## Winter Carnival To Have Pomp and Glory of St. Pats

Plans are now being made by the St. Pat's Board for M. S. M.'s first Winter Carnival to be held December 11th and 12th.

As stated in a previous issue of the MINER the Winter Carnival will be the supplement for the Seniors' St. Pat's celebration which is held in March.

Each fraternity and the independents will elect a maid of honor to preside at the Coronation Ball on Friday evening and at the various functions of the individual organizations.

As far as is known, the fraternity houses will celebrate the Winter Carnival in the same glorious fashion as the famous St. Pat's affair. Fraternity men will move from the houses to allow their dates to move in.

The crowned queen of the Coronation Ball will receive the title of "Winter Carnival Queen" amidst all the glory and pomp of last year's St. Pat's.

As in previous years, Sigma Nu plans to sponsor a tea dance at their chapter house on Saturday afternoon, and will be followed by banquets of the various fraternities.

Saturday evening commencing at 10:00 p.m., the Formal Ball will show forth in all its color and glory.

As yet, a "name band" has not been signed to furnish the music and entertainment for the dance sessions. However, it is hoped that in the coming week contracts will be signed and the students will be informed.

The St. Pat's Board is attempting to obtain the finest possible "name attraction" available for the affair.

The gym will be transformed into a ball room of much splendor equalling or surpassing that of the well remembered St. Pat's of last March.

This celebration the first of its kind attempted, will be MSM's entertainment sendoff to one of our largest senior classes and is presumed will be attended by the majority of the students.

## Theta Tau Makes Plans For Dance

Plans for the forthcoming dance of Theta Tau were discussed at the meeting of that Fraternity last Tuesday night, November 3. The dance will be held Saturday evening, November 21.

Also, the men who are to be invited to the Smoker November 10 were selected.

As yet, pledge candidates have not been chosen from the Sophomore and Junior classes.

## AIME Sees Movie On Copper

On Wednesday night, November 4th, the members of the AIME met in Parker Hall and saw a group of "silent" films depicting copper mining and related manufacturing processes. The pictures showed where the copper is found and how it is extracted from the earth, manufactured into useful every day products utilized and conserved. The films were loaned to the society by the Bureau of Mines, United States Department of the Interior.

The meeting started at 7 o'clock and methods employed in starting open pit mining operations at Morenci, Arizona. These include diamond drilling to determine size, shape and copper content of the ore body; air drilling and blasting to establish working benches for electric shovels and trucks which remove the overburden of waste rock. Incidental operations include drilling and blasting boulders that are too large for shovels to handle, and sharpening dull chum-drill bits. The scene then shifted to Ajo, Arizona, here a twenty year old open pit is in its prime—with mining ore and stripping overburden proceeding together. Operations shown include air drilling and reforing of detachable bits used on the drills. It also showed grinding and tempering of detachable drill bits, loading wastes and transporting it to the camp, and blasting and loading ore, which is hauled by railroad cars to the smelter. The film concluded with scenes at Bisbee, Arizona where extensive underground mining is being done.

This is the first of a series of films to be shown every other Wednesday night at Parker Hall. Because of the present transportation problem, the series of pictures is being substituted for last years procedure of having a guest speaker at each meeting.

## HOMEcoming DANCE TO BE NOVEMBER 14

The Annual Missouri Mines Homecoming Dance will be held again this year Saturday, Nov. 14, 1942, in Jackling Gym from ten to two.

This dance is sponsored jointly by the M. S. M. Alumni Association and the St. Pat's Board. It will afford the members of the faculty an excellent opportunity for meeting their old acquaintances among the many Mine graduates who will return for this gala affair.

Homecoming in the past years has been one of the outstanding events on this campus, and the Homecoming Balls are something to remember. So Miners bring your dates and let's see you a week from tonight. Tickets may be obtained from any St. Pat's Board member from now until the dance for \$1.00 per sale.

## Pettus Speaks Of War Work To ASCE

Mr. L. A. Pettus, representative of the Sverdrup and Parcel consulting engineering firm, who has recently returned from the Southwest Pacific where he was engaged in construction work, spoke at a joint meeting of the Missouri Society of Professional Engineers and the Student Chapter of the Am. Soc. C. E. on Thursday evening in the Auditorium. Mr. Pettus, who has had wide experience in civil engineering and consulting practice, was introduced to an audience of 110 by J. F. Kilpatrick, president of the M. S. P. E. Mr. Pettus was, for several years, City Engineer of the city of St. Louis.

Mr. Pettus was in the southwest Pacific when the fall of Singapore took place and was in Australia preparing for the influx of American fighting equipment when the threat of invasion by the Japanese was imminent. He took part in the emergency defense program, which was hampered by the poor transportation facilities, to defend portions of the Australian continent at all costs. He gave his opinion on the importance of the battles which are now being fought, and of the relative merits of the armed forces of the United States and of Japan.

Mr. Pettus was engaged in engineering and consulting work during the construction of air dromes on the islands of the Southwest Pacific and in Australia. He told of a landing strip which was constructed without the aid of the giant earth moving equipment with which we are accustomed. The excavation of the landing strip, which was 4200 feet long and 150 feet wide, was performed entirely by hand labor. The earth was carried away in baskets on the shoulders of native laborers; compaction of the soil was obtained by driving sheep and cattle repeatedly over the soil; the concrete landing strip, which was 75 feet wide, was mixed by 100 small mixers of one-half bag capacity.

Following the address, Mr. Pettus, answered questions from the audience. Some of the pertinent opinions expressed by the speaker were as follows: the Southwest Pacific is more important as a training area for soldiers than as a military objective, that to advance by sea against land based aircraft is futile, that the Japanese Zero fighter is the best fighter plane in existence, that the Japanese intend to invade the whole of Australia, that the Japanese are now the best soldiers in the world, that the Flying Fortress is the best bomber in current use, and that the war will last until 1948.

Mr. Pettus is the fourth speaker. (Continued on Page 4)

## Joint Enlistment Board Speaks To Student Body

### Student Council Discuss Early Graduation

The members of the student council held a meeting on Wednesday night, Nov. 4, in the club room of the Metallurgy Building. The meeting started at 7 o'clock and lasted thirty minutes. Among the topics under discussion were the early graduation of the class of 43 a plan to lay away money for memorial plaque on which would be inscribed the names of students of MSM who are killed in action in this second world war, and lastly a plan to have all organizations meet on a definite night.

The subject of an early graduation of the seniors has held the attention of the school since the beginning of the semester but as yet nothing of importance has been decided. A majority of the seniors desire an early commencement. It is hoped, therefore, that permission will be granted so this wish may be fulfilled.

### Aluminum Movie At ASM Meeting

Tuesday evening, at 7:30 P.M. the American Society of Metals presented three pictures on that vital war metal, aluminum.

The pictures showed the processes involved in mining the ore bauxite, from which aluminum is obtained. The principal source of bauxite in this country, so related the picture, is bauxite, from which the aluminum is obtained. The main source of bauxite in this country, geographically speaking, is Arkansas, with a little obtained from Mississippi and Georgia.

The extraction and purification of metallic aluminum by the utilization of the Hall process proved to be one of the most interesting highlights of the film.

The last picture shown was dedicated to the illustration of the fabrication of aluminum by the metallurgist. Welding processes involving aluminum was shown in detail.

After the pictures, refreshments beckoned to the appetites of the metallurgists; it need not be stated that an enjoyable time was had by all present.

A sensible girl is not as sensible as she looks, because a sensible girl has more sense than to look sensible.

—The Ore Digger.

### Marines, Army And Navy Represented

During the past week, on Wednesday and Thursday, November 4th and 5th, the Missouri School of Mines was visited by the "Joint Enlistment Board" of St. Louis. The board, consisting of five officers representing the Marines, Navy, Naval Air Corps, Army and Army Air Corps, were introduced by Dean Curtis Wilson at an 11 o'clock assembly on Wednesday morning. The officers who spoke at the assembly were: Major L. A. Pollack, Army E. R. C. and chairman of the board; Lieutenant J. L. Barnes, Naval Aviation; Lieutenant W. D. Slattery, Marine Corps; Lieutenant M. Unterman, Army Air Corps; Ensign J. E. Wallace, Navy.

The man enlisting in the United States Marines deferment program must be between the ages of seventeen and twenty-seven years; must be not less than five feet six inches or more than six feet four inches in height; his weight must be proportional to his height. The eyesight requirements are that of 15-20 visual acuity, with limited requirements relating to color blindness. The educational requirement demands only that the enrollee be pursuing some course for which a degree is offered after four successful years in an accredited college. The educational requirement demands only that the enrollee be pursuing some course for which a degree is offered after four successful years in an accredited college.

Marine officers, Lieutenant W.D. Slattery, made the following statement concerning this branch of the service: "No special courses are required, and any course for which the forementioned degree is offered is satisfactory. Although no special amount of mathematics is required, we advise the men to take all the mathematics possible."

A man in the Marines may be either married or single, but he must meet all the physical requirements of a generally sound body. Any man in doubt about physical requirements had best take the physical examination.

For the Naval Aviation program it is necessary that all candidates have 20-20 vision with normal color perception. He must be between the ages of eighteen and twenty-seven years

## LETTERS TO EDITOR ...

To Whom It May Concern:

This open letter is addressed mainly to those students who have found some fault with the 1942-43 Student Directory as put out by Blue Key. It is also addressed to that certain student who, after finally acquiring an office of some doubtful importance on this campus, has taken it upon himself to be a representative of the entire student body in his biased criticism of the Directory.

First let me explain that the names, addresses, and telephone numbers were all taken from the files in the Registrar's office and these in turn were taken from the information given by you at the fall registration of this year. We assumed that the information given was your present and

correct address and phone number and so if any mistakes are found, aside from the possibility of typographical errors, they are due entirely to your own fault. It can plainly be seen, at least by most students, that Blue Key cannot check each fellow's address and phone number. The statement was made that "it seems that about half the addresses and phone numbers are wrong." Now really fellow, I do think that is a slight exaggeration, don't you? I also doubt very much if those six names were taken "at random" as stated.

In regards to the statement that Blue Key gets all the credit but the office force does all the work, that, like all the other statements made in that letter, is a gross misstatement. A few days following registration, two members of Blue Key went up to the office and started to get all the student's names, addresses,

es, and telephone numbers. After getting thru the C's, Mr. Hubbard inquired why we didn't let the office force do it as in previous years. The reason for this is the fact that it takes less time and saves us from crowding the office and hindering their work. Therefore, this part of the Directory was done by the office.

However, the writer of that letter seems to think that there is no other work attached to the printing of the Directory, which is far from the truth as anyone should know. The members of Blue Key did work, quite a bit of it this year, to make this year's Directory better than ever and I rightly believe that Blue Key should get the credit for it. Oh yes, I forgot to mention that since we didn't do the printing, maybe we shouldn't get the credit for it after all.

Now for that huge sum of a dime that we collected from the students to help defray expenses. During this year's registration only around 600 students donated 10c each instead of 800 as stated. This is a slight difference of \$20.00, to keep the records straight. But to get back to the point, Blue Key uses this money and the money from advertising to put out the Directory. The money that is left over is used for different projects, such as the Freshman Week entertainment and that Tea Dance we gave last week. On many campuses the CHARGE for the Directory is much more. Here at M.S.M. we just collect a slight DONATION of 10c and if the writer of that letter doesn't feel as if he is getting his money's worth he can see me and I'll gladly give him his money back.

The truth of the matter is, I believe, from the many comments I've heard, that this year's Student Directory is the best put out so far. More work was put in on it, I'm sure. As for the mistakes, all I can say is, "it isn't our fault."

Perhaps the main reason for the letter in last week's Miner is that our eminent correspondent was letting his personal feelings enter into his far-fetched criticism. It is true that his phone number was wrong, due, however, to his misinformation. Just because of this, he seems to think that the Directory is all wrong and "no darn good." Grow up, fellow Miner, and deflate a little of your ego. A good "bitch" is swell, but why not have an adequate reason to "bitch."

Very truly yours,  
R. Kent Comann,

An elderly woman got on to a streetcar with a large suitcase which she put in the rack above her seat. At the next stop, a large gentleman got on the car and sat down beside her. Just as he got settled, he felt a drop of liquid hit his cheek and run down into the corner of his mouth. He touched his tongue to it, and looking up, he said, "Ah, pickles."

"No," she said. "Puppies!"

The landlady brought in some exceedingly thin slices of bread. Said one boarder, "Who cut these?"

"I cut them," replied the landlady coldly.

"O. K." said the boarder. "I'll shuffle and deal."

## Campus Spotlight

Raymond O. Kasten is a well known figure on the School of Mines campus. He has been very active during the four years he has been here. Ray came to the School of Mines in September 1939 and he will receive his degree in January. He is taking Civil Engineering the structural option.

Ray is a member of the Tau Beta Pi and the Theta Tau. He is secretary and treasurer of the Blue Key. In his capacity as president of the St. Pats board he has shown outstanding leadership. He is a member of the A. S. C. E. and was last year's vice president. He is on the Miner Board, in the circulation department.

Last year Ray was student assistant in the civil engineering department. Also since November 1941, he has been assistant in the National Defense Training Courses.

During the summer Ray has gained some valuable experience in the civil engineering field. Two summers ago he worked for Professor C. H. Black as a draftsman. He also performed some surveying in the summers.

Roy comes from Jackson, Mo., His favorite hobby is swimming. In January Ray will go to work for Curtiss-Wright in St. Louis. There he will work on Stress-Analysis.

## Detonators Drill At Military Ball

The Detonators represented themselves at the annual S. A. M. E. military ball last Saturday night October 31, by forming an honor guard and exhibiting various new drills.

The twelve picked men were in full dress for the occasion. The squad was commented on their drilling by a number of the various guests present.

The men who participated in this exhibition were:

Sergeant James Bottom in command.

Arthur Feinburg, Tom Buckley, Alan Ploeser, John Shnitz, Glen Joste, Norman McCutchen, Edward Nauyoks, Edmond Hyatt, Carl Finley, Ray Smith, Joe Strubert.

Do you know what good clean fun is?

No, what good is it?

## Glee Club Shows Improvement

The Glee Club met last night, as usual, a goodly number of students attending. Practice was continued on the new songs which were received a short time ago by Mrs. Lovett. Two of the favorites practiced were "Stout-hearted Men", arranged by Sigmond Romberg, and the appropriate "Song of the Army Air Corps". It is hoped that we will soon have Fred Waring's male-chorus arrangement of the school song; it has been ordered for quite some time. At the present time there is much encouragement for the Glee Club, as the improvement since the first of the year has been outstanding. Mrs. Lovett is having practice with the individual sections of the chorus in order to help out those who have not had previous experience in such a musical organization.

## JOKES

We're having a terrific water shortage here.

Really, how bad is it?

So bad that all the trees are going to the dogs!

She "I'm perfect!"

He, "I'm practice!"

The little pig who cried, "Wee wee, wee," all the way home won't drink so much beer the next time.

A pretty young doll named Brenda

Went out in a Jeep on a benda!

After riding for miles,

She lost all her smiles

It seemed that Brenda was tenda.

A Miner may be defined as a man that sleeps tight at night and goes around that way all the next day.

# Miners Must Trounce Bears Today To Stay In MIAA Race

## Victory Hinges on Dick's Passing

The "Fighting Miners" will be fighting their second conference game of the season this afternoon when they oppose the Springfield Bears at Springfield. Miners are expecting to enter plenty of competition as Bears will be revengful for loss to MSM last year. This resulted in a 3-0 victory the Miners. The Bears have four games, tied two, and only one thus far this season. However, their lone victory in a conference tilt when they defeated Maryville 14-13, they hold second place in the MIAA.

The conference hopes for the Miners will depend entirely on the result of this contest today. To date, the Miners are batting 500 percent in conference competition having lost their first game to Maryville and then coming back next week to trounce Warburg. If they are able to defeat the Bears today and Cape Girardeau next week, they will be champs of the MIAA.

Springfield's great offensive built around its six lettermen, Pottenger, George, Blair, Williams, Adamson, and Grantham. These men have all had two or three years of football experience and will give the Miners plenty of opposition. Pottenger is center and has acquired a reputation for being an excellent blocker. George, Williams, Blair constitute three-fourths of the Bear backfield, and

are all capable of passing, kicking and running the ball with expert ability. Adamson is the star of the Bear forward wall. His best play is on defense where he practically lives in the opponents backfield. Grantham is a tackle and will give the Miners his share of trouble.

Gale Bullman put his charges through three tough scrimmages this week in preparation for this decisive contest. However, he is none too optimistic about the encounter as the Miners will be greatly handicapped due to the loss of Hoby, Miller, and Catanzaro, who are all regulars. Hoby has a bad knee, Miller a bad arm, and Catanzaro has a fractured shoulder. However, Jim Stover will return to the line-up for the first time in two weeks.

The starting line-up for this afternoon is:

MINERS	BEARS
Moore, e . . . . . le, Hall	Wood, lt . . . . . lt, Rodney
Mazzoni, lg . . . . . lg, Kerin	Kiburtz, g . . . . . g, Pottenger
Kane, rg . . . . . rg, Adamson	Leone, rt . . . . . rt, Grantham
Perkins, re . . . . . re, Long	Radcliffe, qb . . . . . qb, Williams
Boetjer, lh . . . . . lh, Wyatt	Dick, rh . . . . . rh, George
Carafail, fb . . . . . fb, Blair	

She: "Don't let my father see you kissing me."  
He: "But I'm not kissing you."  
She: "I just thought I would tell you in case."

Alumnus: "How about the team? Are they good losers?"  
Coach: "Good! They are perfect."

## Around The MIAA

Football in the MIAA this afternoon finds the present leaders of the Conference, Cape Girardeau and the Springfield Teachers meeting formidable foes on the gridiron in defense of their lead in the Conference race.

Of primary interest to the Miners is the meeting between the Miners and the Springfield Bears at Springfield this afternoon. The Miners have always found STC a tough foe to beat, and are going on the field this afternoon expecting almost anything in the way of an offensive attack by the Bears. While the Miners were enjoying an easy win over the Warrensburg Mules a little over a week ago, the STC Bear's sprang up with a startling upset victory over the favored Maryville Bearcats. This incident shows the Bears are determined to be counted in the MIAA race this season despite their poorer showing earlier this year.

Remembering the 3 to 0 victory over the Bears last year by virtue of a field goal from the toe of "Stubby" Krueger, the Miners are out to show the Bears they can win another ball game, this time without field goals. With the team in fine physical shape and nearing their peak in performance for the season, the Miners are expected to use an all but offensive both on the ground and in the air against STC. STC will be kept busy once Al Dick starts firing his passes, and Gil Carafail and Jack Boetger begin carrying the pigskin through the line. These men will be the spearhead of the Miner attack. The Miners will have to be equally aware of STC's veteran fullback, Dean George.

Rounding out the second half of the MIAA schedule for the afternoon, is the all-important game between the Cape Girardeau Indians and the Maryville Bearcats. This game will definitely without a doubt settle Maryville's chances of repeating as champions of the Conference this year.

Cape possesses a very strong and well balanced team, with strong reserve material to back it up. Having held the strong Missouri "B" team to 2 points while they themselves scored 14 points, the Indians showed they have the stamina and the ability for anything the MIAA can offer. Last Saturday, Cape defeated a rising Culver Stockton team in a sea of mud, 14 to 0. Showing a well rounded offense and defense in all types of weather, the decision points very much in favor of Cape. Maryville didn't look too impressive in beating the Miners, and their defeat last week by the Bears shows they have weak spots in their football machine, which against a team of Cape's caliber may prove to be their undoing.

### MIAA STANDINGS

Cape Girardeau won 1, lost 0, tied 0, points 27, opponent 0.  
Springfield won 1, lost 0, tied 0, points 14, opponents 13.  
Missouri Mines won 1, lost 1, tied 0, points 45, opponent 29.  
Maryville won 1, lost 1, tied 0, points 35, opponents 27.  
Warrensburg won 0, lost 2, tied 0, points 7, opponent 59.

He: "Hello, Buck."  
She: "I'm not buck."  
He: "No but your teeth are."

## INTRAMURAL Sports

With the beginning of the basketball season just around the corner in the intramural world, we glance at the point standings of the teams to see if a prediction of an "intramural king" is possible. The standings to date are based upon the points gained by each team in table tennis, cross-country, and touch football. At the present time PIKA is out in front, having gathered 945 points, Sigma Nu in second with 845, and Kappa Sigma is third with 680.

In order the other teams and their totals are as follows: Freshman, 562 1-2; Seniors, 535, Triangle, 452 1-2; Sophomores, 447 1-2; Kappa Alpha, 417 1-2; Sigma Pi, 412 1-2; Theta Kappa, Phi, 297 1-2; Juniors, 327 1-2; Lambda Chi Alpha, 227 1-2 and Alpha Lambda Tau, 210.

Basketball will be the last sport of the year and the last before the graduation of the seniors; consequently the points will be totaled and an award given the team with the highest standing at the end of basketball competition.

Basketball carries more points for the leaders in standings for the leaders in standings now are not too solidly situated over the other teams.

It pays to advertize

"Hubby, do you love me?"  
"Yes."  
"How much?"  
"How much do you need?"

Doctor (breaking in on engrossed Dean)—My dear sir, I am happy to report that a little boy has just arrived.

Dean (from force of habit)—Tell him I won't be able to see him for a few days at least.

God bless my parents and my home. Bless my brothers, sisters, friends and relatives. And goodbye, God, I'm going to college.

#### PI KAPPA ALPHA

The presence of three young Misses guests for the Military Ball, sparked the activities around the house last week-end. They were: Frances Litzelfelner, of St. Louis; Bettie Baker and Margie King, both of whom are from Jefferson City.

Brothers Jack Sizer and Wayne Gollob returned to the chapter for a short week-end reunion. Jack who lives in Oak Park, Ill., works at the Sizer Gear Co. in Chicago. Gollob gone to San Diego where he will enter the Marine Air Corps.

Brother Eck's faithful little truck finally heaved a sigh and stopped on him. This sad ragdy happened Friday, near Cuba, as Brother Eck was headed home to St. Louis. "Home Goers also included Milton Heimos and Dick Smith of St. Louis, and Raymond Russell of Wynne, Ark. Brother Robert Hanna attended a B. S. U. convention in Columbia. Headed in the same direction were Matt McCaskill, Bob Phillips; and Bill Powell. Harry Kuhn paid a visit to William Woods College, Fulton.

Bernie Wagner, Herman Schalk, Johnny Erlich, and Bob Hamelmann spent the week-end at the Wagners' Cabin on the Big River. They say the hunting there is rare.

Dr. W. T. Schrenk was the dinner guest of the Chapter on Thursday, October 27.

#### Lambda Chi Alpha

The past weekend was another busy one at the "Little Red Playhouse", with out-of-town dates, initiations, and the traveling secretary's visit.

The out-of-town dates for the week end were the Miss Hope Ryder from Lindenwood College in St. Charles, Mo.; Miss Lois Stout, of St. Louis; Miss Marie Meiners, of Normandy, Mo.; Miss Ann Hoffman, Miss Marjorie Bonewits, and Miss Betty Hill, all of St. Louis; Miss Bar-

bara Wolfs, of Westfield, New Jersey; Miss Pat Kennedy and Miss Jane Fruedenberg, both of Columbia, Missouri; and Miss Jerry East, now attending Drury.

Lambda Chi Alpha is happy to announce the recent pledging of George Miller and Neal Woods. Both of these fellows are Juniors and are studying mining. George is from St. Louis and Neal is from Christopher, Illinois.

The chapter was visited by one of the fraternities three full time traveling secretaries last weekend. Mr. Howard Barnum, Jr. arrived Saturday afternoon and stayed until Monday morning. He had many useful suggestions to make to the chapter, but found the chapter in a good condition. Mr. Barnum is a graduate of Florida Southern, where he attained some of the highest honors ever given in that school. He is a member of Phi Beta Kappa, highest honorary fraternity, having had a scholastic average of 2.9.

The Alpha Delta Zeta of Lambda Chi Alpha is happy to welcome seven new members into its bonds. These fellows all completed the third degree last Sunday afternoon, after which a banquet was given in their honor at the Pennant Tavern. Those initiated were Bill Winters, Ray Punch, Kimbell Cross, Bob Heinbeck, Jim Wylie, Bob Murphy, and Don Frommer.

"You should be more careful when you pull down your shades at night. Last night I saw you. Ha, Ha, Ha! The jokes on you. I wasn't home last night."

#### PETTUS SPEAKS

er in civil and allied engineering fields who has appeared before the meetings of the Am. Soc. C. E. During the year more prominent engineers will appear before the society to acquaint its members with the engineering practice of modern times.

#### ENLISTMENT BOARD

Continued From Page 1

be not less than five feet four inches nor more than six feet four inches in height; must be of general good health; must not

weigh less than one-hundred twenty-four nor more than two-hundred pounds, which must be distributed according to his height. It has been said that the naval aviator is the best trained pilot in the world.

In the words of Lieutenant J. L. Barnes, the naval procedure is as follows:

"Men going into naval aviation will be continued in school until the end of the current school year, but not later than July 1, 1943, except in the case of freshmen, who may be deferred until the end of their sophomore year. Naval aviation cadets are then sent to one of the Navy's pre-flight schools for physical and mental conditioning, for a period of three months. From there they sent to one of the intermediate flight bases, such as Lambert Field, St. Louis, for approximately nine weeks. There they receive additional ground school instruction and approximately fifty hours of flight training. Finally the cadets are sent to one of the advance training bases, either Pensacola, Florida, or Corpus Christi, Texas for a period of three to five months training. Upon the successful completion of training they are commissioned as Ensigns in the United States Naval Reserve or in the Marine Corps Reserve, with pay and allowances aggregating \$291 per month. It has been estimated that the cost in training one of these naval aviators amounts to approximately \$27,000.

Some of the naval cadets for aviation are also given an eight weeks course in C. P. T. training before being called in for naval training, as an additional aid in helping them to become qualified naval officers.

A regular navy recruiter will be at the Rolla postoffice each Tuesday to assist men in effecting their enlistments."

Major L. A. Pollack of the Army E.R.C. told of the physical requirements necessary to enter this division of the service.

For the E.R.C., a man must be not less than five feet nor more than six feet six inches tall; must weigh no less than one-hundred one nor more than two-hundred fourteen pounds; can have slight defects in color perception; must be a United States citizen; must be a full-time resident student in an accredited college's four year course.

Major Pollack stated some of the facts as follows:

"Before enrollment the professor of military science and tactics is required to determine whether the man is physically, educationally, morally and psychologically qualified as an officer candidate. These men will be ear-marked for potential officers, and when they are called in for active duty, they are placed under immediate observation for a period of thirteen weeks. Upon the successful completion of the thirteen weeks training as an enlisted man he files his application for admission to the officers candidate school, for which he will be recommended. After at-

tending school for three months and completing that course he is commissioned a Second Lieutenant."

Lieutenant M. Unterman of the Army Air Corps said:

"Opportunities in aviation are much greater than in any other branch of service, both during the war and in the civil life afterwards. Engineering students have a two fold opportunity as they are eligible for either the air-crew or for the ground-crew."

The air-crew requirements state that the applicant must have 20-20 vision; must weigh between one-hundred five and two-hundred pounds; having a maximum color blindness of twenty-five per cent; must not be less than five feet or more than six feet four inches in height.

The requirements for ground duty are much the same, with the exception that the applicant may have 20-100 vision, correctable to 20-20 with glasses.

Ensign J. E. Wallace had these statements to make about the naval program:

"It is expected that men enlisted in the Naval Reserve will be assigned to inactive duty at their schools until they receive their degrees. If it becomes necessary to call naval reservists from school, these students will be sent to the midshipman training school and will be given the same training that graduate students now receive. The navy, being an organization of specialists, makes every effort to put a man's training or experience to its best use in the service.

Arrangements have now been made for the physical examinations, to be taken on the campus. Dr. Fiend will make the examinations and it is contemplated that arrangements will be made to complete the enlistment on the campus. Dean Wilson will have the forms necessary to make the application.

Freshmen and sophomores interested in the naval program, must first enlist in the E.R.C., and at the time of enlistment indicate the navy or marines. Within the last three months of their sophomore year they may transfer. There has been no official word as to the closing of V-1 or V-7, however it is unofficially understood that the program may be closed. No official date has yet been announced to this effect."

The V-1 is for freshmen and sophomores; while V-7 is for juniors, seniors, and graduates. A man may transfer from these to V-5 if he desires to do so.

The physical requirements for the Navy are the same principally as for the other branches of the service; 20-20 correctable vision being required. The age limit for V-7 is from eighteen to twenty-seven, and for V-1, is from seventeen to twenty-six years of age.

Naval or Marine Corps candidates, if failing to pass the requirements for a commission, have the choice of remaining in the navy or marines as a seaman, or may receive honorable discharges from these departments.
