# THE MISSOURI MINER

Missouri School of Mines & Metallurgy

NUMBER 31

ROLLA, MO., WEDNESDAY, MAY 21, 1947

VOLUME 33

## Ten Additions To Faculty To Be Made In September

To take care of almost 2200 students, the faculty of Missouri School of Mines and Metallurgy has increased to 130 full-time members during the 1947 spring semester. During this time the very teaching loads were in the human class advances on to up-to-date status, additional instructors are needed primarily for professional departments. It is expected that the faculty will number at least 150 full-time teaching members by next fall. New appointments are being approved each meeting of the Board of Regents. So far the following have been approved and have appointments to the MSM faculty.

**Physics**  
Dr. Harold Q. Fuller, will assume his duties as Professor of Physics on September 1, 1947. Dr. Fuller is a graduate of Washburn College and received his A. M. and D. degrees from the University of Illinois. He has served on the faculty of the University of Illinois and comes to us from Albion College where he is Chairman of the Department of Physics. During the war he served as Senior Physicist at Oak Ridge, Tennessee. Dr. Fuller is married and has three young sons.

Another new member of the Physics Department is Mr. William C. Hoover, who has been appointed Instructor in Physics beginning next fall. Mr. Hoover is a native of Topeka, Kansas, and has had teaching experience in Kansas and Oklahoma and also considerable practical engineering experience in the plating and electroplating industry. He has a B. S. and M. S. degree.

**Ceramics**  
To replace Mr. T. J. M. Planje, who is resigning from the faculty to devote full-time at MSM for his Ph. D. degree, the Board of Regents has appointed Dr. William J. Knapp as Assistant Professor of Ceramic Engineering. Dr. Knapp received his B. S. from the University of Missouri and his M. S. from the University of Massachusetts. He has served in the laboratories of the North American Corporation and as a Lt. in the Aviation Branch of the United States Navy during the war. Recently he has been Senior Research Ceramist in the Westinghouse Research Laboratories of the Pennsylvania Salt Manufacturing Company in Philadelphia.

**Civil Engineering**  
Four new instructors have been appointed in the Department of Civil Engineering. John G. Duba of Norfolk, Virginia, comes to us from Washington University. Edward J. Kimmick is a graduate of Ohio State University and served with the United States Navy during the war. Victor R. Brieden-

## Homeless Wren Picks Jeans For Nesting-Place; Pants Scarce Too

Pity the poor animal, for even she suffers from the woes and miseries that we think of being peculiar to man. Even the housing shortage seems to have reached the animal kingdom, effecting the same desperate measures in the lower orders as in many humans today.

With the spring come the birds, and they, too, are infected with the realization of the wonders of nature that we humans feel reborn within us at this time of the year.

One lady wren found more to do this year than enjoy and add a bit of cheerfulness to the newly awakened earth. For in building time lady wrens find also that the time for nest-building is at hand, but the wee lady of our story was faced with an overwhelming perplexity; there was no place to build a home. This added to the fact that her time was near, caused her to adopt unorthodox measures.

In her busy search for a suitable nesting place she happened to observe a bright-colored site, cheerful in a bright spring sun. That seemed an answer to her bird prayers. Without pausing to wonder at how such an attractive home-site could have been overlooked by the many other homeseekers, she proceeded to build her house.

## AICHE Men Attend Regional Meeting Of Organization

Last Sunday, May 11, a group of members of the American Institute of Chemical Engineers journeyed to St. Louis to attend the Regional meeting of AICHE held at the Coronado Hotel.

The meeting was a four day affair with Sunday designated as student meeting day. Most of the party who were to attend were already in St. Louis for the week end and the rest left Rolla by car at 9:00 a. m. Sunday. Those who attended the meeting from the MSM Chapter were Dr. W. T. Schrenk, head of the Chemical Engineering Dept., Dr. F. H. Conrad, recently promoted to Professor in the Chem. Dept., Mr. R. Cornwall, instructor in the Chem. Dept., G. H. Brand and D. F. Brice graduate student in chemistry and V. V. Valleroy, J. H. Locher, Charles Hudson, A. L. Van Amberg, W. H. Gammon, E. E. Hoehn and Jack Mueller, member of the student branch of AICHE.

The group enjoyed speeches on the subject of "The General Field of Industrial Chemical Engineering Work," by Mr. Charles L. Schmidt, Process Superintendent, Titanium Division of the National Lead Company, St. Louis, Mo., Mr. Donald H. Tilson, Works Manager, Aluminum Ore Co., East St. Louis, Ill. and Mr. Fred Olson, Director of Research, Western Cartridge Co., East Alton, Ill. After the speeches the meeting was thrown open to an informal discussion among students, speakers, professional engineers and faculty professors in attendance.

Dr. Schrenk, Dr. Conrad, Mr. Cornwall, and J. H. Locher returned to the meeting Tuesday, May 13, to hear a series of research papers that had been prepared by members of the society. They were especially interested in hearing the one prepared by a former graduate of MSM, Mr. J. Russell Bircher, Mr. Bircher is now at the Battelle Memorial Institute, Columbus, Ohio. The subject of his paper was "Some Aspects of the Storage of Coke-Oven Gas in Sand Stone Strata."

The general trend of the talks emphasized the fact that in order to succeed the young engineer must be able to get along with people.

Mr. Tilson enumerated some of the qualities that employers look for when interviewing prospective employees. The most important of these qualities are courtesy, poise, appearance, scholastic standing and the ability to express ideas both in speech and in writing.

## Blue Key Elects Ten New Men At Annual Banquet

The MSM chapter of Blue Key National Honor Fraternity held its Spring Initiation Banquet at the Houston House, Newburg, last night and added additional funds to the MSM appropriation to provide for the completion of the Chemical Engineering Building and to start the construction of the newly-proposed Mineral Industries Building.

The Senate Committee upped the appropriation for the Chemistry Building from \$200,000 to \$300,000 after school officials had strongly recommended the move at a meeting in Jefferson City last night. In another move designed to aid the Rolla school, the group decided to appropriate \$150,000 with which to start the Mineral Industries Building which had been requested by Dean Curtis L. Wilson and other high-ranking Rolla officials in their appropriation request to the Legislature.

Previously, the House Appropriations Committee had struck the minerals building from the appropriation and had shaved the Chemistry Building fund down to \$200,000.

**Feeling in Jefferson City** was that the new move by the Upper House would receive a final okay in a joint House-Senate hearing and would be signed by Governor Donnelly, it was learned.

The \$300,000 will provide all the money necessary for the final completion of the Chemistry Building which was started here several years ago. At the present time, the building is half-finished. The \$300,000 will finish the building and will equip it, officials said.

**The Mineral Industries Building** was requested by Dean Wilson since, he explained, the school is overcrowded to the point where "students are virtually hanging out of the windows."

Dean Wilson was in Jefferson City last night along with Frederick A. Middlebush, President of the University of Missouri; Leslie Cowan, Vice-President, and other officials.

**Four Players To Join Drama Fraternity.** The Delta Psi Cast of Alpha Psi Omega, the national honorary dramatic fraternity, will initiate five men this coming week. These men became eligible for membership through work done in either acting or producing the play presented a few weeks ago by the MSM Players. Those men being initiated are Albert Danz, stage technician; Eugene Mueller, actor; Edward Sonevald, actor; and Fred Springer, business manager and stage technician.

In connection with the presentation of "Springtime for Henry," which was the play staged by the Players, the members of Alpha Psi Omega would like to express their thanks to Professor Lloyd, Mrs. May, Reverend Porter, Miss Roach, Mr. Sherman, and Mrs. Williams for the help they gave in helping produce the play. Much of the credit for its success goes to them. The fraternity would also like to thank Mrs. Evelyn Bailey, Mr. Currie Furr, and Mrs. Marion Stanley for all the work they did both in acting and producing "Springtime for Henry."

Although the chapter will be dormant during the summer, plans are underway for the presentation of several plays in the fall, and the members of Alpha Psi Omega invite you to be present at the next rise of the curtain.

**Wat's In A Name?** Fort Worth, Texas (ACP) — Marino Anderson, junior history major from Quita, Ecuador, now studying at Texas Christian University, isn't particularly fond of writing his signature, and for good reasons.

While in San Antonio during the Easter holidays, Marino stayed in a hotel one night. The clerk informed Marino, after he registered that the hotel was extremely crowded and that the hotel couldn't possibly accommodate all the persons listed.

"Anyway," continued the irked clerk, "you aren't planning to put all these people in one room, are you?"

A rich man in his years of toil burned barrels of midnight oil: His son now keeps his memory green By burning midnight gasoline

## Senate Awards More Money For MSM Building

The Missouri Senate Appropriations Committee jumped to the aid of the School of Mines last night and added additional funds to the MSM appropriation to provide for the completion of the Chemical Engineering Building and to start the construction of the newly-proposed Mineral Industries Building.

The Senate Committee upped the appropriation for the Chemistry Building from \$200,000 to \$300,000 after school officials had strongly recommended the move at a meeting in Jefferson City last night. In another move designed to aid the Rolla school, the group decided to appropriate \$150,000 with which to start the Mineral Industries Building which had been requested by Dean Curtis L. Wilson and other high-ranking Rolla officials in their appropriation request to the Legislature.

Previously, the House Appropriations Committee had struck the minerals building from the appropriation and had shaved the Chemistry Building fund down to \$200,000.

**Feeling in Jefferson City** was that the new move by the Upper House would receive a final okay in a joint House-Senate hearing and would be signed by Governor Donnelly, it was learned.

The \$300,000 will provide all the money necessary for the final completion of the Chemistry Building which was started here several years ago. At the present time, the building is half-finished. The \$300,000 will finish the building and will equip it, officials said.

**The Mineral Industries Building** was requested by Dean Wilson since, he explained, the school is overcrowded to the point where "students are virtually hanging out of the windows."

Dean Wilson was in Jefferson City last night along with Frederick A. Middlebush, President of the University of Missouri; Leslie Cowan, Vice-President, and other officials.

## Commencement Exercises To Be At Uptown, June 3; Former Director To Address Graduates

### Lloyd Principal Speaker At Last AIME Banquet

Professor Sam Lloyd gave a short and very interesting address at the banquet the AIME held in the College Inn of the Hotel Edwin Long.

Dr. Clark, acting as chairman, introduced several prominent visitors and members of the AIME and then introduced the speaker of the evening, Professor Sam Lloyd, Chairman of the new Humanities Department here in the School of Mines. Professor Lloyd's talk was about the "Role of Humanities in the Mineral Industry."

Professor Lloyd told how in this modern business world an Engineer should know how to use the English language and how to manipulate words as well as formulae. He also stated that an Engineer should help form policies in local and national affairs and how the school of today should teach the Engineer the origin, structure and functions of our government.

The Engineer, too, should be a cultured person in that he too could enjoy life by seeing the world in things he builds and not have to be able to quote Shakespeare to be accepted into society. Professor Lloyd stated that he thought that the schools should spend more time in teaching the fundamentals of report writing and in the correct manipulation of the English language and that a man could pick up Shakespeare etc. in his leisure time.

That the school of today needs to make these changes is great and vitally necessary, but trying to get them to change is very difficult. If the Engineer is to take his rightful place in society, these changes must be made.

### Registration Plans For Summer Term

The registration for the summer procedure will follow approximately the same outline as that for the registration on February 3, 1947, except that only Mechanical and the Gymnasium will be used.

Upperclassmen who pre-registered and failed no required course will get their registration papers at the foot of the stairs in Mechanical Hall and go to the class rooms upstairs to complete their registration. If such students wish to change their pre-registration, they will have to take their cards to their advisers in the Gymnasium.

Freshman students who pre-registered through the Registrar's Office will all complete their registration on the floor of Mechanical Hall, getting their cards at the foot of the stairs above. If a freshman fails a required course, his schedule will be corrected in the Registrar's Office and it will not be necessary for him to see the Freshman Committee unless he wishes to make some change in his schedule, in which case he should go to the Freshman Committee in the Gymnasium.

All upperclassmen who failed a required course should go to the Gymnasium where their papers will be given them at the east door leading to the gymnasium floor where all advisers will be, and make such adjustment in their schedules as is necessary.

All new students and old students returning will go to the gymnasium.

### Contingents Must Be Cleared Before Semester Ends

All students must clear their contingent refunds at the end of this semester. Forms are available now in the vestibule of Parker Hall. Students who have not cleared will not be permitted to register for the summer term or the fall semester nor will transcripts be issued until they have cleared. When the contingent forms are completed, take them to the Cashier's window in the Business Office. It is recommended that students attend to this as soon as possible. Those who have laboratory classes may clear as soon as the classes are finished.

Drunkard: A person who tries to pull himself out of trouble with a corkscrew.

### Nine Of Faculty Leaving MSM For Industry Or School

The end of this semester will see seven faculty members leaving MSM's teaching staff to either continue their educations or work elsewhere. The departees include Dr. Wm. P. Randel, of the Humanities Department, Dr. M. J. Caldwell, of the Chemistry Department, Mr. M. F. Kallmeyer, of the Mechanical Department, Mr. T. J. Plange, of the Ceramics Department, and Mr. George Tracy, Mr. John Ridout, and Mr. 'Syl' Pagano, of the Mathematics Department.

Mr. Randel is leaving MSM for a post as Associate Professor in the English Department of Florida State University at Tallahassee, where he will teach graduate courses in American literature. Dr. Randel obtained his B. S. at Columbia University in New York in the Spring of 1932, his M. A. at the University of Michigan in '33 and his Ph. D. from Columbia in '45. He first came to MSM for the Fall semester of '45 and since has taught a variety of subjects in the English Department here. His stay here was also marked by the publishing of his book, "Edward Eggleston, Author of 'The Hoosier School-Master,'" which was an outgrowth of the work he pursued in obtaining his doctorate.

Dr. Caldwell, recently promoted to Associate Professor, is accepting an offer from the Moorman Manufacturing Company of Quincy, Ill., as a Research Bio-Chemist in animal nutrition. The company specializes in mineral-enriched feeds for cattle, hogs and other farm animals. Dr. Caldwell's first connection with the company came when he was working on his doctorate at Kansas State College, where he helped direct the Moorman Company fellowships in '45 and '46.

"Mel" Kallmeyer obtained his B. S. here at MSM last January. Since then he has been teaching Machine Shop in the Mechanical Department. "Mel" is leaving for a position with the Western Electric Company of Chicago as a Design and Production Engineer. When "Mel" graduated he had agreed to stay on as an instructor for one semester before he headed for industry. His work has filled in a serious gap in the Mechanical faculty.

Mr. T. J. Plange, of the Ceramics Department is going into "residence" here at MSM on the research portion of his doctorate. The rules require that he devote his entire time to this work.

Mr. George Tracy of the Math Department is leaving MSM to accept a position as Petroleum Engineer with the Stanolind Oil Company in Tulsa, Oklahoma. Mr. Tracy received his degree from Central Missouri State Teachers' College in '42. After the war he came to MSM to work on his Masters in January, '46.

Mr. John Ridout is leaving for Missouri U. at the end of this semester to continue his education also. Mr. Ridout has been in the Math Department of MSM for his last two semesters. Prior to his work at MSM he was a chaplain in the army, spending three years in evacuation hospitals in Northern Africa, Sicily and England.

Mr. Pagano is a graduate of MSM's EE Department. He has been an instructor in Mathematics since June, '46 when he received his degree. His plans include entrance into Washington University and work toward an M. A. in Math.

A somewhat supercilious bachelor was invited to dinner by a lady of his acquaintance, but did not accept. A few days later, seeing her at a party, he strolled over. "I believe you asked me to dine with you last week," he said in his best manner.

The lady looked at him thoughtfully. "Why, yes, I believe I did," she answered brightly. "And did you come?"

It has been said that chivalry is a male instinct purely — the instinct which prompts a man to protect a woman from everyone but himself.

### Mining Department Leads Graduates; Twenty-Three M.S.'s Among Degrees

One of the largest commencement exercises in the history of MSM will be held Tuesday, June 3, 1947 at 10 AM in the Uptown Theater. Baccalaureate services will be held in Parker Hall at 8 in the evening on Sunday, June 1, 1947. At this commencement 161 seniors will receive their Bachelor of Science degrees while 23 graduates will receive their Master of Science degrees.

**Dr. Young, Speaker**

The Commencement address will be given by Dr. Lewis E. Young of the Pittsburgh Coal Company. The subject of his address will be, "The Engineer and American Free Enterprise." Dr. Young will probably be remembered more by the able members of the faculty as older members of the directors of MSM from 1907 to 1913. Dr. Young favors the Mining branch of engineering as he received his B.S., E.M., and Ph.D. in that branch. The latter being received at the University of Illinois in 1915. He has also had a wide experience having been an Assistant Professor at the University of Illinois and having worked for several important and well-known business firms in the east and middle-west. Besides this, he has written several books on mining along with various technical papers. Dr. Young is a prominent member of the AIME as well as several other well-known organizations.

**Baccalaureate**  
At the Baccalaureate Services on Sunday, June 1, the Reverend Mr. Ralph M. G. Smith of the First Baptist Church of Kirksville, Missouri will give the Baccalaureate Address. Reverend Smith will address the graduates on, "The Characteristics of a Superior People," which should prove interesting to everyone. The Reverend Mr. J. V. Carlisle of the Rolla Baptist Church will deliver

### First Frosh Dance Since War Held At Gym Friday

A medium-sized but spirited crowd danced to the music of Charlie Faulkner's Orchestra last Friday, night as the Freshman Class presented the last dance of the semester.

"All the returns aren't in from the benefit show," said Ivan Bounds, Freshman Class President. "But I think we came out all right. I hope the freshmen next year will continue this, and those of the years after, making it an annual event as it was before the war."

The Glee Club was prevented from entertaining at intermission, as it was reported in last week's MINER, by the unavoidable absence of their accompanist.

The gym was attractively, if inexpensively, decorated with crepe paper streamers. The only kick extant seemed to be that the lights weren't dimmed.

### Moline Elected AIME President For Coming Year

The AIME met Wednesday night May 14, and after a little "politic" elected their new officers for the coming school year of 47-48. Gordon Moline was elected as the new president, Ralph Banks was elected as vice-president, Joel Beezley Secretary, and Gerry Joffe, (conscientious and honest) was elected treasurer.

An interesting movie on the quarrying and milling of Indiana Limestone was seen by the group. The movie covered the limestone from the time it was first cut out of the quarry, run through various sizing processes and final finishing for shipping to the builder. This movie was shown by courtesy of the Indiana Limestone Institute.

The meeting was fairly well attended, but there were quite a few members absent.

Teacher (calling the roll): "Aloysius Albert Petrovich."

Student: "Here."

Teacher: "Are you Aloysius Albert Petrovich?"

Student: "Oh, no. Pardon me, I thought you said Joe Jones."

the invocation and benediction at both the Baccalaureate Service and the Commencement exercises. Dean Curtis L. Wilson will preside over the commencement exercises. The degrees will be conferred on the candidates by Frederick A. Middlebush, President of the University of Missouri. Each candidate will be presented by the chairman of his department.

During the Commencement Exercises various student awards and prizes will be given. Unfortunately, these cannot be released at this time.

Also, during the exercises, the Alumni who graduated fifty years ago will receive gold medal awards. These men are P. B. Anderson of Kirksville, Mo., J. S. Cameron of Henryetta, Okla., and J. A. Rogers of Sinoab, Mexico. All three men graduated in 1897.

**Music**  
The music for both ceremonies will be rendered by the Chamber Music Society of MSM with Mrs. K. E. Born on the violin, Mrs. C. A. Johnson on the cello, Mrs. A. W. Schlechten on the viola, and Mrs. Fred Remington on the piano. In support of this, the MSM Glee Club, directed by Mrs. C. H. Black, will sing several numbers. They will be accompanied by Leslie Meyer on the piano.

The Faculty Committee on Commencement is headed by Prof. V. A. C. Gevecker, who has the support of K. E. Born, M. H. Cagg, R. Jann, C. A. Johnson, Maj. E. C. Richardson, J. Rideout, P. N. Russell, and W. H. Webb.

The Marshalls for the Academic Processions will be D. F. Walsh and C. A. Johnson. The ushers will be supplied by Alpha Phi Omega Fraternity.

**Mining Grads**

This year the Mining Department has the largest number of

### ROTC Band Gives Concert To Crowd Novel Horn Shown

In their last public appearance of the semester last Sunday afternoon at Parker Hall, the 40 piece ROTC Band was well received by a large audience, consisting of students and citizens of Rolla and the surrounding area. Several parents and relatives of band members from out of town were also present.

The program included several different types of musical numbers, among them, March from "Tannhauser," which featured Charles Black playing an enormous coach horn, owned by director Scott. A brass quartet consisting of Charles Black, cornet, Dave Smith, trumpet, Lee Crandall, Flugel Horn, and Ralph Morse, Alto Horn, was enjoyed by all. This ensemble, which featured the Flugel Horn, played two selections; "Annie Laurie," and "Sweet and Low." Prior to the performance of this number, Director Scott explained and described the Flugel horn a rather uncommon instrument to the audience, as well as exhibiting instruments of his own collection, some of which were as much as 200 years old.

Other special numbers were two violin solos, "The Old Refrain," by Kreiser, and "From the Canebrake," Gardner, played by James Ranes, MSM '47. He was accompanied on the piano by Mrs. J. M. Morris. Mrs. Morris also served as accompanist for the sextet from "Lucia di Lammermoor," Donizetti. The sextet was composed of Dave Smith, Chas. Black, Bill Hickman, Bob Ege, Jo Ferrantele, and Bill Herndon.

Other band numbers which were well received were "Wedding of the Rose," "Maritana," and the overture, "The Sky Pilot."

The program was concluded with the band playing "The Stars and Stripes Forever," to which Cecil Branson, drum major, performed some percussion twirling. The Star Spangled Banner was played, ending the performance.

The Band will be discontinued this summer but Director Scott states that he has plans for a bigger and better band than ever before in the history of MSM.

THE MISSOURI MINER is the official publication of the students of the Missouri School of Mines and Metallurgy. It is published at Rolla, Mo., every Tuesday during the school year. Entered as second class matter February 8, 1945 at the Post Office at Rolla, Mo., under the Act of March 3, 1879. Subscription Price 75c per semester. Single Copy 5c.

THE MISSOURI MINER Office is located on first floor of the Old Power Plant Bldg. Office Phone is 851.

### End Of The Line

And so the last issue of the MINER for the semester has been put to bed. This semester and the one preceding it have been hectic times for the Board, but good times. The MINER has expanded from a four page tabloid size to its present enlarged form, has gone that improvement a couple better by putting out several six page editions, and is now looking for new worlds to conquer next fall.

This summer over half the MINER staff is taking a break from school. Of the better than thirty-five members of the Miner Board, only about ten will be here this summer. No more than ten try-outs plan to attend. The prospects of putting out a regular-sized paper aren't so brilliant. However, as usual, the staff will do its best.

For those leaving this summer — "Be seeing you next fall. Happy vacation!"

### "Eternal Vigilance . . ."

On the floors of the Senate and the House of Representatives there will soon begin the long awaited hearings on the Universal Military Training Bill. Public opinion polls show that from 70 to 85 per cent of the people of this nation believe in UMT as the most workable plan for preserving peace and maintaining our security. However, this majority in favor of the proposed enactment does not mean a decisively favorable decision in the legislative branches of Government.

The dissenting minority is composed of many people who misunderstand the real meaning and purpose of UMT, and of well-organized, radical groups who wish to see the bill defeated because of its strengthening effect upon our nation. It is these despicable, un-American organizations that must be defeated in their attempts to convince our legislature that they represent the "true" voice of the people.

These special-interest groups, many of whom have no desire to aid the nation, but rather are motivated by subversive intentions, are well experienced in the processes of lobbying, and they support many influential speakers in their behalf to contact our Senators and Representatives in an effort to pass themselves off as spokesmen of the majority of the citizens. The best method of combating their possible influence is the American prerogative of the voter . . . the right and duty of the citizen to inform his legislator of his feelings and desires on national problems.

Foremost in the fight for the enlightenment of the people on the true purposes of the UMT, and in the fight against the misrepresentation of the people's desires are the veterans organizations. For it is the veteran whose mind is most indelibly impressed with the senseless horrors of war, whose future is most affected by the Future of Peace, and whose sons will be brought up in a strong and well-defended United States of America.

The majority of the MSM students are veterans and voters. Many of us have wives and children. Let's not let our strong voice go unheard amidst the clamor to return to the state of blindness, helplessness, and stupidity in which we found ourselves in December of 1941. If you do not fully understand the program outlined by UMT, inquire of your veterans organizations. Then, let your legislator know how you feel. A letter to Congress and a word or two to those who misunderstand may make the difference.

## Off the Campus

### Kappa Alpha

The Beta Alpha Chapter of the Kappa Alpha Order initiated two men into the fraternity last weekend. They are Dick Ballman and John Ehler. This brings the chapter active roll to thirty one.

Another note of interest is the fact that Castleberry's Hamesters have given birth to nine more young ones. These amazing animals, which reproduce the species every sixteen days, were imported from Alabama last fall.

Friday evening, following their baseball game with the Sig Ep's, some of the actives fell heir to a box full of chocolate cake which a troop train couldn't use, and as a result, the chapter has had cake for dinner several times.

There aren't quite enough seniors in the house to have a party for them, but the chapter does want to express their congratulations to Kenneth "Toro" "Doc" Franks, the only graduating senior.

### Gamma Delta

The Alpha Chapter of Gamma Delta from Washington University arrived at 10:00 AM Sunday, May 18th, to be the guests of the local Alpha Phi Chapter. Thirty-five local members were present to greet the visiting chapter — Mostly women.

Poppitz was the guide for a tour of the campus and fraternity houses after the morning church service. Following the tour, the groups went to Green Acres Park for a picnic lunch and spent the remainder of the afternoon there playing softball, volleyball and croquet.

Miss Loretta Urban liked the hot dogs so well that, with the aid of a few fellows on one side of a picnic table, she took a hot dog and warm water shower. Later, after a quick change, she was seen in the softball game. Paul Kasten found that a little man like Clemens Knigge is not hard-headed. Paul's eye is proof of that.

Maurice Fleichman always has trouble getting his feet off the ground, and when he reached for a ball his feet wouldn't move. Result: He fell flat on his face while the ball went sailing on. Miss Jerry Larson was unofficially chosen the best ball player on the field. When "Gus" Carlson was catching, the "pigtail" worked over-time.

The group left the park about 5:30 and attended a banquet in the church basement. A short vesper service was held by Pastor Seager, concluding the day's festivities.

Among the guests present were the president of Alpha Chapter, Charles Lakingier, who is also the National Treasurer of Gamma Delta, and Louis Rush, who was the National President when the Rolla Chapter was installed.

Alpha Phi will have their final meeting of this semester next Sunday at 5:30 PM.

### Tau Kappa Epsilon

Beta-Eta chapter of Tau Kappa Epsilon initiated two new associates into the chapter Monday night. The formal ceremonies were held in the dining hall of the Pennant Tavern and Restaurant. The new members initiated were Prof. E. J. Randolph and George Cornicke.

A banquet was held after the initiation and Dr. M. J. Caldwell, faculty advisor for the chapter, was presented with a watch by the members of the chapter. The watch was presented as a token of esteem to Dr. Caldwell for his aid in starting the chapter here and keeping it functioning well. Dr. Caldwell is leaving the school at the close of this semester to take a position in Quincy, Ill. The members of the chapter will certainly miss Dr. Caldwell.

The local chapter of Tau Kappa Epsilon held their annual spring outing last Sunday at Meremac Springs State Park. Coke and somewhat stronger beverages flowed almost as freely as the springs at Meremac. The TEKES and their guests, some 75 people, consumed thirty pounds of hot dogs, five gallons of potato salad, twelve loaves of bread, and 25 cases of assorted drinks. With the hot sun beating down, many of the guys took to the spring to keep cool. Most everyone resorted to the drinks for refreshment and by

This week we feature a senior in the Mechanical department. He is Ronald A. Tappmeyer, age 21, from Owensville, Missouri. In June of 1943 Tappmeyer started to school at MSM. That fall he went out for basketball and earned his letter. Ever since then, Tapp has been active around the gym. In the fall of '44, Tapp went to work as a student assistant in the Athletic Department. The school had a total attendance of less than 200 at that time, so there wasn't a basketball team. When the fall '45 rolled around, sports activities picked up a bit and Tapp went back to making the baskets.

This last year he was captain of the team. You usually see him playing center or forward. Two years ago he made 34 points for us in a game with Park college. Things like that have earned him his place on the All-Conference Team for the last two years. In spite of all the sports activity, he has twice won the Phi Kappa Phi Book Plate award.

Former Class President  
Back in '44 when Tapp was a sophomore, he became President of his class, and he was Secretary of the Junior class in '45. While he was a junior in the Mechanical department, Tapp became Secretary of the ASME and was President of the organization during '45 and '46. Tappmeyer has been a member of Blue Key for almost two years.

Tappmeyer became a Sigma Nu not long after he came to school here. As a sophomore, junior and senior, he has held the offices of Recorder, Lt. Commander, and Commander. Those offices compare with Secretary, Vice-President and President.

In July of '44 Tapp entered the Navy with the intention of going through the radio technician school. But, he was given a Medical Discharge two months later because of bad vision. He was late in starting back to school that year.

After graduating Tapp plans to take a months vacation, then go to Tulsa to work for Shell Oil in the production division as a junior mechanical engineer.

Fulghum, A. Met. Major  
Gale Fulghum came to the School of Mines, back in January of '42 from William Jewell college at Liberty. His home is in Independence, Missouri. Gale went to Jewell College soon after graduating from High School, on a scholarship, but he stayed only two semesters. Then he went to work on a construction job near Kansas City in building a defense plant. While working there he decided to be an engineer; so he ended up here. As a metallurgist, his all time grade point is 1.87. His name has been on the Dean's honor list three times and he is a member of Tau Beta Pi. Gale was a member of the AIME one semester before joining the Navy. Last fall he became a member of the ASM. He used to belong to the old Tech Club before it went out of existence.

Four Football Letters  
Fulghum goes out for sports in the form of football. He has lettered in it four times, twice here, once at Jewell College, and once at Oklahoma U. while he was a midshipman in the V-12 unit there.

(Continued on Page 3)

evening everyone was feeling very happy.

Softball, volleyball, and horse-shoes were played. The big attractions of the afternoon were the fat man's race, three-legged race, piggyback race, and many other games in which nearly everyone participated at some time or other.

Almost every guy had a gal, either wife or date, and everybody had a swell time. Bill Weinstein, social committee chairman who planned it all, says that the one next year will be even bigger and better than this one was.

### CVA SUGGESTION BOX

Although the scheduled meeting last Thursday failed in its attempt, the effort was not a total loss. A short discussion was held among the members attending concerning the future of the organization and the most worthy suggestion of the semester was selected by this same group. Due to the fact that a quorum was not present, no official business could be conducted. The plans for the summer semester will probably be published in the very near future.

The \$5.00 award for the best suggestion of the semester goes to Albert Seelig. The suggestions were judged according to their worthiness, originality, etc. Although action has not been taken on the selected suggestion, it is planned to carry out a thorough investigation regarding its possibilities. Albert's suggestion, accompanied with a very neat sketch, was to designate the location of MSM to all people traveling through this area. This would be accomplished by spelling the identification of the school on the new smoke stack, readily visible in the daytime and illuminated at night by flood lights.

In a previous article a suggestion was answered concerning the Blue Cross Insurance and it was also stated that, since it was impossible to obtain the desired type of policy for the students, another policy was being investigated through recommendation by the Blue Cross representative. This anonymous company has been investigated, as well as a few others, and they fail to offer any more than an ordinary hospitalization policy. Therefore I suggest to those students that plan to work during the summer to attempt to enroll in Blue Cross as an employee. After one has been enrolled, he may continue the insurance regardless of the employment status.

SUGGESTION: Suggest that an NROTC be installed at this institution for the convenience of the ex-Navy personnel who might wish to obtain a reserve commission in

that branch of the armed forces.

ANSWER: The suggestion will involve considerable changes, as well as time, due to the normal requirements of the Navy. However the possibilities of such an installation are being investigated by competent individuals; so have patience. If the contributor has valuable information concerning this subject, please feel free to make it available to speed up the investigation.

SUGGESTION: The speck of green, known as the sunken gardens, would be an ideal spot for benches. This would be a service to the residents of the barracks area as well as the students and the passers-by.

ANSWER: Since the benches on the campus are the result of the efforts put forth by the Independents, the suggestion was relayed to a campus organization. After a lengthy discussion there was some doubt as to the benefit that would result. If some evidence were displayed indicating a great desire for the suggested improvement, I personally believe that the organization that discussed the project would further its efforts and would probably receive support from other organizations and the school to make the suggestion a reality.

Nearly half of U. S. roads are surfaced. America has more surfaced roads than the rest of the world combined.

Seven out of 10 workers in the nation go to and from their jobs by motor cars, according to a recent survey.

## The Marriage Ring

### Introducing

Willy J. M. Peels, Hastrat 66, Helmond, Holland, Willy is another of the girls who has made the long trip over the Atlantic Ocean to be with that special ex-G. I., B. J. "Dusty" Rhoads Jr. She left Holland April 11, 1947 and sailed on the ship, Westerdam. The Statue of Liberty greeted her April 21, 1947. Quoting Willy, "I love the United States. And as for the food, it's wonderful. Especially Ice Cream and Chocolate cake." Miss Peels is a lovely blonde and has mastered our language to such a degree that one has little trouble carrying on a conversation with her.

Thursday proved to be an eventful day for Emma Pearl Meadows, Willy Peels, and Elva Plimpton. They had a perfect day for the lovely drive through the Ozark hills to Waynesville where they attended a Sub-District meeting of the WSCS.

Harriet and Chuck Summerson and their friend, Rev. Link, were dinner guests of "Swede" and La Rayne Johnston. All of us who have partaken of LaRayne's cooking know how good it was!

Kay Brewer was hostess to her bridge group Wednesday night. The much sought prizes were won by Zella Held, low score, and a sugar scoop for LaRayne Johnston high score, received a canning jar funnel. Others who competed were Fran Anderson, Iva Balstad, Ann Fullford, Mary Hyslop, Mary Carn, June Kofahl, Jane Waring, Helen Hartman, and Noela Van Amberg.

Something new in the way of entertainment occurred last Monday evening at Mrs. Screnck's home, when Lois Young, Helen Armstrong, Pat Prosky, Phyllis Cornelius, Sally Mueller, and Agnes Remington got together to begin a new bridge group. Mrs. Young was appointed assistant chairman of all bridge groups under Mrs. Frank Hequemburg. After the session, Mrs. Schrenk served cokes and cookies to the beginners.

Audrey Kuhn, Mickey Beverage, Sue Bennett, Isabelle MacCormack, Ginn Hequemburg, Jane Applebaum, and Audrey Christian met for their Tuesday evening bridge party at Lois Fullo's. After several hours of indulging in the Rolla pastime, the girls relaxed during an elaborate snack.

## Thirty Letters For MSM Athletes

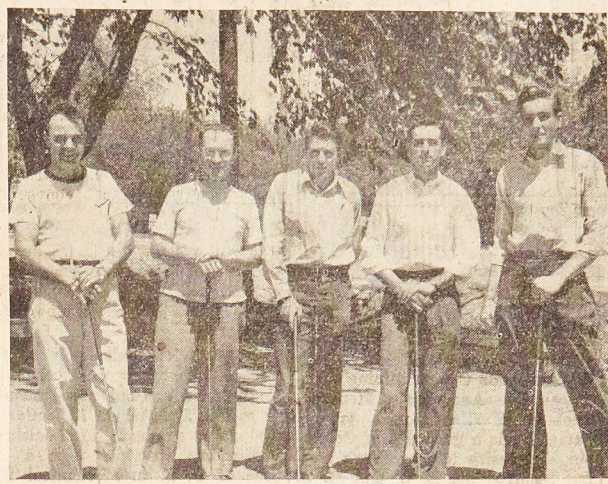

The Faculty Athletic Committee announces a total of 30 Miner students satisfactorily completed requirements for their athletic awards in the spring athletic program.

The following men won awards in varsity track for the 1947 season: George Bock, T. F. Burke, A. J. Bush, Everett Bruer, Paul Carlton, Ray Collier, H. E. Corbin, S. E. Guiney, J. D. King, Wm. Kirk, Bob Kendall, Walter Liddell, Carl Mann, Don Ruff, Dale Stone, Al Schwartz, Charles Tothill, Cliff Turner, Cletus Voiles and W. T. Winning.

The following won awards in golf: W. A. Kramer, A. J. Pantaleo, D. L. McColgin, E. R. Sands, and L. P. Youngs.

The following won tennis letters: Gene Weber, Charles Ross, Charles Osborne, John Graves, and Fred Canning.

## Top Conference Golf Team

Pictured above is the MSM Golf Squad, MIAA Champions for 1947. Reading left to right, the members are: McColgin, Young, Sands, Pantaleo, and Kramer.

## Kappa Sigs Take Top Honors In Golf Tournament

After somewhat threatening weather and a few raindrops, the intramural golf tournament managed to get under way last Saturday. Pi K A and Sigma Nu were the first teams to tee off at 1:00 PM. Although bucking a strong westerly wind, Doss of Kappa Sigma came through with an 8 over par to be top medalist of the day. Best round scores were turned in by Wees of Chi Sigma and Blair of Kappa Sigma, both firing 38, three over par.

### TEAM SCORES

Kappa Sigma	160
Sigma Nu	165
Pi K A	174
Theta Kappa Phi	178

## Reds Beat Whites 52-0 In Intra-Squad Game

The annual spring football game held between old Regulars (Reds) and new aspirants (Whites) developed into a 52-0 win for the Reds. The Whites, led by quarterback Ed Kwadas, battled to a 0-0 first quarter and held the Reds to 13-0 in the first half. Experience made the difference in the second half as the regulars scored 6 touchdowns to trounce the Whites.

Strangely enough, the Reds averaged but 4 hours total practice per man before the game to the 10 hours total practice per man for the Whites. The Whites, however, had to learn offensive and defensive tactics from scratch and the Reds carried on from last year's experience.

Basically, the teams used the same formations as last year — running plays from the T formation. Passes by the Reds looked bad, whereas the Whites repeatedly completed passes against the Reds. The Reds ability to intercept passes and hold for downs in crucial moments kept the fighting Whites from scoring. The scoring was done by 8 different players. However, Paul Fullop could have scored a second touchdown easily, but tossed a lateral to tackle Luther Steele and Steele countered the 6 points, instead, Bob Reicheit, Jerry Berry, Paul Fullop, Dale Stone, Al Schwartz, Sid Duerr, Luther Steele, and Jim McGrath tallied touchdowns for the Reds. Standouts defensively for the Reds were Neal Wood, Co-Captain of the 1947 team, Gene Marshall, Steele, Pettska, and Sid Duerr.

Ed Kwadas, playing quarterback, played the outstanding half for the Whites. Consistently finding receivers for long completed passes he kept the Whites in the ball game the first half. Dilorenzo was the receiving end on most of his passes. Roemmerman played a good game at guard and Wm. Coolbaugh played a bang up game at center for the Whites. Coolbaugh was the only player injured in the game.

Dovling thrilled the crowd when he intercepted one of Bob Kemper's passes and raced 60 yards only to be caught from behind by a Red halfback. The Reds then held for downs.

Practice will continue through the summer term and will be held each Monday evening at 4:00 p. m. throughout the semester. All players who participated in spring practice and all new aspirants are asked to please report to these Monday practices.

Two small boys had taken the clock apart to see "what made it tick." After examining each part very carefully, they put the clock back together again.

During the night their father was awakened from his sleep when the clock began striking. I struck 117 times without stopping "Cindy," he said to his wife, excitedly, "you'd better get up. Durn it if it ain't later than I ever knowed it to be."

South Pacific as skipper of a crash boat. Not long after getting his commission he married the girl from back home.

Gale is going straight to work, after graduating, for J. F. Pritchard and Company at Kansas City, a firm of Engineers-Constructors specializing in the construction of petroleum refineries.

## Speed Boat Races On Lake of Ozarks Decoration Day

Place: Oak Bend, Lake of the Ozarks, Mo. — East of Highway 5 between Versailles and Camden-ton, Mo. Roads will be marked. Follow signs.

Date: Decoration Day, Friday, May 30th.

Racing Participants: St. Louis Outboard Drivers Association, an affiliate of the American Power Boat Assn.

Sponsor: Cyrus Crane Willmore, president and owner of Lake of the Ozarks Lodge Properties, Inc.

**Spills and Thrills Expected**  
There are many good, fast, out-fits in the St. Louis Outboard Drivers Assn., and this race should be a race well worth watching (if you haven't a weak heart or high blood pressure). Spills are the order of the day at all boat races, but this event should be particularly exciting because of the large number of entrants and the fine prizes offered. The Class "C" race will have as many as 22 entrants so you can imagine the mix-up that will occur at the first turn. Plenty of wrecked boats and drivers in the water, but of course rescue crews will be on hand at all times.

**Races**  
Many good exciting races will be held. Definitely scheduled are: Service "C" Class — 22 h. p. and under; 2 heats of 5 miles each. "E" Class — 35 h. p. and under; 2 heats of 5 miles each. "Free for All" race—an unlimited class with respect to boats and motors; 2 heats of 5 miles each.

It is probable that there will also be a Racing Class "B", Racing Class "B", Racing Class "C" and an inboard runabout event. Plans also include a fisherman's race open to anyone with a family type boat. This will mean lots of local entrants and will prove exciting and interesting for all the spectators because anything can happen in a race like this—and usually does.

Best Known Drivers in Midwest will Race  
Such nationally known drivers

as Eddie Loetscher, Steve Gantner, Jud Davis, Al Hoppe and Dewey Rader will compete, Eddie Loetscher raced with the Midwest Circuit and National Outboard Drivers prior to the war, and since his return is making racing history in local circles.

This Decoration Day Race is the first since the war to be held at the Lake of the Ozarks, so it is expected to arouse keen interest among sportsmen as well as city-weary people who want to get out into the country for a 3-day Decoration Day holiday. Plenty of parking space and entertainment is promised for the event. Come early—bring your lunch and enjoy the beautiful scenery!

Crowd Anticipated  
Two to three thousand are expected to view the races.

the Oklahoma State Highway Department.

**Metallurgy**  
The Depart of Metallurgical Engineering has a new Instructor coming next fall who is now Assistant Research Engineer with the Anaconda Copper Mining Company in Anaconda, Montana. Thomas Martin Morris is his name. He is a graduate of Columbia University in New York having received his B. S. and M. S. degrees in Mineral Dressing. During the war he was a Lt. jg. in the United States Navy.

To replace Mr. Gilbert Plimpton who is leaving Rolla at the end of this term, the Mining Department has appointed Ronald L. Carmichael, who received his B. S.

degree in Mining Engineering and who will receive his M. S. degree this June. Mr. Carmichael has worked with the U. S. Bureau of Mines and the Rock Island Coal Company.

**Mechanical**  
The Department of Mechanical Engineering has one new instructor so far. Mr. Marvin R. McCarty, who is a graduate of Louisiana Polytechnic Institute with a degree of B. S. in Mechanical Engineering. Mr. McCarty is a native of Louisiana and served during the war as a Naval Aviator.

**Electrical**  
For the summer session only, the Department of Electrical Engineering will have Mr. J. L. Hummer and Mr. William F. Scho-

ening is an Instructor in Electrical Engineering at Washington University.

Additional faculty members are being considered and a number have already been proposed for the next meeting of the Board of Curators in June.

A New Yorker stranded in Los Angeles stopped before a flower shop bearing one of those signs stating that flowers can be telegraphed anywhere. He went in, sought out the proprietor, and asked, "It it really true that you can telegraph flowers anywhere?" "Sure, it's true. Can't you read?" "Very well, then," said the telegrapher metropolitan, "you can telegraph me right back to New York. I'm a pansy."
