# Message from the BITS 2022 Workshop Co-Chairs

## SMARTCOMP 2022

It is our great pleasure to welcome you to the *6th IEEE International Workshop on Big Data and IoT Security in Smart Computing* (BITS 2022) co-located with the 8th IEEE International Conference on Smart Computing (SMARTCOMP 2022). This year, the BITS 2022 is held as a hybrid event due to uncertainties associated with the pandemic.

Smart computing aiming to improve human quality of life and experience represents the next wave of computing. Key technologies contributing to the realization of smart and connected communities include sensing, IoT, mobile and pervasive computing, cyber-physical-social systems, big data, machine learning, data analytics, social and cognitive computing. Smart computing helps solve a wide variety of societal challenges related to transportation, energy, healthcare, finance, disaster management, and so on. At the core of these systems, critical issues are security, privacy, reliability, resiliency, robustness, and efficiency.

The objective of BITS 2022 workshop is to provide a forum to exchange cutting-edge ideas, share experiences, and enhance collaborations among researchers, professionals, and application developers in various aspects of security and privacy of big data and IoT in the context of smart computing.

We thank all the authors for submitting their fine work. We are also grateful to the TPC members for their hard work in reviewing the papers.

We hope you enjoy BITS 2022 workshop. Thank you for your participation.
