Missouri School of  Mines & Metallurgy

VOLUME 28

ROLLA, MO.

WEDNESDAY, JANUARY 28, 1942

NUMBER 30

## Seniors May Be Graduated On May 1

The faculty, at a meeting yesterday, decided to recommend to the Board of Curators that the senior Commencement Day be advanced from May 27 to May 1 and that the Baccalaureate address be moved to April 26. If this plan is adopted, the senior classes will end on April 25 but all other classes will continue as usual.

It was also suggested that the holidays be abandoned to give more time for school work. The holidays that will be affected if the plan meets with the approval of the Board of Curators are Washington's Birthday, February 23, and March 18 and 19, the spring intermission. There would be no school May 1 so the students could hear the Baccalaureate address.

## Navy Will Be Here To Recruit Men

University graduates and upper-class men are invited to explore the opportunity to qualify for training as Naval officers by Commander Grover C. Clevenger, U. S. Naval Reserve Procurement Officer, who will be in Rolla, Saturday, January 31. The program, to be explained by Commander Clevenger, pertains to juniors and seniors in that it provides for their continuing in college until they obtain their degrees.

Candidates must be unmarried, between the ages of 19 and 27, and must have had at least two semesters of college mathematics, as well as a school or college course in plane trigonometry. Undergraduates, on enlistment, will be required to supply a letter from the college Registrar that on graduation they will have the requisite education qualifications.

Interviews with Commander Clevenger may be arranged through the office of Mr. Noel Hubbard, Registrar of the School of Mines and Metallurgy. A Pharmacist's Mate, accompanying Commander Clevenger, will conduct preliminary physical examinations.

## Alpha Chi Sigma Meets

The professional chemical fraternity, Alpha Chi Sigma, held its regular meeting Tuesday night, January 20, in the new Chemistry building. It was planned to install the newly elected officers at that time but because of the exams the installation was postponed to a later date.

During the evening Bob Pohl passed out cigars in celebration of his recent marriage. A special meeting was scheduled for last night.

## Students Wish To Have Summer Term

In order to obtain information pertaining to the adoption of an accelerated program, each student, as he registered Monday, was asked to answer three questions concerning the adoption of the three-semester program.

The first question read: "would you be willing to continue through the summer months of 1942 on an accelerated program basis, taking through the summer the courses you would normally take next fall?" To this question, 442 students answered "yes" and 120 answered "no." These numbers include about 150 seniors who will graduate in June.

The second question was: "would you be financially able to carry out such a program?" The results to this one was about even with 286 answering "yes" and 244 "no."

The third question asked: "if you are not financially able to carry out such a program, would you be able and willing to do so with government aid in the form of a loan?" To this, 816 students answered "yes" and 86 answered "no." Some of the above questions were answered "maybe," but these were not tallied.

Dean Wilson was unable to make any statement concerning the outcome of the questionnaires, because a large percentage of the students had not yet filled out the blanks. It is evident that only about 550 students have filled out the questionnaires. All students who did not fill one out are urged to obtain one from the office and fill it out, so that a more accurate result can be had. This does not obligate the student in any way.

## Coeds Appear on Fort Wood Program

As a finale to the popular "Khaki Kapers" presented at Fort Leonard Wood last Wednesday night, five "co-eds" matched wits with five of the selectees at the post in a quiz program staged at Service Club 1. The program was under the direction of Mrs. Helen Moore, who is the principal hostess at the post, and was presented by soldiers at Fort Wood.

The five-members of the "female" team, representing the School of Mines for the quiz, were Mrs. Homer Kerr, Miss Marie Davis, Miss Mary Ruth Wilson, Miss Mildred Davis, and Miss Jean Lloyd. Private Don Gallagher, who appeared on a general lecture's series in an imitation of Herr Hitler, acted as question master and master of ceremonies. Questions ranging from topics of geography, science, and history, to riddles and puns were asked, and the program was made entertaining by the humorous manner in which Mr. Gallagher conducted the quiz.

## Mrs. W. T. Schrenk Dies January 22

Mrs. W. T. Schrenk, the wife of Dr. Schrenk, professor of Chemical Engineering and Chemistry at MSM, died in St. Mary's Hospital in St. Louis after a long illness Jan. 22.

Funeral services were held in the Presbyterian Church in Rolla with the Rev. Frank L. Rearick officiating. Services were at 2:30 o'clock, and burial was made in the Rolla Cemetery on Saturday.

Mrs. Schrenk was for many years an active sponsor of women students in the School of Mines, and as instrumental in the founding of the coed organization and the Pi Delta Chi sorority in the school. She had been hostess many times to the sorority with picnics and parties on her lawn and in her home. Members of the sorority attended the funeral services in a group.

Mrs. Schrenk was also active in the Order of Eastern Star both in Rolla and in state organizations. The Eastern Star conducted funeral services.

## Major Jones Gives Military Lecture

Major Carl R. Jones, U. S. A., Professor of Military Science and Tactics, lectured on "The Fall of Holland, Belgium, Luxembourg, and France" on Monday night. He compared the repeating of history in the Wars of 1870-1871, 1914-1918, and 1939-1940. He explained the tactics of the German Army in attack on fortified positions and especially the use of engineer troops and armored divisions in making penetrations. Discussed specifically were the operations from May 10, 1940 till June 25, 1940.

This lecture was the third of a series which he is giving in the military department. The purpose is to make the students and faculty aware of exactly what has happened in the war up to the present time.

The next address will be given Thursday at 5:00 in Room 10 Parker Hall when Captain Howard B. Moreland will lecture on "The Battle of Britain." All interested are invited to attend.

## Cotterill To Harvard And Fort Monmouth

Carl H. Cotterill, Class of '40, stopped in Rolla yesterday. He was on his way to Cambridge, Mass., where he will attend Harvard College, taking a training course. From there he will go to Fort Monmouth, New Jersey, where he will be stationed. Cotterill was Cadet Adjutant of the First Battalion in the cadet regiment and was commissioned second lieutenant in the reserve corps in May of 1940. He has been working as a chemical engineer for the American Zinc Company in Dumas, Texas.

## Bids For New Power Plant Opened Yesterday

### Term Enrollment Unusually Large

Enrollment at the Missouri School of Mines for the second semester is expected to exceed that of last year, Noel Hubbard, assistant registrar, announced yesterday.

There were only 671 students who registered the first day of the second semester last year, compared to 721 Monday. Unavoidable delays in registration as well as the arrival of transfer and former students is expected to swell the enrollment to well over 800. Last year the final tabulation of students showed 806.

It is unusual for many freshmen to register for the first time at the start of the second semester, but 15 did Monday and Tuesday. There was a surprising number of old students returning too, Hubbard said.

There is of course little chance of the enrollment equaling that of the first semester of this year, when 842 were in school. Some students were unable to continue in school, and 25 students were graduating.

Hubbard said, "I believe part of the reason for the large number of freshmen, the many old students who are returning and the transfer students is that a greater interest in engineering has been created."

The largest to enroll was the Sophomore class with a total of 191. The Freshmen numbered 178; the Juniors 159; and the Seniors 177. Two graduate students and fourteen unclassified also registered.

The largest department this year is the Mechanical Department with a total enrollment of 148. The Mining and Chemical departments are next with 123 and 112 respectively. The enrollment in the Electrical Department is 100; while the Metallurgical, Civil and Ceramic Departments had 94, 70, and 25 respectively. Thirty students have not yet chosen their curricula, and there are 3 in the Science course. Sixteen registrants were unclassified.

## Books Wanted By A. P. O. Exchange

The demand for books at the Student Book Exchange, which is sponsored and operated by Alpha Phi Omega has by far exceeded the supply.

Books of all types for scheduled courses are needed. It should be understood that the student does

See BOOKS, Page 3

Bids were opened at Parker Hall at 11 o'clock yesterday for the furnishing of boilers and turbine-generators for the new MSM heating and power plant, scheduled for construction on the school campus. Those present included members of the Board of Curators of the University of Missouri, officials of the School of Mines, and a consulting engineer. Bids were received from six companies.

No contract award was made, and the matter will be considered further at a meeting of the full membership of the Board of Curators, to be held here Friday and Saturday.

While priorities have finally been received on the materials for the power plant, none of the companies bidding were able to promise delivery of the boilers and turbines before a year from now, and most of them placed delivery time as closer to two years.

### Demand Responsible

The demand for boilers and turbines, as well as the shortage of materials for their construction due to the war, is responsible for the delay.

The General Electric Company submitted a bid but did not send a bid bond, and it was indicated that their bid may be declared invalid when the entire Board of Curators meets to consider the bids submitted.

While the Board of Curators will study the bids, both President Frederick Middlebush, of Missouri, and Dr. Curtis L. Wilson, Dean of the School of Mines, said it was somewhat doubtful whether the contract would be awarded at the meeting Friday and Saturday. Both indicated that more time might be needed to study the bids and specifications.

The Murray Iron Works, Burlington, Iowa; Westinghouse Electric Co., Pittsburgh, Pa.; Elliott Company of St. Louis; Babcock and Wilson Boiler Co., St. Louis; Combustion Engineering Co., St. Louis, were the companies submitting bids.

### One Refused Bid

The Worthington Pump and Machinery Co., of St. Louis, returned specifications for the boilers and turbines but did not offer any bid.

Thomas K. Smith, chairman of the executive committee of the Board of Curators, presided. Others present were: James A. Potter, Jefferson City, a Curator; President Frederick A. Middlebush, Columbia; Leslie Cowan, secretary of the University, Columbia; L. J. Ritschy, St. Louis consulting engineer; Howard Katz, acting MSM business manager; and Dean Wilson.

## "Your Duty Is To Become A Competent Engineer"

In answer to a letter which asked the question quoted below, Lt. Col. Claude C. Earp, State Director of Selective Service, submitted the following letter for publication in the MISSOURI MINER.

Selective Service System  
State Headquarters  
Jefferson City, Mo.  
Jan. 16, 1942

Charles E. Zanzie  
Editor, MISSOURI MINER  
Missouri School of Mines  
Dear Sir:

In reply to your question of recent date, "If the information can be given, I would like to obtain from you, or from someone in authority, an official statement for publication in our school paper saying what an engineering student's duty to his country is in helping to win the war." will say that the present demand for engineers in the all out War Effort, in all categories is very great and will possibly increase in intensity as the War Emergency continues. This is particularly true in the industrial phases of engineering where the War Effort Program has put a tremendous load of design, development, production and maintenance upon the engineering departments of nearly all industrial organizations.

The requirements for the Army, Navy and Air Corps have increased by leaps and bounds and in addition to this we are furnishing our Allies with the munitions of War. It is unnecessary for me to tell you that practically all the industries and public works demand the services of engineers even in peace time but the War Effort has increased the demand many many times. The branches most important to War Effort industries are ceramic, civil, electrical, mechanical, metallurgical and mining, chemical, engineering physics and general engineering.

Four years now is the minimum required to train an engineer in the purely scientific and fundamental phases of engineering practice. A recent survey indicated the need for approximately 40,000 engineers during 1941-42. There were graduated in June 1941, approximately 12,000 from all colleges and schools. Of these more than 1,500 were enlisted in the Naval Reserves. Several thousand went into the Army as commissioned officers in the Corps of Engineers and into the flight and technical branches of the Air Corps and in fact to all branches of the military establishment. This left the strictly industrial and public services much below the annual normal supply. The engineering student's duty to his country therefore in helping win this war will mean that he should work harder and longer than he has ever worked before, sacrificing his college good times and hastening the date of his graduation, so that he can do his part as a commissioned officer or enlisted man in the Armed Forces or as a civilian using his engineering efficiency to build up and increase the munitions the Armed Forces need.

The individual engineering student will have to make the final decision but he certainly should not exert his efforts in any other manner than the two different categories above stated.

Selective Service has been given serious consideration to engineering students as to their deferment as a student as long as they are receiving average or better grades, are in full time attendance in an accredited school and give evidence that they will become competent engineers.

Yours very truly,  
(Signed) Claude C. Earp  
Lt. Col., Ordnance  
State Director  
Selective Service

## As a MINER Sees it

It's been well over a week since we've written anything about these scandalous Miners and, boy, have we got the dope now.

To clear up the old business first, let's go back to the night of Lambda Chi's formal. All the stags seem to have enjoyed immensely dancing (?) with that ice-cream-cone queen. I mean the tall red head that was chasing Nicola, et al, around the Penant at intermission. Does anyone know her phone number? I've been offered a buck to find out.

That same night the boys in the back room had quite a time keeping a seat next to Verna, a Rolla newcomer, warm. Who finally got to keep her coat, Nick? The entire Mechanical department, with the exception of the profs and the G. P. hounds, served nobly as an audience. Rather boring I thought—these wolfing sessions go on all the time.

In connection with this same affair, who is this Gunga Din whom Leonard Wolff kept toasting. Has everyone heard the one about the drunk that thought he was Napoleon?

Commissar H. B. Smithski seems to have considerable trouble keeping his shirt front closed. For studs he was using bolts and nuts from his engineering invention. Guess they weren't immune to Vodka either.

Has anybody noticed Sammy Kurtz's broken bicuspid? He thought that bottle had a left-hand thread and tried to bite the top when it wouldn't come loose. On the level, though fellas, someone hit him in the face with a paper bag.

Under the able leadership of Freddie Olde, a few of the lads pitched another of those Miner-style parties in St. Louis over the week-end. Thin one was at the "Shack"—they couldn't rent the "Seven Seas" again for reasons better left unmentioned. Everything went off according to Hoyle except for a few erstwhile rowdies who Stewart took care of by slapping their wrists and taking away their chewing gum for a half hour. No casualties other than Guilfooy who had to be taken home before his date was ready to go.

Haven't seen a picture of our honorary cadet colonel, Dorothy Nolan, yet but I understand she's quite all right. She's engaged too, wolves. I think this is a case

### Advise Moving U. To Rolla

After finishing their final exams at M. S. M. on Wednesday morning, Jan. 21, sophomores Dick Mateer and Bob Balin set out for Columbia, Mo.—home of the University of Missouri and Stevens and Christian Colleges for girls. Utilizing the rule of thumb and the law of averages to their fullest advantage, the boys made the 120 miles trip in six hours. That evening they visited friends, saw a movie, and sat in on a bacteriologist, a music student, and a journalist. The conversation revealed (among other things) that the students do not carry as heavy a program as the Miners do, but nevertheless they have to study a lot.

Thursday they toured the buildings of the White and Red Campuses. They visited the laboratories and classrooms of the electrical, mechanical, and chemical engineering courses and noticed that fine, new equipment that they had. In the physiology labs of McAllister Hall they saw a lone student dissecting a moldy, green corpse. In a room marked "no admittance" they saw jars of preserved human hands, brains, and other organs. Everywhere there was the pervading stench of a strong disinfectant.

Among other things that they saw were: the animal house where rabbits and other small animals are raised for experimentation; the six great charred columns of the old administration building; the student union center with free dancing at all times in addition to other recreation facilities; the massive building built especially to house the School's general library, this being in addition to the various other libraries of medicine, law, engineering, etc.; the tall, beautiful Memorial Tower leading to the White Campus; the College of Agriculture's vast farms extending for miles into the country.

The highlight of the trip was the visit to the University's President, Dr. Frederick A. Middlebush. Dr. Middlebush is quite an inconspicuous figure about the campus. The students see very little of him, and even a custodian that the boys met in Switzer Hall remarked that he has worked at the school for the past six years and still wouldn't know the President, if he saw him. The President, a tall, well proportioned man with all the appearances of a high executive, impressed the two boys with his congeniality and lack of formality. He asked them to take their coats off and make themselves at home, then offered them cigarettes. For the next twenty minutes they talked of MSM and Mo. U. The President, on hearing that Dick and Bob

## Miners Lose To Springfield Five

The Miner basketball team still hasn't found an MIAA rival it can lick—they dropped their fifth successive loss to a mediocre Springfield teachers quintet 51-30 here Friday night.

The Miners put up a brisk fight all through the game, but the Springfield scoring guns, Jim Ball and Carl Jeffries, were too much for them. The Bears jumped to a 15-4 lead early in the game and ran their advantage to 29-14 at halftime.

The outcome of the contest would have been greatly altered if Keith Cook, veteran Miner basketball, hadn't been expelled from the game during the first half. One of the four fouls registered against Cook was committed by one of his teammates but through a mistake in identity one of the officials charged Cook with the misplay.

The Miners also suffered when Ed Isenmann, who was outstanding defensively for the Miners was forced from the contest on fouls.

Cook was high point man for the Miners with ten counters. Leo Spinner carried part of the offensive load with three field goals and one free throw, while Duke Blair netted three baskets.

## BOOKS (Continued From Page 1)

not sell the book to the Book Exchange, but leaves it with them with his own marked price on the book. This provides a considerable saving to the student over prices for which he could sell and buy used books at the stores in Rolla.

When the book is sold the owner will then receive the purchase price, less five cents, the exchange fee.

The exchange is being held in Room 1 of the Power Plants Building and will be open from 3:00 p. m. to 5:00 p. m. for the rest of the week. Books may be turned in and bought at these times.

The Student Book exchange was started here on the campus a year ago by Alpha Phi Omega. In the past, the success has been limited by the shortage of books turned in. However, more and more students are realizing the savings and values offered and every semester finds more books on the shelves.

It is the night of the Sigma Nu dance. Fifty couples are dancing to the strains of the Varsity.

It begins to rain. 100 couples are now on the floor.

## Miners To Battle Cape Indians Friday Night

By Ed Goetemann

The second place Cape Indians invade Jackling Gym Friday night when they meet the Miners for the second time this season. In their previous encounter at Cape the Braves scalped the Miners 46 to 22. Cape has won three and lost one game, losing to an under-rated Marryville quintet.

Captain Herb Mulkey has sparked the Braves attack this season and is fighting with Kirscheville's "Long John" Shores for conference scoring honors. It will be remembered that last season these two men battled it out for scoring honors with Shores having Mulkey by a few points.

Along with Mulkey C. P. Harris, the Braves' coach, will use Jack Behrens and "Slick" Hill at guards. Behrens, a sophomore, has been playing a smooth game of ball on the floor, but it wasn't till the Maryville game that he found the hoops to his liking. Against the Bearcats he dropped three field goals and four foul

shots to lead both teams in scoring. Carl Bidewell, Rolla Anderson, and Jack Russell will alternate at the forwards. Jack Klostermann, Cape's long hot artist, has been bothered with a sore ear, but should be in shape for the Miner game.

Now that the Miners have played all their opponents once this season and have registered a big zero in the win column, Percy Gill has decided to have his men play what he calls "Fire Truck Basketball". He says that the team is so outclassed this season he is going to have them play the game for the fun of it, as well as give the fans a thrill. The players will have orders to go out on the floor and shoot from anywhere, whenever they get the ball, and play hough and ready game.

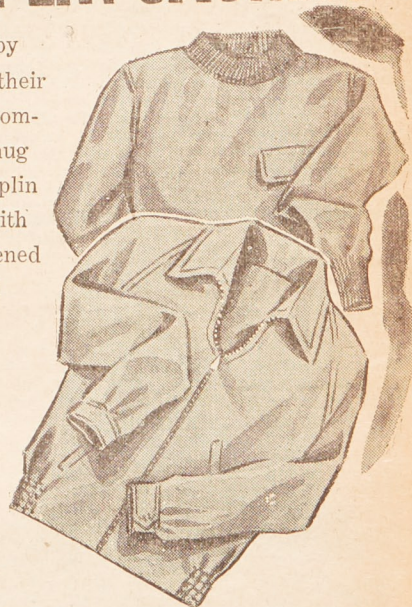

Coach Gill claims everybody will get into the game, but Cook and Moore will start at the guards, Main will be at center, and Blair and Nevin will start at forwards.

### Off The Campus

**Lambda Chi Alpha**  
The Lambda Chi Alpha Winter Formal was given at the "little red play house" on Olive Street last Saturday night. The music was furnished by the Varsity Orchestra.

Out-of-town guests were the Misses Lois Schuholz, and Jane Kern, from Columbia; Wilma Carhough, from the Univ. of South Dakota; Anne Harloe, of Washington, D. C.; Elizabeth Dixon, of Fort Scott, Kansas; Margie Moser, of Salem; Loretta Gildehaus, of Union; Jennie Thaxton, of Doniphan, Mo.; Madeline Edmondson, of Springfield, Mo.; Mr. Jose McClinton, of St. Louis; Mr. Otto Holz, and Mr. Gordon Moline, also from St. Louis.

Rolla guests were the Misses Battloee Boggs, Miss Dorothy Hartlein, Josephine Moore, Hope Ryder, Adele Neyer, Jean Lloyd, Mary Sands, Jerry East, Mary Snodgrass, Billie Catsrop, Betty Jo Butler, Sue Enochs, Peggy Heller, Sue Crumpler, Theda Finley, Mary Francis Higley, Eleanor Greig, Betty Richards, Jean Fay, Adah Rose Cross, Ken and Connie Roffman, Betty Brewster, Anne Drake, Arlene Comstock, Elsie Gullahon, Juanita Davis, Adele Alexander, Agnes Houlihan, Loretta Gildehaus, Mr. and Mrs. Crumpler, and Mr. and Mrs. Kerr.

Chaperones were Mr. and Mrs. De Vere Joslin, Col. and Mrs. F. H. Ryder, Capt. and Mrs. Moreland, and Major and Mrs. C. R. Jones.

A bachelor is a sportsman who plays at the game of love and manages to retain his amateur standing.

### MISS DOROTHY NOLAN TO BE CADET COLONEL OF REGIMENT

The most coveted position in the School of Mines winter social season is that of the Society of American Military Engineer's "Honorary Cadet Colonel" for their annual Military Ball. This year the SAME has bestowed this high honor on pretty, versatile Miss Dorothy Nolan of St. Louis, Missouri.

Dorothy has brown hair, blue-ruby lips, and an exquisite soft, smooth complexion. She's 23, stands five feet five and weighs 118 pounds. She has what artists call a slim-princess figure and exquisite brunette beauty.

As regards her formal education, Miss Nolan was graduated from Blewett High School in 1938, valedictorian and vice-president of her class. She later at-

tended Miss Hiekey's Secretarial School in St. Louis.

Versatility is the keynote of her talent. Dorothy exhibits prowess in swimming, horseback riding, tennis, and other sports. She sings well and loves dancing, an art at which she is especially proficient. Those at last year's Military Ball will remember her excellent technique as the leader of the conga line.

Dorothy is certainly no stranger on the campus. Last year she attended many dances here including that of Theta Tau. Her winning smile and vivacious personality have won her a lot of friends and admirers. She will be escorted by her fiancé, Welby King, Cadet 1st Lieutenant of Company "E".

### Cornell Offers Scholarships To Graduate Engineer

Several John McMullen Graduate Scholarships, paying \$900 a year, and a number of other fellowships and scholarships for graduates of accredited engineering colleges are offered by Cornell University for the academic year 1942-43, according to information received here. The new buildings, Olin Hall of Chemical Engineering and the High-Voltage Research Laboratory, besides additions to equipment in other laboratories, have greatly improved facilities for research in the College of Engineering, the announcement said, and a number of research projects with a direct bearing on the war effort will be

undertaken with the help of the new group of graduate students.

Other awards, in addition to the McMullen Graduate Scholarships, are listed as follows: in civil engineering, the Elton Huntington Hooker Fellowship in Hydraulics, with a stipend of \$150 a year, the McGraw Fellowship, \$400 a year and free tuition, and a University Graduate Scholarship, \$200 a year and free tuition; in mechanical engineering, the Sibley Fellowship, \$400 a year and free tuition, and the Edgar J. Meyer Memorial Fellowship, \$400 a year and free tuition; and in electrical engineering, the Charles Bull Earle Memorial Fellowship of \$400 a year and free tuition. McMullen Graduate Scholarships may be held in any of the four general fields of civil, mechanical, electrical, or chemical engineering.

Applications for these scholarships should be sent to the dean of the Graduate School of Cornell University before March 1. Application blanks may be obtained direct from the Graduate School Office in Ithaca.

### Sergeant Bertram Begins Fourteenth Year At MSM

Staff Sergeant W. B. Bertram was assigned to the MSM faculty on January 1, 1929, and has been a key man in the instruction of students in the Reserve Officer's Training Corps since that time. He estimates that he has instructed over two thousand men in basic military training during his thirteen years here.

Sergeant Bertram is a veteran soldier having been in the regular army since he volunteered on May 3, 1917. He served two years overseas during World War I with the 6th Provisional Regiment, Coast Artillery (8 inch howitzers) which later became the 57th Artillery. He came to the Missouri School of Mines from the Second Engineers, Denver, Colorado, which he joined in 1923.

Well known for his excellent rifle marksmanship, Sgt. Bertram received an expert rifleman rating upon joining the Second Engineers in 1923. He has retained that rating since that time. His very able coaching has been instrumental in producing some of

were touring the campus, carefully pointed out places of interest on a map and offered to secure a guide for them.

That evening the boys went to the Student Union Center, toured the town, and went to another movie; they saw a goodly cross-section of the School's 6000 students. The next morning they bade farewell to Columbia, took to the road, and headed South, arriving in Rolla early in the evening.

In a terse statement expressing their opinion of Missouri U., Dick Mateer and Bob Balin said, "It's a nice place. Why not move it down to Rolla."

the finest rifle teams in the nation. His MSM team of last term won 23 of 24 matches to place it among the best of the nation's teams.

Sgt. Bertram was born in Monticello, Kentucky, incidentally only sixty miles from the birthplace of famed Sgt. York. He attended Cumberland University from which he received a law degree in 1912.
