Miners Meet Springfield Cagers Here Tonight

Miners To Battle Missouri University Victors

The Miner five will be host to the Springfield Bears tonight when the two foes will meet for the first time this season. This game at the local gym will be the Miners' fourth conference tilt.

The Miners who have yet to taste defeat on their home court in three contests will face a fast breaking squad, who defeated the Missouri U. Tigers last week by the score of 35-32. Most of the Bear's games have been hard-fought and S. T. C. has a record of five victories to one defeat. Springfield has a large squad with both height and experience as two of their upper-most assets. Kominsky and Lechner are expected to be among the starters for Springfield. They are both tall rangy forwards and have been responsible for most of the Bear's scores.

Coach Gill will rely upon about the same men that he used in the opening game of the season. Team play will be centered around Bob Bruce and Bill Schroeder, the Miners two top scorers. Bruce led all scorers in the Miner's last two games, accounting for eighteen points in the Kirksville game and eleven in the Maryville game. Schroeder scored eight points in the Maryville contest. Cook, who sank shots from all points of the floor in the St. Louis U. game, is also expected to see plenty of action. Under the captaincy of Harold Wampler, who is hard to surpass on defense, the Miners will try to gain their first conference victory.

Civils Called For Interviews

The U. S. Gypsum Company called two seniors who are being graduated in January, S. J. Beers and M. C. Grisham to Chicago for further interviews following the general interviews held here last Friday.

Representatives of the Gulf Oil Company will interview seniors of the Mechanical, Petroleum Production, Chemical, and Electrical Departments on Thursday, January 16.

Representatives of the Hercules Powder Company will interview ten to twelve Chemicals on January 16, 17, or 18.

General Electric Co. To Interview Seniors Today

Mr. M. M. Boring, personnel director at the Schenectady office of Central Electric Co., Mr. A. K. Busman, district manager from the Chicago office, and Mr. J. D. Vallier, sales representative in St. Louis, will interview seniors of the mechanical and electrical engineering departments today.

Mr. Boring will give a group talk from 9:00 to 9:30 a. m. to seniors who wish to be interviewed, and will conduct 10 minute individual interviews for the rest of the day. Each man being considered will talk to all three interviewers.

In previous years General Electric has always taken from 3 to 3 men, and this year is expected to take more. On October 15 Mr. Armsby received a letter from their employment office saying that the need for engineers is acute, and that the company will employ juniors who are having financial difficulties if the student intends to continue his school work after one year.

Graduates who are selected may or may not be put into the General Electric training course, as the company sees fit. In previous

D. F. Fisher, MSM Instructor, Dies Suddenly

Brain Infection Claims Life of Youthful Teacher

Tragedy struck the School of Mines Friday night, Jan. 10 when Instructor Durward Frederick Fisher, Jr., aged 25, died at Barnes Hospital in St. Louis.

Mr. Fisher's illness began shortly before Thanksgiving, causing him to be subjected to a mastoid operation over the holidays. He was back in school about a week and a half after the operation, and except for occasional irregularities, met his classes.

Married Over Christmas Holidays During the Christmas holidays he went to his home in Washington, D. C., and was married on Dec. 28 to Miss Mary Ellen Sims, of that city. After a short honeymoon he returned to Rolla, and after a few days was taken to St. Louis for treatment. He died of an infection of the brain.

Funeral services were held yesterday in Washington, D. C. at 2:30 p. m. The deceased is survived by his wife, mother, father, sister, and brother.

Received M. S. Degree From Penn. State College Mr. Fisher began his work

Influenza Epedemic May Cause School To Close

Alpha Phi Omega To Sponsor Student Book Exchange

Alpha Phi Omega, National Service Fraternity, will conduct a non-profit Student Book Exchange next semester. The exchange will be located on the second floor of the Power Plants Building in the room next to the Dark Room. Only used books will be handled.

Used books to be sold will be accepted from the students Jan. 20-24, 4-6 p. m., Jan. 27-31, 1-6 p. m., and Feb. 3-7, 4-6 p. m. The books will be sold Jan. 27-31, 1-6 p. m. and Feb. 3-7, 4-6 p. m.

There will be an exchange fee of five cents per book, which will be collected only if the book is sold. This fee will be used to take care of all expenses incurred.

The exchange will be conducted in the following manner. When a student brings in a book to be sold, a clerk will give him a slip which he will fill out in triplicate. The information on the slip will include the title of the book, the course number, the price, and the owner of the book. One copy will be given the owner, one copy will be pasted in the book, and one copy will be filed.

The books will be filed on the shelves. When a student desires to buy a book, a clerk will show him all of the available copies of the book. After he has made his choice the student will take the book to the clerk who will accept the money and tear out the lower half of the slip in the back of the book. If a student gets the wrong book, he can return it with the upper half of the slip still in it, and if the original owner has not received the money, the book can be returned to the exchange table and the money refunded.

The holder of the receipt will present his receipt slip to the desk clerk and if his book has been sold, he will receive the price of the book, less five cents, the exchange fee.

Orchestra Engaged For Military Ball

Charley Eby and his orchestra, from St. Louis, have been selected to play for the Military Ball here Saturday, Feb. 8, according to Alden Hacker, president of the American Society of Military Engineers who are sponsoring the Ball.

Some Students Being Treated In Homes; 75 Ill At Present

Dr. E. E. Feind, Health Director of the school, said Monday that the Missouri School of Mines would have to close if many more influenza cases are reported in the next few days among school of Mines students.

Dr. Feind said that the situation is on the verge of becoming serious. At present there are 75 students sick, and the MSM hospital has been completely filled for a number of days. He is also treating quite a number of students with mild cases, at their residences.

School officials are hoping that the situation will become better in a few days. However they stated that the school could be immediately closed should the number of sick students justify it.

Influenza is also reported on the increase among the construction workers at Fort Leonard Wood, and some of the men have contracted pneumonia.

The Rolla Public schools are still open, but, like the School of Mines, will close as soon as the number of cases reaches epidemic proportions.

Four Initiated To Chem. Frat At Joint Meeting

Four men were initiated into the Beta Delta chapter of Alpha Chi Sigma at a meeting held Saturday night at the University of Kansas, in Lawrence. Six men were also initiated by Kappa, the Kansas chapter. Those initiated from M. S. M. were James Cornelius Johnson, Michael Gobush, Stanley M. Kulifay, and Clyde H. Krummel.

A dinner was held for the initiates Sunday afternoon after which Dr. Schrenk, district counselor, spoke to those present about the progress being made by the Alpha Chi Sigma chapters in this district. Representatives from Delta chapter at Missouri U., and members from the St. Louis and Kansas City professional chapters were present. Dr. Day Ed. Butch, Carl Zvanut, Les Almstead, and Walter Dean accompanied the initiates to Lawrence.

Reporter Uncovers Scoop: Miner Once Kissed by Queen of Belgium

Once again the Missouri School of Mines makes a bid for fame. Two years ago MSM won world-wide attention as having the only college campus in the universe fertilized with elephant dung. And now we again step to the front with the announcement that a MINER reporter has discovered a personality upon the campus that we challenge any other college in the United States to match.

He is none other than Nelson Koener, the only person in the United States who has been kissed by the queen of Belgium. This announcement is a surprise even to Nelson's closest friends, for the husky senior mechanical and football star has modestly refrained from mentioning his unusual accomplishment to anyone.

The story begins back in the days immediately following the World War, when the king and queen of Belgium were touring this country. As visiting notables

often do, they inspected libraries, museums, hospitals, and the like. Not long after Nelson arrived here on this planet, the king and queen were inspecting the St. Louis hospital in which Nelson was staying.

When the king and queen came through the baby ward, nursery, or whatever you call it, where literally thousands of babies were kept, the queen chose to single out Nelson to fondle. Call it chance, fate, or what you will—anyway the queen picked tiny Nelly up from his crib and kissed him.

This reporter uncovered this amazing incident, not from modest Nelson himself, but from a friend of Nelson's mother. According to this friend, who swore this reporter to secrecy as to his identity, Nelson, like all young men, objects to being kissed by ladies other than those of his own age, and the memory of being kissed by a lady so much older is extremely distasteful.

THE MISSOURI MINER

The MISSOURI MINER is the official publication of the Students of the Missouri School of Mines and Metallurgy. It is published every Tuesday and Saturday during the school year. Entered as second class matter April 2, 1915, at the Post Office at Rolla, Mo., under the Act of March 3, 1879.

Subscription price — Domestic \$1.50 per year, Foreign \$2.00 per year. Single copy 4 cents.

A Tribute To Fred Fisher

It is with sincere sorrow that students of the School of Mines have received the news of death of youthful, quiet, congenial Professor Fisher, who was a friend of every one in his classes, and who was known by many as "Fred." All his students gave him the recommendation of being a "good prof," and with his willing, capable instruction, our embryonic engineers cracked even the hard, dry shells of Mechanics and Dynamics.

It almost stands without saying that all of us who knew him will remember Mr. Fisher as a regular fellow, and an able instructor.

Alpha Phi Omega's Book Exchange

In this issue of the MINER comes the announcement that Alpha Phi Omega, national service fraternity, is opening a book exchange in the Power Plant building in the near future. This organization is to be commended for its originality and energy in conducting this enterprise. It will fill a long-felt need here at the school, and it is worthy of the whole-hearted support of every Miner. The details of the plan are explained elsewhere in this issue.

How About a Stunt Night?

A few years ago one of the high-lights of the year here at the School of Mines was the presentation of Stunt Night. For the benefit of those who are not familiar with stunt night, each fraternity and the independents present a five or ten minute skit or stunt, and the best, in the opinion of judges selected from the faculty, wins a cup.

The last Stunt Night was two years ago, and anyone present will agree that it was one of the most hilarious evenings that he ever spent. No Stunt Night was held last year because, in the opinion of the administration, a little too much off-color humor was included.

It is regrettable that a program similar to Stunt Night cannot be held again this year. Under the supervision of the Student Council, there is no reason that a program satisfactory to the administration cannot be arranged.

We feel that we express the wishes of the entire student body when we ask that the administration give their official sanction to a Stunt Night this spring. If anything is to be done this year it must be done soon.

By The Pen of Ye Ed
HERE'S A TIP that may save you cheapskates some money. Just clip out this article and send it to the girl that you are inviting down for the Military Ball or St. Pat's. A Miner, whose name we cannot disclose, wrote to Martha Carr, the Post-Dispatch's authority on etiquette, asking her about this matter of paying a girl's expenses when inviting her down for a weekend. Here's the answer:

DEAR H—:
When a college student invites a girl to spend the week-end for a dance, the girl should pay her transportation, but the boy usually provides for her meals while there. Generally the fraternity house is turned over to the girls when they visit, but if this is not the case and the girl has to stay at a hotel, she then has to pay her hotel bill.

Sincerely,
Martha Carr.

Waring's Writing Of Song Halted By Radio Squabble

The Missouri School of Mines was all set for a new song. Having heard the job Fred Waring was doing for other colleges and universities in adding new blood to their time-worn anthems, turning out fine alma mater and pep songs and giving them a rousing introduction on his Friday College Smoker programs, MSM representatives wrote him asking "How about one for us?" He said, in effect: "Whenever we can fit you into our schedule." It seemed that the line formed on the right and that it was pretty long, since requests had been piling up since his introduction of the idea over a year ago on his series.

But now it looks like the answer is up in the air. Waring's schedule juggling has stopped. The whole project is at a standstill pending settlement of the differences between ASCAP and the radio broadcasters. Rolla Mines and other interested colleges and universities, together with disappointed Maestro Waring, are among the victims of the current ASCAP-radio battle. Waring, among the many performers who are also creative members of the American Society of Composers, Authors, and Publishers, has had his work banned from the air.

Fred Smith Dies Jan. 11

Fred Smith, one of the Miners' best friends in the town of Rolla passed away Jan. 11 at his home on Tenth Street. He was born in England, and died here at the age of 72.

Fred was well known to a large number of present and former students of MSM for his cheerful disposition and friendly advice, and his enthusiastic interest in MSM. He is survived by Mrs. Smith, his wife, and a sister in California.

Alpha Phi Omega Elects Officers

An election of officers was held by Alpha Phi Omega last Friday night. The officers elected were: President, J. P. Drester; Vice-President, J. J. Johnson; Secretary, W. Pollock; Treasurer, J. Fox; Historian, J. Mitchell.

After the election a business meeting was held in which plans for the next semester were discussed. A pledge meeting was held after the regular meeting and another meeting will be held sometime this week.

Two EE's Receive Job Offers

Wayne Bennetsen and Robert Sexton, senior electricals have received jobs with R. C. A. and Westinghouse respectively.

Sexton will work in Pittsburgh and Bennetsen will work in Camden, N. J. Both boys intend to take the training course offered by the respective companies.

In The Mail

Dear Editor:

The Interfraternity Council has shown a commendable spirit in their drive to raise funds for the Red Cross. In this time, when people and organizations all over the country are striving together for the common cause of a united freedom, the actions that people show in reference to this sort of thing, are a good barometer of a kind humanity. As in every good endeavor, there is a certain element that pulls the opposite way or ignores any such effort altogether. The student body as a whole, did little to support the dance given Saturday night for the purpose of aiding the Red Cross.

Two sore spots that show above and beyond that, however, are the attitudes taken by the St. Pat's board and the Varsity orchestra. The St. Pat's board pulled another of it's notable flukes by tight-fistedly charging the Council for the use of the piano. Considering the fact that every bit of business (and even its very existence) comes from the fraternities and student body, the attitude taken by the orchestra could have been other than what it was. An offer of a reduced rate for its services would have been very appropriate and fitting. For a school of this kind, the attitudes shown by these organizations and their spirit of cooperation are certainly not commendable. Each man for himself and the devil take the hindmost" seems to be the theme. Nice going.

Name withheld by request.

We couldn't find anything to put in this space, either.

Rifle Team Wins Seasons First Match

The Missouri School of Mines rifle team defeated the University rifle team of Armour Institute of Technology by a score of 940 to 899 in their first match of the current season.

This was a five man five shot air position match. The individual scores were as follows:

Missouri School of Mines.	
F. Fich	190
W. Finley	189
E. Fields	189
C. Ulrich	186
H. Fox	186

Total 940
Armour Institute of Technology.

Dryer	191
Dumetz	182
Lanier	177
Dost	175
E. Peterson	174

Total 899

This week the Missouri School Mines team has matches with Michigan College of Mining and Technology and the University of Alabama.

Last year the Miner sharpshooters won 23 of 24 matches.

The above story should have been about three lines longer to fill up this space.

Round The MIAA

By Ed Vogelsang

The MIAA basketball race is under way now in dead earnest. All the teams have played a number of non-league games, in which they smoothed off their rough spots and sharpened their shots. This far, four teams have tested their strength against league opponents, with the Miners engaging in three tilts, against Cape Girardeau, Kirksville, and Maryville.

Previous to the holidays Rolla traveled to Cape Girardeau only to get routed by a red hot Indian five. The teachers after losing a number of earlier games turned both barrels on the Miners and breezed to the finish by a 54 to 35 count. Failure to make their shots and ragged defensive play were the main features in Rolla's defeat. Mulkey of Cape was high point man with twenty markers, while Schroeder and Bruce paced the Miners with ten and nine points respectively.

Last week the Miners again took what proved to be a disastrous road trip. Thursday night the Bulldogs of Kirksville took the Miners to camp by the score of 46 to 29. Rolla led at the half 20-15 largely due to Bob Bruce's thirteen points, but Kirksville came back in the second half with a scoring spree that netted them the victory. Bruce was high point man of the evening with eighteen counters.

Again on Friday night, the Miners tasted defeat. This time at the hands of last year's champions, Maryville Teachers. The Miners were close at the heels of the Cats, trailing by only a few points, for all but the last minute of the game when the teachers put on a scoring spree.

Warrensburg and Springfield have yet to play any league games. These teams will see competition next week with Springfield playing at Rolla tonight.

Standings

	Win	Lose
Cape Girardeau	1	0
Maryville	1	0
Kirksville	1	0
Rolla	0	3
Springfield	0	0
Warrensburg	0	0

The joke that was to have filled this space was censored by the editor.

Industry Of Army Camp Construction Booms Business In Surrounding Towns

By Charles Zanzie

The once placid towns of Newburg, Waynesville, and Rolla, and the scrub oak Mark Twain forests are now abuzz with the activity of building Ft. Leonard Wood, an engineer's training camp which is being made about 30 miles west of Rolla, under the National Defense Program.

New cars bump and jolt over the improvised roads, trucks grind with an angry whine over the steep Ozark hills, mighty "cats" equipped with bulldozers shove over trees, move great volumes of dirt, and tug road graders. At night floodlights built on portable towers illuminate the homely, torn-up terrain, so that workers may carry on with the project that is to be a cog in the wheels of the great program which is to save democracy from the engulfing grasp of dictators. Country that 3 years ago was complaining of poverty, depression, and want is now the midst of proverbial beehive of activity.

Living Conditions Crowded

People have flocked from far and near in haste to receive the jobs that are opened to them with promise of large pay. Families are living in everything from one room apartments to tents, trailers, and chicken houses that crowd the roadside near the camp. A boastful sign "Hotel Restwell" stands before a long line of floorless, heatless tents that have been pitched beside the road in a cow pasture. Barracks have been built for workmen by the government, and may be rented for 50 cents per bed per night. Even with these accommodations many men sleep in cars.

Construction Being Done by Four Companies

The work is being carried on by a consolidation of 4 contracting companies, namely Lytle, Western, Klinger and Newman. The company did not submit a bid on the construction that is being done, but has the contract on a "cost plus" basis. That is, the government furnishes all the material, labor, and machinery and the contracting company does the work and collects 5% of the total cost of construction. All material that is bought is contracted for in Washington, and is inspected upon reception by government men.

About 4000 men are employed, and it is estimated that between 150 and 200 men are discharged daily because of inefficiency. The personnel office is busy several hours after the regular 8 hour day, and office help receive no extra pay for overtime.

A. F. of L. Leads Labor Organization.

The wage scale of the A. F. of L. is paid to all laborers and tradesmen, the pay ranging from

70 cents per hour for laborers, to \$1.25 and \$1.60 per hour for carpenters, masons, bricklayers, plumbers, and electricians. Time and a half for overtime, and double time for Sunday, is paid as the A. F. of L. specifies, and many tradesmen, especially carpenters, are working 7 days a week.

Camp to be Permanent

According to present specifications, about 20 million dollars will be spent in converting the 68,000 acres of woodland into a training camp. Contrary to the belief of many, the camp will be permanent, and will remain a part of the country's defense after the training program and possible war is over. It is to be the permanent home of the sixth army of the United States.

The camp will be made to accommodate 1200 officers, and 45,000 men. It is intended to be ready for its full capacity in about a year, there being room for about 700 men in the barracks at present. An assignment of soldiers is expected soon.

About 25 of the long wooden structures are nearing completion, and ground work for dozens is under way. The buildings are two story, and will house a company (150 men) on each floor. The inside of the room is something like

a narrow gymnasium floor with a big barrel stove at end end. The foundations of the buildings are made so that the wooden walls may be replaced by brick.

Besides the barracks, there will be five theatres on the grounds that will have no admission charges. A 100 bed hospital is being built, and for minor ailments each company has its own sick bay. A fire department, which is necessary during construction, has already been established, and is ready for emergency use.

The Big Piney river will furnish the camp with water. Miles of pipe are being laid, a purification unit is under construction, and it is estimated that the water supply will be sufficient for a camp three times the size of Ft. Leonard Wood. Most of the food will be bought at Kansas City, and among other things, a half-pint of milk a day will have to be procured for each soldier. This will undoubtedly have to be gotten from some place besides in the immediate locality.

Every high ranking officer of the army that has visited the grounds says that the terrain is ideal for army maneuvers. One of the singular features of the camp is that there will be ski training facilities. Straw will be used for snow.

With the ALUMNI

John C. Magill, '39, and Robert Carter '39, have joined the staff of the Missouri Public Health Service as Chemical Engineers. They are temporarily stationed at Jefferson City, Mo.

R. H. B. Butler, '09, who has been making his home at Rothert, London, England, writes that he is now stationed in Chicago with the British Technical Mission. His address there is Room 603, 306 N. Michigan Ave.

Hermann E. Brisch, of the class of '35 and '36, spent the Christmas Holidays in Rolla. Hermann is now associated with Ralph Snyder under the firm name of Brisch and Snyder, Consulting Petroleum Geologists and Engineers affiliated with the Manley Oil Company with head offices in Centralia, Illinois. They also maintain branch offices at Benton and at Carmi, Illinois.

William L. Sullivan, Jr., '39, has joined the staff of the Western Cartridge Company at Alton, Illinois. Bill is living at 22 Frontenac St., Clayton, Mo.

E. W. "Swede" Parsons, who has been for sometime in Peru connected with the Northern Peru Mining Company has returned to the States for a vacation. "Swede" writes on January 5th he is leaving for Nicaragua where he will act as mine superintendent for the Empresa Minera Nicaragua at a new mine which this company is opening up down there. His family will join him in April.

Clarence C. Palmer, '40, has been with the Tennessee Valley Authority at Chattanooga, Tennessee, where his address is 2106 N. Broadway.

L. R. Hinken, Chemical Engineer of the Class of '40, is in the research department of the Philips Petroleum Company. He is working on the production of Olefine from pure hydrocarbons. His address is Box 66, Schilder, Oklahoma.

Harry Cutshall, '39, is Chemical Engineer with the Illinois Powder Company, stationed at Spanish Fort, Utah. His home address is 264 E. Third Street South.

Marvin Breuer, '35, is employed with the Quartermaster's Corps of the U. S. Army in the construction of the buildings to house the Seventh Corps Area Training Center being constructed near Rolla. "Floppy," as he is commonly called, is better known as the most outstanding rookie pitcher on the Yankee baseball team last year.

Louis H. Schuette, '29, who has been associated with the American Radiator and Sanitary Corporation, has accepted em-

here in December 1938. His college career consisted of 2 years at the University of Maryland, and 2 years at Pennsylvania State College, where he received a Bachelor of Science degree in February, 1937. In June, 1938, he received his master's degree from the same school.

During the summers of 1935 '36, and '37 he worked as mechanic's helper and operator of a precooling unit for U. S. Department of Agriculture, Honeywell Regulator Co., and Produce Conditioners, Inc. From Feb. 1937 to June '37, and from Sept. '37 to July '38, he worked on a research fellowship at Pennsylvania State College. After obtaining his master's degree he worked for Klomparsen's Engineering Co., from Aug. '38 until Nov. and began his instructing career here in Dec. of the same year. He taught classes in Theoretical Mechanics, Mechanics of Materials, and Dynamics.

G. E.
Continued from page 1

years there have been a number of men from this school who entered the course and have completed it.

At present, pay for recruited engineers while in the one-year test course is 75 cents per hour, for 40 hours per week.

Johnson Speaks To ASCE

At a meeting of the A. S. C. E. held Friday, November 10, Mr. W. Scott Johnson, Chief Public Health Engineer of Missouri told the students that the construction of an army camp, a T. N. T. plant, and an airplane factory in the state would create a definite health problem.

Problems of water supply, pure food, and sewage disposal, are present, and will be hard to cope with because of short notice of occurrence he said.

The joke that was to have filled this space was censored by the editor.

employment with the Sunstrand Machine Tool Company at Rockford, Illinois. He visited in Rolla during the Christmas holidays.

Thurman M. Thomes, '40, is employed as assistant engineering draftsman with the Tennessee Valley Authority at Chattanooga, Tennessee. His home address is 509 Walnut St.

John Cramer, '39, formerly with the Arkansas Bauxite Co., at Bauxite, Arkansas, is now Chief Chemist for the Alabama Bauxite Company at Abbeville, Alabama.

John E. Kiser, '39, has accepted a job with the St. Joseph Lead Company at Bonne Terre, Missouri.

Two words describe ice-cold Coca-Cola... delicious and refreshing. Delicious, because it is always a pleasure to taste. Refreshing, because it leaves a delightful after-sense of refreshment. So when you pause throughout the day, make it the pause that refreshes with ice-cold Coca-Cola.
