Stimson Wants Engineers To Complete School

Many controversies have arisen lately as to the place of the Engineering student in this war. The MINER has received several letters seeking information as to the prospective Engineer's status. In an attempt to answer a few of the questions in a student mind, Mr. Hubbard obtained the following Bulletin which Secretary of War Stimson addressed to the American Council for Education.

"Last week I announced that college students who are members of the Army Enlisted Reserve will all or for the most part be called to active duty at the end of the term now beginning and thereafter, as they reach Selective Service age. This action had been foreseen as a possibility and in every presentation of the Enlisted Reserve to college students and college authorities it was clearly stated that enlisted reservists are subject to call at any time when in the opinion of the Secretary of War, the exigencies of war demanded it. This statement was made by me personally in the original announcement of the plan on May 14.

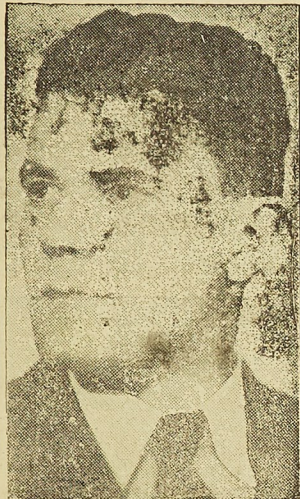

In public addresses by War Department officials on the subject of the Enlisted Reserves, the fact that the members were subject to call at any time has been emphasized and repeated. For example, last July 4, Mr. Harvey H. Bundy, Special Assistant to the Secretary of War, addressing a freshman class, said: 'There is no commitment that a young man may complete his college education.' This address containing that statement was distributed to the college. In view of admonition of its nature, which have been a consistent part of the War Department's Enlisted Reserve policy from the first and the increased seriousness of the war, it is not surprising that the call to duty could come early in 1943 should it have occasioned great surprise.

However, my statement, together with other recent press reports, has been interpreted in some quarters to mean the end of all higher education for the duration of the war. This is a misapprehension that should be corrected.

The Army is greatly in need of men of specialized training, particularly in physics, chemistry, engineering and medicine. We are equally interested in having adequate numbers of men in such training available to war production industries and the civilian research agencies of the

Jan Valtin On Lectures Program

JAN VALTIN

Jan Valtin, author of "Out of the Night" and former Communist agent among water-front workers all over the world, will speak here on Monday night at 8:00 p. m. on the General Lectures at Parker Hall.

In private life Jan Valtin is Richard J. Krebs and is only 36, despite a long sequence of strange and varied experiences which have taken him all over the world.

He was born in Mainz, Germany, of a Swedish mother and a German father. The first school he attended was a German school in Buenos Aires. Two years afterwards he was studying in an English school in Singapore. A few years later his father, who was attached to the nautical inspection service of the North German Lloyd, was transferred to Yokohama and from there to Batavia. Hong Kong and Singapore followed, and when the first World War broke out in 1914, the family found itself stranded in Genoa, Italy.

Shortly afterwards, young Richard found a position on a Latin America bound ship, spent almost two years in the Americas, returning to Hamburg in the spring of 1923. He had come home planning to study navigation but instead, embittered and disillusioned by the want and hunger he saw on all sides, became active in the Communist

For the next ten years he wandered all over the world in the service of the Communist International and the Russian political police. He was in and out of jails many times and now has a price on his head by both the German Gestapo and the Russian GPU. His adventures as a Communist agent took him from Shanghai to Narvik, from Montevideo to San Francisco.

"Out of the Night" was finally published by the Alliance Book Corporation in February of 1941

G. E. Offers Jobs To Eleven Seniors

Eleven Seniors were offered positions with General Electric as the result of interviews conducted Tuesday, October 27, by a representative of the company. The positions offered were divided up amongst four mechanicals, six electricals and one metallurgist. Those whose interview turned out successfully are: F. E. Dreeste, electrical; V. E. Flessa, electrical; W. Gimson, mechanical; E. G. Johannes, mechanical; M. D. Gurselman, mechanical; E. E. Gyax, mechanical; R. L. Hanna, electrical; J. C. Hoey, electrical; J. Lening, electrical; F. Padavich, metallurgical; and E. O. Vandeven, electrical.

November 5, the Radio Corporation of America will be here for interviews with seniors graduating in January. They want men for work in mechanics, communications, physics, electronics and in industrial chemistry. This will involve students in electrical, mechanical, and chemical engineering. There will be a group meeting from nine to nine-thirty November 5, after which there will be twenty minute interviews starting at nine-thirty.

Mr. A. M. Rupkey will represent Bethlehem Steel Corporation and give interviews to seniors in all branches of engineering. He will interview both the seniors graduating in January and those graduating in May. The interviews will be fifteen minutes in length and seniors will be given a booklet titled, "The Loop Course" which explains the process of training college graduates for places in the industry.

General Motors will be represented by Kenneth A. Neade here November 17. He will interview electrical and metallurgical engineers.

Pittsburg Plate Glass Corporation will be here November 20. Mr. F. R. Elmore, a representative of the corporation, will interview seniors in mechanical. Interview will start at noon of the twentieth. They will be fifteen minutes in length and will continue until all the applicants have been interviewed.

Curtis-Wright will have a representative on the campus November 24 and 25. Mr. Andrews will interview all seniors interested. Any seniors interested in come to the registrars office for an application and a booklet titled, "Visibility Unlimited." This booklet deals with the products being produced by Curtis-Wright and the possibilities of advancement.

"You have beautiful eyes," wrote the young lawyer, and "exquisite long lashes, and I love the way the aforesaid eyes peep out from under the aforesaid lashes."

Honorary Cadet Colonel To Be Crowned At Ball Tonight

Miss Anne Jewell Brown

Senior Cadets To Be Put In Several Branches of Army

The War Department has called for the transcripts of all ROTC seniors and has also called for recommendations for seniors to be assigned to branches of service other than those for which they have been trained in the ROTC. In this School, where all men are trained for the Corps of Engineers, and have engineering degrees, it appears probable that the assignments will be made to the technical branches, that is, engineers, ordnance, signal and chemical. The shortage of engineer officers candidates also makes it probable that few will be assigned to branches other than engineers; on the other hand, schools which have ROTC units of line branches may send many officers into the engineers. As applied at the School of Mines, the recommendation of the PMS & T will take into account both the training and the preferences of the men, but there is no indication as to how much consideration will be given to these recommendations when the final selection is made in Washington.

Last year graduates of this school were assigned arbitrarily for example, mechanical engineers to the ordnance, electrical engineers to the signal corps, etc., and several were returned to the engineers later.

Rust David Will Provide Tempo

Miss Ann Jewell Brown of Springfield, Mo., will be commissioned as Honorary Cadet Colonel for the coming year at the Annual Military Ball tonight in Jackling Gymnasium. Miss Brown will be escorted at the ball by Cadet Captain G. H. Thomas.

Miss Brown was graduated from the Springfield Teachers' College last spring. While in college she was elected Homecoming Queen in her Sophomore year and was Maid of Honor to the Ozark Queen in her senior year. Miss Brown is also popular on the MSM campus having attended a number of dances here in the past three years. She was maid of honor to St. Pat from the Sigma Nu fraternity last year.

A banquet will be held at the Pennant Tavern preceeding the Military Ball. Lieut. Colonel John F. Zajieck and Lieut. Colonel Roy Copeland, of the Engineers Replacement Training Center of Fort Leonard Wood, will be the guest speakers. Governor Forrest Donnell, Col. and Mrs. Herman, Major and Mrs. Moreland, Capt. and Mrs. Doff, Dr. and Mrs. Wilson and Mr. and Mrs. Noel Hubbard have been invited to this banquet.

The commissioning of the Cadet Colonel will highlight tonights ceremonies. The ceremony will be performed at 11:15 by the Cadet Colonel of the ROTC

EDITORIAL

In these times of national emergency, and accelerated programs, we are all trying to finish our educations as soon as possible so that we will be able to help our country, either as officers in the armed forces, or as engineers in industry. Toward this end the present class of Seniors is circulating a petition which will be presented to Dean Wilson and the faculty in the near future. In this petition they ask for the advancement of graduation date from January 19, 1943, to December 22, 1942. There are several good reasons why this move would be desirable.

At the present time industry is in vital need of engineers and the sooner it gets these engineers the quicker the battle of production will be won. Secondly, it would mean a saving to students of a great deal of money. Not only will they save expenses by not having to attend school the extra time, but they will also be able to work an extra month.

Many schools including Purdue, Notre Dame, Penn. State, Carnegie Tech., and Case School of Applied Science have advanced their date of graduation in cooperation with the war effort. We feel that the Missouri School of Mines should seriously consider this matter and its value to our "all out effort to win the war".

Detonators To Form Guard Of Honor For Queen

A squad of twelve Detonators will be present at the S. A. M. E. Military Ball Saturday, October 31, to form a guard of honor for the queen of the ball. These men were picked by the process of elimination, according to their ability to execute the manual of arms.

This squad has participated in strenuous practice this week, although these movements are very complicated, they have been mastered after a great deal of work.

The drill detail is under the command of sergeant James H. Bottom, who also commanded this detail last year.

The Detonators is the first organization on the campus to practice the manual of arms. The cadet corps may have to do without rifles for the duration. This hasn't been officially stated yet.

Major Moreland, after excessive red tape, has secured fifteen rifles from Fort Leonard Wood for the exhibition Saturday night.

The climax of the drill will be the Queen Ann salute, which will be rendered to the queen and her escort as they march up to the throne. The drill detail will then give the rest of their drill. After this they will make a square, from this point a "V" for Victory formation will be made, and then the squad will be marched off the floor.

The drills are used at the United States Military Academy at West Point.

Dr. Smith Talks At A. I. Ch. E. Meet

Dr. R. Nelson Smith, new faculty member in the chemistry department, addressed the student chapter of the A. I. Ch. E. Wednesday evening on photochemistry.

He stressed the role which light plays in certain chemical reactions and explained the theory of the reaction of hydrogen and chlorine in the presence of light. Dr. Smith also talked about the photochemistry of the eye and the irradiation of milk.

The business meeting was devoted to discussion of the membership drive.

Blue Key Tea Dance Today

The annual Blue Key Tea Dance will be held this afternoon at the Parish House. This dance will be free to all Miners and service men with dates. It will begin at 4 p. m. following the football game and will end at 6.

The arrangements have been completed and are sure to insure a grand time for all who attend. The expenses of this dance will be entirely defrayed by the Blue Key.

Kent Comann has just announced that Dick Mateer and his Orchestra will do the musical honors.

The Blue Key has gone to considerable trouble to have the Tea dance for the Miners and their dates and it is their hope that the students will attend in large numbers and make it a huge success.

Campus Spotlight

The Campus Spotlight turns this week to Joseph P. Berndt. Joe comes to the School of Mines from St. Louis. He entered school in September 1939.

Joe is a Senior and in January he will receive his degree. He is also taking advanced Military and will receive his commission soon after graduation. In the cadet regiment he is a First Lieutenant and he is Battalion Adjutant to the first battalion.

During his four years at M. S. M. Joe has played an active part in campus activities. He is a member of the Tau Beta Pi, the Alpha Chi Sigma, and the Blue Key. He is on the student council. In his Freshman year he was on the Shamrock Board of Control, and last year he was secretary of the organization. This year he holds the presidency of the Shamrock Club. He is also president of the Independents. He belonged to the Detonators for two years and last year he was staff Sergeant of the Detonators. Joe is also a member of the A. I. Ch. E. He is on the Miner-Rollamo Board of Control.

Besides his scholastic activities, he has been very active in intra-mural sports. He lettered in swimming for three years and played volleyball for the Independents. Last year Joe wrestled in intra-mural competition.

He is a student assistant in the Chemical Department now. After graduation Joe's future is assured as he will be going into the army as a commissioned officer.

Civils See Movie On Making Steel

On Tuesday evening Mr. A. C. Weber of Laclede Steel gave a talk to the Am. Soc. C. E. on the making of steel in the Laclede plant. The talk was illustrated by slides and motion pictures taken at the plant.

Mr. Weber told of the increasing capacity at which the steel industry is operating at the present time, and stressed the importance of scrap metal in steel production, with plants operating at 100 per cent capacity of former years. A great strain is being put on the resources this year. The reason for the high percentage of production is that the steel industry today is producing faster than it can be supplied with the raw materials. Mr. Weber pointed out that the collection of scrap metal today is of greater importance than that the public assumes it to be.

Scrap metal must make up for the raw ore that, because of transportation difficulties, can't be had in the making of steel. The supply of scrap is rapidly

if not already reached a point of exhaustion— all available scrap must be recovered and used if the tools of war are to continue to roll out into the fight for victory.

When God dished out brains I thought he said trains and I missed mine.

When God dished out noses I thought he said roses and I asked for a big red one.

When God dished out ears I thought he said beers and I asked for two big ones.

When God dished out legs I thought that he said kegs and I asked for two round ones.

God, ain't I a mess!

Miners Host To Fort Wood USO Benefit Game Today

Star Studded Lineup For Fort

Today at 2:15 p. m. on the Fort Leonard Wood, the Miners will host a team of former professional and college stars representing the Sixth Division of the USO. The game will be held in the Phelps County Armory.

Second Lieut. Finnerty, coach of the Service team has been directing his charges through various drills this past week in an endeavor to get his team at peak for tomorrow's benefit game.

Coach Bullman wound up his list for the week with light images. The past week and the Miners working hard their running attack with Jim Miller, Jack Bostger and Gill Rafoil standing out in practice. Al Dick has been exceptional in practice with his accuracy in tossing the skin.

The game will present excitement to fans beyond the actual playing. Two or three bands, poppy drills, scores of service in uniform, etc., will provide color.

The Miners will probably play a line-up including Legett and Perkins at end, and Leone at tackle, Kane Mazzoni at guard, Kiburz center, Dick and Glover at fullback, Carafoll fullback and Radfe, quarterback.

Stars In Soldier Line-up. The soldiers will present a studied lineup, including Peterson and Leeson, ends, Suk and Francis, tackles, Nutt and Anderson, guards, Davis and Tarzia and Kalivas, halfbacks, Wolfe, fullback.

Alumnus Talks To Ceramic Society

The American Society of Ceramic Engineers held a meeting Tuesday evening in the Bureau of Mines Building. They were addressed by Mr. William the Walsh Refractories Co. gave a very interesting talk on the production and sales of factories.

Mr. Schweickhardt is an alumnus of the Missouri School of Mines. He was in the first graduating class from the Ceramic Department in 1928.

Plans were laid for an outing Nov. 10. This outing is for members of the Society. Elections will be held at the next meeting to replace the seniors who will graduate in January. Refreshments were served after meeting.

Definite Plan Needed For Training Engineers

From Eng. News-Record

Canada has made definite plans for meeting the shortage of engineers for war industries by a program. Thus, practically all engineers have been placed under the control of a central agency, and a system has been set up to facilitate shifting them into war industries as needed. Also, to increase the number of students in engineering schools, Canada has inaugurated a plan under which top-ranking high school students are being "channeled" into the freshman class of engineering schools, with government assistance, where that is necessary. A proposal similar to this last one was made recently by Dean Thorndike Saville of the engineering school at New York University, but unless our Selective Service practices are altered, it is difficult to see how it would be effective. Under our present system, no one of these boys could get more than six months deferment on a war job, even assuming that he would be permitted to complete his college trainings by met by shifting older engineers from non-essential jobs to war industries. To that end, this country should soon take the initial steps that already have been taken by Canada.

No, I don't expect you to be a Superman. All I said was "Ship me a carload of fertilizer."

Around The MIAA

All teams in the MIAA have open dates over this week-end as far as Conference competition goes. With Conference play not resuming until November, the teams are turning to outside competition to round out their schedule.

Here at home, the Miners will meet an aggregation of foemen from the Sixth Division of Fort Leonard Wood, in a benefit game for the USO. The Miners should have little difficulty in gaining a decision over the soldiers, in that the soldiers have just returned from maneuvers and have not had the time to get themselves ready to give the Miners a real battle. Last week, the soldiers were beaten by the Missouri University Freshman team by a score of 25-0. For the little time the team had to prepare for that game, they show great possibilities with a little more practice. However, the game this Saturday may turn out to be a surprise for both sides.

Looking ahead to the forthcoming games in the MIAA, the schedule is bound to provide some startling results in the Cape Girardeau-Maryville game, the outcome of which will greatly affect the present Conference race. At the present time Springfield and Cape are leading the race with one victory and no defeats. Maryville has one victory and one defeat to its credit. If Cape can beat Maryville, which at present time doesn't seem impossible, the Bearcats will be eliminated as far as the race goes. However, if the Bearcats win it will give Cape, the Miners and Maryville all an even chance of coping the MIAA crown.

While the all important Maryville-Cape battle is underway the determined Miners will meet the Bears from Springfield. The Miners are determined to make

Jan Valtin
Continued From Page 1
and was an instant success. Literary critics praised it as much for its literary excellence as others commented upon its political disclosures. Many of them regard Jan Valtin as a kind of combination Jack London, Joseph Conrad and Maxim Gorki and believe that he is on the threshold of what will prove to be an important literary career.

Admission to the lecture will be by card for students, \$0.50 for general public and \$0.25 for faculty members and student dates.

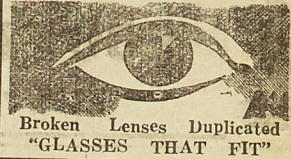

Let's be perfectly frank, she said as she stepped between me and the setting sun.

"Get thee behind me, Satan," said the pledge as he assumed the position.

their bid for the title by defeating Springfield. Springfield started off the season with one of their longest losing streaks since the Blair regime took over the coaching job of STC. Last week they surprised all Conference followers by upsetting the strong Maryville eleven and going into a tie with Cape for the lead. Springfield will be ready to avenge the 3-0 defeat handed to the Bears last year by the Miners, when "Stubby" Kreuger, kicked a field goal before a large parent's day crowd, to give the Miners their first victory over Springfield in a number of years. Coach Bullman will test out his attack this week against the Fort Leonard Wood team to see how it functions in hopes of eliminating the bugs before next Saturday's game. The game against Springfield should furnish plenty of unexpected thrills for the spectators. The action will be divided between Dean George, veteran fullback, of STC and "Sunny" Al Dick, veteran fullback of the Miners. Both boys are the spearheads of their respective teams attacks.

PI KAPPA ALPHA.

Parents' Day found the fraternity house of Pi Kappa Alpha filled with parents of actives and pledges.

"STUBBY" KREUGER, Pi K. A. grad of '41, was also present over the week-end. At present Stubby is located with the St. Louis Smelting and Refining Co., at Baxter Springs, Kansas. Mrs. Krevger accompanied him on his visit.

The list of visiting parents included: Mrs. J. R. Boggs, Mrs. George R. Brown, Mrs. Matt L. McCaskill and her daughter, Mary Ann, Mrs. E. W. Jenkins, Mr. and Mrs. Bernard Wagener, Mrs. Pauline Glover, Mrs. Hammelman, Mr. and Mrs. J. Schalk and their son Norbert, Mr. and Mrs. George A. Davis, Mrs. O. L. Hever, Mr. Arthur Satorius, Mr. and Mrs. A. J. Kreutzer and their daughter Mary Louise, Mr. and Mrs. L. G. Wolforth and their daughter Shirley.

Music Club Will Meet Sunday

This Sunday will mark the season's first meeting of the Music Club. The organization's purpose is to provide listening pleasure for the music lovers of the campus. An all Russian program is to open the season, the major work being Tschai-kowsky's 4th Symphony. The program also includes works by Shostakovich, Borodin, Rachmaninoff, Rimsky-Korsakow, and addition is a set of four Russian folk songs sung by the Red Army Choir of the U. S. S. R.

The selections played are drawn from a library of individual collections with a grand total of more than 300 records, so your favorite is almost certain to be among them. Everyone is welcome to this and all future meetings. The time is 7:30, Sunday evening in room 10 Norwood Hall.

When some luscious bit of feminine pulchritude exposes her incisors and molars in what can be termed a seductive smile, we may be justified in calling her act a "strip-teeth."

Best Men In The Nation Neded For Army Officers

Brigadier General R. C. Crawford, Commandant of the Engineer School at Fort Belvoir, in an Article in the Military Engineer, states that only seven percent of the engineering officers who are now graduating from the Officers Candidate Schools are graduate engineers and only 29 percent more have college degrees of any kind. 24 percent have never attended college. The production of officers for an army as large as the one we are now raising is a more serious problem than is generally appreciated. It is a vain hope that we can sit back and use the tremendous industrial capacity of this country to destroy our enemies with comparative safety to ourselves. The final outcome of this conflict will be determined by the character of the individual soldier and the adequacy of the leadership of the officers who direct his efforts against the enemy.

The present plan for the production of officers who are to lead our armies in battle contemplates that a soldier who is drafted and has been given three months training, during which he has demonstrated qualities of leadership, is earmarked for the Officers Candidate School; at the end of three months at the School he is given a commission as a 2nd Lieutenant. This is our primary source of officers. Regardless of the quality of material that is drafted, we must select one out of 20 enlisted men, and make him an officer. When one considers the deferments in the draft because of the demands of industry and other reasons, it will be appreciated how narrow a field there is from which to select. The Engineer Officers Candidate School must produce battle field leaders in 12 weeks; to do this we must select the material with great care. What we are getting is being selected in accordance with a lower set of specifications that would be used if we were able to tap the best sources.

The requirements for a candidate, other than the usual age, citizenship, physical, character and length of service conditions, are (1) leadership, a matter of opinion; (2) a score of 110 in the Army classification test, and (3) a high school education. The result is, that in an engineer battalion of 25 officers supplied from this source, 2 officers have engineering degrees, 7 others have college degrees, 10 have attended but not graduated from college, 4 have graduated from high school only, and 2 have not completed high school. Such a battalion would be woefully deficient in that back log of engineering skill which is required by the increased tempo of modern military operations. No type of candidate training can make up for this deficiency, which will only become apparent in the final test of campaign.

The best the nation can produce, whether in men or materials, is

none too good for the battlefield; the second best will never do. Our best leaders are engaged in the battle of production. We must tap this source of officer material if our success is to be assured against the armed might of the enemy on the field of battle.

"I'll raise you two," said the wealthy lady to the orphans.

When they grow bigger damn fools colleges will have them.

Military Ball

(Continued from Page 1)

regiment, Don Coolidge. Following this, a ceremonial drill squad of Detonators will present a series of exhibition drills. An arch of sabers will be formed by the Cadet Officers through which the Honorary Cadet Colonel will be escorted.

Music for the ball will be by Russ David and his orchestra. This band is being featured over the NBC Network from KSD in St. Louis.

As a patriotic move the SAME has chosen corsages of war stamps for the occasion.

The Military Ball tonight will be one of the outstanding social functions of the year. This is the first function of that nature that has been held since the beginning of the present conflict.

STINSON WANTS ENGINEERS TO FINISH SCHOOL.

(Continued from Page 1)

government. Plans are now being worked out for the method of training of those inducted in-

to the Army, but in any event it is hoped that the collegess will maintain their training of students in engineering, medicine and other sciences. In some cases, it will be necessary to expand this training. Occupational Bulletins of the Selective Service System have been issued from time to time which relate to college students in these fields essential to the war effort. I now re-emphasize the fact that where students in these fields and their teachers fall within the classification for deferment by the provisions of these bulletins they are doing the job their country wants them to do and are performing their full duty in the war effort.

Young men who have joined the Army Enlisted Reserve or who now enlist in it, should proceed with their studies until they are called to active duty. When they are called, the Army will utilize for their further training, such facilities of its own as it may have or of the colleges as it deems best to meet military requirements as they then exist. The intervening time will afford a period of adjustment and for the formulation of plans for such additional specific training as seems indicated.

These plans, which will probably include a modification of the college ROTC courses, are now under study. When they are completed the committee of educators appointed by the American Council on Education will be fully informed and consulted as to the details of their application.
