars.

## In The Mail

Whereas and however, Mr. James W. Kerr, Senior, class of '41, ready, willing, but unable to grow the symbolic beard grown only by Seniors, does hereby grant John L. Zagata, Junior class of '42, the privilege and honor of growing said beard, by proxy, for above named Hon. James W. Kerr. Any infringement upon this privilege shall be duly, forthwith, and immediately brought to Mr. Kerr's attention, and furthermore, any Sophomore disturbing said leafy foliage shall be promptly and properly dealt with by Messrs. Kerr and Zagata.

Signed, James W. Kerr.

## Tradition of Bearded Seniors On the Wane

We wonder if the seniors can't grow beards, or if they're afraid the freshmen will shave them off. Never in the history of M. S. M. has the campus been bedecked with such a group of so-called unbearded kings. The let-down has taken place so suddenly that we look on almost unbelievably. Remember the wildernesses Post and Dods grew year before last? And what a brush-pile Tiede had last year. Those were men of the old school, and right upstanding they were, too. It's a long way from those boys to the examples we see today — take for instance the little stubble that Hardine has been nursing for months and which still doesn't even make a noise when he rubs it. The kind the old boys grew felt like files.

There's a possibility that beards are in the minority this year because seniors think they're a hindrance on dates. They've forgotten to consider the advantages they may gain by covering up their faces. To say nothing of the tremendous saving of razor blades and shaving soap.

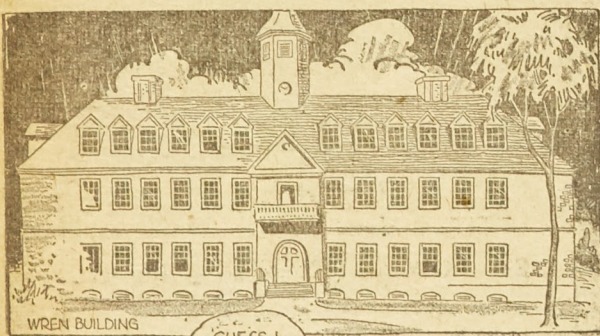

Dell Wade is about the only one we can give credit to for upholding school tradition. His noble growth is comparable to the ones of Lincoln, Einstein, and John Post, and his name should go down in our memories as one who stood for all that is noble and upright when all his other companions had forsaken the cause. M. S. M.'s only hope lies in building a better class of '42.

## New Hydraulics Lab Nears Completion

The new hydraulics lab and soil mechanics lab are nearing completion in Harris Hall with the installation of new equipment will be available to students in two weeks.

Some of the equipment in the hydraulics lab has been in other buildings on the campus for the past two years. These machines are being set up by an outside machinist and a student mechanic. The new setups include apparatus for the study of orifices under constant and falling heads, and for the study of flows by means of pitot and piezometer tubes. An outfit to measure pump efficiency is expected to be installed very shortly.

At present the soil mechanics lab is being painted but the entire laboratory will be completed before the end of the fall semester.

## Alpha Psi Omega Plans First Play

Professor J. S. Cullison of the Geology Department addressed a gathering of old and possible new members of the M. S. M. chapter of the Alpha Psi Omega fraternity last Thursday night. Alpha Psi Omega is the dramatic fraternity on the campus and was formerly a group known as M. S. M. Players. Prof. Cullison spoke on the history of the group and

## Blue Key Selects Cheering Squad

Jack Dorres, Hartley Locher, Jean Lloyd, Eleanor Gibson, and John Domin were selected by the Blue Key Service Fraternity as cheer leaders for the Miner cheering squad. The use of girls as cheerleaders is a recent innovation at M. S. M., and it is hoped that it will increase attendance and promote more enthusiastic cheering. Jack Dorres is to be the leader with the others, as assistants. The center section of the stands will be marked off for use by the cheering section.

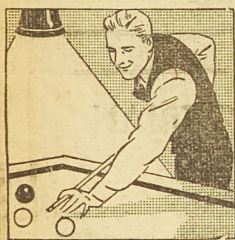

## Alumnus Sends Mineral Specimens

John Livingston, an alumnus of this school, recently sent Professor Muilenburg a collection of fluorite from the town of Rosiclare in the southern Illinois fluorite field. This collection consists of approximately twelve specimens which represent many of the natural occurrences of the mineral.

the possible plans for the coming year. Earlier in the day he had presented to the fraternity his file of plays presented at the school thus far.

According to present plans the first play of the school year will be given sometime before Thanksgiving. The selection of a play is now under consideration and will be announced in the near future.

## ASME Holds First Meeting Of Year

A membership drive was rolled into action by the A. S. M. E. last Tuesday night in Mechanical Hall when the society conducted its first meeting of the year. Vice-President Earl Smoot introduced Prof. Jackson, head of the Mechanical Department, who spoke on the various benefits of the society to student members.

Eugene Smith, just returned from his advanced course in C. A. A. at the St. Louis Municipal Airport told of his experiences in the course and gave information of general interest to those students interested in C. A. A. training.

## Tau Beta Pi Meets

The Missouri School of Mines chapter of Tau Beta Pi, national honorary engineering society, held its first meeting of the year last Monday. Several business items came up for discussion, among them the construction of a bench on the campus, care of the public address system at football games, and the coming pledging of new members.

Membership in Tau Beta Pi is based on scholarship, character, and leadership, with scholarship playing a very important part.

## Miners to Enter Cross-Country

Several Miner track men plan to enter the cross-country run at Walsh Stadium, St. Louis, on Thanksgiving Day.

These men, members of last year's squad, are in training now. Freshmen who have had training in the distance races at high school are invited to see coach Bullman concerning fall track.

The idea of fall track is to find replacements for the distance runners lost through graduation last year.

There will be a mile race open to all students October 26. Later in the fall an intramural cross country run will be held.

First school of engineering in Polytechnic Institute, founded at Troy, N. Y., by Stephen van Rensselaer in 1824.

## Alumni News

Elmer Gammeter '26, has been promoted to the position of Manager of the Stainless Steel Bureau, Metallurgical Division, Carnegie-Illinois Steel Company, Chicago, Ill.

John R. Post '29, formerly with United States Gypsum Company, Acme Steel, is now with the Box 92, Southard, Oklahoma.

Scenes such as this will abound at the Fairgrounds again on Thursday, Oct. 3, when Russell Bros.' Circus returns to Rolla to close its 1940 season before going into winter quarters located at the Ft. Wyman place just south of town. Two performances will be given, starting at 2 o'clock in the afternoon and 8 o'clock at night, with the doors opening at 1 and 7 p. m. A completely new show will be presented, which has won enthusiastic acclaim during the past summer throughout the New England and Atlantic states.

### Interfraternity Council Discusses Dance Hours

At a meeting of the Interfraternity council held Wednesday Sept. 18, an announcement was made of a plan whereby all Fraternities will be allowed to hold their dances from 10 til 2 instead of the regular dance hours of 9 til 1. This was partly brought about by the fact that many of the dates are from out of town and find it hard to get here earlier in the evening. Final decisions on this matter will rest on the judgment of Mr. H. H. Armsby.

There is also being drafted a plan of interfraternity dinner guests. Under this plan, one night

Tactics, Resignations  
Dr. W. Charles Bell of Geology Department.

a week will be set aside for visit from one active member and one pledge of each fraternity. The schedule will be arranged so that one fraternity each week will have no guests. This is because of the fact that there are an uneven number of fraternities on the campus.

#### ATTENTION—

##### Entire Student Body

Excuses from classes because of illness are not to be had for the mere asking.

We must see you at the infirmary before you miss classes so that we can determine whether your illness is great enough to warrant your absence from school work.

All excuses that we give have to be in the Registrars' office within three days after the cessation of the illness for which given.

In case of illness in which you are unable to get to the Infirmary it is best to call or have someone call the Infirmary for you and the nurse will get in touch with the Doctor.  
E. E. FEIND,  
Student Health Director.

### Prof. Cagg Writes Book

After being asked for several years for a book on how to diagram sentences, Professor Miles H. Cagg, a professor of English at M. S. M. for the past eleven years, has recently published a book entitled "The Pocket Manual of English Diagrams." This book shows a concise, clear method of diagraming and was written to be used by college freshmen.

"The Pocket Manual of English Diagrams" was written in Professor Cagg's spare time and took about a year to complete. It first appeared in mimeograph form during the summer of 1939 when it was used by students during the summer session. In the fall of 1940 the book was revised and published by the Christopher Publishing House of Boston; however it has not been placed in the stores here at Rolla as yet.

The book is one of several of Professor Cagg's publications. The others are namely "The Origin of the Euphuistic Style of English" and the "Attitude to Lawyers in the Late Fourteenth Century English Literature."

CAMBRIDGE, Mass. —(ACP) — Harvard college once was so poor the legislature ordered towns to appoint men to solicit subscriptions for its support.

# INDUSTRIAL MEETING

Continued from page 1

been made if M. S. M. had not been here. Another note of praise was struck when he told of an important executive, who upon interviewing job seekers, spoke of M. S. M. students as being most appreciative of the chance given them. Mr. Jones' final statement mentioned M. S. M. as producing the "kind of students in whose hands the destiny of our country is safe."

"Prepare For The Future"

Second speaker of the morning was Walter W. Head, President,

General American Life Insurance Co., St. Louis, Missouri, whose talk was on "Tomorrow." Mr. Head urged that we prepare for the future as the men who founded our country did, believing that the best way to look into "tomorrow" is by reviewing the past. In this period of unrest and change he suggested that the younger generation learn to work hard and produce more instead of less, without letting unemployment and various other conditions promote discouragement. Depending on ourselves and our own abilities, the development of courage, and the willingness to make sacrifices, all will enable us to make "tomorrow" what we want it to be, so he stated.

## Afternoon Session

Meeting again after adjournment for luncheon, the program got under way with Professor Muilenberg, chairman for the afternoon session, introducing Mr. Arthur Casey, Director of Public Relations, Columbia Broadcasting System, St. Louis. Speaking also of the tendency of the American people to become soft, Mr. Casey urged the present generation to stop worrying about other's problems and concentrate on our own. In the light of world relations, for instance, he urged that we cease bothering about the governmental systems of other nations and concentrate on our own. Democracy, he stated, while ideal for us, may not be the best system for other countries.

## Television New Frontier

With a long and extensive background in radio, he spoke of the tremendous possibilities of radio and television to the world and to young engineers, and mentioned possible forces which might present its advancement, but concluded that its progress could not be stopped.

## Dr. Gaston DuBois

Following Mr. Casey's talk, Prof. Muilenberg introduced Dr. Gaston DuBois, Vice-President Monsanto Chemical Company of St. Louis. Dr. DuBois, expressing belief that "the spirit of youth will conquer," injected an even more optimistic note into the future of engineering. Citing many cases of possible fields for engineering advancement, he emphasized the fact that trained engineers are needed everywhere and that no dependence upon anyone else will work. The engineers will bring about their own accomplishments through their own initiative and aggressiveness, so he stated. There is actually nothing such as social security for a national group. Social security for the individual will come only upon the application of the individual, so he said.

# Pearl Speaks At Alpha Chi Sigma

At the meeting of the Beta Delta Chapter of the Alpha Chi Sigma, Chemical Fraternity, September 25, plans were made for the Rushing Party which will be held October 9 in the Met Building. Refreshments will be served. Jack Pearl, Class of '39, who is an Inspecting Engineer for the United States Rubber Company was present at the meeting Wednesday night. He gave a discussion of synthetic rubber and its uses.

Arrangements are being made for a District Jamboree of Alpha Chi Sigmas. The Jamboree will be held at Rolla October 29 and will include the local Beta Delta chapter, the St. Louis professional chapter, the Kappa chapter of Kansas, the Delta chapter of Missouri University, and the Alpha Epsilon chapter of Washington University of St. Louis.

Dr. W. T. Schrenk, Dr. T. G. Day, W. K. Dean, Harold Nicholas, Carl Zvanut, and Edmund Butch, attended the opening meeting of the St. Louis professional Chapter of Alpha Chi Sigma held Friday night, September 20.

## What Smoke Costs St. Louis

R. R. Tucker, Commissioner of Smoke Regulation of St. Louis, was the speaker of the evening at 7:00. Speaking to an assemblage of students, faculty members, and local business men, Mr. Tucker discussed the smoke situation in St. Louis largely from the economic viewpoint.

Smoke costs the average person in St. Louis \$20 to \$21 a year, according to Mr. Tucker. Not only the direct costs but also the depreciation of buildings due to smoke raises the smoke problem to such a statue that drastic steps must be taken to remedy the situation. This is Mr. Tucker's job.

Dr. Enoch R. Needles, MSM graduate of 1914, arrived yesterday from dedicating a bridge in Jackson, Mississippi, and will be in Rolla over the weekend and acted as toastmaster for the dinner.

# Advice To Nostalgic Freshmen Given By One Who Knows

Mid "wrinkles" and mud fights though I may roam, be it ever so humble there's no place like home. These are the thoughts that are running through the minds of almost every freshman on the M. S. M. campus.

Most of the freshmen only know a few of their fellow classmates and maybe a upperclassman or two. So, that leaves them in a new world where they wander aimlessly from class to class obeying what they thing are very silly the orders given them by the sophomores. Instead of offering any resistance they allow lipstick to be smeared all over their face and don't come out of their daze even when confronted by the question, "Who is the head of the Chemistry Department?"

Most of the freshmen will not admit that they are homesick but those that are the staunchest deniers are the ones whose thoughts are back home with mother or the sweetheart.

There is a choice of two cures for homesickness; they are either spend all your time studying

so that you haven't time to think or anything else or to fall in love. Or else there's the demon Rum.

There is no need to take into discussion the first cure which is self-explanatory; so we will analyze the last and theoretically the only cure. The girl involved in this cure must not remind you of any girl at home. She must not be the gentle and sympathetic type who will try and comfort you because you are alone in this big fantastic thing called college life. She must be a "live-wire" type of girl who is full of pep and vitality and always has ideas on how to spend your spare time and all your money. But money is a little matter when you are looking for a cure from homesickness.

So, all you freshmen can take your choice either stay homesick and spoil the best years of your life. Or forget your father-city and all that belongs to it and have a grand and glorious time. It's the belief that every freshman that is interested in his own well being will follow the latter.

# Officers Elected For Radio Club

Dan Lynch was elected president, Art Wilson, vice president, and Wayne Bennetsen, secretary of the Radio club at a meeting held Wednesday, Sept. 25. The club has added two new "hams" to its membership. They are: Tomis Yyau, who operates W9-BGG in St. Louis, and Robert Siegel, operator of W9-ULC also in St. Louis.

The plan for radio club meetings this year will include descriptions of the general outline of the tests given to men who wish to become licensed amateurs. The club also intends to purchase a number of code practice sets which may be used by members.

A St. Louis orchestra and singer are to be here for the Homecoming Dance, November 9, the St. Pat's Board decided in their meeting held Wednesday night.

# Sophomores Elect Class Officers

The class officers for the sophomore class for the coming year were held in Parker Hall on Thursday, September, 26th, under the leadership of the student council. There were ninety-one members of the class present. These boys, elected Kent Comann as their president and leader, Henry Krusz as vice-president, Joe Berndt as secretary, and Kenneth Mooney as treasurer.

## As a MINER Sees it

A good feature column isn't dropped out of a newspaper without a lot of comment and clamor on the part of the readers. We had decided to write this column only once a week, and that is still our intention. However, the clamoring of disappointed readers may force us to change this policy. In one day last week we received five letters from our readers inquiring about the continuance of this widely read column. Of course there were four carbon copies and the original, but Finley didn't notice that.

The "44 Frolic" was well named, but it might have been more appropriately called "The Thirteen Year Old's Debut." Who left that baby carriage at the gym door when he left? Did you carry her home?

The Sigma Pi's are a crowd of heartless creatures. Imagine ex-

pecting a lone freshman to carry a case of beer, a half dozen bottles of soda, fourteen hamburgers, six bags of peanuts, and two ice cream bars all the way from town to their new "Country Home" just to ease that midnight hunger. Careful, boys, or the child labor laws will get you.

Someone said last week that Ken Hardine looked better without his goatee. How can they say such things? Ugh, such nakedness is disgusting. Grow it back, Ken; she said that it didn't tickle too much.

Carl Zvanut, senior chem pistol, dashed to St. Louis last week-end to catch up on something or another.

The editing department certainly slipped up when they ran the "Innocent Bystander" column on the editorial page without even crediting poor Jim Jensen. Too, the paragraph telling of Jim's entrance into the sea of matrimony with Velma Dyer was omitted.

"Boss" Pick certainly pulled off that pep session in grand style Friday. Hats off to the cheer leaders, especially those two little girls, who have nerve enough to get up and lead the Miners in

cheers.

Cook and Jeanie will convert MSM into a real "college" campus if we aren't careful.

Roy Ferris, junior mechanical, returned with a bride this fall, congratulations.

Bob Sexton is perturbed these days, the electricity hasn't gone off once this fall and he's getting behind in his visits to the local cinema.

Bravest event of the week — Senior Holland lining up four freshmen to sing. Be careful of the Rolla police, Russ.

Oddity of the week—Faulkingham and his seven leak boots. Some people resort to shovels instead of boats.

Most embarrassing event of the week—Somebody (two of him) listening in on a telephone conversation between Tex Gordon and some cutie. "Tex, you nasty little thing!"

Most embarrassing event of last summer, just brought in by grapevine — horse refuses to ride with Leroy Allan at camp.

Quotation of the week—Dewitt says, with J. Barrymore's permission, "the best way to fight a woman is with your hat — grab it and run."

Cameron Bradley of Southboro, Mass., a recent Harvard graduate and vice president of the Veteran Motor Car Club of America, spends his spare time collecting old automobiles. He has 16 pre-1910 models.

Andrew Mellon's \$750,000 mansion and seven acres of land have been given to Pennsylvania College for Women, whose nine-acre campus adjoins the Mellon estate in Pittsburgh's fashionable East end.

## On The Bench

By Bob Nevins

Saturday's game with Arkansas State should produce the usual opening game fumbles, off sides, missed assignments and poor timing, but with a few weeks we should come out on top.

None seems to know just who will be on the starting eleven but for the first time in a number of years, the Miners will be able to send two teams of almost equal strength onto the field. Last year we were weak in reserve strength and when the regulars tired our attack bogged down. Let's hope that doesn't happen this year.

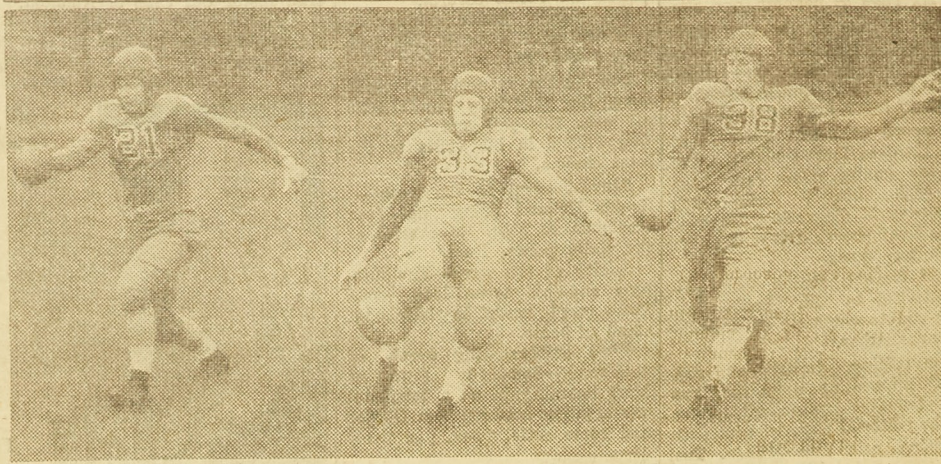

All over the country the big teams are rolling into action. As far as I know, all of the M. I. A. A. teams will be getting their feet wet and Maryville will be having their second encounter. I seem to be having trouble filling this column; so I might as well try my luck at picking a few winners. Who knows, if I get good enough, maybe the Triple-N syndicate will take me on as an advisor. If I get bad enough, maybe Henry McLemore will sign me up. Anyhow, here goes:

Boston College over Tulane (close).  
Ohio State over Pitt.  
Southern Calif., over Washington State.  
Washington over Minnesota.  
Michigan over California.  
Kentucky over Xavier.

### MISSOURI SCHOOL OF MINES AND METALLURGY FOOTBALL SQUAD—1946

No.	Player and Home	Wt.	Pos.	Squad

## READY FOR ACTION TODAY

Ralph Eads

Dick Cunningham

Jim Glover

Santa Clara over Utah.  
Tennessee over Mercer.  
Texas Christian over Centenary.

Miners over Arkansas State.  
There's a few cripples in that bunch I'll admit, but then what do you expect for an army-chooser?

Professor Don J. Kays of Ohio State University has worn the same pair of bowling shoes for 27 years.

## Intramural Sports

Ping Pong is in full swing now as the teams begin to narrow down into a closer race for the finish. The four winning teams in the semi-finals are the teams from the Lambda Chi Alpha house, the Sigma Nu house, the Pi Kappa Alpha house, and the sophomore team. These teams will play off their matches to determine the best one of them, who will meet the winner of the losers bracket to decide on the championship. Some of these games were played off on Friday and the winner will be known on Monday.

Football has also come into the lime-light once again. The rules are posted in the gym and the games will start on Tuesday, Oct. 1st. The first games to be played are the Juniors vs. the Triangle team, and the Sophomores vs. the Sigma Nu team. These games will be played on Tuesday, Oct. 1st. On the following Wednesday Lambda Chi Alpha will play the freshmen and the Alpha Lambda Tau team will stand up against the team from the Sigma Pi house. Kappa Alpha and Pi Kappa Alpha will meet the following Thursday.

This is a round robin match as in years past and each game will start at 4:15 p. m. Each team must furnish a man for scoring and timing. No man will be eligible for touch football who has ever lettered in varsity football at any college or university in the country. For the complete rules and regulations, see the bulletin board in the gym.

M. L. Dorris '23, formerly with Braden Cooper Company at Rancagua, Chile, has returned to the States, and is now living at 802 Maple Ct., Collinsville, Ill.

J. Bruce Clemmer '28, Metallurgist, U. S. Bureau of Mines of Tuscaloosa, Alabama, visited the campus in September.

## Meet The Miner's Gridiron Captain

Dick Cunningham, captain of this year's Miner gridiron squad, came to the Miners from Blewett High School in St. Louis. In high school he lettered twice in football, three times in basketball, and three times in baseball. He was co-captain of both the football and baseball teams in his senior year.

Cunningham was getting off to a great start as regular half back for his third year with the Miners when a very bad sprained ankle confined him to the hospital for two weeks and kept him out of the last half of the seasons games. However, Dick is back this season ready for action, and he will be a big asset to the team.

Dick is well liked by all of the football squad because of his fighting style of play, because he can take it as well as dish it out, and because, as one player put it, "he's an all around good fellow."

### FOOTBALL (Continued From Page 1)

Coach Gill will be absent from this game for he is journeying to Columbia to see the St. Louis Billikens battle the Missouri Tigers.

The probable starting lineup will be:

Miners	
L. E.—Nevins	
L. T.—Kromka	
L. G.—Veale	
C.—Durphy	
R. G.—Rogers	
R. T.—Krueger	
R. E.—Strawhun	
Q. B.—Hancock	
R. H. B.—Schumacher	
L. H. B.—Cunningham (Capt.)	
F. B.—Cook	
Arkansas State	
L. E.—Osment	
L. T.—Ballew	
L. G.—Buttrey	
C.—Hutchison	
R. G.—Burk	
R. T.—Metzler (Co-Capt.)	
R. E.—Bolton	
Q. B.—Settemire (Co.-Capt.)	
R. H. B.—Kelsoe	
L. H. B.—Tilley	
F. B.—Callahan	

## "M" Club to Hold Dance Oct. 19

The first meeting of the new school year for the "M" Club was held last Thursday night in the club room. Chief topic taken up was the dance being given on Parent's Day, Oct. 19. The Miner, the student council and the "M" Club are cooperating to make this the biggest day of its kind at M. S. M. Every Miner's parents are going to be urged to bring down the "girl you left behind." The local hotels are planning to make special arrangements in order to allow the greatest possible number of parents to spend both Saturday and Sunday in Rolla with Junior.

The dance committee consists of Jim Carroll, Charles Clarkson and Fred Davidson and the ticket and decoration committee is Nelson Koerner, Cliff Corneau and Nelson Ganun.

A letter of invitation has been sent to the Warrensburg team urging them to attend the dance. This is a return of the favor extended to the Miner's last year at Warrensburg.

Other business taken up was the soda and ice cream concession at football games which will be run jointly by the "M" Club and Wallace Tucker of the Rolla Soda Shop.

Election of new officers will be held at the next meeting and new members will be initiated into the club on the evening of October 25th.

In writing home don't forget to urge your folks to attend Parent's Day and to bring your home town girl down for the Warrensburg game and the "M" Club dance.
