THE MISSOURI MINER

Missouri School of  Mines & Metallurgy

VOLUME 32

ROLLA, MO., TUESDAY, MAY 14, 1946

NUMBER 31

MINER Poll Indicates Majority Of Voters Favor New Time System

A total of 201 ballots were cast in the Miner's latest student opinion poll, with 120 in favor of moving summer classes from 8:00 a. m. to 7:00 a. m. and continuing that way through the day, and 81 of those who voted were against the change. The Student

Council has not submitted a petition to the faculty yet, and if they submit their plan in time for it to become effective before the summer term begins, a special faculty meeting must be called by Dean Wilson.

The Governor of Missouri has decreed that all state departments must be operated on Central Standard Time, but this does not interfere with the Student Council's plan. There was a considerable amount of confusion about the Council's proposed time system as to whether it should be called Daylight Saving Time or not. Although the Miner did not say the school clocks would be changed, many students had the impression it did. In order for the new hour earlier time system to pass the faculty, it cannot be called Daylight Saving Time.

Some of our engineers signed their ballots, evidently feeling they wanted it to be known they were for or against the proposed change. From the 81 ballots against the change, John Abbott, Wm. Cole, R. F. Nuelhaus, Jack Leahy, Alberto Olivarez, Robert Morlock, Walter Mathews, and Austin Clayton, signed their ballots. Among the 120 for the change were J. Neely, J. Mundy, Russel Stumpe, Harry Cunningham, W. McPheeters, and K. W. Vaughan who turned in the only typewritten ballot.

Some ballots had long written opinions included, while others had statements of "damned right." One student went to the extreme of making his own special ballot and voted, "For setting it back one hour."

A.S.C.E. Members Hold Picnic Thurs.

The Student Chapter of A.S.C.E. had a picnic at Buehler Park Thursday evening, May 9, 1946. Weiners, buns and all the trimmings were prepared by cooks A. Kram, Paul Kram, and Irvin Robbins. About sixty persons including members, their wives, and girl friends were present. The faculty was represented by Professors Butler, Gevecker, Bremer and Carlton.

Some of the group played baseball after which the whole group ate and sat around a big fire and sang songs with Bob Mann accompanying on his guitar. In spite of the rain everyone seemed to have a good time and they hope to repeat with more frolics again in the fall.

Steamboat Excursion Scheduled This Summer

The St. Pat's Board of Missouri School of Mines is planning to sponsor an excursion on the Admiral, a steamboat, early in July. The excursion will start from St. Louis and proceed up the Mississippi River. The exact date will be announced on the first of June. Tickets will go on sale at that time.

State M. A. of S. Meet to be Held Here Next Fall

The Missouri Mines Chapter of the College Section of the Missouri Academy of Science has begun to make plans for the state wide meeting of that organization which will be held at MSM next fall. This meeting will be held in conjunction with the adult society of the Missouri Academy of Science which is being held previous to and during Engineers-Parents Day next November second. The College Section is planning several scientific exhibits and a number of reports for this meeting. Although plans are still in infancy, the MSM chapter expects this meeting to be an excellent affair.

The gold keys which the MSM Chapter has adopted as their official insignia have been ordered and delivery to the members has been set for sometime during the latter part of the summer. Due to lack of members the chapter will be dormant for the summer semester but plans for a bigger and better organization are underway for next fall.

R. O. T. C. Plans For Expansion On M.S.M. Campus

The Military Dept. has been making plans for an increase in the enrollment in both the Basic and Advanced course R.O.T.C. program at M. S. M. Due to the increased enrollments for the fall semester, the Military Dept., has been in the process of reorganization and rearrangement. The offices were changed earlier in the semester, and more recently, space has been provided for the storage of new military equipment which is already assigned to this school. There are no military courses given during the summer school session.

The basic course R.O.T.C. is taken by all non-veterans, physically qualified, students on the campus. This course consists of four semesters of basic military subjects.

The advanced course R.O.T.C. is an elective course good for three hours credit. This course is open to all students who have completed the basic course R.O.T.C. as prescribed in War Dept. circulars, or those veterans, who have been Honorably Discharged from the various branches of service, after serving a minimum of 12 months active duty. Ex-officers are not eligible. Qualified students will receive sixty six cents per day monetary allowance in lieu of subsistence. An officer's type uniform complete with field overcoat and shoes will be given to each candidate. Advanced course students are required to spend one six week period in an advanced summer camp, before receiving his commission.

Formally enrolled students in (See "R.O.T.C. PLANS")

Legislature Cuts M. S. M. \$600,000 Short

Under the terms of a bill introduced in the House of Representatives on May 8, the University of Missouri would receive a total of \$2,642,975 of this sum, the University of Missouri at Columbia would receive \$2,249,075 (nearly \$4,000,000 less than was requested), while the School of Mines would be provided with \$393,900 (more than \$600,000 less than was requested). The M. S. M. allocations from the general revenue fund would include: personal service \$260,000; additions \$22,900; repairs, replacements, etc. \$92,500; special program of instruction \$12,500; grand total \$387,900. In addition, special funds from the State Treasury would provide \$6,000 for personal services and operation.

Dean Curtis L. Wilson, President Frederick A. Middlebush, and University of Missouri Board of Curators appeared before the Missouri State Legislature last night to appeal for a greater consideration regarding the budget allotted to M. S. M. It is hoped that they were successful in securing an increase in the allotment for our school.

President Middlebush, Vice-President Leslie Cowan, and the entire nine-man Board of Curators met with Dean Wilson at M. S. M. last Friday and Saturday to discuss further plans for the school. Although the details of the meeting have not been disclosed, it is generally presumed that school finances for the coming year was one of the important topics on the calendar for discussion. Other topics probably considered were the school's veteran program and the housing program recently started here with the cooperation of the Federal Public Housing Authority. It was announced that a large number of housing units designed to house veteran students, have been awarded to M. S. M. and plans are already in progress for their construction north of Jackling gymnasium.

R. O. T. C. Band to Present Free Spring Concert Wed. Night in Auditorium

The Missouri School of Mines R.O.T.C. Military Band, under the direction of Mr. Jno. W. Scott, will give a concert Wednesday evening, May 15, at 8:15 p.m. at Parker Hall Auditorium.

The program will be as follows: College Tunes: Main, Texas, Wisconsin, St. Louis U., and M.S.M.

"Sorella," by Ch. Borel-Cherec; Bass solo "Beezebug," by Catozzi; Overture; "Stradella," by Flowtow; "Flight of the Birds," by Rice; Trombone solo: "Romance," by Rubenstein; Hungarian Dance No. 5, by Brahms; March: "His Honor," by Fillmore; "The Star Spangled Banner."

The bass solo, "Beezebug," will be played by Mr. L. L. Steele, on the largest saxophone made. Mr. Scott, director of the band, also an accomplished musician, will be the trombone soloist on Rubenstein's "Romance."

No admission will be charged, as the concert is being given purely as an entertainment feature to show the accomplishments of the R.O.T.C. Band. The people of Rolla, as well as students, are invited to attend.

CVA Men Discuss Housing With Pres. Middlebush

Friday afternoon, May 10, a committee from the Campus Veterans Association met with President Middlebush to discuss the housing program at Rolla and

Co. Delegates To Interview Men on Campus

Representatives from the following companies will be here for interviews:

Mr. Fitzgerald of the ATLANTIC REFINING COMPANY will be here on May 15th to interview May and August graduates. He placed particular emphasis on seeing Chemical and Electrical Engineers, Geologists, and others who are interested in the production end of the petroleum industry. An appointment may be made in the Registrar's Office.

Mr. Schneeberger from WESTINGHOUSE will be on the campus, May 15th, to interview the Electrical and Mechanical Engineers who will graduate in May or August. Appointments can be made in the Registrar's Office if interested.

Graduating seniors interested in work with the U. S. Engineers out of Kansas City may interview Engineers on Tuesday, May 14. See Mrs. Berry in the Registrar's Office for details.

Mr. Van Arman of the U. S. Engineers out of Kansas City is coming to Rolla on May 14 to interview under graduate students interested in summer work. All students so interested are asked to be in the auditorium promptly at 8:50 a.m. on Tuesday, May 14th. Mr. Van Arman will explain his proposition and those interested in further consideration will then be given a chance to talk with him personally. This meeting will end in time for 9:00 classes.

University Dames Plan for Future

The Chapter of University Dames here met May 9th in the Metallurgy Building. Plans were made for the contacting of new students wives as they arrive, in order to divide the group into councils composed to those interested in special activities. Plans were made to hold a picnic in the early part of next semester.

Plans for the picnic included the invitation of all husbands, and a unanimous vote for Meramec Springs as the site for the picnic.

Activity groups are in the making for the purpose of overall acquaintance within the organization. These will probably be divided as to those interested in sports, dramatics, bridge, sewing, music, and literature of various kinds.

Committees were selected; one to plan the contacting of new students wives, and another for the purpose of selecting a "homier" atmosphere than the bare walls of the Met. Building for future meetings and social gatherings.

learn what accommodations will be made for MSM. They also wanted to ascertain how many temporary housing facilities would be ready by September and how much work would be done on the completed project.

President Middlebush's answers to these questions were often lengthy and generally evasive. Two hundred units to accommodate both single and married students are on the way here immediately and will be ready for occupation by September. No figures were given as to how much housing has been planned, nor when further units will arrive.

The CVA was asked by President Middlebush to send a committee to Jefferson City when the housing appropriation bill comes before the State Legislature.

Two bills are now being drawn up in a Senate Committee at Washington, of which Senator Donnell of Missouri is a member, concerning this problem. It is clear that if M.S.M. is to receive aid, the bulk of it will have to come from the Federal Government. Units at Fort Leonard Wood are available in this immediate area.

Tonight the CVA is offering everyone the opportunity to help work out a highly important problem; one with which the Miners are all concerned. Remember: Room 103, Old Chem. Building, 7:30 tonight.

Boy Scout Frat. Invites New Men

The Beta Omicron Chapter of Alpha Phi Omega Fraternity will meet this Thursday evening, May 16 at 7:30 p. m. in room 10 of the Power Plant Building. This meeting will be very important and all members and pledges are urged to attend. Anyone who is interested in this national service fraternity is also urged to be at this meeting.

The purpose of Alpha Phi Omega is to assemble college men in the fellowship of the Scout Oath and Law, to develop friendship and to promote service to humanity. There are only two requirements for membership. Applicant must have had previous experience in the scout movement and he must have an earnest desire to render service to others.

M. S. M. Faculty Members Speak At High Schools

Dean Wilson tops the list of MSM faculty members who, in response to requests from high school officials for commencement day speakers, will take part in such activities at high schools in this section of Missouri, this month. Dean Wilson will speak at Newburg, Union, Owensville, and Potosi; Dr. Paul G. Herold at Somerville and Jackson; and Prof. E. W. Carlton at Myrtle, Mo.

The large number of requests for commencement addresses by the faculty of this school is a pleasing reflection upon the reputation and prestige of the school and its components, and is an indication of the growing education-consciousness of the people of Missouri.

THE MISSOURI MINER

THE MISSOURI MINER is the official publication of the students of the Missouri School of Mines and Metallurgy. It is published at Rolla, Mo., every Tuesday during the school year. Entered as second class matter February 8, 1945 at the Post Office at Rolla, Mo., under the Act of March 3, 1879.

Subscription Price 75c per semester. Single Copy 5c.

A Little Action Miners

Tuesday night, May 14, at 7:00 p. m., the C. V. A. will give every student at M. S. M. a chance to do something for M. S. M. There is prevalent this week a bill before the Missouri Legislature to provide the Rolla division of Missouri University with a dormitory.

Tuesday night at 7:00 p. m., the C. V. A. will supply a pen and postcard to any and every student interested in the future of M. S. M. so that he may write his state Senators urging an immediate passage of the dormitory appropriation. The pens and cards will be distributed in room 103, Chemical Bldg. Last night Dean Curtis L. Wilson and President Middlebush were at the state capital pleading the dorm bill and other appropriations to the Legislature.

Last Friday afternoon President Middlebush interrupted the Board of Curators meeting to talk with a progressive group of the C. V. A. to assure them that the Curators were doing as much as they could toward federal and state housing relief. Though the President's answers were a little vague he helped greatly to enlighten the vets on just what the school officials were doing about the housing shortage concerning both married and single students.

The Curators are doing all they can at present for the student at M. S. M. on the housing situation. The C. V. A. is doing their best and now the students must do their part by writing their state Senators tonight.

Who says that Mother Nature
Failed to do her bit?
She never made a guy or gal
With lips that didn't fit.

Mertz: "I know the secret of
popularity."
Poteet: "So do I, but my mother
says I mustn't."

A young man's biggest problem
is to find a girl attractive enough
to please him and dumb enough
to marry him.

A woman gets more beautiful
with each cocktail—that her es-
cort drinks.

LETTERS TO
THE EDITOR...

Gentlemen:

I wish to point out a few pertinent facts overlooked by your staff in regard to your editorial published in the May 7, 1946 issue of the MINER, "Daylight Saving Time at M. S. M."

1. The petition sent in by the student council requested that the first class start at seven a. m. with NO mention of daylight saving time.

2. Due to your faculty reading of the petition you have set up a series of arguments which do not pertain to the situation, and has created misunderstanding and confusion in the minds of the students.

3. By the results of your impartial poll the student council has proven itself to be representative of the student body. HAS THE MINER?

L. F. Burnett

To The Editor:

Congratulations to the MINER for doing it again! Not only in an article regarding the Easter vacation petition did it misconstrue the facts about the Student Council proceedings, but it has also confused the issue concerning the Council's proposed petition to the faculty for the boosting of the regular school schedule one hour ahead of the previous semester. The Student Council is NOT advocating daylight saving time as reported by the MINER. It is presenting a plan to the faculty to advance the schedule of classes ahead one hour for the summer semester only. This is not daylight saving time, but a plan whereby the advantages of utilizing the best part of a summer day are gained, and the disadvantages of time confusion are eliminated. Cape Girardeau has had such a plan for the past two summers, and it has certainly proved its worthiness there. Any student who has been through summer school here in the past (which the author of last week's editorial has obviously missed) can readily see the advantages of such a change. Maybe the said author

would rather do his studying in the hottest part of the day instead of taking advantage of the comparative morning coolness.

I sincerely doubt that the Student Council was thinking of their own select few when they passed such a motion. The plan was discussed pro and con, and it was finally decided (with, incidentally, the largest attendance at a meeting this year) that such a plan would be a definite benefit to summer semester students.

In conclusion, I might add that students are invited as spectators to all Student Council meetings, and I would suggest that those who truly have an interest in student affairs at MSM attend these meetings. I believe that before a poll of general student opinion can be fairly taken it is imperative that the issue be clear, distinct and NOT misconstrued to the student body.

JACK ROTHER
Ex-President
Student Council

Miners Lose Final Track Meet As Cape Wins M. I. A. A. Crown

By Dean Daniels

The Missouri School of Mines track and field team suffered its initial defeat in the final track meet of the season Saturday afternoon in Cape Girardeau, as the Cape Girardeau Indians won the M. I. A. A. conference title to remain the conference track and field champions. The meet, held during a cold and dismal Saturday morning and afternoon, found only four of the six M. I. A. A. schools competing. The final total score was Cape Girardeau, 95; Miners, 73; Springfield, 51½, and Warrensburg, 16½.

Led by Launius, Williams and Reid, the Cape trackmen jumped to an early lead during the morning field events and were never threatened during the rest of the meet. Lee Reid, who broke the local track 220 yard dash record here in April, took first place honors in the 220 and 440 yard events, and finished second in the 100 yard dash. Lee also anchored the winning Cape 880 yard relay team. Launius took first in the low hurdles and the high jump, and he also ran in the 880 relay. Williams captured first in the shot and accumulated points in the broad jump, pole vault, low hurdles, high jump and the 880 relay.

Johnny Garcia, Springfield sprinter, was high point man in

the meet scoring a total of 19 markers. Garcia took first place honors on the broad jump and the 100 yard dash. He finished second in the low hurdles and the 220 yard dash. He also ran on the Bear's 880 relay team.

King Wins Mile and Two Mile

Walt Lidell, stalwart Miner performer, was high point man for the local team with a total of 12½. Walt took seconds in the broad jump, high hurdles, and pole vault, and fourth in the javelin. Johnny King showed the slim crowd his skill as he won both the mile and two mile run in easy fashion. The times were 4:41.2 and 10:40.6 on the wet track. The Miner's mile relay team composed of Bill Weismantel, Paul Carlton, Cliff Turner, and Red Clayton, captured the first spot in the final event of the afternoon.

A brief review of the past two months shows one of the best M. S. M. track seasons in many years. Coach Gale Bullman and his team had the pleasure of winning four straight meets during April and May. Outstanding performers, such as Johnny King, Walt Lidell and Red Clayton, plus all the rest of the team, has helped to bring varsity sport spirit back to the school.

INTRAMURAL Sports

Sigma Pi Vs. Vets In Softball Final

By Gene Tyrer

The 1946 Intramural softball season will be brought to a close today with the championship game scheduled to be played at 4 p. m. Sigma Pi will vie for the title with the Veterans Association furnishing the opposition.

The field was narrowed down to the two teams yesterday, May 13, when Sigma Pi met and defeated the Engineers Club by a score of 2-1. The game was a good pitchers battle with every run being of the unearned caliber and breaks playing a deciding role in the outcome. Bogantes of the winners drew a life in the opening inning when he advanced to first on an error. A moment later, Mel Hagen tripled to left to drive him across.

In the fourth, Frank Hequem-bourg, the Sigma Pi pitcher walked to open the inning, was sacrificed to second, stole third, and counted on a bad throw to third base.

Rother of the Engineers Club got to first on an error in the last half of the fourth inning. He was moved up on a walk to the next batter, and then rode home when third-baseman Bogantes made a wild throw.

The Sigma Pi victory assured Sigma Nu of the intramural championship regardless of the outcome of the softball final.

Other games last week found the Veterans defeating Sigma Pi on Monday, May 6, by a score of 4-2

Frank Schofro To Compete In Ozark A. A. U. Lifts

Frank Schofro will represent the Missouri School of Mines and Metallurgy at the Ninth Annual Ozark A.A.U. Weightlifting Championship to be held at the Boys Club of St. Louis, 10th and Lafayette Avenues, St. Louis, Missouri, this coming Friday night, May 17, at 7:30.

The championships will be determined by the regulation Olympic Lifts consisting of the Two-Arms Press, the Two-Arms Snatch, and the Two Arms Clean and Jerk. Competition will be in the following weight classes: 112-118-126-132-148-165-181 and Heavyweight. Regulation Ozark A.A.U. medals consisting of gold will go to the first-place man. There will be acts of muscle-control and various stunts of the strong-man variety.

Frank Schofro at the recent intramural wrestling and boxing championships pressed 300 pounds, snatched 270 pounds and cleaned and jerked 320 pounds for an 890 total. The present records of the Ozark A.A.U. district are 275 pounds in the press, 260 pounds in snatch, and 310 pounds in the clean and jerk.

The Ozark A.A.U. Weightlifting Committee has extended a cordial invitation to all Miners, their relatives and friends to come to the Boys Club on Friday night at 7:30 p. m. for the commencement of the contests. Admission is free.

In eight innings, Sigma Nu defeated Kappa Sigma, 2-1 on May 7 and the Engineers Club won from Kappa Alpha 7-6 also on Tuesday. The Engineers Club defeated Sigma Nu on May 9 on a score of 4-1 to complete the week's activities.

Netmen Win MIAA Tennis Tournament

Mathuramuthoo Subramanyam and Fred Canning returned to Rolla yesterday morning with all the honors in the annual MIAA conference tennis tournament held in Cape Girardeau Saturday. Playing in cold, rainy weather, the Miner netters displayed their skills to the few brave fans who weathered the day to watch the matches. Because of the poor playing conditions Saturday, the boys will play for the singles championship here in Rolla Wednesday afternoon at 4:45. The championship match will take place on the east tennis courts.

On the preliminary single matches last Saturday, Hicklin and Moran. Cape standard bearers, proved far superior to their Springfield opponents, Cheek and Scolfield, and eliminated them in the opening matches of the morning. Hicklin defeated Cheek by 6-0 and 6-3 scores, while Moran passed Scolfield 6-2 and 6-1.

Advancing to the semi-final rounds, both Cape men won the first sets by 6-4 scores from Canning and Subramanyam. The Miners drew byes in the opening round. After losing the first set, the Miners settled down to defeat their opponents in easy fashion. The scores were as follows: Canning over Moran, 4-6, 6-2, 6-1 (and Subramanyam over Hicklin, 4-6, 6-1, 6-3).

The opening round of the double matches in the afternoon found Cape matched against the Miners. Canning and Subramanyam needed three sets to turn back Hicklin and Moran by 10-8, 4-6, 6-3 scores. The Miners then easily defeated the Springfield entry of Scolfield and Cheek, 6-0, 6-3.

Theta Kappa Phi

Mu Chapter of Theta Kappa Phi Fraternity will hold their spring formal this coming Saturday night, May 18, at the Mu Chapter house. The time for the dance has been set from ten until two with Charlie Faulkner's Band supplying the music for the occasion. The boys from Theta Kap cordially invite all Miners with dates to attend this semi-formal affair.

Kappa Alpha

The Beta Alpha Chapter of Kap-

pa Alpha held a ranch party last Saturday, May 11, in honor of their 1946 spring pledge class. The party was held on D. L. Moodie's farm, which is located in the vicinity of the Gasconade. Mr. Moodie, who is Alumni Secretary for Missouri School of Mines, is also an alumnus of Beta Alpha Chapter. The party was well attended by members and pledges and a number of dates were present.

Pi Kappa Alpha

The Pi Kappa Alpha house was ablaze with merriment Saturday night as the boys from the "house on the hi-way" held their spring dance.

Chuck Faulkner's band provided the music until two A.M., while miners and their formally attired danced, laughed, and sipped of the

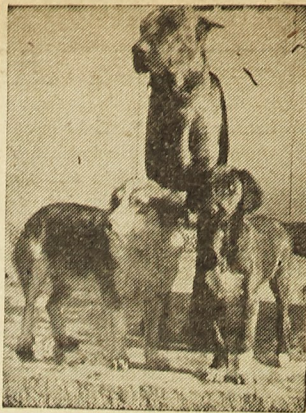

refreshments. Popularity of the event was demonstrated by the fact that dates came from all over the state, representing four colleges; Drury, Lindenwood, Missouri U., and Washington U.

Guests of the house for the week-end were: Peggy Stevens, Rolla, Mo., Shirley Carpenter, Eleanor Potete, Loan Thornhill, Ruth Bringer, Audrey Gaines, Mary Raidt, Ruth Mertz, St. Louis, Mo., Joan Moeller, Francis Porter, Gerry Davis, Pat Denton, Springfield, Mo.

Blue Key Luncheon

Blue key, honorary fraternity, will hold a luncheon this Tuesday noon at 12 o'clock in the Pennant dining-room. The president urges all members to be present.

Dog's Heaven

Three of the cagiest canines on the campus. Meet curs Olaff, Marc and Homer—part of the Lambda Chi collection.

Well friends, this the last social column of the semester, and I can frankly say that I am very glad that it is. It is really quite a job to assemble enough dirt to make the damn thing up, and I feel that you all should be very thankful that you are not hitched to the job. Even if the material is sufficient, our dear editor-in-chief would cut it out, as he is certain to do this. (Phooey to you, Cecil!)

Now for a bit of poetry donated by one of our fair coeds:

My dearest darling—
After careful consideration
And much deliberation
It is my inclination
To be your relation.
So if you will meet me at the station

With the preacher's cooperation
We will form a congregation
That will increase the population.
Yours in desperation,
Temptation?

It seems that Nat Sewell, of Tucker's Towers, who thought that he was the O.A.O. of Colonel Helen, has found that the truth is bitter, indeed, and has destroyed his picture of her. For shame, Bogart, didn't you know about the thriving little romance that you (and a case of poison ivy) have broken up?

And then there is the sad story of the wild man from Texas, Fred Springer, who's girl sends love letters to his roommate.

We wish to extend sincere congratulations to Messrs. Bob Doelling, and Ray Pickett, of Sigma Nu, who have succeeded in planting their White Stars on the fair bosoms of Bev Boorman, and Betty Miner, respectively.

The Impertinent Miner

"WIFE OF MONTE CRISTO"

and

Roy Rogers in

"SONG OF ARIZONA"

IT'S ALL DONE
WITH CALORIES
(via the dipper)

There's been an endless parade of mechanisms to eject ice cream from dipper.

But somebody noodled... "Why not make a dipper with no moving parts?" Make it so that calories of heat from the user's hand shoot right down the handle to the cup. Then the ice cream will drop out easily.

That called for a material that transfers heat fast. So the dipper was made of Alcoa Aluminum, and the hollow handle filled with liquid. And, by golly, it worked... perfectly. The dipper sells.

No "Einstein" at work here... just plain

American ingenuity of the kind graduated every year from our colleges and universities. Imagination plus engineering... or "Imagineering" as we like to call it at Alcoa... did the trick.

This is just one example of invention and adaptation of things aluminum... of men with ideas working them out in this versatile metal. Men who do this often draw upon the greatest fund of aluminum knowledge in the world... Alcoa's. ALUMINUM COMPANY OF AMERICA, Gulf Building, Pittsburgh 19, Pennsylvania.
