NUMBER 12

Welcome Parents

Army Air Corps Examining Board At MSM Soon

Men who wish to join the Army Air Corps and also complete all or part of their college training before joining, may enlist in the Air Corps Enlisted Reserve (part of the Army Enlisted Reserve) in Rolla. An Aviation Cadet Examining Board will visit the school at a date to be announced later. Men who wish to become either flying or ground (officers) may appear before this board, and if accepted, will be enlisted at once. Men who cannot wait for the visit of this board may be enlisted by Major Moreland at once in the Army Enlisted Reserve, unassigned, and transferred to the Air Corps Enlisted Reserve if accepted by the board. Dr. Fiend will give the Air Corps Examination prior to the arrival of the board.

Men who wish to join the Navy as either flying or ship officers after completing their college education, may join the Army Enlisted Reserve (if freshman or sophomores) in the School of Mines, and when they become juniors, they will be transferred to the Navy Enlisted Reserve. If the Army Enlisted Reserve is called into service prior to this time, the men will be transferred to the Navy Enlisted Reserve at that time. Juniors or Seniors who wish to enter the Navy Enlisted Reserve must obtain a letter as to their status from the Pm S&T and present this letter to the Navy Recruiting Officer in St. Louis before their enlistment can be effected.

All men who have decided to enlist in the Army or Navy Enlisted Reserve (including Army Air Corps) are requested to notify Major Moreland in the Bindery office, basement of Parker Hall (or Mrs. Lee if he is not there), either in person or by campus mail. Information may be obtained at the same place. Major Moreland is usually present at 5 p.m.

Alpha Chi Sigma Plans Safety Program

Alpha Chi Sigma at its meeting Wednesday night discussed plans for a safety program which it intends to carry out in the near future. The program is concerned with safety practices in the school laboratories. A similar scheme was sponsored by the chemical fraternity last year.

A larger attendance at meetings drive was also launched.

MSM's First Winter Carnival To Be Held In Dec.

The Missouri School of Mines' first annual Winter Carnival will be held December 11 and 12, 1942. The purpose of this celebration is to supplement the senior's St. Pat's.

It will be the "affair" of the year. There will be a coronation of the Winter Queen attended by her maids, who represent each of the fraternities and the independents.

This coronation will be held on Friday night, the night of the costume ball. Saturday, as is customary at St. Pat's, the Sigma Nu's will hold a tea dance at their Chapter House in the afternoon, followed in the evening by the formal ball at the gym.

To all those worthy Miners who remember the celebration of their patron saint last Spring, the gym at this affair will be dressed in a splendor equalling or surpassing that of St. Pat's.

This will be the School's entertainment sendoff to one of its largest senior classes and unquestionably its best spirited. So come on Miners lets give these men something really worth while to remember us by whether they go into industry or into the armed services.

Smith New Pres. Of Theta Tau

Theta Tau, Professional Engineers' Fraternity, held its regular meeting last Thursday evening, October 22. The main item of the meeting was the election of new officers.

The following were elected: Don Smith, President; Charlie Mitchell, Vice-President; Al Dick, Marshall; Leo Goodwin, Scribe; Dick Wheat, Inner Guard; Bob Schmidt, Outer Guard; and Tom Branick, Treasurer.

The new officers were installed immediately.

The pledging of potential members will be held early next month. A committee to select the pledges was appointed at the meeting.

The announcement that two social meetings a month will be held was made known. They are to be held every other Sunday evening at seven o'clock.

The height of chivalry is the action of the young man who took a girl out for a ride in his car—and then walked home with her.

I've raised a lot of families, says the elevator boy.

A. C. Weber To Talk Before ASCE

Due to difficulty of arranging student visits to manufacturing plants now engaged in defense work, the Student Chapter of the A. S. C. E. will present Mr. A. Carl Weber, Research Engineer for Laclede Steel, with slides and motion pictures on the "Making of Steel" that would approximate a visit through a typical steel producing plant. The pictures will show types of furnaces and mill operations taken at different levels in the open hearth department and in the rolling mill of the LeClède Steel Company.

Since no Senior trip will be taken this year, because of transportation difficulties, etc., a program of this type should be very informative. All students are cordially invited to this lecture.

The meeting will be held in Parker Hall on October 27 at 7:30 p. m.

The fall outing of the Student Chapter of the A. S. C. E. will be held on Thursday, November 5 at 5:30 p. m. in Sinkum Hollow.

A. P. O. Plans Hayride Oct. 29

The Alpha Phi Omega, campus service fraternity met Tuesday evening in the A. P. O. room in the Power Plant Building. Plans were discussed for a hayride and outing Oct. 29, the night before the Independents' dance. This outing is for members of the local chapter.

Eight to ten members will act as guides on Parents Day. They will conduct visiting parents of students on tour about campus & which will take in the different buildings and other places of interest. These tours will be conducted from 8 to 12, Saturday morning.

A committee, headed by Neil Stueck, was formed to investigate the possibilities of a salvage drive on tin cans. There will be more news about this new scrap drive in a later issue of this paper.

Dean Wilson To Attend S. P. E. E. Convention

Dean Curtis L. Wilson will visit Chicago as the official delegate of the Missouri School of Mines at a convention of Associated Land Grant Colleges and Universities. The meetings will be held from October 25-30.

Dean Wilson will also attend a preliminary meeting of the S. P. E. E. to discuss war work of Engineering Colleges, and the part engineering students can play in it.

Gala Program Planned For Parents-Engineers Day

War Stamp Corsages For Military Ball

The S. A. M. E. has decided that in keeping with the present War Stamp drive and because of the definite aid we would be giving, to substitute war stamp corsages for floral corsages of the Military Ball. Therefore, all floral corsages will be banned from the floor. This step, taken voluntarily by the students, should show in the future a marked change from the former corsage prices. These corsages, contrary to opinion, are very attractive and besides we are helping our country as well as ourselves.

These corsages may be obtained through John Requarth or any other Senior R. O. T. C. student, from \$1.50 up. Bonds too are entirely in order.

ASME Hears Talk On Shipbuilding

The student branch of the A. S. M. E. held a regular meeting last Tuesday night in Mechanical Hall. At this meeting a very interesting talk on ship building was given by one of the student members of the society who has had practical experience in one of the Navies' largest ship yards. He outlined the principal steps in building Destroyers, and explained why it takes so much longer to build a vessel of this type, than it does one of the Liberty ships which can be built in several weeks. Several points of interest to the Mechanical Engineer were also brought out. The Society plans to have many more such talks by the students themselves.

In addition to this, plans for Parents Day were discussed, and the part that the Mechanicals will play on this day were outlined and explained by Professor Thorpe. They will display equipment of the Aero-nautical Engineering Department in addition to Forge Shop, Welding Shop, Machine Shop, Power Plant and other things pertaining to the Mechanical Department. After the meeting, refreshments were served, much to the delight of those present.

Dr. Johnson To Speak At Banquet

Today the faculty and students of MSM welcome the parents of the student body in celebration of the annual Parents - Engineers Day. The purpose of the occasion is to acquaint parents with the various departments and facilities of the School of Mines.

In order to give parents an opportunity to witness the functions of the departments many of the laboratories are in operation. Student guides, who are supplied by Blue Key and Alpha Phi Omega service fraternities, will conduct the visitors on organized tours about the campus, and special guides in the buildings are available to explain the laboratory equipment and the special exhibits.

From 8-9 a. m. there is registration of parents and visitors in the lobby of Parker Hall. The rest of the morning will be devoted entirely to the campus tours, and every visitor will be furnished with a program which explains the work done in each department.

During the noon hour the parents will be the guests of the fraternities and eating clubs where luncheons will be served.

Featured on the program is the MSM vs Warrensburg football game starting at 2 o'clock on Jackling Field. Between the halves the Detonators, crack R. O. T. C. drill unit at SM, will give an exhibition in precision drill.

This year the Parents Engineers banquet will be held at the Edwin Long Hotel beginning at 6 p. m. Dr. Oscar C. Johnson who is pastor of the Third Baptist Church of St. Louis will be the principal speaker. Dean Curtis L. Wilson and members of the faculty will also attend.

Exhibits

The civil engineering department is displaying equipment in the hydraulics laboratory and showing methods used in testing highway materials. Other exhibits in Harris Hall are sponsored by the mechanics department and the U. S. Geological Survey.

In the mining department, visitors may view scale models of mines and equipment used in mining operations. Tours will also be conducted to the school mine southwest of town.

WELCOME PARENTS AND FRIENDS

The MINER, on behalf of the student body would like to take this opportunity to welcome the parents and friends of the students who are visiting on our campus. This day is for you, and we sincerely hope that you enjoy it.

It is our purpose to acquaint you with our school; with our methods of teaching; and with the equipment which is used in this instruction. Almost every department has an exhibit. We hope that all of you have time to visit each one and learn of the work we are doing.

It is our aim to make this **your** day and to this end we are dedicating this issue of the MINER to you, our Parents and friends. May this day be one long remembered by you and your sons.

Special Parent's Day Offer

I wish to take advantage of the special Parent's Day offer of \$1.50 for a subscription to the MINER, good until September 1943. I am enclosing \$1.50. Please send the MINER to

J. R. Nevin Weds Miss Ruth Hunter

James R. Nevin, Jr., '42, and Miss Ruth Hunter of Rolla, Missouri, were married on last Saturday, October 17. Miss Hunter is the daughter of Rev. and Mrs. H. P. Hunter of Rolla. The ceremony took place in the Methodist Church of which Rev. Hunter is pastor.

Mr. Nevin is the son of Mr. and Mrs. James R. Nevin of St. Louis, Missouri. He is now connected with the North American Aircraft Company in Kansas City, Kansas.

Mrs. Nevin graduated from the Rolla High School in 1936 and from Baker University in Baldwin, Kansas, in 1940. She has been connected with the American Red Cross at Fort Leonard Wood and at Camp Kit Carson, Colorado.

Wedding Bells For Junior Mech.

Morris Sievert, Junior Mechanical, will marry Miss La Wanda Hughes, daughter of Mrs. Alice Hughes of St. Louis, at the Euclid Baptist Church at 4 p. m. Saturday, October 24.

Mr. Sievert and Miss Hughes attended Soldan High School, St. Louis, and both were graduated in January, 1940. Miss Hughes then attended the Rubicam Secretarial School in St. Louis, later working as a stenographer at the Sherwood Refining Co. Mr. Sievert, a sports-writer for the Miner, plans to enlist in the Air Corps Reserve. Last summer he worked for the Curtis - Wright Aircraft Corp. at Lambert-St. Louis Airport.

Marion Snyder will act as best man at the wedding; George Burke and Robert Setchfield will attend as guests.

The newlyweds will reside in Rolla, where Mr. Sievert will attend school, and Mrs. Sievert will work at Fort Leonard Wood.

Detonators To Drill At Game

The Detonators, the crack drill team of the Missouri School of Mines R. O. T. C. Regiment, will give an exhibition between the halves of the football game between the Warrensburg Mules and the Miners, here this afternoon.

Several new drills and formations will be introduced at this exhibition. The Detonators have been practicing every evening this week to overcome the difficulties of some of the drills.

Another service that the Detonators will render to the school, will be the formation of a guard detail about the campus and the furnishing of information to parents and friends of the students who will be here on Parents-Engineers Day.

Glee Club Rounds Out Repertoire

The M. S. M. Glee Club turned out full force on Thursday night, October 22, in Norwood Hall, there being more than thirty-five in attendance. This year's Glee Club will sing a variety of songs, although there is only one hour of rehearsal a week. Popular, national, sacred, and secular arrangements will be rendered by the organization. Two of the songs

LETTERS TO EDITOR . . .

Dear Editor,

On October 17, 1942 the Miner came out with a front page story concerning a joint enlistment board which will be at H. S. M. on November 3 and 4. This article left me with the impression that those students who did not sign up with some branch of the enlisted reserves would be drafted into the first service that grabs them.

There is no doubt in my mind that everybody going to be in the war effort, but I see no reason for assuming that everybody will be in some branch of the armed services of the country.

Major Harris, of the Army Engineers, expressed the view, Tuesday morning while interviewing Seniors, that engineers could do more for their country and be more good to themselves by securing a position in industry which would defer them from military service. He also expressed the view that educated men could be taught to shoot a gun in a relatively short period of time if necessary, but wondered who was going to produce so they could shoot. Women are already filling many vital positions in industry, but it would take several years—too many years—to produce trained women engineers.

I think Major Harris "has something there," but I have talked to individuals on the campus that think he is "all wet". One individual has even suggested that the campus should have 100 percent of the students in the enlisted reserves by the time the joint enlistment board is through here.

Let's hear some comments on the subject—students, faculty, or anyone not afraid to exercise the right of free speech who cares to comment. Sincerely, W. M. D.

practiced were the march, "Stouthearted Men," by Sigmund Romberg, and "A Song of Peace," from Finlandia, by Sibelius. Mrs. Lovett, the director, commented that co-operation by the vocalists proved very helpful in obtaining the best tone results, and that the results so far have been pleasing.

A four-part arrangement for male voices of the song, "Fight, Missouri Miners," arranged by Harold Flood, was practiced by a group of singers after the regular session was completed.

Plans Complete For Military Masquerade

Knock the dust off your wooden sword and newspaper bat lads, for the Independent's Military Masquerade is fast approaching, Oct. 30 to be exact. Every Miner is expected to be present in the best war-scare regalia he can dig up. Anyone who appears as a ski-trooper will be allowed to make a ski-jump from the gym roof.

Any Miner showing up in bare civilian clothes will be accused of being a spy, and will be subjected to the execution chamber; when and if he gets out he will look like he came through a real war. Any gal who can command a "come-hither" look will be OK'd at the entrance as a bewitching spy. Any male who thinks he can look bewitching enough to escape the execution chamber as an ordinary spy, is invited to try it. Note: If you sirens should succeed in wringing any military secrets out of anyone, please gals, we were only foolin'.

Street clothes are permissible as long as the wearer has a card suspended around his neck, clearly indicating his draft classification. All you guys in 1-A are required to retire at 11 o'clock since you had better get in condition for this man's army. Don't worry about your date, a special committee of Independent wolves will see that she is taken care of.

As you well know, Russ David's imported outfit will pour on the martial jive. All aviators should have their goggles with them as evidence, but must leave their airplanes outside in the space provided. Air-raid wardens will be present to see that all hostile eyes are black-out.

NOTICE !!!

Bids for Cloakroom Concession This is to announce that the St. Pat's Board requests that any Miner interested in the handling of the cloakroom concession during the two night celebration of the Missouri School of Mine's Winter Carnival, December 11 and 12, 1942 submit their bids now.

All bids must be in the hands of Ray Kasten on or before the night of November 14, 1942.

Miners Seek First Victory Against Mules Today

Game Is Miner's First At Home

The Rolla Miners will be seeking their first victory of the season when they oppose the Warrensburg Mules this afternoon on the Jackling gridiron. Having lost two out of two contests, Bullman's eleven is determined to obtain their first victory today. This being Engineers Day, an exceptionally large crowd is expected to attend the contest.

At the present time, very little is known concerning the Warrensburg team. However, they always furnish plenty of opposition for the Miners. Last year, regardless of the fact that they had a much smaller team than we, they managed to tie us 7 to 7. This tie compelled us to share the MIAA championship with Maryville. It is believed that they have even a weaker team this season, but you may rest assured that they will put up a stiff fight against us today.

In the past two games, the Miners have gained most of their yardage through the air. However, today the process will have to be reversed due to the fact that Al Dick, star Junior passer, game with Maryville. Al is undoubtedly the best passer on the team and practically the only accurate passer. This however, should not result in too heavy a handicap as the Miner backfield is composed of many fast and shifty men. Jim Glover, Rip Radcliffe, Jim Stover, Manatoba Catanzaro, Bernie McGrath, Jack Boetger, Jim Miller, Charley Mitchell, and Moose Carafiolare, all capable of picking up yardage. However, it is doubtful as to whether Jim Stover and Jim Miller will be ready for the contest as they are both suffering from injuries.

The Miner forward wall is composed of many good blockers, who are capable of opening the holes for the backfield. Captain Kiburtz, Mike Mazzoni, Joe Hoby, Woods, Deone, Fulghum, Cane, Perkins, Counts, Sueme, Miller, and Moore will take care of this obligation with excellent ability.

Coach Bullman has been putting his charges through strenuous workouts for this past week. He still hasn't recuperated from the trouncing received from Maryville last Friday night. Through the course of that night, the Miner backfield fumbled six times, which isn't a very good showing. "Bull" isn't spent the entire week attempting to overcome this glaring weakness, and is hoping that the backfield will make a much better showing today.

The starting line-up is as follows:

The LINE-UP

MINERS	POSITION	MULES
Moore	l.e.	Edmondson
Engelhart	l.t.	Green
Kane	l.g.	Wild
Kiburtz	c.	Galloway
Mazzoni	r.g.	Mumma
Leone	r.t.	Wille
Perkins	r.e.	Murry
Miller	r.h.	Howard
Dick	l.h.	Kinsella
Carafiol	f.b.	Sartalar
Radcliffe	q.b.	Allen

New Professor Added To Staff

Due to the call if the armed forces, many new faces are seen among the members of the MSM faculty this year. The latest addition has been made in the Chemical Engineering Department.

Officiating in the capacity of instructor is Dr. R. Nelson Smith, who has replaced William Webb. Mr. Webb is now serving with the U. S. Navy.

Dr. Smith received his A. B. degree at Pomona College, in 1938. He took up graduate work at Stanford University and received his Master's degree from that college in 1938 and his Ph. D. degree in April, 1942.

Besides being an instructor in various laboratory courses at Stanford, while working toward his doctor's degree, Dr. Smith did research work on the quantum yield of monochloroacetic acid hydrolysis.

Dr. Smith is a young man, 26 years of age, and should contribute much to our chemistry department.

Academy of Science To Have Outing Sunday

On Sunday, October 25, the Junior Academy of Science will have a weiner roast and song fest. The boys are going to meet at 1:30 in front of Norwood Hall, and hike from there to a sulphur spring that is located about three miles south of town. The outing is for the purpose of securing additional members to the club. Newcomers are welcome. Anyone wishing to join the group this Sunday should see Ed Mochel.

ALL WET, TOO

Prohibition is a wonderful thing. You can't take a walk down the street without seeing a tight skirt.

John Moore

John was the Miners high scorer last year when he was a Sophomore. He is a fast pass-snatching end and a versatile athlete. Last year he earned letters in football, track, and basketball and in so doing became the first Miner to letter in three sports in the last ten years. Playing first-string John stands out much more on the offensive than he does on the defense. He is the running mate of Ira Perkins.

ON THE BENCH

By GEORGE BURKE

This afternoon will find the Miners seeking their first Conference win as well as their first victory of the year. Whether or not the Miners will win, remains to be seen, and probably won't be decided until the final whistle is blown.

The Miners have always found The "Mules" a tough foe. Warrensburg always seem to give the Miners their toughest opposition especially when it looks like the Miners are headed for a banner year. The games of the past two years will substantiate this fact. If you recall, back in 1940 when the team boasted of Cunningham, Felop, Cook, and Kromka, the Mules handed the Miners a 7-6 defeat for their first loss of the season. The game would have been a complete loss for the Miners, if it had not been for Dick Cunningham's sensational 70-yard run for a touchdown. Last year the Miners fumbled away the game, and Warrensburg seizing these opportunities held the Miners to a scoreless tie. That was a game the Miners could have and should have won.

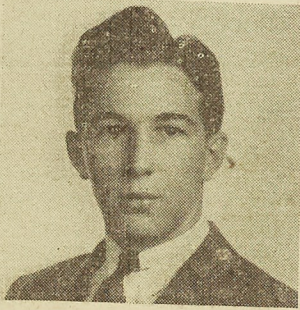

Everyone will agree that the Miners have a pretty good team and they can play ball as they showed in their game against St. Louis University, but since that game the team shows there is something vital lacking. The Miners should be rapidly approaching mid-season form, but so far look far from it. Perhaps in the game this afternoon, the team will recover from its slump and give the Parents Day crowd a real and typical Miner victory. Let's hope so.

If you are one to believe in signs, you can be sure Warrensburg will give the Miners a real tussle this afternoon. The "Mules" were all set last week to administer a sound beating to the Cape Girardeau Indians and do their homecoming up in grand fashion, but — Cape took advantage of this eagerness and won an easy 27-0 victory. This little incident deflated the "Mules" ego a little and as a result they are out for the Miners this afternoon. It would be sweet revenge for them to beat the Miners, especially

In The Campus Spotlight

James C. Johnson, better known as "Jim," entered the School of Mines in September 1939. He is from Licking, Missouri and graduated from Rolla High School.

Jim will get his Bachelor of Science Degree in Chemical Engineering in January. During the past four years Johnson has had as impressive scholastic and activity record.

He is a member of the Blue Key, Tau Beta Pi, and the Alpha Chi Sigma. He was elected to the Blue Key during his junior year.

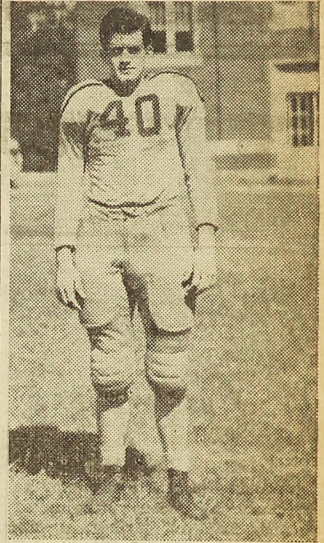

Jim held the office of treasurer of the Alpha Chi Sigma when a junior and he is now Master Alchemist of the organization. During this summer he represented the local chapter of Alpha Chi Sigma at the Fraternity Conclave at Chicago.

Besides belonging to the several honor fraternities, Jim is an active member of the A. I. Ch. E., the Independents and the Engineers Club. He is now treasurer of the Independents and was on the Engineer Club Board of Control during his Sophomore and Junior years. Johnson has also been active in intra-mural sports, participating in both football and basketball. He was in the R. O. T. C. Band in his sophomore year.

In recognition of his outstanding scholastic ability, Johnson was awarded the Phi Kappa Phi Bookplate Awards, the Blue Key award for scholarship, and the Alpha Chi Sigma award for the highest ranking third semester student taking Chemical Engineering.

Jim has worked during the summers for the State Highway Department. This last summer he attended school here. He has been offered a job with the Monsanto Chemical Company as soon as he graduates.

By this year, when the Miners are rated as one of the top teams in the Conference.

JACK BOETJER

This Senior halfback is playing his second year at MSM. He is a light, highstepping back with agility and moderate speed.

LAMBDA CHI ALPHA

Lambda Chi Alpha is happy to announce the recent pledging of Thomas Ford, of Springfield, Mo. Tom transferred to MSM this fall and is now Spohomore E. E. Incidentally, Tom's brother was a Lambda Chi and graduated from MSM in 1933. His brother is now Major Homer T. Ford, Post Engineer at Fort Story, Virginia.

Brother Dick Lee, alumnus of the Epsilon-Sigma Zeta of Lambda Chi Alpha visited the chapter last Monday and attended our chapter meeting. We were indeed glad to have him. He is now stationed with the engineers at Fort Leonard Wood.

Lambda Chi Alpha plans to begin the initiation of seven of its pledges into the bonds. The first two-thirds of the initiation will be held tomorrow afternoon and the last third will be held next Sunday, the 1st. Those to be initiated are Bill Winters, of Rolla; Ray Punch, of St. Louis; Kimble Cross, also of St. Louis; Bob Heineck and Jim Wylie, both of Normandy, Mo.; Robert Murphy, of Dixon, Mo.; and Donald Frommer, of Chesterfield, Mo. We have a lot of confidence in these fellows and are sure that they will be an asset to Lambda Chi Alpha.

SIGMA PI

Last week end was a hectic one up here on the hill. As a result of the intrafraternity games played over the week, there were to be two outings given by the fellows. By mutual agreement it was decided to hold one gala affair instead of two separate ones. This was done last Saturday night. Naturally, everyone enjoyed himself twice as much as otherwise.

Sigma Pi is doing its share in contributing to the M. S. M. scrap drive as evidenced by the pile out front. Just because Brother Leming's "Jeep" is parked alongside of the pile, that should in no way judge the quality of our contribution.

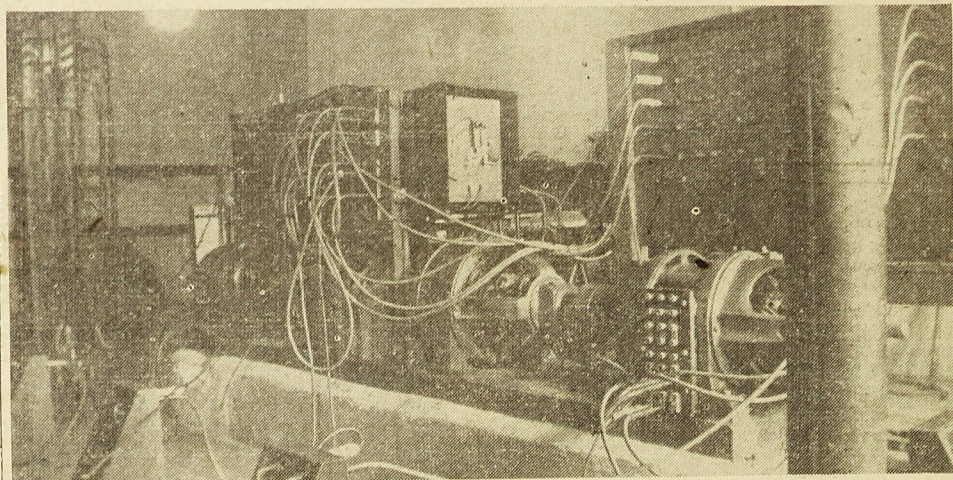

Brothers Stovesand, Barker, and "Tumbleweed" Makay decided to go to Salem after the outing Saturday. They did, and they returned, but that's enough about that. Brother Schilling spent the week-end in St. Louis, Glenn Lufcy went to Jefferson City, while Ken Rudert and Al Thiele journeyed to Cape. Lyndall Williamson and Rondall Moore from Monett, Mo. dropped in last Friday to visit Dan Dickinson.

Miss Jean Powell of Sikeston, Mo., was the guest of Jim Paul over the week-end.

SIGMA NU

On Friday evening, October 16, the Gamma Xi Chapter of Sigma Nu held its annual Pledge Dance in honor of the new pledges. The evening was a huge success; the Varsity Orchestra was at its best. The following dates attended the dance: Bobette Joslin, Melba

Parallel Operation of Generators Shown By E. E.'s

One of the many exhibits to be shown in the Electrical Engineering departments is parallel operation of generators, the wiring of which is shown in the picture above. The laboratory hook-up is the same as is used in larger commercial generating stations, but the equipment is smaller.

Fern Black, Peggy Wilson, Norma Jean Stair, Ada Rose Cross, Maxine Houlihan, Maxine Lockhart, Jean Lloyd, Betty Jo Kilgore, Faith Ridout, Lenore Jones, Elizabeth Smith, Dollie Jones, Frieda Brown, Olive Mae Coffman, Mary Sands, Juanita Davis, and Sue Crumpler, all of Rolla; Anna Jewell Brown and Martha Dixon, of Springfield, Missouri; Dorothy Foster and Jean Foster, Springfield, Illinois; Lena Mincher and Marie Meisner, Salem, Missouri; Helen Goode, Richmond Heights, Missouri; Ruth Geantil, Maplewood, Missouri; Faye Barnes, Joplin, Missouri; and Blanche Norris, St. Louis, Missouri.

Chaperons were: Professor and Mrs. C. E. Boyd, Mr. and Mrs. H. D. Crumpler, and Mrs. C. D. Ward.

Saturday afternoon and evening everyone journeyed to Nogagami for a genuine autumn picnic. "Ah Me! That Indian Summer air does wonders for one."

(continued from Page 1)

The ceramic engineering department is exhibiting various types of kilns and demonstrating grinding equipment.

In the U. S. Bureau of Mines, visitors may see tests run with ore concentrating devices and inspect the modern spectrographic laboratory.

The exhibits of the electrical engineering department are concerned chiefly with the field of electric power supply and electrical power supply and electrical machinery. Many types of motors and generators will be in operation and demonstrations of automatic control devices are featured.

The department of physics has laboratory equipment on display and a demonstration of certain geophysical equipment is being given on the campus west of Norwood Hall.

Demonstrations in grinding and polishing rock specimens are sponsored by the geology department. The mineral museum and the fluorescent mineral exhibit are the principle features in this department.

In the engineering drawing department visitors may view samples of drawings ranging from the earliest drawings done at the School of Mines down to examples of work from present classes.

The chemical engineering department is exhibiting semi-plant scale apparatus for carrying out experiments in unit processes. The organic chemistry, quantitative analysis, and freshman chemistry laboratories are open for inspection.

On the second floor of old Chemistry Hall the department of mathematics is displaying its six remodeled classrooms which are equipped with fluorescent lamps and other modern furnishings.

The mechanical engineering department is showing the operation of machine tools and offering visitors to inspect various types of welding apparatus. The forge shop is also open for inspection.

In the metallurgy department

parents may view the various laboratories and watch demonstrations in the concentration of ores and the production of metals.

McDonnell Corp. To Interview

Monday, October 26, a representative from the McDonnell Aircraft Corporation will be here to interview seniors in regard to prospective jobs with his company. He will conduct fifteen minute personal interviews with seniors in Electrical, Mechanical and Civil Engineering. The civil engineers will be used in work dealing with structural and stress analysis. The representative Harry L. Daasch, will be looking especially for students who are strong in the subjects of Mathematics and Mechanics. Any seniors interested in an interview should apply at the registrars office. The McDonnell Aircraft Corporation is located at Lambert's Field, St. Louis.
