NUMBER 50

Ernest Howard to Give Address at Commencement

Plans for the Commencement Program at the School of Mines and Metallurgy this spring have been announced by Dean Curtis L. Wilson. The program will start on May 23, when Father H. J. Lambert, pastor of Saint Patrick's Catholic church, of Rolla, will deliver the Baccalaureate address beginning at 11:00 a. m. in the auditorium of Parker Hall. On the evening of May 25 in the Dean's garden, will be held the annual Faculty Reception for the graduates and parents. The Commencement program will be held on the morning of May 26 in the auditorium of Parker Hall, with Dr. Ernest E. Howard, Consulting Engineer of the firm of Howard, Needles, Hammond and Bergendoff, Kansas City, delivering the Commencement address.

Dr. Howard is outstanding in the field of civil engineering, and especially in the construction of bridges and viaducts. He is the author of numerous technical publications read before the different engineering societies of the United States, and also the author of two books dealing with various phases of engineering. In 1936, Dr. Howard was one of the United States delegates to the Berlin Congress of the International Association for Bridges and Structural Engineering. Dr. Howard's hobby is ancient engineering practice, and he has chosen for his topic for the Commencement address the subject, "Engineering—The Record of the Past, The Promise of the Future."

The Faculty Committee in charge of the program consists of Professor R. Z. Williams, Chairman, N. Costakos, J. S. Cullison, T. G. Day, W. R. Eikelberger, Col. F. W. Herman and C. J. Monroe.

APO Holds Spring Initiation and Banquet for 11

The annual spring banquet and initiation, commemorating the founding of Beta Omicron chapter here at MSM, was held Thursday, April 15th, at the Parish House. The main speaker of the evening was Dr. Joseph Beasley of Kansas City, director of alumni organization and affairs for the national organization, who spoke on the principles (Leadership-Fellowship-Service) of Alpha Phi Omega. Most of his talk was devoted to developing the many things which go together to make up "Service" in its true sense and which give man satisfaction from helping his fellow men. Short talks were also given by Sidney B. North, National secretary, who gave a summary of the progress of the national organization and what is being accomplished by APO on campuses throughout the nation, and by Dean Wilson, who complemented the men of Beta Omicron on their fine work. The accomplishment of much of this work would not have been possible except for the fine co-operation given by the Dean and the school. Bill Goodwin acted as toastmaster for the evening.

Following the banquet, formal initiation was held for the following men: Bob Barmier, James Bryant, William Casey, Glen Dean, Robert Hein, Kay Ikeuye, Ernest Massard, James Ranes, Robert Roley, Ted Wolfarth and Bill Wilson. The new initiates carried out a short but active program of pledge duties and it is felt that the chapter will gain greatly by the addition of these new men. Rev. Frank L. Rearick, scoutmaster of one of the local scout troops was also initiated as scouting advisor to the chapter.

Jim Doud Elected Prexy of A.I.M.E.

The student chapter of the A. I. M. E. met Wednesday evening, and elected new officers for the coming semester. Jim Doud, a Junior Mt, and a member of Tau Beta Pi and Blue Key was elected President of the chapter. Pete Des Jardins, Junior Geologist and member of Theta Kappa Phi was elected, vice-president. Dick Wampler, Junior Miner was elected treasurer and Sandy Simons, Junior Met was elected secretary. Des Jardins was appointed to head the new refreshments committee, which includes Harry Gilliland and Jesse Bill Wilson.

It was announced that the members of the student chapter are invited to participate in the dinner-meeting of the St. Louis section of the Institute in honor of the annual visit of the Institute's president to the section. The dinner will be held Monday night, May 2 at the Park Plaza Hotel in St. Louis.

(Continued on Page 4)

Campus Questions Answered by Dean

At a mass meeting at 11:00 a. m. last Friday morning in Parker Hall, Dean Wilson cleared up many of the questions that have been prevalent around the campus lately. The assembly, an informal question and answer procedure, was led by the Dean and sponsored by the Student Council. Most of the questions asked were relative to the Army Specialized Program. Following are some of the more important questions, and the answers as given by Dean Wilson:

1. When will this semester close? The semester will close as was planned, on May 25, and finals will begin May 21.

2. Is the Army going to take over the school and when? MSM has been approved by the Army as a school for the Army Specialized Training Program, and suitable for at least 400 trainees. This program will definitely not go into effect until the end of this semester; the exact date for its beginning has not been settled. The Army has desired to move in April 5 or May 5, but necessary arrangements could not be made. If the program goes into effect, it will not be until June 5.

3. Should men enrolled in V-1 or V-7 start the summer semester? Under Navy regulations, a student who has one more term to complete as of July 1 may request deferment from call until graduation. However, only those who will graduate this summer fall under this classification. Unless advice to the contrary is received, it hardly seems wise for V-1 or V-7 men to start the summer session. The Navy plans to call its reserves about July 1.

(Continued on Page 4)

Theta Tau Honors 15 New Members With Banquet

The fifteen pledges of Theta Tau, professional engineering fraternity became active members of that fraternity at their formal initiation last Sunday afternoon.

The new members are Harold Butzer, James Dowd, Carl Finley, James Fraser, Louis Hartcorn, William Hicks, Bob Jamison, Paul Hennekes, Joe Jenkins, Mel Kallmeyer, James McGovern, Jose McClinton, Robert Ray, Jim Snider and "Sandy" Simons.

After the initiation the Theta Tau's adjourned to the Pennant Tavern for a banquet honoring the new members. After a delicious chicken dinner the group was entertained by impromptu talks by "Sandy" Simons and Jim Snider.

The principal speaker of the evening was Professor Carlton of the Civil Engineering department who, because of the many branches of engineering represented, talked upon a subject concerning all engineers. By relating personal experiences he emphasized the fact that too many engineering failures were due to the failure of the engineer to realize that all branches of engineering are inter-dependent each upon the other. Only by a full realization of this fact may the maximum benefit of engineering be utilized.

NOTICE!

The track meet scheduled for tomorrow with the Blytheville Army Air Field team of Blytheville, Ark., has been postponed until Tuesday, April 27, at 4:00 o'clock.

Many Reservists May Remain on Inactive Duty

In its bulletin "Higher Education and National Defense" issued April 15, 1943, the American Council on Education in Washington makes the following statement:

"There is uncertainty in the calling to active duty of men in the Army Enlisted Reserve Corps. Many have not as yet been called for induction and institutions are again urged to encourage men in the reserve corps, including those now beginning a new term, to continue in college until they receive their official notification."

With regard to deferment the American Council on Education gives this information:

"It is impossible to predict future development in Selective Service with certainty, but it is probable that deferments for student in training and preparation will be extended and provide the channel through which potentially necessary men may continue their training in civilian status. It seems likely that a definite decision will be made considerably prior to the expiration of present deferment."

"The Council is making a national survey of the number of students now deferred to continue in training and preparation for essential occupations. On the basis of this information combined with studies of man power shortages in the technical and professional fields, specific recommendations will be made to the War Manpower Commission regarding the continuing of occupational deferment for student in essential fields."

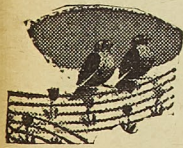

Alpha Chi Sigma Pledges 7 Men

Alpha Chi Sigma, professional chemical fraternity, formally pledged seven men at a meeting Tuesday, April 13. The new pledges are:

William H. Dragoset, Alpha Lambda Tau; Robert A. Denison, transfer from U. of Arkansas; I. Ch. E.; Ken E. Rudert, transfer from Southeast Missouri State Teachers' college, Sigma Pi; A. Fred W. Thiele, transfer from Southeast Missouri State Teachers' college, Sigma Pi; Frank Schofro, Engineer club, A. I. C. E., football squad; Earl M. Shan Kappa Sigma, A. I. Ch. E., football '42-'43; John W. Sjober, transfer from Southeast Missouri State Teachers' college, Tech club.

The organization held its annual spring outing last Saturday at the clay pits where a softball game was played and refreshments were served. The liquid refreshments were financed by the members who comprised the losing side in the recent meeting attendance contest.

Music Club

Johannes Brahms, Edward Mac Dowell, and Gioacchino Rossini are the composers to be represented on this Sunday's Music club program. The program will open with Rossini's Overture to the Silken Ladder played by the B. B. C. Symphony Orchestra under Arturo Toscanini. The major work on the program will be Brahms' Second Piano Concerto in B Flat major played by Vladimir Horowitz and conducted by Toscanini. MacDowell's Indian Suite performed by Howard Barlow and the Columbia Symphony Orchestra will complete the program.

The meeting will be held in the Geology Lecture room in Norwood Hall at 7:30 Sunday evening. As always, everyone is cordially invited to attend.

FIGHTING MINERS

Lieut. Fred Finley—

is one of the American "sappers" who are matching their wits and their lives against the assorted land mines and bobby traps to clear the Tunisian roads of the Allies most troublesome obstacles. They do their job neatly and swiftly. Sometimes the results are astonishing or sad. But on their success depends the progress of fellows in the jeeps and half-tracks.

To neutralize the average mine requires only a twist of the wrist in taking out a certain little pin. Then it can't harm anyone. But they have to figure the angles—it may be a booby trap and one might not find that little pin before the mine goes off.

The detector boys are probably the coolest of all the men on the front. And they have to be. For anyone else the job has a horrible fascination.

The mines laid by the Axis to stop our advancing troops must be buried just under the surface of the ground to be effective. Not everyone knows one mine from another but the sappers do which is fortunate. Some they pick up and pull out the pins, others they don't touch but mark the area as a booby trap.

When in doubt they attach a rope to the mine, get down in the nearest hole; pull and hope. Sometimes the Germans plant a bobby trap so that the convenient

dugout, a handy place to hide to pull the rope, itself explodes.

Sappers and combat engineers lead most of the advance except those that require all out infantry or tank assault.

The week before the Americans took Gafsa, Lieutenant Finley had a crew way out front digging mines only two miles from the town.

Lieutenant Finley graduated from M. S. M. in '41 receiving first honors and a commission as Second Lieutenant in the R. O. T. C. Corps of Engineers. He belonged to numerous organizations on the campus among them: Detonators, Shamrock Club, S. A. M. E., Tau Beta Pi, Phi Kappa Phi, Blue Key, Miner Board and Rollamo Board. He was editor-in-chief of the Miner in '40 and student council representative in '39. He received an "M" award for his services on the rifle team of which he was secretary-treasurer in '39. He also won an award at the Midwest Indoor Camp Perry Match in May '40 and received second award in the R. O. T. C. rifle team for '41. Fred was appointed Cadet Major in the R. O. T. C. battalion in his senior year. After leaving M. S. M. he was stationed at Fort Leonard Wood for a short time before receiving his final training and being sent to the North African front.

War Rations

Customer—"Those sausages you sent me yesterday seem to be meat at one end and bread crumbs at the other."

Butcher—"You're right they were, madam. In these times it's hard to make both ends meat."

As a MINER Sees it

The Student Council, ably led by Tom Brannick came through by arranging the mass meeting Friday. It was a worthy cause, done well and quickly. It cleared the air a lot. We found that most of the rumors that have been flying are true, but exaggerated. The Dean couldn't give us concrete statements on everything but he told us all he knew, and he didn't dodge any issue. It wasn't a dish of soft soap either, he told some of us that our time was up, others that they had a chance of continuing. The most reassuring thing was his statement that the school was for us and that we will not be neglected when the army moves in. To our faculty and student council, we offer the thanks of a grateful student body.

Tuesday night, the evening of ROTC band rehearsal found the library door closed. A note on the door stated bluntly; "Library is open, portal is closed to keep out disturbance." Honest John ain't gonna like that.

Our boy Feinburg has shown up in town. Seems that he quit school last semester to return to Boston for a rare old time before being called to active duty. Well, he got sent right out to Fort Leonard Wood, all the way back to Missouri. Strangely enough he says the army is fine, that he likes the food and is being treated first rate. Whadda ya know?

Another boy from the fort who has been seen around lately is Brackett. He graduated and was then drafted. Saturday night he showed up with some soldier friends at Kap Sig and started one of those parties he made famous during his undergrad years here. The party was fine until the soldiers started passing out. One of them was cold, so he threw a brick through the window of Bob Nichol's locked car, climbed in and went to sleep. These soldiers are really tough guys, but they just couldn't stand up under "Kap Sig style."

Jim Bryant is undergoing appendectomy at the St. James infirmary. The Kappa Alphas are existing on a diet of pills lately. One of their boys came down with meningitis last week and they are taking no chances that he might have "slipped them the bug." You guys look plenty healthy to me, quit worrying. Reminds one of the Tech Club scare.

The Theta Kap beer bust was a successful event. They pledged a new member. It is a hound of extremely doubtful ancestry. They call it "Morsh." An abbreviation of some kind I understand.

The pin boys who keep an eye on the back door of Deen's Eporium are wondering about the large number of "saxophone players" who stroll in every night. Since when have Brannick, Hartcorn, Roemer, Van Os, Goodwin, and Goetemann become so musical?

Our congratulations go to the new Theta Tau men. At the same time we extend the glad hand to Van Os as new regent. Good leadership can make this powerful organization a bulwark in the trying times to come. We think you can do it John.

It seems that a well known Jack who hasn't hit the column for sometime has finally found someone to keep his interest in

Rolla. We sort of expect him to lose his fascination soon and be on the prowl again at the local dives. Until then? ?

The Colonel and his daschund reviewed the regiment on Thursday. That band sounded mighty weak after two hours of blowing. They kept dumping water on the little trumpet player to revive him. Maybe they should distribute marihuana to the musicians before they have another one of these endurance sessions.

The geological field trip had an amusing highlight. Pete Bolanovitch was the cause of a

very embarrassing moment for a certain waitress. He says he was framed, but that didn't help him any when she swung around like a tigress and told him if he did it again he was going to be slapped. For a nominal fee, Huseman will explain his "non-slap technique." Pete, if you intend to try this again, you better learn from "Amazing" Huseman.

Suggestion to APO: pull strings to have mud and standing water removed from the walks on the west side of the campus near Harris Hall. Lets "keep out of the mud," too.

Faculty Members Attend S.P.E.E. Meeting Today

Twenty-one faculty men will leave Rolla this afternoon to attend the annual meeting of the Missouri Section, S. P. E. E. to be held at Washington University today and tomorrow.

There will be an evening dinner at the Forest Park Hotel at which Col. Raymond W. Briggs of the Seventh Service Command, Omaha, Nebraska will discuss the Army Specialist Training program which will soon be under way in Missouri Engineering colleges.

The Saturday morning session will be a general discussion by the faculties of the three Missouri schools, namely Missouri University, Washington University and the School of Mines with Dean Langsdorf of Washington Univer-

sity and Dean Wilson of the School of Mines as the speakers after which a round table discussion will be held by the engineering faculties of the three schools regarding problems and methods in handling the Army Specialist program.

The following is a list of M. S. M. faculty members who are planning to attend this meeting: Dean C. L. Wilson, E. W. Carlton, J. B. Butler, W. P. Hatfield, C. H. Black, D. R. Schooler, W. T. Schrenk, Wm. Alsmeyer, W. J. Jensen, O. R. Grawe, L. E. Leaver, F. H. Frame, I. H. Lovett, T. L. VanderVelde, A. Legsdin, C. F. Boyd, H. F. Wilson, N. Hubbard, R. H. Young, J. M. Willson, and R. M. Rankin.

A motor, riding along downtown one night on his motorcycle, glanced down at the speedometer but found the light was out. "I'll pull over here and stop beneath the street light," he muttered to himself "to see how fast I'm goin'."

Miners Drop First Track Meet to Washington U.

Liddell Leads Miners' Scoring

By HARRY GILLILAND

The Miner track team lost its first dual track meet last Saturday afternoon to the Washington University Bears, 74-56. The two teams, both handicapped by inexperience, appeared to be in good condition for their first meet of the season, and their followers can anticipate better results in the future. The Bears exceeded the Miners in the running events, while the Miners predominated in the field events.

Walter Liddell, junior track star for MSM, was the outstanding athlete on the field. Walt was a participant in six different events, taking first place in the pole vault, second place in the 120-yard high hurdles, and third place in the javelin. Walt had not thrown the javelin this season until the meet, and then took third place. Other Miners who were outstanding were: Doerres, who took first with the javelin; Rankin, first in the high jump; Jett, although handicapped by a bad knee, took first in the broad jump; Carlton, first in the 440-yard dash; Prange, first in the discus; and King, who ran a close second in the mile. For Washington, Hughes, Gonterman, McGoon, Spier, Schwenk, Mueller and Govlias were outstanding.

RESUME OF EVENTS

100-Yard Dash
McGoon, (W); Mitchell, (R); Lake, (W). Time—10.5 seconds.

220-Yard Dash
Mueller, (W); Lake, (W); Mitchell, (R). Time—23.7 seconds.

440-Yard Dash
Carlton, (R); Conner, (W); Greiner, (W). Time—52.3 seconds.

880-Yard Dash
Schwenk, (W); Haffner, (W); Speer, (W). Time—2.06 minutes.

220 Low Hurdles
Gonterman, (W); Sheppard, (W); Boles, (W). Time—25.7 seconds.

120 High Hurdles
Gonterman, (W); Liddell, (R);

Boles, (W). Time—16.4 seconds.

Mile
Spier, (W); King, (R); Webers, (R). Time—4:44 minutes.

2 Mile
Hughes, (W); King, (R); Webers, (R). Time—10:56 minutes.

1 Mile Relay
Washington, (Connor, Greiner, Schwenk, Gonterman); Rolla, (Bush, Carlton, Blase, Wilms). Time—3:34.6 minutes.

Broad Jump
Jett, (R); Liddell, (R); Sullivan, (R). Distance—21 feet, 2 inches.

High Jump
Rankin, (R); tie for second, Fuchs, (R), and Huseman, (W). Height—5 feet, 7 inches.

Pole Vault
Liddell, (R); Schewe, (W). Height—10 feet, 9 inches.

Javelin
Doerres, (R); Prange, (R); Liddell, (R). Distance—152 feet, 10 inches.

Shot Put
Govlias, (W); Fuchs, (W); Moore, (R). Distance—40 feet, 6 inches.

Discus
Prange, (R); Eastridge, (W); Leone, (R). Distance—117 feet, 11 inches.

Softball Heads Intramural Sports

Softball has gotten away to a good start this year with the Juniors defeating the Frosh team, 6 to 0. Monday evening, the Seniors defeated the Sophomores, 10 to 7, as a result of a last minute splurge. Tuesday, Kappa Sigs came out victorious in a well played match against Sigma Nu, 5 to 2. The schedule for the following week in softball is:

April 23, afternoon, Sigma Pi vs. Pi K A; evening, Frosh vs. Theta Kaps.

April 26, afternoon, Sophs. vs. Kappa Sig; evening, Seniors vs. Sigma Nu.

April 27, evening, Seniors vs. Triangles.

April 28, afternoon, Juniors vs. Sigma Pi; evening, Sophs vs. Lambda Chi.

Miner Tracksters Meet Army Team Next Tuesday

By MORRIS SIEVERT

Tuesday afternoon beginning at 4 o'clock, the Miner tracksters will meet a track team representing the Blytheville Army Air Field from Blytheville, Arkansas, at Jackling Field. The team as picked by the post athletic director is composed of officers and enlisted men, most of whom are former high school and college stars.

One of the outstanding members of the team from Arkansas is Capt. Martin B. Biles, who will throw the javelin. He will probably have very little close competition in this event, for he was national champion javelin artist in 1937 and 1938 while he was attending the University of California.

Another outstanding member of the squad is Lt. D. W. Jenkins, former ALL-AMERICAN center from the University of Missouri in 1941, who is entered in the shot put. He is expected to give the Miners' stiff competition.

Another promising candidate for meet honors on the Arkansas team is Lt. William Gallogly. He was former quarterback on the New York Bears' professional football team in 1941. Previously for three years he called signals in the backfield of the strong Holy Cross eleven. He threw the discus, shot and javelin while attending school and he will be entered in the same events here.

Looking over the Miner's track possibilities for the meet, it seems almost inevitable that the Arkansas team will sweep the weight events. However, since little was said about the dash and distance men on the visiting team, and judging from the results of the track meet with Washington last Saturday, the Miners should more than make up for their shortage of points in the weight departments.

Walt Liddell who did so outstandingly well in competing in six different events and placing in five of them will probably lead the Miners in their point getting efforts again. Walt is probably the first athlete in the track history at MSM to compete in as many as six events in one meet and place in almost everyone.

Ind. Board of Control Donates \$5 to Fire Fund

The Independent Board of Control held a short meeting in the Old Chem building on April 21, at 6:45 p.m. At this meeting the

GOLF

The Intramural Golf tournament is to be a two day meet, on Saturday and Sunday, May 15 and 16. Four men will represent each organization with the matches played in foursomes. The tournament is to consist of a 27 hole medley. The winning organization is to receive a trophy, and medals will be given to the two lowest scores of the second place team. The lowest individual score is to receive three new golf balls as an award. Scores are to be handed to "Hafe" immediately after the match. The schedule for this meet is:

Saturday afternoon, May 15, Kappa Alpha vs. Kappa Sig; Seniors vs. Triangles; Theta Kaps vs. Pi K A.

Sunday afternoon, May 16, Juniors vs. Sigma Nu; Frosh vs. Lambda Chi; Sophs vs. Sigma Pi.

Fontbonne Girls Entertain Miners

Four Miners attended the recent meeting of the College Section of the Missouri Academy of Science, held last weekend at Fontbonne College, a Catholic girls school in St. Louis.

The program Friday night consisted of a thesis on dancing, not read in conventional style, but presented on the stage in a professional manner. The dances, including both solo and group numbers, were drawn from the folk-dances of the world, even including the folk-dance of the adolescent-jitterbugging. Saturday morning eleven papers were presented on such varied subjects as The Tools of Quantitative Analysis, Railroad Development, Vitamines, and War Diseases. Following the papers was an excellent luncheon for the eight men and forty girls present at the meeting.

The Miners, delegates from the local chapter of the Academy, were Ted Wolfarth, Walter Weber, who presented the paper on railroads, Woody McPheeters, and Wilbert Stoecker, local chapter president, now also secretary of the College Section of the State Academy. Dr. C. V. Mann at-

tended in the capacity of sponsor. Representatives were present from Moberly Junior College; Lindenwood College, St. Charles; Maryville College, St. Louis; William Woods, Fulton and Fontbonne College.

CAMPUS QUESTIONS— (Continued from Page 1)

4. How will the Army men be housed? Present plans are to take over the fraternity houses for sleeping room; the men will all eat at one place, possibly in one of the garages. However, before the fraternities can be taken over, the school must draw up contracts with them. Present plans are that the three eating clubs will not be taken.

5. How about deferments? The school will do its best to secure deferments for its students. All students in good standing who are at least second semester freshmen should be able to get deferments. According to one of the late Occupational Bulletins, Engineering students are to be deferred.

6. What is talk about a 12-week term even after this summer? The Army Program is arranged in 12-week terms; so it is possible that, in order to have smooth schedules, if the Army starts concurrently with us for the summer semester, we may continue that length of

semester. In other words, the school may switch to quarterly sessions; this question is up to the faculty. The Army Program is for three terms of 12 weeks each, of Basic Engineering; practically all the subjects are those that we teach, so little adjustment would have to be made. If 12-week semesters are adopted, the January '44 graduates will still get to graduate on time.

Legislative Group Inspects Campus

A subcommittee of the Appropriations Committee of the House of Representatives, composed of six members, visited the campus of the School of Mines and Metallurgy on April 16 to inspect the Power Plant. The School of Mines appropriations are being considered and this committee decided to visit the Power Plant before making their recommendations. The governor has recommended a reappropriation of the \$250,000 appropriations made for a new Power Plant last year and not constructed because of the impossibility of securing the necessary priorities.

The subcommittee was under the chairmanship of Mrs. Lulu White Burns of St. Clair county, the other members being D. C. Hickman of Phelps county, J. C. Woodsmall of Scotland county, Melvin E. Fish of Putman county, Walter Whinrey of Lawrence county and Harry T. Limerick, Jr. of Boone county.

The committee was shown through the Power Plant by Dean Curtis L. Wilson, Howard M. Katz and Dr. A. J. Miles.

Beckman Speaks To Civils on Water Resources

Mr. H. C. Beckman, Regional Engineer of the United States Geological Survey, Water Resources Division, spoke before a meeting of the Student Chapter of the Am. Soc. C. E. Tuesday evening at 7:00 on the subject "Water Resources Investigations."

The speaker stated that to the casual observer the investigation of the available water supply seems very insignificant and unimportant. However, that is not the case inasmuch as the location of factories, cities, military installations, and power dams depends upon the degree of ease with which an adequate water supply is obtainable.

The location of Fort Leonard Wood was dependent upon a good water supply. The original plans called for the building of the fort in southern Iowa. However, upon investigation the amount of water available was found to be much less than the anticipated needs of the post. The site on the Big Piney was finally selected because of the availability of plentiful supplies of good water.

Data on the flow of rivers is used in planning power and flood control developments, in estimating available water supply, in solution of the stream pollution problem, by soil conservation and irrigation agencies, and by the bridge departments of various states.

Bagnell Dam on the Osage river and the dam at Forsyth on the White river forming Lake Taneycoma, both power developments, could never have been built had not a record of the flow of these streams been made over a long period of years. Data is also available on the amount, kind, and depth of ground water anywhere in Missouri to depths of 2000 feet.

Mr. Beckman had on hand a number of stream gauging devices, pictures, maps, and charts which were shown to the audience. He answered questions from the listeners and explained the instruments and their actions. The talk was well received.

The election of officers for the coming semester will be held on next Tuesday evening, April 27. The time and place of the annual spring outing will also be selected at that time.

Memorial Plaque to Go Over Fountain in Gym

President Don Smith presided over a short "M" Club meeting which was held last Thursday evening, April 15, in the club room in the Met. building. The main purpose of this meeting was to make final plans for the outing which was held last Friday evening.

It was also announced that the plaque for deceased member, Bill Waring, would be bought next week. It is going to be a rectangular wooden plaque with a metal center. It is planned to hang the plaque over the drinking fountain in the gym.

A. I. M. E.—
(Continued from Page 1)

It was decided that the chapter is to hold a spring outing, refreshments to include beer, sometime in the near future. The date is as yet undecided. All Miners, Petroleumists, Geologists, and Metals are invited at fifty cents each, whether or not they belong to the chapter.

Professor Hanley addressed the meeting on the use of Secondary Metals. After Prof. Hanley's talk the meeting adjourned to the usual eats.

**ASK THE SOLDIER
IN THE SOUTH PACIFIC**

"BOY, THE HEAT AND WORK DOWN
HERE ARE SOMETHIN', AREN'T THEY?"

"WHAT LUCK... COKE! IT'S GOOD
FOR THE OLD
MORALE."

"That's based on a real letter. 'Gimme a Coca-Cola' is the watchword for refreshment with every branch of the service. It's the soldier's buy-word wherever they gather... and they get together where they can get Coca-Cola. Distinctive, delicious taste. Quality you can count on. Thirst-satisfaction plus refreshment. Any way you look at it,—the only thing like Coca-Cola is Coca-Cola, itself."
