JOE MINER:

Here's your chance to make good this week-end! Don't disappoint those 110 girls from Lindenwood; show them a hot time at ol' MSM.

VOLUME 38

THE MISSOURI MINER

Missouri School of  Mines & Metallurgy

ROLLA, MO., FRIDAY, FEB. 29, 1952

REMINDER

There are just 10 more shopping days until my visit with you, so you had better stock-up now to avoid any rush which yours truly might cause.

St. Pat

NUMBER 17

MSM HAS FOUR NEW MEMBERS ON FACULTY; THREE LEAVE STAFF

Dean Curtis L. Wilson of Missouri School of Mines and Metallurgy has announced the appointment of four new faculty members for the spring semester.

Dr. Robert C. Peabody will be in the Chemical Engineering department, William A. Frad and Raymond Cathcart will be in the Metallurgical Engineering department and Dr. W. H. Bessey will be in the Physics department.

Dr. D. L. Fizzell is returning to the Geology department after a semester's leave of absence doing special work in geology.

C. O. Reed of the Chemical Engineering department, Gene Langston of the Metallurgical Engineering department and W. H. Harris of the Mechanical Engineering department are resigning to go into other work.

Dr. Peabody, new assistant professor in the Chemical Engineering department, came here from the Iowa State University, where he received his Doctor of Philosophy degree. He worked there as an instructor for several years before coming here.

Mr. Frad will assist with the courses in physical metallurgy. He has a Master of Science degree in Metallurgy from the University of Iowa and has taken graduate work at the Colorado School of Mines.

Mr. Cathcart, who will teach extractive metallurgy courses, is a graduate of the University of Alabama, and has a Master of Science degree in Metallurgical Engineering from M. S. M. He was formerly a faculty member of Birmingham Southern. Both instructors have had practical experience as metallurgists.

Dr. Bessey will be an associate professor in the Physics department. In 1940 he received his Doctor of Science degree at the Carnegie Institute of Technology, Pittsburgh, Pa., and has been an assistant professor there since 1948. During the war he worked on the National Defense Research Committee projects. He holds membership in numerous professional organizations throughout America.

Pikers Preparing Now To Snare Float Prize At '52 St. Pat's Parade

By Jean E. Hacker

A business like air of efficiency has shown up at Piker Manor as work has progressed on the St. Pats float. The experts at elevation of the lowly napkin have started to work again. When they are all done there is no doubt that the finished product will do justice to the fine reputation the house has built up in past years.

We have been host to Tom Bowles, National Field Secretary, for the past few days. His presence has given some of the boys a good excuse for relating some of their favorite tales about "The good old days when the old corps was still here."

The disappearance of Peanuts from the morning paper for a few days caused a bit of unhappiness among some of the fellows but its return has soothed their shotgun shattered nerves.

Sam Schneider has just completed a series of experiments and calculations which prove without a doubt that the long distance phone bill is inversely proportional to the length of time until St. Pats.

Lee R. Grabill, Oldest MSM Graduate, Is 93

The Alumni Association received a note from the oldest graduate of the Missouri School of Mines and Metallurgy, Lee R. Grabill, who was 93 years old in November, 1951.

Mr. Grabill entered Missouri School of Mines in 1876 and graduated in Mining Engineering in 1878.

Australian Geologist Will Speak Next Week To Rockhound Groups

Dr. Curt Teichert of the Geology Department, University of Melbourne, Australia will discuss "The Coral Reefs of Australia" in Room 204 Norwood Hall, at 7:30 p.m. March 5.

Dr. Teichert will show a 30 minute color movie depicting the life on a coral reef and will discuss the geological problem connected with a study of coral reefs.

Dr. Teichert has made a study of the reefs of Australia and has published several papers based upon his studies. Currently, he is visiting the geology departments of a number of American Universities and has presented his talk at many schools and before various geological societies. A study of coral reefs has come into prominence lately partly because of the study given to reefs by the military forces operating in the South Pacific during World War II, and partly because significant new sources of petroleum have been discovered to be associated with reef structures, such as the large accumulation in Scurry County, Texas.

All persons interested in learning more about coral reefs are invited to attend and participate in the discussion.

The talk will be sponsored jointly by the Geology Department of the Missouri School of Mines, by the Dake Geological Society, and by Sigma Gamma Epsilon.

O. R. Grawe, Chairman
Department of Geology

E. E. BULLETIN BOARD DENOTES "GOLDEN ERA"

Something new has been added in the Electrical Engineering Department. In view of the acute shortage of electrical engineers, a bulletin board of the department has been devoted to listing job opportunities. The initial contribution to the board lists offers with better than 50 companies from all sections of the country. But who is more surprising is the fact that the entire list was compiled from one issue of the official magazine of the Institute of Radio Engineers. So great is the demand that in one single issue of the magazine, eleven pages of advertisement were donated to job offers. As time permits this list will be supplemented; eventually offering the most complete list of opportunities available.

The graduate electrical engineer is indeed fortunate, for his opportunities are boundless. Unlike many of the other engineering fields, the electrical engineer is not a specialist. That is to say, that while he is trained toward a definite goal, the education received is broad enough to be applicable to almost all vocations. Even those industries which do relatively little technical work can place electrical engineers because of their excellent training in the fundamental sciences.

Much of the demand for electricals can be attributed to the present world crisis. This is true in all fields of engineering. However, if the crisis were to end tomorrow, the need for electrical engineers would be decreased a negligible amount. This is largely due to the astonishing developments within the field itself. Developments that have been hampered considerably by world affairs, and but await a change to normalcy when they can be fully exploited. Great strides are being made in such fields as ultra-high-frequencies, television, frequency modulation, application of electronics to medicine, electrical computing systems, and a host of others. It is constantly becoming more perceptible that the next decade or two, will be the "Golden Era" for electricity and electrical engineers.

Sig Eps Redecorating Their Entire House

By Ken Delap

The Sig Eps House has taken on a new look in the past few weeks. The boys have all become very industrious and have done quite a bit of rejuvenating in the house. The upstairs has been redecorated completely. The ceilings were torn out, some of the walls came down also, and all of the rooms received a fresh coat of paint and an overall good cleaning. Such energetic people I haven't seen in years. It sure has paid off though in an altogether pleasing look in the house.

We wish to congratulate Bunny Howe and Leroy Justice on their election to the presidency and vice-presidency respectfully. We are proud to have them in these offices because we know that we have two men that will end their terms with a job well done.

We wish to extend congratulations to Bob Flore, who graduated in January, for his recent engagement. We use to think he was the slowest man in school, but he sure has picked up speed since he graduated.

A fine pledge class is shaping up for this spring. Five good men have been pledged; John McCarthy, John Seipel, Rich Humphries, Russ Desieux, and Art Soellner. We wish to welcome these men and extend our congratulations.

General Hershey Sets March 10 as Deadline for Selective Service Qualification Test Applications

Major General Lewis B. Hershey, Director of Selective Service, today reminded college students that applications for the April 24 Selective Service Qualification Test must be postmarked not later than midnight March 10.

The deadline is necessary to allow the administrators of the test, the Educational Testing Service at Princeton, N. J., time to process the applications and assign each applicant to the testing center requested by the student — or to the closest possible alternative center — also to make administration arrangements consistent with the number who will take the test. There are more than 1,000 testing centers throughout the United States and its Territories.

National Headquarters estimates that upward to 100,000 will make application to take the April 24 test. This will be last test given during the current academic year.

Application blanks may be obtained by students from the nearest local board. They do not have to return home to the local board which has jurisdiction over them.

To be eligible to take the Selective Service Qualification Test, an applicant, on the testing date

110 Vivacious Lasses To Enchant Miners

By Jerry Klobe

That a treat is in store for the Miners is evident by the fact that the Lindenwood College Choir will visit the campus this Saturday, March 1, for their annual presentation at Parker Hall and the dance in Jackling Gym afterwards.

After the 110 ladies arrive at 3:30 or 4:00 in the afternoon, they will go to the Edwin Long Hotel to get dressed for the concert. Then the choir will go to Parker Hall, where they will be met and taken to the various fraternity houses for dinner.

At 7:30 the concert will begin in Parker Hall under the direction of Milton Rehlg and accompanied by Virginia Rateliff, the choir will begin the program with a group of five numbers: "Blessing, Glory and Wisdom" by Bach, "Heavenly Light" by Kopylow, Brahms' "How Lovely Is Thy Dwelling Place", "Flower of Dreams" by Clokey, and Romberg's "Serenade."

Then a soprano solo will be presented of "Sehon Rosemarin" by Patsy Fields. Following this will be selections by the Lindenwood Sextet.

At this point in the program the M.S.M. Glee Club will sing "Joshua Fit de Battle ob Jericho" with a solo by Bill Thomson, baritone. The Glee Club will also sing "Eight Bells" and "Splash".

The Lindenwood Double Chorus will then sing "Pueri Hebraeorum" by Thompson. Then will follow a few special selections.

The final group of numbers will include the following favorites: "When Johnny Comes Marching Home" by Mead, "Wynken" by Nevin, "Winds in the South" by Scott, selections from Sullivan's "Pirates of Penzance", and Gershwin's "Liza."

Following the program the dance will begin in Jackling Gym which is being decorated by the Interfraternity Council. The Interfraternity Council has secured Harvey Levy and his orchestra to play for the dance.

Although the dance is sponsored by the IFC, all students are invited. However, the Student Council has decided to charge an admission of fifty cents this year.

ATTENTION

There will be an open house at the Methodist Church Friday, February 29th, at 7:30 P.M. Everyone is welcome and all Methodist students are urged to come. This is your chance to become better acquainted with your Pastor and to have a good time doing it. Make it a date - tonight - 7:30 P.M. - Methodist Church.

Love Overcomes Cuts As Triangle's Licata Takes Long Week Off

The first order of business this week is to congratulate Hugh Smith and Harry Pierson on having another of their growing number of birthdays. Our illustrious pledges commemorated the occasions by tunelessly (?) rendering appropriate greetings. As long as we're passing out bouquets, let's toss a few to Ken Cole, of Granby, Mo. for choosing Triangle as his fraternity.

Will wonders never cease! Among the unusual happenings was a house letter out more than three weeks before St. Pats. This was primarily due to the industrious effort of Hubcap Hubel, Corresponding Secretary. (Jim was P. Oed when I didn't mention him among the prospective candidates for the beard contest - maybe this will keep him happy. After all, he's too big to fool around with.)

Note - To all Mining Engineers: You'd better switch to Coal option. How else can you get a week off to see your true love without, that is, getting on cut probation? Seems as how Jack Licata has somehow arranged it. It has been rumored that there has been a new chapter of Triangle organized at Du Quoin. Keep up the good work, Jack. We'll all graduate someday.

Our thanks to Brother Johnny Powell for the new tile in the first floor vestibule. Looks great, John.

Last week, our boy, Jerry Metcalf, was sporting a highly polished eye. He says that it was obtained in a bout up at the gym in preparation for the boxing

AFS Men Tour Three St. Louis Foundries On Industrial Trip

Jack H. Thompson

On Wednesday, February 13, the section was very fortunate in having as their guest speaker the National President of the American Foundrymen's Society, Mr. Walter L. Seelbach of Superior Foundry Inc. Mr. Seelbach spoke on his recent trip to Europe for the International Foundrymen's Meeting. His talk included numerous interesting comments on the countries and people visited on the trip.

Among the recent activities of the Missouri School of Mines Student section was an all day tour and supper meeting in St. Louis. This tour of East St. Louis Castings, General Steel Foundries and Great Lakes Carbon Co. and the supper meeting was sponsored by our very generous and helpful big brothers, the St. Louis Section of the A.F.S. We appreciate the help and encouragement given by the St. Louis Section and wish to take this opportunity to thank every one of their members and officers.

Included in our distinguished list of guests present at the February 13 meeting were: AFS National Director A. L. Hunt, American Brake Shoe Co.; St. Louis District Chairman Ralph M. Hill, East St. Louis Castings; John Williamson, M. A. Bell Co.; R. Patton, Patton Equipment Co.; National Director, L. C. Farquhar Sr., American Steel Foundries; Jack Culling, Carondelet Foundry; and Norman Beukert, Carondelet Foundry.

CUPID STRIKES AGAIN AT THETA KAP HOUSE: ANOTHER MEMBER WEDS

Spring is early this year at the Theta Kap house. You can tell from the clouds of cigar smoke pouring out of the windows every Monday night. Close upon the heels of Bruskotter's wedding came the magnificent and stupendous wedding of William J. Barbier and the former Shirley Kruse with its accompanying liquid reception. Colossal!

The last straw, however, came last Monday night when Eddie Gegg strode in with a proud grin and began to pass out, ye olde smudge sticks. The charming Miss Dottie Fallert was the responsible party, having taken poor Ed's pin away from him. Ed seems pretty happy, though. Everyone mentioned above is to be thoroughly congratulated, and so much for the weekly society page.

Bill Barbier had a slight mishap, a few days after the wedding on the way back to Rolla. It seems his faithful old Ford was feeling a little too happy after the events of the previous few days and upped and threw a rod. This didn't throw the happy couple, however, and they made it back on the train. That kid ought to write a book.

The author, having returned from New York, is wishing he were back there. They decoy you into a few free cuts so they can snow you when you get back. New York's a nice place though. They gotta lotta pigeons in Central Park. We counted 21,052 plus or minus 20,000 of them before the comptometer broke. There were a few odd birds, but we didn't have time to make a Kinsey survey. We took those natives for a ride, though, thanks to the advice of "Rosie" Cowan and A. B. Herrgesell. The Subways in New York are all free, you know. It's those darn turnstiles that break you.

A word of encouragement to our starving boxers and wrestlers: Stay with it, men, only six more weeks of lent.

Selectee: "They can't make me fight." Draft Board: "Maybe not — but they can take you where the fight is and let you use your own judgment."

(Continued on Page 4)

FACULTY MEMBERS ATTEND NEW YORK NAT'L A.I.M.M.E. CONVENTION

Dean and Mrs. Curtis L. Wilson of Mo. School of Mines and Metallurgy, Rolla, Missouri, along with other faculty members and wives attended the annual American Institute of Mining and Metallurgical Engineers Convention in New York City, February 17 through February 22.

The faculty members and wives who attended are: Dr. J. D. Forrester, Chairman of the Mining Engineering Department, and Mrs. Forrester; Dr. A. W. Schlechten, Chairman of the Metallurgical Engineering Department; Dr. D. S. Eppelsheimer; Dr. H. R. Hanley; Dr. O. R. Grawe, Chairman of the Geology Department; Dr. T. M. Morris; Prof. A. Legsdin; Prof. L. B. Taylor and Prof. D. R. Schooler.

Dean Wilson is past Chairman of the Education Division and was also a member of the Board of Directors. He is currently the Chairman of the St. Louis section of the Institute.

Dr. Forrester, Chairman of the Mining Engineering Department, presented an address entitled "The Selection of Percussion Drilling Machines." Dr. Forrester is the Secretary of the Minerals Industries Education Division and is also on the Executive Committee.

Dr. A. W. Schlechten, Chairman of the Metallurgy Department, presented a paper on the Volatility and Stability of Metallic Sulfides. He also served as Chairman of the Round Table Discussion on the Training of Extractive Metallurgists. Dr. Schlechten is a member of the Executive Committee of the Extractive Metallurgy Division.

Dr. T. M. Morris presented a paper before the Mineral Beneficiation Division entitled, "The Measurement and Evaluation of Flotation Rate as a Function of Particle Size."

Prof. H. R. Hanley is Chairman of the Round Table Discussion on Addition Agents in Electro-Metallurgy and arranged that portion of the program dealing with the electrodeposition of zinc.

Dr. D. S. Eppelsheimer is program chairman for the Minerals Industries Education Division, vice chairman of the program committee for the Institute of Metals Division, and a member of the Metals Branch Council.

Int'nat'l Fellowship Has Mr. Tangri as Speaker for Meeting

Antoon Dabbous

The International Fellowship will hold its next meeting Feb. 29, 1952 in Harris Hall, room 300. Mr. K. Tangri, a graduate student in the Metallurgy Department will talk on "Renaissance in Politics." Mr. Tangri was the president of this organization, and it was under his guidance that the club has its present status.

The club is not exclusively for foreigners, as a matter of fact none of its members feels that way; and it is an occasion to extend an invitation to everybody.

MSM to Offer Awards At St. L. Science Fair

Missouri School of Mines and Metallurgy will be represented as one of the schools offering scholarships at the Science Fair, sponsored by the St. Louis Post-Dispatch, to be held at St. Louis this spring. MSM is to grant one four-year scholarship amounting to \$400.00 and two one-year scholarships of \$100.00 each. This will be accomplished by a remission of fees to the extent of \$100.00 annually.

The Science Fair is held by the Greater St. Louis secondary schools to promote interest in the scientific field. This is the first time MSM has participated in the granting of awards.

THE MISSOURI MINER

THE MISSOURI MINER is the official publication of the students of the Missouri School of Mines and Metallurgy. It is published at Rolla Mo., every Friday during the school year. Entered as second class matter February 8, 1945 at the Post Office at Rolla, Mo. under the Act of March 3, 1879.

Subscription Price \$1.00 per Semester. (Featuring Activities of Students and Faculty of M.S.M.)

MYSTERY PERSONALITY APPEARS IN M.E. DEPT.

During the past 80 years many characters have made an appearance on our campus. Most of these individuals have managed to leave the institution after a period of apprenticeship which ranges anywhere from four years on up. However, a new and different character showed up in the Mechanical Engineering Department near the end of the fall semester. After a thir degree interrogation many facts of interest concerning this individual were uncovered.

With the help of a good low curve he claims he should be able to graduate in something under 20 years and hopes to serve as loyally as his predecessor during that time. Like many other situations existing in the world today, he contends that his present position here arose from circumstances entirely beyond his control.

He tells us that his chest measurements are not exceeded even by those of Jane Russell's. His shoe size is a neat 18 and 27/32nd. He stands about 14 and 57/64th hands high with a four foot beam. His brew capacity is as yet unknown, but will no doubt do the Mechanical Engineering Department justice. He says that he requires very little food or drink and that if his Kansas City tailor didn't steer him wrong, his present garments should last for several years.

This new personality gives full credit for his success thus far to his plegemasters, Denver Patton et al. We feel that his illustrious background and family tree should long endear him to the hearts of all our co-eds as well as some of the male students. He hopes that thru the years he will get to know many of the student body and that his visit here with us will be both long and pleasant.

He tells us that he will make his appearance on campus sometime next Wednesday, March 5th, to announce a regular ASME meeting.

Sigma Nu's Advance New Head Decoration

By Charles Eckerle

Accompanying the redecoration which has been underway at the Snake House for the past two weeks, there were a good many ooh's and aaah's, as the fellows gazed unbelievably on newly painted walls, ceilings, and woodwork. "Looking nice, looking nice," says Commander Kent.

Good Lord! What in the ---! How in the ---! Well, its different anyhow. Not bad, not bad. Modern art, yeah, that's what it is, modern art. These were some of the comments the writer overheard when the vacationing Sigma Nu's returned and beheld the heads, which had been painted in their absence. To coin a phrase, the heads at Sigma Nu are unique. Who else has chautreusse walls and ceilings set off by black woodwork?

The periodical absences of Ed Oliphant, "the liensure senior," have been very conspicuous of late. It seems as though some company or the other is always asking him to come see them on an expense paid interview. Ed claims the two inch steaks he is forced to subsist on, while in route, are becoming unbearably monotonous.

A new bunch of enlisted men got seasick over the rail. Soon one of the old salts joined them and sarcastically asked, "What is the matter, Jones, got a weak stomach?"

"Hell no," gasped Jones, "I'm throwing it as far as the others."

Breezes From The Windjammer

New angles are always coming to light in every field of human endeavor. For instance, along the cribbing line, someone discovered a spectacle case in which the lining is on a panel. This panel can be turned down, allowing a good view of a set of crib notes. From now on all students who wear spectacles will be the envy of their fellow students. Another gimmick is the twenty foot pole for girls who can't be touched with a ten foot pole.

After looking at some cigarette ads, and noting their boring similarity, 10,000 cu. ft. of hot air blew the following definition through one ear and out the other. "A cigarette is two and one half inches of thin paper firmly stuffed with dried weeds. When lit at one end and huffed at the other, the cigarette becomes a portable, hand-held grass fire. It then enables its owner to experience, in miniature, all the sensations of an arsonist. Through this satisfying characteristic, it is believed that the common cigarette annually prevents ten million dollars of damage from fire bugs.

As an aid toward better orin-

tation for those who have had their applications accepted by Uncle Sugar's Travel Agency (see last week's column) a glossary of military terms is presented as an item of public service.

B.A.R. — Military recreation center.

Bronze Star — Officer's good conduct medal.

Cadet — Officer material, if you don't believe it ask him.

Marine Officer's Club — Installations built on beach heads by Seebies while waiting for the Marines to land.

Periscope — Navy peeping Tom.

PFC — Potential Fodder for the Cannons, synonym for you.

Pilot — Bus driver who soloed.

Pontoon — Platoon of Engineers.

Psycho — Military Phi Bete (much too smart to fight).

Quartermaster Corps — Chairborne paper-troopers.

R.O.T.C. — Right Off the Campus, synonym for rookie.

Special Service Unit — Army's answer to student theatre group.

Uniform of the Day — Varies: may be khaki, woolen, or helmet-liner, combat boots, and raincoat.

Be Happy-Go LUCKY!

Smoke the world's best cigarette—
You ought to smoke 'em too!
They're round and firm and fully packed;
Here's Lucky Strike to you!

Sue Titcomb
Texas State College for Women

If you and she have had a spat,
And you two now are partin'—
To patch things up, give her a gift
Of Luckies by the carton!

Solwyn Steinberg
City College of New York

LUCKIES TASTE BETTER!

The difference between "just smoking" and really enjoying your smoke is the taste of a cigarette. You can taste the difference in the smoother, mellower, more enjoyable taste of a Lucky ... for two important reasons. First, L.S./M.F.T.—Lucky Strike means fine tobacco ... fine, mild tobacco that tastes better. Second, Luckies are made to taste better ... proved best-made of all five principal brands. So reach for a Lucky. Enjoy the cigarette that tastes better! Be Happy—Go Lucky! Buy a carton today!

King Midas sat upon his throne
And uttered this decree,
"The golden touch you've heard about
Is L.S./M.F.T."

Intramural Boxing and Wrestling March 5, 6 and 7

Memphis Navy Defeats Miner Swimming Squad

The Miner Medley Relay Team, John Padan, Jerry Zacher and Lee Beverage, edged out the Navy in a close finish to win the first event. In the next event, the 220 yd. Free Style, Bob Gorman and his teammate Richard Hull, both broke the pool record. Gorman's time was 2:22 flat, breaking the former record of 2:23.7 established in 1949 by Lee Beverage of the Miners.

The next record to fall was the 120 yd. Individual Medley. Juergen Bloess of the Miners gave a repeat performance to establish a new pool and MSM record of 1:20.4. His former record of 1:21.2 was made in the Bradley University Meet last week.

At the start of the 440 Free Style the score was knotted at 34 all. The Miners were somewhat handicapped in this event as their distance performer Marty Johnson, was farmed out to Doctor Feind and Company for an appendectomy performance.

In this closing event, the 400 Free Style Relay, the Navy team of Bob Gorman, Joe Schriener, Dick Hull and Joe McKinna established a new pool record of 3:49.4, when they broke the old record of 3:54.5 made by Keller, Lundt, Schmidt and Pohlman of Washington University in 1951.

Final score Memphis Navy 49 and MSM 35.

Events, place, name, school and time:

300 yd. Medley Relay 1 John Padan, Jerry Zacher, Lee Beverage — MSM — 3:17.8.

220 yd. Free Style 1 Bob Gorman, Memphis, 2 Richard Hull, Memphis, 3 Don Anderson, MSM — 2:22 Pool Record.

60 yd. Free Style 1 Ed Donnelly, Memphis, 2 Ray Rucker, MSM 3 Howard Bullman, MSM — 31.4.

120 yd. Individual Medley 1 Juergen Bloess, MSM, Gene Davenport, Memphis, 3 Joe McKenna Memphis — 1:20.4 Pool Record and MSM record.

Diving 1 Fred Slover, Memphis

GOOD SHOW EXPECTED AS 8 CHAMPS RETURN

What is considered the biggest sporting event of the school will take place this coming Wednesday, Thursday and Friday, at Jackling Gymnasium. The Intramural Boxing and Wrestling Tournament is only a few days off and from the list of entrants it looks as if the spectators will be in for quite a show by the gladiators.

In the wrestling division there is six returning winners from last year's matches. From Sig Pi Lealand Beverage and Harry Coffee are back and they were winners in the heavy weight and 145 pound class respectively. Other winners from last year are Tony Bruskus, Sig Ep, 135 pound; Ed Ferber, TKP, 126 pound; Harold Crane, TKP, 118 pound and Charles Pashedag, Triangle, 175 class.

Runners up in the wrestling from last year and back for a second shot at the title we find Bill Oshership, 118; Pete Kemp, 126; Bob Gordon, 145; and Joe Murphy, 175.

Only three first place winners will be around again this year, for the boxing. Bob Collins, 155, champ, Ind; Martin Prager, 118 winner, Theta Xi; and Jack Eason, 126 pound, Pi K A. Runners up include Gerald Metcalf and Bob Scott.

two wins against eight losses.

The Miner swimmers were another losing proposition this semester. If the preceding statement sounds as though I am a defeatist, it wasn't meant to be as such. The swimming team is one of the best small college teams in the country. If you will notice, three of the nine meets were against Service teams. Both Fort Knox and Memphis Naval Aviation Station have the cream of the countries swimmers on their team. It is evident that if we want a winning swimming team all we have to do is schedule teams more in our league.

If some of you readers were unlucky enough to have read this column in the last issue, you will remember that the theme of the article was school spirit. One of the students, after reading the article, asked me an embarrassing question. He wanted to know how many basketball games I had attended this season. I was forced to admit that I had been to only three of the seven home games this season. Unfortunately my questioner missed the whole point of the article. I was not crying over spilt milk, but trying to stir up a little school spirit for future contests in MIAA competition. School spirit has been on a steady decline here at MSM. This is especially evident in the attendance and amount of cheering at all varsity competition this school year. An unbiased observer would think we are bashful or else ashamed to cheer for our team. Let's try to get out and support the teams. They are playing for your benefit.

Miners Bow 109 to 82 To McKendree Five

By Norm Nlemeyer

Monday night, February 11, the Missouri Miners bowed to a powerful McKendree five 109-82 at the Matusa, Ill. high school gym. Hoydt set a new McKendree scoring record with 45 points. Faulkner was high man for the Miners scoring 20 points, closely followed by Burns with 19 points. The Miners led by one point at the end of the first quarter. McKendree's superior height began to show in the second stanza, however, as they went on to lead 46-39 at the half. The Miners were never in contention through out the second half as McKendree continued to roll up it's impressive score.

Miners	FG	FT	Pts.
Faulkner	8	4	20
Miles	0	0	0
Jenkins	1	0	2
Abendroth	3	1	
Orrick	3	2	8
Huffman, G.	3	5	11
Weitzel	0	0	0
Rucker	0	0	0
Burns	6	7	19
Huffman, S.	2	0	4
Ross	2	1	5
Koelling	3	1	7
McKendree	FG	FT	Pts.
Hoydt	16	13	45
Leckrone	2	2	6
Godney	4	0	8
Herrin, Ron	9	2	20
Maddox	5	1	11
Herrin, Rich	4	5	13
Cruse	0	2	2
Butler	1	0	2
Heitman	0	0	0
Shafer	0	2	2
Score by quarters	1	2	3
McKendree	18	46	75
Miners	19	39	59

MARYVILLE DROPS MINERS INTO CELLAR

The Miners were bounced back into a permanent position in the M.I.A.A. basketball cellar as they were defeated 79 to 68 by the Maryville Wildcats last Saturday night.

Bob Faulkner and Gene Huffman took their usual spot among the scoring leaders as they bagged 23 and 17 points respectively. Sonny Koelling collected 14 points to boost the Miners scoring attack but to no avail.

This was the last conference game of the season for the Miners and the loss left them in last place in the MIAA cellar. The conference season record shows 2 wins and 8 losses.

Box Scores:	FG	FT	F	TP
Miners	FG	FT	F	TP
Faulkner	6	11	2	23
Jenkins	0	2	5	2
Abendroth	0	3	5	3
Orrick	2	1	5	5
Huffman	6	5	5	17
Burns	1	2	3	4
Koelling	4	6	3	14
Maryville	FG	FT	F	TP

Garner	2	0	4	4
Ramsey	5	3	4	13
Wright	5	1	3	11
Coulter	0	1	1	1
Monochino	4	3	4	11
Lyle	0	1	4	1
Grunwald	1	1	3	3
Belt	5	0	2	10
Buckridge	6	1	3	13
Yurchak	1	1	5	3

Varsity Rifle Team Wins Two More Meets

The varsity rifle team defeated Rose Polytech of Indiana in a four position match 1864 to 1805 and the University of Cincinnati in a three position match 1383 to 1372. These two wins brings the varsity record to three wins as against two losses for the year.

The ROTC team has not fared so well but has beaten the State University of Iowa for its second win against seven losses. The recent losses were to St. Bonaventure, University of Illinois, and Iowa State.

Big guns for the team have been Walter Irvin and John Schemel, both of whom have set new records for the MSM range. Walt Irvin's Match Total of 383 x 400 bettered the old mark of 379 x 400 set by Schemel earlier in the year. John Schemel has also fired a 99 x 100 in the kneeling position to better the 98 x 100 shot by W. G. Myers in 1949.

The ROTC team has just completed the firing of the long eighty shot Fifth Army Match. The ten men ended up with a total of 7007 out of a 8000 possible. High man was Schemel followed closely by Allan Holiday, an up and coming freshman. The team ranking will not be known until all the scores are tabulated by the Fifth Army Headquarters.

The team has shown a great deal of improvement in the past few weeks and should be in fine shape for the road trips in March. Teams from the School of Mines will compete in the Kemper Midwest Matches and in the Illinois Invitational Match in preparation for the National Intercollegiate Matches at Oklahoma A.

Tankmen Lose Three Meets Against Strong Teams

The M.S.M. Tankmen dropped their last three meets which can be attributed to the fact that they have had to contend with staggering competition. This situation has prevailed all season and the Tankmen have done exceedingly well by scoring the number of points they have against their competition.

Although the 300 yd. Medley Relay team, consisting of John Padan, Jerry Zacher, and Lee Beverage swam a good race, they were beaten out by the Washington U. team in the excellent time of 3:16.6. Don Anderson won the 220 yd. freestyle event in 2:31.6. Ray Rucker took a second in the 60 yd. freestyle. George Bloess broke the M.S.M. record (set by him the previous week) in the 120 yd. individual Medley event by covering the distance in 1:21.1. Lee Beverage placed second and Ray Rucker third in the 100 yd. freestyle event. George Bloess and John Padan placed first and

and M on the 22nd of March. At the Illinois matches the team will be facing the "big ten" so the Miners are in top competition. This team will be weakened by the absence of some of its top men at Illinois as it is over the St. Pats holiday and these men prefer their dates to rifle shooting.

third, respectively, in the 200 yd. Backstroke. George broke the M.S.M. record (also set by him) in the excellent time of 2:29.2. The final score of the meet was: Washington U. 58, M.S.M. 26.

Memphis Naval Air Station, started off the meet by winning the 300 yd. Medley Relay in the fast time of 3:17.3. Ray Rucker placed second in the 50 yd. freestyle. George Bloess, "Old Faithful", copped first place in the 150 yd. Individual Medley in 1:50 and another first in the 200 yd. Backstroke in the time of 2:31.2. Gerry Zacher placed second in the 200 yd. breast-stroke. Lee Beverage and Don Anderson make a spectacular showing in the 400 yd. freestyle by finishing first and second, respectively. The final score was: Memphis 56, M.S.M. 28.

College Men!
CHOOSE A CAREER
in the U.S. Air Force

Aviation Cadet Program Offers Special Opportunities for Collegians Now Preparing for Military Service

Here is a real man-size opportunity! You can choose—immediately—between being a Pilot or Aircraft Observer in America's swiftly-expanding Air Force. The Air Force encourages candidates to stay in school and graduate. However, seniors and students who anticipate early entrance into military service can insure their future and serve their country best by applying for Aviation Cadet Training today. You receive the finest training and experience when you fly with the U. S. Air Force—experience that pays off in later years.

WHO MAY APPLY

AGE—Between 19 and 26½ years.
EDUCATION—At least two years of college.
MARITAL STATUS—Single.
PHYSICAL CONDITION—Good, especially eyes, ears, heart, and teeth.

HOW TO QUALIFY

1. Take transcript of college credits and copy of birth certificate to your nearest Air Force Base or Recruiting Station.

2. Appear for physical examination at your nearest Air Base or Government expense.

3. Accomplish Flying Aptitude Tests and enlist for two years only!

4. The Selective Service Act awards you a four-month deferment while awaiting class assignment.

5. Immediate assignment to Aviation Cadet Training Classes starting May 27, July 19, August 19 and October 2, 1952.

6. Attend Aviation Cadet Training School for one year—either as Pilot or Aircraft Observer. Get \$105 monthly plus food, housing, uniforms, and other benefits.

7. Graduate and win your wings! Commissioned as a second lieutenant, you begin earning \$5,000 a year. In addition, you receive \$250 uniform allowance and a 30-day leave with pay.

WHERE To Get More Details

Visit your nearest U. S. Air Force Base or U. S. Army—U. S. Air Force Recruiting Station or write direct to Aviation Cadet Headquarters, U. S. Air Force, Washington 25, D. C.

U.S. AIR FORCE

U. S. NAVAL ORDINANCE ON CAMPUS TO OFFER JOBS TO GRADUATES

Employment in the Naval research laboratories and the National Bureau of Standards' research laboratories located in California will be offered to qualified students by representatives of these laboratories who will be on campus on March 24, 25, 26 to interview graduating seniors, graduate students, and alumni. To be considered for employment the student's major field of study must be in engineering, electronics, physics, chemistry, or mathematics. Definite offers of employment will be made to students who fulfill the requirements for work in mechanical, electronic, electrical, and aeronautical engineering, and in physics. Some job openings also exist in other engineering fields and in chemistry and mathematics.

A group meeting for interested students will be held at 4:00 p.m. Parker Hall Aud. Monday, Mar. 24. A film relating to the research facilities and activities of the laboratories, including the development and testing of guided missiles and improved rockets, will be shown at this meeting. General information regarding employment opportunities will also be presented at this meeting. Students may arrange for individual interviews by contacting Mr. Dean, Parker Hall 104.

The Naval research laboratories and the National Bureau of Standards' research laboratories located in California which will be represented by the recruitment team are as follows:

U. S. Navy Electronics Laboratory, San Diego,
U. S. Naval Ordnance Test Station, Pasadena.
U. S. Naval Ordnance Test

tournament. That could be disputed, but if it is true, everyone in that class had better watch their step. You should have seen the other guy.

It has been reported that Jack Zenik is now welching on wagers. McQuie, take note.

Things are getting rough around here. It's getting so that the mortality rate is constantly on the rise from the rush to the card room right after meals, etc. Two pledges and an active were sent to the hospital last week with fractured skulls. It has been suggested that the card room be expanded to include the living room so that everyone who wants to can engage in pinocle at any time. Bleachers are also to be built in the present card room for interested spectators. (Suggestion to the I.F.C. - since there is a bridge tournament, how about expanding it to include pinocle as well?)

CIVILS HEAR OF TWO CASH AWARDS AT ASCE MEETING; NOW ALL GUN

300 Harris Hall was the scene of another A.S.C.E. meeting Wednesday night. Prof. Carlton told of two awards which were currently being offered. The first is called the Kennedy Awards which consists of \$50 offered for a Civil Engineering term paper. The second award is known as the Flint Award which is given annually to a civil in his junior year, who is thought to have the best qualifications for being a good engineer. This award consists of several expensive volumes of engineering handbooks.

Dr. Edward Clark the State Geologist, was introduced and proceeded to give a talk entitled, "Relation of geology to Engineering." He told the meeting that the prime needs of the present day geologist was to be able to explain his findings in layman's terms. In order to further this some schools are teaching a course known as Geological Engineering which gives a geologist - some basic engineering training.

At this meeting the members were honored with the presence of Dean Wilson and several other dignitaries from the U.S.G.S. Mr. Henry Beckman head of the Water Resources Dept. of the local office of the U.S.G.S. will give the talk at the next meeting.

Station, Inyokern.

U. S. Naval Air Missile Test Center, Point Mugu.

U. S. Naval Civil Engineering Research and Evaluation Laboratory, Port Hueneme.

U. S. Naval Radiological Defense Laboratory, San Francisco.

National Bureau of Standards, Corona Laboratories, Corona.

National Bureau of Standards, Institute for Numerical Analysis, Los Angeles.

These laboratories offer their scientific and engineering employees an excellent opportunity to make contributions to science and to develop professionally. Their research facilities are ranked among the finest in the world.

He: "You are the sunshine of my life. You alone reign in my heart. Without you life is but a dreary cloud."
She: "Say, is that a proposal or a weather report?"

SELECTIVE SERVICE

(Continued from Page 1)

Selective Service Test indicates the same level of ability as a score of 120 on the Army general classification test. Only 16 percent of the entire population of this country are capable of achieving such a score.

Many students have been confused in differentiating between the "S" and "I-S" deferments. The "I-S" deferment is considered on the basis of class standing or qualification test and is discretionary on the part of the local board. It may be granted by the local board each successive year, thus enabling students who continue to meet the criteria to complete their education.

The I-S deferment, on the other

hand, is provided for by the law. A college student ordered to report for induction while he is satisfactorily pursuing a full-time course is entitled to this I-S deferment until he finishes his academic year provided he has not had his induction postponed or been deferred as a student prior to June 19, 1951. He may be given but one such deferment and it is incumbent upon him to notify his local board of his status when he receives the order to report for induction.
