Missouri School of  Mines & Metallurgy

VOLUME 29

WEDNESDAY, NOVEMBER 25

NUMBER 21

Senior Civils Honored at ASCE Banquet Friday

Lieut. Col. Paul B. Marner, Corp of Engineers, United States Army, spoke at a meeting of the Mid-Missouri Section of the Am. Soc. C. E. which was held in honor of the senior civil engineers of M. S. M. Friday evening at a banquet held at the Pennant Restaurant. Lieut. Col. Marner, who was accompanied by Lieut. Col. Roy Copeland, is connected with the Engineer Replacement Center of Fort Leonard Wood. Lieut. Col. Marner was introduced to an audience of fifty persons by Prof. H. W. Wood, acting chairman of the Civil Engineering Department at Missouri University Columbia, Mo., and president of the Missouri Section of the Am. Soc. C. E., who served as toastmaster for the occasion.

The subject of Lieut. Col. Marner's address was "The Role of Engineers in the Army." He said that the army engineers are composed of all types of engineers, the predominate type being civil and mechanical engineers. The modern engineering component is complex and highly organized. The branches of the army are trained to do a special job and produce results. The result is victory. The members of an army must act as members of a team.

The engineers are organized into two units, the general service and the special service units. The general service units assist the army in the actual battle area; they aid the infantry and the motorized divisions. The special units give technical aid such as the construction of air fields and communications.

The engineers have the latest equipment and have a huge responsibility in the ultimate victory.

The appointment of Capt. Carl L. Sadler, U. S. G. S., to life membership in the Am. Soc. C. E. was unofficially announced by Prof. H. W. Wood. Capt. Sadler has been a member of the Am. Soc. C. E. for thirty-five years and was commended for his great interest and work in the society. Capt. Sadler spoke briefly on the progress of the society since its founding in 1852. The three new institutions which have been added to the organization during the last thirty-five years are the creation of local sections of the organization, the establishment of student chapters and the founding of the society magazine "Civil Engineer."

The officers of the University of Missouri Chapter of the Am. Soc. C. E., Ben McCabe, Jack Guinne, Dick Beard, and Prof. G. K. Gilban, instructor of

St. Pats Board Sponsors Contest

This year the St. Pats Board is sponsoring a contest for the best decorated fraternity or eating house during the two day celebration of the school's first annual Winter Carnival. The award given to the winner will be a beautiful plaque, and is the permanent possession of the winning organization.

The purpose of this contest is to stimulate the interest of the various organizations, and to help make the "first annual" read the "here to stay" Winter Carnival. The winning house will be judged both during the day and at night so that everyone has an equal chance, even though Christmas lights will be hard to obtain.

There is no limit on the decorations. They may be simple or elaborate; inexpensive or expensive; large or small. The judging will be on originality and beauty. This is your chance to show the aggressiveness of your organization.

Detonators Drill At St. Louis Game

At the last game of the season the Detonators had perhaps their best drill of the season this year. Even with the handicap of practically having to swim in the mud at Francis Field they put on an exhibit of fancy drill which would have defeated the Pershing Rifles of Washington University if they would have braved the mud and excepted the challenge which the Detonators extended to them. The greater part of the credit for this showing goes to Sergeants James Bottom and Jack Burst who commanded the unit on the field and who were largely responsible for holding the group together through the first part of the year. At times the demonstrations put on by the Detonators were not up to par at no time during the football season did they fail to show up for any of the home games and at both the St. Louis and Washington University games they put on a creditable showing. They also put on a fine drill at the military ball considering what short time they had to drill with rifles. This might also explain the difficulty at the Fort Leonard Wood game, but as it was not only the rifle drill that was no good then but also the close - order drill. However, they have improved steadily since that game through plenty of hard practice and they deserve a hand for their participation in the drill during the halves.

Joan: I'd love to go to a fraternity dance.

Jane: That's the way to get there.

M-Club Announces Names Of Pledges

On Monday evening the M-Club held a meeting in which they set a date for the initiation of new pledges. This initiation will last all day Friday and will be followed by a formal initiation in this organization.

The new pledges will be required to carry the customary hurdles and eggs to all campus activities, Friday, November 27. They will also be required to wear their clothes in the characteristic manner of all preceding M-Club pledges.

The new pledges number 21 and consist of 9 football players, 9 track men, 2 tennis men, and 1 golf man. These new men are: John Hazelett, Soph., football; Paul Carlton, Soph., track; Marvin Engelhart, football; Edwin Blase, Soph., track; Joseph Sueme, Jr., football; John Liddell, Soph., track; Gale Fulghum, Soph., football; Arthur Peterson, Sr., track; Seaborg, football; Otho Self, Sr., track; Ebert Miller, Jr., football; Harold Webers, Soph., track; Jim Stover, Soph., football; Wesley Weber, Soph., tennis; Jack Boetjer, Jr., football; John Wilms, Sr., track; James McGrath, Soph., football; Franklin Rehfeld, Sr., golf; Glendon Jett Jr., track; Jim Wigge, Soph., tennis; and Richard Chapman, Soph., track.

Coffee Rationing Affects Colleges

College students, under rationing, will get about the same amount of coffee that the rest of the American people do during December and January—one cup a day.

When coffee rationing goes into effect November 29, college eating places will be classed as institutional users and, under OPA regulations, will be allotted for the first allotment period—November 22 to January 31—the same amount of coffee that they used in September and October of 1942.

This institutional allotment, based on a former order which restricted coffee deliveries in September and October of 1942 to 65 percent of the coffee used in the same period in 1941, will mean that college students will get 35 percent less coffee than last year.

In calculating their allotment, OPA officials report, colleges must make an inventory of the coffee they have on hand, and this amount will be subtracted in calculating just how much coffee each college will receive.

The first institutional allotment period is nine days longer than the base period on which colleges will make their calculations. For that reason, OPA officials point out, the college student will have slightly less coffee per capita than he has had for the first two months of the academic year.

Dean Wilson Will Speak To Students On Thanksgiving

Weber Is Called By Army Air Corp

Professor R. H. Weber, associated with the chemistry and English departments of the Missouri School of Mines and Metallurgy, left this week in response to a call extended to him by the Army Air Corps. Mr. Weber has been very prominent in school activities during his period as a teacher here. At the time of his call he was sponsoring the Sigma Psi Epsilon production of "Orphan Nell," a Miner play which is scheduled for production some time in December.

Mr. Weber is entering the Air Corps meteorological department, in which he shall be commissioned as a lieutenant. As an officer in aircraft meteorology he will be holding one of the key positions as all successful air operations are directly dependent upon the weather.

For his instruction in meteorology he will be sent either to the Massachusetts Institute of Technology, the University of California at Los Angeles, or the University of Chicago. The length of course at one of these schools is of 30 weeks duration. He has been awaiting his call for some time.

Students Urged To Join ERC Soon

Under the present system of enlistment it is possible to take around 25 applicants per week into the Enlisted Reserve Corps. Inasmuch as enlistments of upper-class student in the ERC are scheduled to close by December 31 of this year this means that not more than 125 students from Missouri School of Mines and Metallurgy can be enlisted in the ERC.

The bottleneck is obviously the physical examination which requires considerable time. Should 200 or 300 of our students desire to take advantage of ERC, it is advised that they make up their minds soon and leave their names in the Dean's Office. For this number the Military Department will request the aid of one or more Army doctors who will then come to the campus and proceed with the enlistment of a large number of students in several days.

Dean Wilson urges that you give this matter your careful consideration.

How did Joe get his black eye? He was leading the life of Riley and Riley came home.

Glee Club Will Sing At Program

At 11 a. m., tomorrow there will be a Thanksgiving Day program given in the Auditorium. The program will be under the direction of the Alpha Phi Omega Service Fraternity, and representatives from the Fraternities and Independents will take part. The two main features of the service will be Dean Curtis L. Wilson's address and the anthem sung by the MSM Glee Club.

Richard Ollis of the Kappa Alpha Fraternity will open the service by playing the prelude entitled "Largo" from the opera "Xerxes" by Handel.

The invocation will then be given by William A. Hubbard of the Kappa Sigma Fraternity.

The invocation will be followed by the congregation joining the Glee Club in the singing of the hymn "Oh Worship the King."

Richard P. Wheat of the Lambda Chi Alpha Fraternity will read the scripture lesson, followed by William J. Goodwin offering a prayer. He will also lead the congregation in the Lord's Prayer.

The Glee Club will sing the anthem "Heavens Give Praise" by Beethoven. This club is composed of 27 boys, representing a cross-section of the student body of MSM. The Glee Club under the direction of Mrs. I. H. Lovett has made many public appearances in the past. Their next appearance will be a Christmas concert on December 18.

Dean Curtis L. Wilson will give the address of the morning. His text to be "The Meaning of Thanksgiving." In his address he will stress the meaning of the holiday as it applies to us in war time, as American citizens and students of engineering.

The closing hymn will be "Onward Christian Soldiers" sung by the congregation and the Glee Club.

Robert Underhill of the Triangle Fraternity will then give the benediction.

Don Volkmer Undergoes Appendicitis Operation

Donald Volkmer has undergone an operation for appendicitis at St. Mary's Hospital in Jefferson City. His mother writes that he is getting along nicely and will return to school as soon as possible.

Volkmer is a transfer from Junior College in Jefferson City, and is a Sophomore in Chemical Engineering.

Slap The Japs But Save The Grass

This summer and fall Alpha Phi Omega sponsored a "Keep Off the Grass" campaign which helped greatly to increase the beauty of our campus. Most of the paths which had resulted from the carelessness of Miners soon disappeared.

The result of the campaign was that the campus became prettier and the grass healthier than it had been for ten years.

Now, however, many students have again grown careless and have started walking on, and scuffing the lawn. There are plenty of walks between the various buildings on the campus so there is no need or excuse for cutting across the grass. It is especially harmful in this kind of weather when the earth is damp and the grass easily pulled from the ground.

The school is trying very hard to make our campus more beautiful by planting shrubs and trees, as can be seen from the landscaping being done around the new Chemistry building.

Let us do our part and help beautify the campus by using the walks. Give the grass, which we worked so hard to start, a chance to grow and thrive.

As a MINER Sees it

What's this about the three Miners who are burning the midnight oil in the aud these evenings. They claim they are painting a curtain for the forthcoming production "Orphan Nell." Look to your laurels Rembrandt!

Let us raise our tonsils and give thanks on Thanksgiving for our long holiday. Think of it fellas, a whole day. To give us the whole week-end would cause the average Miner to lose two labs and two lectures. Although this is the last occasion before transportation difficulties begin, this tremendous amount of lost time is considered unexpendable. All protests are fluffed off with that vague, snag, ubiquitous drone of "the war situation you know—"Since we are not going to leave town, I would prefer to go to school Thursday, and in return maybe get TWO days at Christmas..

The panda is learning Statics these days. Unlike the rest of the school mongrels, he shows a distinct preference for a particular classroom. As fast as Nick can throw him out one door the animal swishes back in through the other. Before long he will be answering the roll.

The Chinese scholar turned out to be quite a wit. Best laugh however was when the good colonel walked out. It seems that Sam didn't warn the guest speaker to lay off Pearl Harbor.

The Theta Tau rattle turned out to be a sparsely populated affair, a bit too exclusive you might say. Everybody of importance except Comann, was at St. Louis game. There was a bountiful supply of A. & A., so everybody was happy. Especially so was Bustle-boy Brannick. When last seen he was under a table, headed north. Please boys how about donating those Viennese waltzes to the scrap drive? Joe Miner just can't minuet worth a farthing.

As usual, we wuz robbed at the game. You've worked hard this season fellas and we are proud of you. You don't have to bring back the turkey every time in order to rate with us. The School is known not for its winning, slaughtering teams, but rather for its fighting teams. We got 'em.

Signed
Joe Miner

JOKES

He (at movies): "Can you see all right?"
She: "Yes."
He "Is your place comfortable?"
She: "Yes."
He: "Is there a draft on you?"
She: "No."
He: "Will you change places with me?"

Man is born.
Man grows up.
Man kicks bucket.
Man turns to dust.
Horse eats grass!
Moral: Never kick a horse; he might be a relative.

Im thirsty.
Here—drink some milk. It's good for the blood.
But I ain't blood thirsty.

Phil Levant, Conductor — Composer

PHIL LEVANT

Phil Levant, the famous conductor-composer, who will appear with his "Listen to Levant" orchestra in Jackling Gym at MSM's First Winter Carnival on December 11 and 12, will feature music for the dance lovers and those who appreciate entertainment and dandapation welded together to present outstanding and enjoyable music.

Phil Levant and his orchestra have been featured regularly over the radio networks of NBC, CBS, Blue, and Mutual, from such famous entertainment centers as the Bismark Hotel, Chicago; the Schroeder Hotel, Milwaukee; the Muehlebach Hotel, Kansas City; the William Penn Hotel, Pittsburgh; the Trianon Ballroom, Chicago; Plantation Clubs in Dallas and Houston and other famous spots.

Phil is the composer of the Hit Parade song hit "Afterglow" and is one of the finest viola players in the orchestra world as he had been schooled for the concert stage and since has transposed his classical knowledge into popular music.

Bears Defeat Miners In Last Game of Season, 19-6

Miners Score On Pass To Moore

The Bears from Washington University after finding themselves on the short end of a 6 to 0 score at the end of the first half, came back in the third and fourth quarters sparked by their star halfback, Lee Tevis, to down the Miners 19 to 6 before a small crowd at Francis field on last Saturday. The Miners gave the Bears a severe test with their aerial and ground offensive in the first half before they were finally overcome by the Bears power.

The superb defense of the Miners aided by the unheralded kicking of Keith Radcliffe kept the Bears in check during the first and second quarters. The Bears succeeded in penetrating beyond the Miners 20 yard line, twice, but both times the Miner defense stiffened and pushed Washington back deep into her own territory. At the end of the first quarter, the Miners held the advantage by having possession of the ball on Washington's 24 yard line.

The play in the early part of the second quarter saw-sawed back and forth, with the Miners gaining the advantage on Radcliffe's fine kicking. The Miners advanced to the Bears eight on a pass from Dick to Glover, but the Miners were unable to do anything in four downs and the Bears took over.

Winkler kicked out to midfield where Radcliffe caught the ball and returned it to the Bears 33 yard line. Glover passed to Perkins on the Washington 13, the pass was ruled completed because of interference by Washington. The Miners failed to gain ground, and on the fourth down Glover fumbled, Washington recovering on their own 6 yard line. On the second play, Feeney fumbled for Washington and the Miners recovered on the 14 yard line. The Miners were thrown back on their next two plays, and the drive halted altogether when Winkler intercepted a Miner pass on the 17 yard line. The Miners threw the Bears back on three

plays, forcing Tevis to kick out of danger for Washington. Tevis kicked from his 10 yard line to the Miners 4, where Boettjer ran the ball back to the 23. The Miners kicked out of bounds on their own 27, but a strong defense kept the Bears from taking advantage of their opportunity. Taking over on downs, the Miners proceeded to advance the ball on successive runs by Dick, Carafail, Radcliffe and Miller to the 42 yard line. At this point Glover replaced Miller in the backfield. On the next play he advanced the ball to the Bears 48 yard line on an end run. With the clock reading less than a minute to go, Glover faded back to his own 46 and spiraled a pass to John Moore along the sidelines, who shaking off a would-be tackler, dashed across the goal line. Glover's try for the extra point was blocked, but the six points looked big as the half ended.

The Miners lead was not long-lived however, for the Bears came back with less than two minutes of the third quarter gone and scored on a 70 yard run by Lee Tevis. Tevis missed the conversion. Although the Miners succeeded in checking the strong drives of the Bears for a short time, the Hilltoppers power began to tell. With less than two minutes to go in the third period, the Bears drove within scoring distance, where Tevis plunged over tackle to add another score to the Bears total. Tevis again missed the extra point.

In the fourth quarter the Miners succeeded in pushing the Hilltoppers back a little, but the Bears came back strong to score on a pass from Tevis to Todorovich, who galloped 20 yards to cross the goal line unharmed. Tevis converted the extra point.

Both teams substituted its reserves after this, and neither team showed any real scoring threat thereafter.

It is noteworthy to make mention of the excellent defensive playing of Al Dick, Jim Glover, Jim Miller, and John Moore, and of the entire line despite the censorable weather conditions. The Miners could not have put

(Continued on Page 4)

Around The MIAA

BY GEORGE BURKE

Despite the censorable weather conditions the curtain was brought down on the MIAA in a grand finale this past weekend, with Cape Girardeau and Maryville tied for the championship in the Missouri Intercollegiate Athletic Association for 1942. Cape tied with Maryville by defeating the Springfield Teachers 19 to 6.

Maryville gained the other half of the championship bracket by overwhelming Warrensburg 52 to 0, in the largest scoring spree witnessed in the MIAA this year.

Cape's sophomore quarterback, Byford Barr, who has been in the background and has gained little praise, was the star of Cape's victory over the Bears. In the third quarter he dashed 60 yards to score for Cape, and in the fourth quarter with 28 seconds to go, nearly duplicated his feat earlier in the game, by running 45 yards for another touchdown.

Barr also set up Capes first touchdown in the second quarter when he carried the ball on a 29 yard end run to put the Indians in scoring position. He then took part in the reverse to Frank Chornak who passed to Jack Klostermon for the touchdown.

Springfield's lone score came in the third period on a pass from veteran halfback Dean George to Henry Williams.

Maryville brought its season to resounding close by running up 52 points against the weak Warrensburg Mules while the latter was being held scoreless.

Maryville put on an elaborate display of "schoolboy" football by running every kind of play imaginable. The weak and victoryless Mules were no match for the razzl-dazzel Maryville football and ended one of its worst seasons. Capitalizing on the running lateral and the running back of intercepted passes, Maryville paraded to their place in the conference race with eight touchdowns, converting four of the extra points.

Every man on the Maryville team saw action in the game after the regulars had piled up a 25 to 0 lead at the end of the first half.

Maryville crushing victory put them far out in front of the Miners in the lead for the most points scored this season. The standings of the teams in the MIAA for the season is as follows:

	W	L	Pts	Opp
Maryville	3	1	94	33
Cape Girardeau	3	1	50	19
Miners	2	2	64	36
Springfield	2	2	41	45
Warrensburg	0	4	7	132

INTRAMURAL Sports

Several thrilling contests have been played in the past week in the Intramural basketball tournament. Last Tuesday evening the first game was scheduled to be played between ALT and PiKA. The game was forfeited to PiKA. In the second game Kappa Sigma defeated the Juniors in a hard fought contest. The Kappa Sigs were forced to fight an uphill battle as the Juniors led until the last few minutes of play. Kappa Sig finished strong, however, and the final score was 24-19. Glen Jett of the Juniors was high point man of the evening with 8 points to his credit as he displayed fine ball-handling ability. In the third game Sigma Nu turned back the Seniors by a score of 25-30. Carlton and Stoops played well with 10 points each, while Neustader and Johnson played a fine game for the Seniors, scoring 8 and 9 points, respectively.

Theta Kappa Phi gave further proof of a strong team by trouncing the Sophomores by a score of 30-10. The outstanding man on the floor was Duffner of Theta Kap as he scored 13 points. Sigma Pi, another of the leagues strong quintets, easily defeated the Frosh by a score of 26-18. Lambda Chi and Triangle played a close game in the third contest with Lambda Chi emerging as winner by a score of 27-30.

The Seniors continued in their usual luck and lost a tough one to Kappa Alpha by a score of 23-17, and Kappa Sigma kept their winning ways in defeating ALT 36-10. Tapperson of Kappa Sigma scored 12 points to attain high point honors for the contest. PiKA pulled a surprise out of the hat by defeating the highly touted Theta Kaps by a score of 15-13.

The lowly Sophomores rose up to defeat an even lowly Frosh team by a score of 30-17. Fraser and Gustis of the Sophomores each counted 11 points to lead in scoring. The last two games of the evening were both forfeits, the Juniors to Kappa Alpha and Triangle to Sigma Nu.

I think that I shall never see
A girl refuse a drink that's free,
A girl with hungry eyes not fixed
upon a drink that's being mixed.
A girl that doesn't like to wear
a lot of junk to match her hair.
But gals are loved by mugs like
me,
For who in Hell could kiss a
tree? ? ?

Yippeel! Come Sattiday night, us boys up yar on the hill ere agonna celebrate the 50th anniversary of the biggest event what ever happned hereabouts — the hangin' of Cactus Pete, the ornist critter what ever came out of Joisey, and his pardner, Amos "Five by Five" Cesspool. That shore was a right purty day—the sun was a shinin' like a prairie fire, the trees was as still as a tombstone, and there as old buzzard bait Pete hangin' alongside A. Five by Five Cesspool, as I recollect. Yes, sir, I'm still around. After the hangin' I decided to get some book larnin'.

There's shore gonna be a heap of purty ladies at our dance. Most of the boys, namely: Protnicki, Hentchel, Bottom, Roley, Bumps, Schilling Makay, Frericks, Stovesand, Parker, Casler, and Schmoldt done went into the big city the other day to fetch 'em come Sat-

today. The boys in Bunkhouse B, Shipman, Lufey, Stangland, Sullivan, Wilms, and Jim Paul rode off in the direction of Columbia whar they whooped up the town and split the grub with them right purty gals at the Alpha Gamma Delta Ranch.

We uns is right glad to have Rolf Roley '40 who came all the way from South America, campin' with us.

You whats gonna be here won't have to bother about lookin' right elegant. Yor ranch clothes will be fitten enough.

Absent-minded Prof. "Waiter, have you forgotten to bring me my ham and eggs, or have I eaten them?"

Steel Shortage May Be Relieved By New Plastics

Plastic compositions which can replace steel or other metals in many uses may now be manufactured by incorporating with various cellulosic fibers a resin powder known as Vinsol, extracted by Hercules Powder Company chemists from the Southern pine tree, the Patent and Licensing Corporation, New York, has announced.

This new structural resin plastic is an addition to the growing family of resin-treated laminated paper products. It is a thermoplastic, fibrous-resin composition, hard, dense, stiff but with reasonable toughness. It is described as sturdy but lightweight, and has low water absorption.

It is said to be a possible replacement for steel or other scarce metals for some parts in containers for food shipments; for automobile license plates; in trucks, street cars and busses; conduits in certain uses; cement-filled lally columns supporting light loads. One of its best characteristics is its high resistance to petroleum products.

Fibers used in the production process include newsprint, clean cotton rags, sulphite, sulphate, and the like, in straight or mixed furnish. Such fibers are non-critical. The Vinsol resin is currently available without priorities, and can be obtained in ample quantities from the Hercules naval stores plants at runswick, Ga., and Hattiesburg, Miss.

When it is held advisable in certain operations to raise the fluxing or melting point of Vinsol, hardening agents are employed, and the report recommends zinc oxide.

Production of the fiber sheets requires use of existing conventional paper-making machinery, without special installations. Thin sheets for laminating may be made by continuous process on cylinder or fourdrinier paper machines. Thicker sheets for laminating or for homogenous pressing can be made on wet machines or insulation board machines. So far, the source of supply has been, chiefly, The Flintkote Company, New York, of whom The Patent and Licensing Corporation is a subsidiary.

Curing of the raw stock requires primarily hydraulic steam presses which operate at 275-350 degrees F., at 800-1500 p. s. i., and which have rapid cooling provided which will permit press means. Special furnaces may be curing at as low as 300 p. s. i. The curing cycle is from four to six minutes. Multiple platen production is regarded as thoroughly feasible because seconds or re-

Special compression presses and special compression molds or dies shapes, but multiple dies can be needed for specific molded worked out for the simpler shapes, such as corrugated sheets or fluorescent lighting reflectors, the announcement said.

The Patent and Licensing Corporation already has under way

considerable experimental work with this product. The Federal Electric Company, Chicago, for some time has been manufacturing "Federalite" for commercial use as a 3 inch diameter plastic tubing to replace steel pipe for shot hole casing in seismograph oil field exploration work.

Several other companies interested in the possibilities of the product as a metal substitute, and also for specific uses on its own merits, are working on adaptations of various kinds, such as containers for greases and oils, lightweight structural I, U and L or similar members, pipe, wall panels corrugated sheets, cabinets, boxes, refrigerators, air conditioning ducts, vent pipes, fluorescent lighting fixtures, radio antennae structures, furniture, etc.

Senior Civils

Civil Engineering at Missouri University attended the meeting and banquet

Others present at the meeting were W. J. Shulten, secretary of the Mid - Missouri Section of the Am. Soc. C. E. of Jefferson City, Mr. Gleissner, U. S. G. S. and wife, and many of the members of the U. S. G. S. staff.

The next meeting of the Mid-Missouri Section will be held during the month of December in Jefferson City.

Bear-Miners Game

(Continued from Page 3)

up such an excellent defense, however, it it were not for the remarkable kicking of Keith Radcliffe. Keith propelled the pigskin 70 yards on one kick and well over 50 on several others, despite the condition of the ball. Despite the newspaper stories and the broadcasts of the game, the Minrs turned in an excellent job, and every man should get credit for his splendid work, even in defeat.

Miners	Position	Washington
Moore	LE	O'Rourke
Wood	LT	Mersman
Kane	LG	Obermark
Kiburz	C	Wisman
Mazzoni	RG	Paul
Leone	RT	Lecture
Perkins	RE	Watzig
Radcliffe	QB	Mills

AND MORE JOKES

A drownng jitterbug: Hep! Hep!
A dying jitterbug: Dig, Dig, Dig.

Moron (drunk): Whasha time? Fran: Ish two o'clock.
Moron: How you know? Fran.: Looked at the sun dial with my flashlight.

Society: Have any of your family connections ever been traced? Bored Dowager: Yes, they traced a cousin as far as Canada once.

She was only an oculist's daughter, but give her two glasses and she'll make a spectacle of herself.
