WELCOME GRADS THE MISSOURI MINER

Missouri School of  Mines & Metallurgy

Parents'-Engineers' Day Is Next Big Event Scheduled

The seventh anniversary of the founding of the Missouri School of Mines will be observed by a combined Engineers'-Parents' Day program, an occasion that all parents, and alumni will want to attend.

The main attraction of the day will be a series of tours conducted on the campus. Parents and visitors will be given the opportunity to see their sons and other students in action in the laboratories, classes, and on the campus. Classes will have many special exhibits and displays for the benefit of the parents. Dr. Miles is the chairman of this portion of the program committee.

While these tours are being conducted, moving pictures describing the courses at Rolla will be shown in the auditorium, Parker Hall. Following this, and after the parents and visitors have had a chance to talk with the professors on the campus, the sons will take their parents to lunch, either to their fraternities, or to other eating places.

In the afternoon, the attraction will be the Springfield-Miner football game to be played on the campus of MSM. Directly after the game, the Association for the Advancement of Missouri School of Mines and Metallurgy will hold a meeting to which all parents and visitors are invited. Mr. Cross, of St. Louis, will preside.

In the evening, Dr. C. L. Wilson, dean of MSM, will be toastmaster at a banquet which will be given at the Pennant Hotel. The principal speaker at this banquet will be Mr. Cogwill Blair of Joplin, Mo.

All students are urged to invite friends, relatives and alumni to come to this big occasion, and all parents that are able to come are encouraged by the students and faculty to do so. Let's all do our part to make it a record crowd!

NOTICE

Band and Detonators will fall in at 12:30 today on the athletic field.

St. Pat's Board Makes Final Plans For Dance

The St. Pat's Board at a meeting Wednesday night made further plans concerning the Homecoming Ball to be held in Jackling Gymnasium Saturday night from 9 'til 1.

Doctor Day, faculty advisor, outlined to Board members the function of the board of control.

It was announced that the pre-sale price of \$1.10 for the Ball tickets would cease at 6 p. m. Saturday. Thereafter the price will be \$1.40. Tickets are available from all St. Pat's Board members.

Dr. Mann Made Theta Tau Advisor At Banquet

Dr. C. V. Mann was officially announced as Faculty Advisor of Theta Tau, national professional engineering fraternity, at their annual Founders' Day Banquet which was held last Wednesday, October 15 at the Pennant Tavern. Last Wednesday marked the thirty-seventh year of existence of Theta Tau, a chapter of which has existed at MSM for twenty-five years.

Other features of the banquet were a short talk by Clarence Stevens which was followed by a "Chapter History" presented by Vernon Loesing. Bob Stowell also read a number of interesting letters written by some of the alumni of Theta Tau.

Dr. Mann then presented a short pep talk. The banquet ended with singing.

John M. Schuman To Direct Alumni Banquet

The Alumni Association of the Missouri School of Mines will hold its annual Homecoming Banquet Saturday night at 6:15 p. m., in the dining room of Hotel Edwin Long. This year's celebration will be under the direction of John M. Schuman, a prominent Rolla business man, who is a member of the class of 1916. This class will celebrate its 25th reunion this Homecoming.

Among prominent alumni of the class of 1916 who are expected to attend is James L. Head, vice-president of the Chile Copper Company.

Tickets for the banquet may be obtained from Prof. David Walsh, Prof. Rex Williams, or Prof. John Willson. Only members of the Alumni Association or members of the faculty may attend. Tickets will be \$1.00.

Varsity Orchestra Playing Tonight

Eric Casey and all the lads of the Varsity orchestra will be on hand tonight to help make the Homecoming Dance a high spot of this year's alumni frolic. Next to the St. Pat's festivities in the spring it promises to be the biggest and we hope, the best dance of the year. Tickets will be \$1.40 at the door; you may save 30c by buying them from any St. Pat's Board member before 6 P. M. The dance will be in the gym from 9 'til 1.

Blue Key Conducts First "Tapping" Ceremony

Ten juniors and one senior were pledged by Blue Key, national service fraternity, at a "tapping" ceremony preceding the general lecture program last night.

Those pledged were: Joe Berndt, chemical, secretary of the Shamrock Club, Independent, and Alpha Chi Sigma; Don Coolidge, mechanical, member of the Triangle fraternity, Tau Beta Pi pledge, and secretary of the junior class; Ray Kasten, civil Independent, and Theta Tau; Enos Key, member of Alpha Lambda Tau fraternity; Henry Kuz, chemical, Independent, secretary of the Engineer's Club, and member of Alpha Chi Sigma; Fred Radavich, metallurgist, AIME scholarship winner, and member of the Lambda Chi Alpha fraternity; Rene Rasmussen, mining, Theta Tau; and Mel Flint, senior chemical, Independent, president of AICHE, and member of Alpha Chi Sigma.

Dean C. L. Wilson Talks To Teachers

Dean Curtis L. Wilson delivered a speech Thursday night to the teachers, who are now attending the district teachers convention here in Rolla. The topic of the speech was "Winning Victories in Advance."

Dean Wilson expressed the need of creative education and said that it should inspire people to action. Excerpts from his speech that depict the essence are:

"We can win today's victories before the day begins by taking stock of ourselves each morning."

"We can win tomorrow's victories today, by controlling our thinking and planning our program."

"We can win in childhood victories for adulthood. Psychologists say that character is developed by the age of twenty-one."

"We can win in this generation victories for succeeding generations."

AIMME Will Hold Its Annual Fall Conference Here October 23 to 25

The fall meeting of the American Institute of Mining and Metallurgical Engineers will be held from Oct. 23 to 25, at Parker Hall.

The general session of the convention will be held at 2:00 p. m. Thursday, Oct. 23. At this time Max Seaton will show motion pictures from natural magnesite and from sea water. Howard Eells will lecture on "Basic Refractories" and Alvin Schollis will speak about dolomite.

Friday the technical session will be held. The first meeting will be held at 9:00 a. m., the second at 2:00 p. m. A banquet will

Bearcats And Miners Will Battle This Afternoon

Tau Beta Pi Examines Pledges

Friday night the twelve Tau Beta Pi pledges were given a chance to show their mettle during the course of their initiation. Unlike most initiations, the candidates are not subjected to physical duress, but are given a written examination which is subject to a five-hour time limit. The test is divided into two major parts; the first concerning the history of the fraternity, and the second dealing with questions of general knowledge, both scientific and academic. Here are a few questions which are characteristic of the scope and difficulty of the examination.

Translate: "Salus populus suprema lex esto."

Define: Nirvana; numismaticography.

Who was the first man to weigh the world?

In a more technical nature we have:

Prove that X to the zero power equals one.

What is the Lewis-Langmuir theory as to the structure of the atom?

What is the psychology of sound?

Give the mathematical and philosophical conceptions of space.

The only tools the initiates are permitted to use are a slide rule and a Physics and Chemistry handbook besides their writing equipment. According to a law passed at the recent national convention, the papers must be sent to national headquarters for approval of the marking. Next Wednesday a Banquet-Smoker will be held at the Colonial Hotel in honor of those men who have succeeded in passing their initiation.

Added emphasis on home economics training is expected to boost enrollment of women students at the University of California college of agriculture.

Maryville Seeks Revenge For Last Year's Defeat

By Ed Goetemann

The Maryville Bearcats will invade the Miner gridiron this afternoon, where they meet the Miners in the annual Homecoming Day Classic. Both the Miners and the Bearcats will be seeking their first conference win; Maryville having lost to the highly touted Springfield Bears, 13 to 7, while the Miners were held to a scoreless tie by Warrensburg in their only other MIAA tilt. The Bearcats will also be out to avenge the 25 to 0 scalping the Miners handed them last year to break their 21 game winning streak. Maryville up to the present owns victories over Jefferson Barracks and Chardon, Nebraska, Teachers, and suffers losses at the hands of East Kentucky State and Springfield. Although the Bearcats lost fifteen men from last year's squad through graduation and the draft, among them All-MIAA tackle Kruse, All-MIAA center Loos, and All-MIAA end Walker, they still have a strong fighting team, and it is known that Maryville is always a dangerous threat to any team.

Coach Milner is depending on Captain Schottel, All-MIAA fullback, and diminutive Jack Padilla, 147 pound sophomore speedster, for the brunt of the Bearcat's attack against the Miners. Schottel, who lettered in three major sports last year, is one of the best when it comes to blocking and backing up a line. The rest of the backfield will be either Art Schmagel or Bruce Peters, both freshmen, at the right half position, with veteran Bill Bennett calling the signals.

On the line coach Milner will be handicapped by the loss of Vic Farrell, a 238 pound giant, who is Milner's outstanding tackle. Farrell was injured in the Springfield game. Jim Ellison, 200 pound sophomore tackle, will probably start in his place. At the other tackle will be 220 pound Nieland Thompson, the fastest linemen on the squad. Hellerick and Totaratitis will start at ends. Milner will start McClinton and Gregory at the guards. Gregory will also do the place-kicking. Harold Flamming veteran center will be at the pivot position.

Coaches Bullman and Gill, somewhat disappointed at the showing the Miners made against Warrensburg last week have worked the men hard in preparation for their encounter with Maryville. The Miner backfield will again see Fullop and Miller at the halves, with Cook at fullback and Jones at the quarterback position. Fullop did some fancy running in the

DON'T MISS THE MINER-MARYVILLE GAME THIS AFTERNOON

Maryville Teachers will send a tough squad to meet the Miners this afternoon. Let's make the game a big one for the alumni, the Maryville squad, and the Miner eleven, by getting out and giving all the sound effects we can emit. Let's show all the grads who took the time and trouble to come back to MSM for Homecoming, that we've still got that old rip-'em-up, tear-'em-up spirit that has always characterized the School of Mines.

* * *

HAVE A GOOD TIME, GRADS

Once a year we have with us a group of alumni that we are always glad to entertain, and anxious to welcome back.

This year we invite you to see one of the best football teams we've ever had, go to one of the finest banquets you've ever attended, see a parade the nature of which we cannot predict, and top it off with a dance.

Come back again next year, boys.

Since its founding in 1802, United States Military Academy has admitted 23,032 cadets, including foreigners, and has graduated 12,661.

Hunger movements in the empty stomach tend to stop under hypnotic suggestion, according to Ronald E. Scantlebury of Wayne University's college of medicine.

Graduate E. E.'s Correspond Via Prof. Lovett

Professor Lovett, of the electrical engineering department of the Missouri School of Mines has developed a unique plan for keeping members of the graduating class in electrical engineering in touch with one another.

Each year Professor Lovett and his wife entertain the senior electricals at their home with what they call a "Commencement Party." At this time the professor explains his plan. Each graduate is to write Prof. Lovett sometime during the month of September or October. The students tell what kind of work they are doing, where they are, and how they are getting along. Professor Lovett then makes duplicates of each letter and sends them to each member of the class.

This plan was inaugurated three years ago and has proved to be a great help in keeping track of graduates. It also keeps members of the class in touch with each other and makes for a closer feeling between the school and alumni.

Professor Lovett has already received twelve letters from members of last year's class. This leaves four graduates yet unheard from, and the month is only half over.

Dr. Trengove Lectures To AIME

About forty Miners and Metallurgists gathered in Norwood Hall Wednesday evening to hear Dr. Trengove's lecture on "The Ores and Mines of the Mesabi Range." The occasion was the regular monthly meeting of the A. I. M. E.

Dr. Trengove's very interesting lecture was well illustrated with excellent colored slides taken by him while he was employed on the Minnesota iron ranges. He gave a concise analysis of mining and transportation methods with particular emphasis on some of the new safety devices that are in use.

A letter from the St. Louis Chapter of the A.I.M.E. informed the membership that the MSM student chapter has been awarded a \$15 check to help defray expenses for the coming year.

Refreshments were served at the close of the meeting.

Blue Key Planning Book Of Songs

Among the service which the Blue Key will render the campus this year are plans for the compiling of a school song book. Several previous attempts have been made in the past by other organizations, but they met with little success.

The contents of the book are to be worked out by mass meetings of the student body and a faculty advisory committee. It will contain our own school songs, and other popular college songs. Also, a group of classical songs such as those of Stephen Foster are expected to find their place in the songbook. Nothing definite will be decided to the exact contents of the book until the opinion of the student body in general, and the opinion of the faculty are known.

Blue Key expects to have a quartet chosen from the student body to lead in the singing of the songs at mass meetings. A glee club organization will be formed if it is desirable to the students.

The group of songs selected will probably be printed in the form of mimeographed sheets for

Letters to The Editor—

DEAR EDITOR:

Our Homecoming Dance is up for tonight and a question arises as to the admission being asked. Does the St. Pat Board, or whoever is responsible for this, think that the student body has such a poor appreciation of Music that they should be charged \$1.10 pre sale or \$1.40 at the gate to dance to the "smooth" rhythm of the Varsity????? If it is their intentions to rob the students why not take a gun and do it in a nice clean manner. Are the decorations going to cost more than the band which costs \$59.00 complete with everything. If we are to pay a decent price why can't we receive a decent band in return????
AN INQUIRING MINER.

A safety conference for farmers was recently conducted at the University of Minnesota.

experimental purposes and further details concerning the publishing of the book will be formulated if the experiment is a success.

Varsity Orchestra Features A Large Brass Section This Year

By Bob Mellis

The Varsity Orchestra will furnish the music for the annual Homecoming Dance tonight in the Gym.

The M.S.M. Varsity Orchestra functions on the campus primarily as a cooperative organization. That is, the members all share and share alike. This year the business manager is Eric Casey, his job being to pay the bills and arrange for jobs. The past two years have seen the band develop into one which anyone would enjoy dancing to. The "Varsity" as it is called, provides the dance music for the majority of the school and fraternity dances.

The rhythm, the nucleus of any good dance band, is centered around the drummer, Vernon "Abe" Johnson. Matching Abe on the bass fiddle is "Doc" Neimuegger, and to round out this sec-

tion, Eric Casey plays the piano. In the brass section we have Kenny "Stretch" Meyer, Ray Frericks, and Sam Kurtz playing trumpets, and doing a mighty fine job of it, too. This year there are three trombones, instead of two, as there were last year. They are; Louie Campbell, Chuck Faulkner, and Bob Schmidt. Combined with the trumpets, these boys form a brass section that M. S.M. can be proud of.

Dick Wheat, Al Smith, Charles Anton, and John Ritchie compose the sax section. These fellows also play the clarinet, and each is a master of his trade and does justice to the music of the varsity.

The orchestra, as a result of hard work, has proved to be one of the best dance bands in this section and should go places in the near future.

In The Campus Spotlight

By Neil Stueck

This week we focus on another Senior-Miner, Melvin Charles Ullrich. He's blond and rather quiet, with a pleasant personality, but is a human powerhouse of energy, and tough as nails.

Mel, as he is popularly called, is an out of state student and comes from Alton, New York. When we tried to tie this down a little further Mel explained that Alton was about 15 miles due east of Buffalo and not too far from Niagara Falls. We hardly knew how to take that, but knowing him, we figured it as merely referring to "a little bit of heaven."

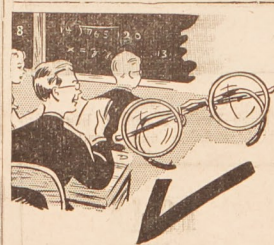

When it comes to activities, this man from New York can really take a crack at the old Missouri adage "Show Me," because he has done just that. At present Mel is president of Tau Beta Pi, honorary engineering fraternity. He is president of the Rifle Club, this being his fourth year on the team. He is a member of the Advanced R. O. T. C. and first vice-president of the S. A. M. E.; a member of the Shamrock Club, and vice-president of the Independents. He is also a member of the A. I. M. E., and in his Junior year received a scholarship from the Ladies' Auxiliary of this organization.

We find that he packs a real wallop in boxing. Last year he won the welterweight or 145 pound class here at M. S. M. He has also been in intramural swimming for several years.

In his sophomore year Mel had an N. Y. A. job and was a student assistant in the civil engineering department. Last year he worked in the Missouri Geological Survey, and this year is a student assistant in the mining department.

Last summer Mel was stationed at Fort Belvoir, Virginia, for the six weeks training required in the R. O. T. C., and later worked at a large munitions plant in the East.

Mel would like to go into the production end of underground mining upon graduation. That is provided he is not called to active duty with the U. S. Army through his connection with the Advanced R. O. T. C.

Welcome Back

THIS YEARS' MINER FOOTBALL SQUAD REVIEWED

By Ed Goeteman

In spite of the fact that we made a poor showing in the recent Warrensburg game, and lost the St. Louis U. game as far as the score was concerned, the Miners are sporting one of the best teams that they have had for a long time.

Here are the leading personalities on the squad that in all probability will show up good this year.

talents don't stop just with football. In his sophomore year, Ed was champion of the heavyweight boxing class. He also plays a wicked game of basketball in the intramural league.

Kromka

Ed Kromka, the Miners energetic captain, came all the way from Boonton, New Jersey, to enroll at M. S. M. "Fightin' Ed" is considered the toughest player in the Miner line. In high school he lettered three years in football, playing both tackle and guard. He now weighs 200 pounds and is about 6 feet tall. When he first enrolled at M. S. M., he weighed only 160 pounds. Kromka

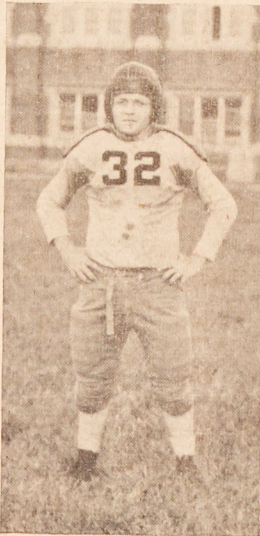

Fullop

Paul Fullop, the Miners hard running halfback, is the Miners potential threat for all-MIAA honors. Paul, who is just a sophomore, will have two years to expand his football record. Fullop has had a prominent part in all of the Miners scoring last year and so far this season. It was Paul who ran wild against Maryville last year when the Miners broke their 21 game winning streak. Fullop relies on his speed and shiftiness to elude would-be tacklers. If he gets past the line of scrimmage, he is always gone for a substantial gain, if not a touchdown.

Mushovic

Nick Mushovic, the Miners towering end, is one of the most congenial men on the squad. He always has a perpetual smile on his face. Nick could not have come to M. S. M. at a better time, for good ends are at a premium. He immediately took over the left end position, and is one of the best ends the Miners have seen.

Veale

Gene Veale, a senior, has played dependable and steady foot-

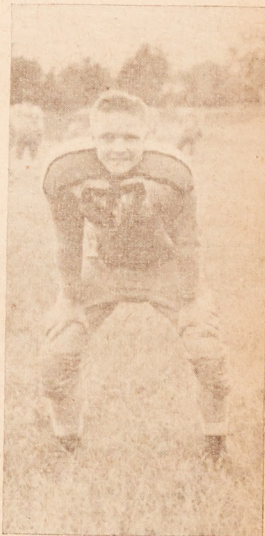

ball at the guard position for four years. This year he is the outstanding guard in the MIAA. Gene, who is 5 feet, 9 inches tall, and weighs 180 pounds, played football at Roosevelt High in St. Louis.

Kiburz

Meredith Kiburz, the Miners veteran center, is playing his third year on the Miner squad. "Kib" is small for a center, weighing only 166 pounds, but makes up for this by his aggressiveness. Normandy high, where Kiburz played two years, was undefeated in his senior year. Kiburz's talents extended also to soccer and wrestling in high school. Here at MSM Kiburz wrestled in the intramurals, winning in his weight class last year.

Jimmy Miller, the Miner right halfback, is also one of those few football players that can star on the gridiron as well as in the classroom. Jim ranked as one of the scholastic leaders during his freshman year. Before enrolling at MSM Jim attended Cleveland High in St. Louis, where he played halfback for two years. With two more years to play Jim should develop into one of the best halfbacks MSM has produced.

Miller

Al Dick who hails from Paris, Tennessee, is the best passer on the team. Al was one of the outstanding high school backs in Tennessee, where he was selected to play in the All-Star high school team. For his weight, Al is the hardest blocker and tackler in the state.

When Latrell Jones decided to take up engineering as a profession, the Miners gained an outstanding quarterback. Jones is a masterful field general rising to every situation. The quarterback in the Notre Dame shift used by the Miners doesn't have much opportunity to gain distinction through running and passing, but he is the man that leads every play. If he misses his block the whole play will go astray. This is where Jones excels. He is the best blocking back on the team.

Harold "Stubby" Krueger is the Miner place kick artist. His kicking has steadily improved and now he hardly ever misses on placements. "Stubby", a senior, is of great value to the Miner team for he can go into a game at any line position and give a good performance. Krueger was the outstanding athlete of his time at Western Military Academy, where he lettered in football, baseball, and track.

Jones and Krueger

Hammann

Gene Hammann, who is holding down the right end position on the Miner forward wall, was originally a tackle, but when ends were needed this season, Gene was tried at end and he has proven his merit. Gene, who is 5 feet 10 inches tall and weighs 185 pounds, played his high school football at Cleveland High in St. Louis. In his senior year his team was a co-champ of the city. Boxing is another of Gene's talents. Last year he won the heavy-weight championship here at M. S. M.

of football at MSM. Although Keith hasn't the weight that is usually characteristic of a fullback, he still has plenty of drive when he picks up his knees and hits that line.

T. J. Hoby who team up with Kromka at tackle is another New Jersey boy. "Hob" hails from Hillside, New Jersey, where he was an outstanding tackle, gaining All-State mention as a Senior. He also is one of those rare students who combine grade points with athletics, having ranked second in his graduating class at Hillside High, and earning the distinction of a scholastic leader in his freshman year at M. S. M.

Clyde Durphy, another Roosevelt product, came to MSM a 220 pound fullback, but changed to center his first two years. Through long hours on the hand ball courts, he streamlined himself down to 180 pounds. When this season started Durphy was

moved out to end, and now he does a good job playing either position.

John Mazzoni, who came to MSM from Soldan high, is one of the hardest working men on the team. John, a guard, has never missed a practice in three years. Each day his play shows improvement.

John Moore, a newcomer to the Miner squad, is an outstanding athlete. John, weighs 170 pounds is 6 feet 1 inch tall, and plays end. He is one of the fastest men on the squad and the team's best pass receiver. John will also help the Miner basketball team.

Keith Radcliffe probably goes in and out of the game more than any player on the team. Keith who plays quarterback, comes from Kirkwood where he played end and blocking back.

Jim Glover, another Roosevelt

Of course, it's just when least expected that the boss shows up, and you have to be on your good behavior. And that's what has happened to Brackbill (Don't give us any trouble, Robert). Seems Bob invited Shell's ace strategist, and Bob's former boss, job with Texaco. After three over to the Signu house for a free days of interviewing, the company feed. That's when the trouble representative still wasn't satisfied. Fellas, you have to real-

ize that all this is for Bob's benefit . . .

Anyway, the brethren of the petrol profession all dolled up in their best bibs, beamed with personality and pretty white teeth . . . and then hurried like hell to show that they were super-educated damfools. Spent the entire session spouting 10-year ancient theory.

The only fellows that made an impression (if any) were Brack and Stretch Meyers. Their break-over in the learned discussion to the more light subject of ale and ales was probably welcomed. Thus, the adjournment to the Peanut.

Another portion of the conversation was on the "educational" pamphlets that were issued at the recent Ritz Morbid Morals Show. Rumor has it that Brack bought one, entirely for the edification of the pledges. The boys don't need it, after these unchaperoned "drop-ins."

Those petroleum students above remind us of Zeke Jennings, ex '41, and how he got his summer grapher, and Bob's former boss, job with Texaco. After three over to the Signu house for a free days of interviewing, the company feed. That's when the trouble representative still wasn't satisfied. During these three days, no-

one could locate Zeke or Falkingham. Finally, on the last morning, Zeke struggled into class, red-eyed and bleary, to receive instructions to report for interview immediately. In fifteen minutes he returned, with one of the best summer jobs in the department. So-o-o what?

Mechanical Larry Stewart seems to have recovered fully from his Sullivan escapade. He's invited two, not one—but two, sorority gals down for the Homecoming' doings. Wonder who the other one will finally wind up with?

The C. A. A. Dive-bombing squadron is still chucklin', but sympathetically, with Charli Morris. Morris, an advanced course stoogent, unfortunately chucked his cookies on the initial advanced initial flight. Maybe he's just now getting over Kasten's wolfing.

Another note of humor comes from the rumored requisition of an offset joy-stick for the exclusive use of Sammy Kurz, versatile musician with the copper "worm" in his trumpet. Seems Sam has difficulty pulling the stick far enough back in his —hmmmm, abdomen to land adroitly.

We're thinking that Homecoming is about the best time of the year for Gibson to payoff on the King's Ransom deal. If she doesn't, Jay, we just won't dish out any more free publicity.

And while we're mumbaling about ancient vintage—Vic Zoller almost got scared out of a Scotch fifth last weekend or so. The details are here censored, for sake of propriety. An ex-gal friend, a campus, and a few other details are involved.

Strehlau, we're sorry about missing you last week. However, the colyum was already written when we found out. Fellas, Don, the Chem. dept. niteowl got a present last week. The card inscribed was labeled Chem. Dept. Faculty. The present, a book by Dr. Marte C. Stopes, famed for titles on Sane Marriage Life. O. K., now you all can wonder, too. Don denies it, emphatically.

We're sorry that we can't think of anything that could be going on that's good during Homecoming. Might make comment, however, on the rimwrecking the St. Pat Board is giving the boys at a-buck-forty for the Varsity. Not that the boys aren't that good, but who's got that much money, after registration day . . .

Radio Club Elects New Officers

The first meeting of the radio club this year was held Thursday evening at Norwood Hall in room 110. The new officers elected are: Edward McClain, president; Franklin McCutchen, vice-president; and Philip Judkins, secretary and treasurer. Robert Seigle is the Station Manager this year.

Professor Ranes gave a talk on the operation of the station for the benefit of the new members, and plans were discussed for the next meeting to be held Wednesday, October 29.

About six amateur radio operators were present.

Man, very hoarse with cold, not able to speak above whisper, knocks at doctor's home and the doc's wife comes to the door. "Is the doctor at home?"

Wife, also in whisper, "No, come in."

ASM Showed Two Films Thursday

The Missouri School of Mines and Metallurgy Chapter of the American Society for Metals met Thursday night in the Metallurgy building. A fascinating lecture and series of slides on the non-destructive magnetic casting of metals was given by Mr. McCann, representative of the Magnaflex Corporation of Chicago. Metallurgical problems involving metals testing were discussed. In the business meeting it was formally decided to issue a chapter periodical to be called "The Soaking Pit," a paper of metallurgy, for metallurgists, by neaphtic metallurgists. A committee headed by Radavich was appointed to publish the periodical.

After a snack of wieners, coffee and doughnuts the meeting was concluded in a general smok-tr and discussion group.

Welcome Miners

I extend to all students and faculty a cordial invitation to visit me in my new home and inspect

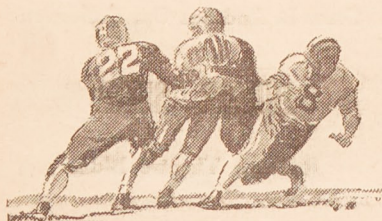

our offices and display room.

You will find at all times a display of quality Electrical Appliances and Lighting Equipment on our floor by the Local Electric Appliance Dealers'.

THE MISSOURI MINER

Page Seven

FOOTBALL (Continued From Page 1)

Warrensburg game, but spotty blocking kept him from getting away for any long runs.

The Miner line will be handicapped by the loss of Gilbert Carafiol, a newcomer to the Miner gridiron, who strained his knee in the Warrensburg fray. Carafiol has been outstanding at guard

this season, getting more than his share of tackles. Harold Krueger, Miner place kick artist and ordinarily a tackle will fill in at Carafiol's position. Gene Veale will fill the other guard slot. Captain Krompka and Theo. Hoby will start at tackles, with Nick Mushoric and Gene Hammann at the ends. Meredith Kiburz will start at center.

Bermel Talks To ASCE-SAME Group

At a joint meeting held by the American Society of Civil Engineers and the Society of American Military Engineers at Parker Hall Tuesday evening, Lieutenant Colonel Bermel of Fort Leonard Wood gave an instructive and entertaining speech on "The Engineer in National Defense."

Lt. Colonel Bermel attended Cornell University and received his degree in civil engineering. He has since been in service for 24 years in the U. S. Army.

Lieutenant Colonel Bermel stated that the opinions and comments he made during his talk were his own and not those of the War Department. He then divided the engineering profession into separate groups. The first of these was the civil engineer upon whom much of our national defense work depends. He stated, "He did not believe in the cost plus contract but he did favor the lump sum contract." He cited examples for his choice from his experiences in Hawaii and PWA projects.

"The mechanical engineering field," Colonel Bermel said, "is the biggest field of all." "The mechanical engineers' problem will be to convert factories which were originally manufacturing civilian products over to the production of military supplies." Another problem that confronts our defense program is that there are not enough skilled mechanics.

The scope of the electrical engineer will be small, he said. Their work will be mainly to see that the additional army camps have satisfactory power. Another aid they will perform is in the design and construction of naval vessels. The mining engineer will continue his basic work but at a much faster pace than before, he claimed.

The last but the most important is the military engineer. It is his duty to see that he has the needed equipment and facilities for his work, but "he is lucky to have the equipment when he wants it." Colonel Bermel remarked that "The military engineers should be composed of fifty percent civil engineers and the other fifty percent should be a combination of all the others." The military engineer is a specialized group and some of the units in their division include pontoon organizations, work units, aviation, camouflage, railroad units, armored forces, and depot and shop units.

"M" Club Financing Football Broadcasts

The "M" club is financing a broadcast of the out-of-town football games. They expect to collect enough from the "Milk-Bottle Fund" to finance it. So far students have not contributed enough to finance the Warrensburg broadcast. The club would like to have all students cooperate by donating to the "Milk Bottle."

Chem Fraternity Plans Jamboree

The Beta Delta Chapter of Alpha Chi Sigma, professional chemical fraternity, met October 15 for the purpose of making final plans for the annual Midwest District Jamboree which will be held on the Missouri School of Mines Campus on Sunday, October 19.

The program of the Jamboree

will consist of: Registration at the New Chemical engineering building, inspection of the building, tour of Fort Leonard Wood, banquet at noon at the Sinclair Pennant Tavern followed by a business session, and the annual softball game between the Professional and Collegiate members.

Attending the Jamboree will be members of the St. Louis Professional Chapter and their wives, collegiate members from the chapters at the University of Kansas, the University of Missouri, Washington University of St. Louis, and members of the local Beta Delta Chapter.

Present at the October 15 meeting was William Wilson, member from the Alpha Xi Chapter at Armour Tech. Mr. Wilson is one of the new graduate assistants of the MSM chemical department.

800 Teachers Here For Convention

Despite the inclement weather, approximately 800 teachers and education attended the forty-ninth annual South Central Missouri Teachers' Convention, which was terminated officially Friday afternoon at the Rolla High School.

The first general session, which began Thursday morning, October 16, was high-lighted by an address by Dr. Roy O. Wyland, National Director of Education and Relationships, Boy Scouts of America. Doctor Wyland, who spoke on "The Guarantees of Democracy", was followed by Lloyd W. King, Superintendent of Missouri schools, and R. M. Imbody, President of the Missouri State Teachers' Association.

Dr. Henry H. Hill, Dean of the University of Kentucky, delivered an address on "The Venture of Living Today" during the afternoon session. Musical entertainment was provided by the Salem Band.

The Convention met again in the evening, in Parker Hall. A concert prelude was presented by the M.S.M. R. O. T. C. Band, John W. Scott, directing. Dean C. L. Wilson was the principal speaker of the evening.

The following morning, Friday, October 17, an address, "Youth

High School product, plays right halfback for the Miners. Jim works hard, and has shown steady improvement. He is one of the best punters on the team.

Warren Taylor, 240 pound tackle, Allen Beverage 210 pound tackle, and Don LePere 210 pound center are three of the largest men on the squad. These three "big boys" are from Belleville, Illinois, where they played on Belleville's Championship team in their senior year. They are developing into outstanding linemen here at M. S. M.

The Tower club at Ohio State University is a co-operative dormitory built under the seats of the stadium.

in Airplanes—Not Covered Wagons," was delivered by Judge Camille Kelly, of Memphis, Tennessee. Dr. Harold Benjamin, of the University of Maryland, spoke on a timely subject, "The Defense of the Americas."

The Convention adjourned Friday afternoon, after several departmental conferences.

ACS Presents Two Films

The American Ceramic Society presented two films, "The Manufacture of Abrasives," and "The Silk Screen Process of Decoration" last Wednesday in the Auditorium.

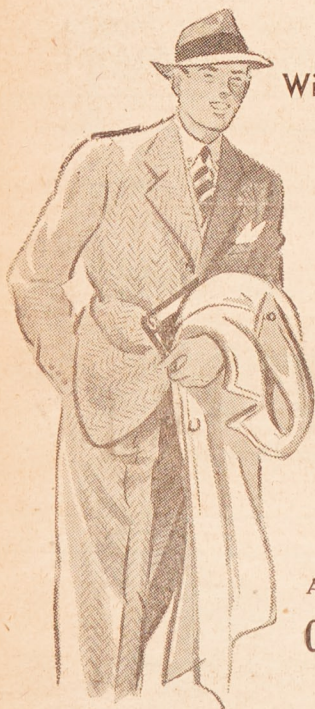

The first film, "The Manufacture of Abrasives," was presented through the courtesy of the Carborundum Company, which is America's foremost producer of abrasives. It showed the process of manufacture of carborundum, aloxite, and sandpaper and its many uses in modern industry. Some of the more unusual uses are the cutting of metal rods, angle irons, etc., with carborundum saws.

The second film "The Silk Screen Process of Decoration" was presented through the courtesy of Harry Gottlieb by Contemporary Film Production Company. It showed the modern method of producing decorative posters by use of silk stencil.
