NEXT WEEK'S INTERVIEWS

Monday, November 17, Bell System, Harrison and party, interested in contacting men in EE, ME, CE, Ch. E., Met., Cer., and Phys.

Monday, November 17, Caterpillar Tractor Company, interviewer Mr. Sutton, interested in contacting men in ME, Ch. E., Cer., Met. and CE.

Tuesday, November 18, Bell System continued.

Tuesday, November 18, Caterpillar Tractor Company continued.

Tuesday, November 18, Monsanto Chemical Company, interviewer Mr. Russell, interested in contacting men in the Ch. E. and ME.

Tuesday, November 18, Hughes Tool Company, interviewers Mr. Berleth and Mr. White, interested in contacting men in Met. and Ch. E.

Wednesday, November 19, Bell Systems continued.

Wednesday, November 19, Monsanto continued.

Wednesday, November 19, Continental Oil Company, interviewer Mr. Cobb, interested in contacting men in Min. E., Ch. E., ME, and Chemits.

Thursday, November 20, Corn Products Refining Company, interviewer Mr. Wilson interested in contacting men in Ch. E. and ME.

Thursday, November 20, Illinois State Highway Department, interviewer Mr. McCree interested in contacting men in CE and other engineering graduates interested in employment with Highway Departments.

Friday, November 21, Sperry Gyroscope Company, interviewer Mr. Dwyer interested in contacting men in EE, ME, and Phys.

Friday, November 21, Missouri State Highway Department, interested in contacting men in CE.

PIKERS MADE BEST OF HOMECOMING WITH ITS AWARDS AND PARTIES

Homecoming was a great success at the "House on the Highway", and the large turnout of alumni was beyond all expectations. The festivities started off with a party Friday night, and the next day the chapter and alumnus took in the football game. That evening the annual Homecoming banquet was held, and the Smythe Award for chapter proficiency was presented to Alpha Kappa by Jim Brown, National Treasurer. Enoc Needles was the guest speaker for the evening. His talk on "Opportunities Still Remain in America" was enjoyed by all as were his anecdotes of his days as an undergraduate. The evening was climaxed by another party which the chapter and alumni will long remember.

The decorations committee headed by Campbell Barnds is to be congratulated for their fine efforts on the homecoming display, which netted third prize for the Pikers. Thanks for a job well done.

Bob O'Brien, our intramural manager has been busy coaching the basketball team, which appears to be much stronger than last year. Back with the Pikers from last year are Clay Robbins, Ray Pfaff, Don Pickering, Nick Muscovalley, and Walt Grueninger. Pledges Dan Mueller, Bob Johanningsmeyer and Pete Gerard are going to be a big part in the team's attack.

Sam Schneider, 52, was kind enough to bring the record of "It's in the Book" with him; much to the dismay of the chapter. But under very mysterious circumstances the record has disappeared and hasn't been heard of. "Nasty Break".

\$350 ALLOCATED TO MSM PLAYERS BUDGET BY STUDENT COUNCIL

The bi-weekly meeting of the Student Council was held Tuesday night, Nov. 11, at 7:00 p.m.

There were twenty members present. The minutes of the previous meeting were read and approved, and the Board of Trustees for publications gave their report to the meeting. The Board gave their report as follows:

(1) The salary schedule for the Missouri Miner has been approved.

(2) The budget for the Rollamo was approved.

(3) Mr. Higgs suggested that two new Student Council members be appointed to the Board of Publications along with one new faculty member and the Business Managers of both the Miner and the Rollamo.

Following this report, a motion was made that if neither a member nor his alternate be present at the meetings for a total of two meetings that he would be subject to impeachment. The motion was defeated.

Under New Business, the treasurer gave a report of the Student Council's financial status. Immediately following this report a motion was made and passed that \$350 be allocated to meet the budget of the M.S.M. Players for the school year.

The meeting then adjourned at 7:30 p.m.

ETA KAPPA NU VISITED BY REPRESENTATIVE OF THEIR ADVISOR BOARD

Gamma Theta Chapter of Eta Kappa Nu (HKN) was privileged last Monday, November 10, 1952, to have as its guest Mr. A. Naeter, a member of the National Advisory Board of Eta Kappa Nu and the chairman of the Electrical Engineering Department at Oklahoma A & M. Mr. Naeter's visit was in the form of an inspection tour of the chapter, E. E. Department, and the school.

After his arrival early Monday afternoon, Mr. Naeter made a tour of the E. E. Department and the school and met with Dean Curtis L. Wilson and E. E. Chairman, Professor I. H. Lovett.

A meeting with the officers of Eta Kappa Nu was held at 4:00 p.m. At the meeting Mr. Naeter gave advice and suggestions and answered any questions on National policies and precedents. At 7:00 p.m. Monday evening Mr. Naeter addressed a meeting of the entire membership. He told of the expanding size of the organization, 55 chapters and 20,000 members, at the present time, and of the tentative plans for a national convention in 1954 to celebrate the 50th anniversary of the organization.

At a regular meeting on Tuesday, Oct. 28, 1952, four junior students were accepted into membership by a vote of the chapter. These four men are Jerry Swearingen, Kenneth Jenner, Gene Reynolds, and Joseph Watkins. During the past two weeks these men have been serving their pledgeship to the organization. Their initiation will be held tomorrow afternoon, November 15, 1952. A banquet, featuring a speech by Dean Curtis L. Wilson, will be held in the Pine Room of the Greyhound Bus Depot following the initiation.

NOTICE

The Glee Club has changed its regular meeting time from Monday to Tuesday at 9:00 p.m. We hope that this will make it possible for more men to attend, as we would like to have a large group for our trips. Our next appearance will be at the Thanksgiving Convocation November 25.

AIEE-IRE Lectured On High Voltage Arc By Mr. George Manke

The local chapter of the AIEE-IRE held a regular meeting last night at 7:00 p.m. in Norwood Hall. Featured at the meeting was a lecture and demonstration given by Mr. George H. Manke.

Mr. Manke is the chief Laboratory and Training Engineer for the Line Material Company of Milwaukee, Wisconsin. In this capacity he was charge of the operation of seven laboratories and also is responsible for the hiring of new engineers and their subsequent training and education in the company. Mr. Manke graduated from Oregon State College in 1933 with a B.S. in Electrical Engineering. After his graduation he held several jobs up till 1943 when he started with Line Materials and advanced to his present position.

The title of Mr. Manke's talk was "Suicide of a High Voltage Arc". In it he outlined the need for arc extinguishing devices on power systems and gave a comparison of various schemes to accomplish this. He also gave a complete discussion of the expulsion principle. Slides and a demonstration of expulsion fuses were included in the talk.

The membership committee asks that all EE's check the EE Bulletin Board for the listing of AIEE-IRE members and make any corrections or additions in the manner prescribed.

Sig Eps Receive Tall Tales From Alumni of The Outside World

With reappearance of "The Green Stuff" while watching our Gridiron Heroes Bill Roemer, Dick Hampel, and Connie Neal perform, memories of long lost days were recounted. Chief contributors to the tall tales of the outside world were Bill Amend, Babe Danz, Gene Sanders, Gene Warren, Tom Newkirk, Dick Roemer, John Priest, and Bob Flore. We were all happy that they were able to make it and hope they return soon.

WARNING !!! Red "Sherlock" Howe is still looking for the culprits who let the air out of the tires of his pride and joy.

A congressional investigation is pending inasmuch as it was noted that Jimmy (Carroll) Argo was seated on the Kirsksville bench. It is rumored that he was trying to shave the point spread.

Trytko Tribe, as usual, was well represented at the football game. Not only the five that the opposing bench was accustomed to, but two sisters, Betty and Mona, were imported from South Bend. As a result Notre Dame upset Oklahoma.

Gene (I still like Adlai) Lang blames the Republicans for walking off with his wife's glasses after the Cocktail Party following the game. In a press interview he says, "They took everything else, they probably have our glasses too."

An unusual sight was to see Tony Bruskus and Hank Andre bring dates. (I guess we all have a chance Miners.) Since they had the party well organized, they had to enjoy the fruits of their labor.

Johnny Stanley and Horace Heidt now have competition. The Sig Eps, with the help of Gail "This Beer's Hot" Bollman, have their own arrangement of "It's In The Book."

Something new has been added at the House of the Red Door. Handsome George Stoddard, the house steward, served a Buffet style meal. The House wishes to congratulate him on a job well done.

TECH CLUB CELEBRATES FOURTH ANNIVERSARY ON CAMPUS THURSDAY

This week brings to a close the fourth year the Tech Co-op Club has been in existence. When the Tech Club shingle was first hung out at 1304 Pine Street on Nov. 15, 1948, there were 72 charter members. The organization has now grown to a membership of 110, and the house proudly displays a neon sign. The Tech Club teams have consistently placed high in the intramural sports, being 5th in the 1951-52 season. A Tech Club man, Bob Edmonds set a new record at the Homecoming Cross-country race last Saturday. Commemorating their fourth anniversary and setting the scene for numerous toasts to having an even better organization, the Tech Clubbers had a special feed Thursday night. Included on the menu were club steaks and ice cream and cake, a bill of fare sufficient to indicate that the Tech Club intends to celebrate many more years of successful operation.

SIGMA NU'S CELEBRATE FIFTIETH ANNIVERSARY WITH HUGE BANQUET

Our Fiftieth Anniversary was in every way a huge success. Not only did we have excellent speeches at the Banquet, a wonderful party Friday and Saturday night but we also rounded out the Anniversary with tieing for first place for the Homecoming decorations.

We want to thank Professor Lloyd of the Humanities Dept. for his excellent speech that he gave at the banquet. His humor completely captivated everyone present and added immeasurably to the success of the banquet. Prof. Lloyd spoke about the traditions of the school what they have been, the crisis the school met during and after the War. To his every comment, Dean Curtis Wilson nodded smiling agreement. Among the speeches was a short, but very much to the point, speech given by Lou Roth, our Vice-Regent which is going to set the theme for our next five years. This theme will be: A New House by '55. To this end we shall work hard and unceasingly. As Cousin Jack put it "A new House, by heaven, for '57."

In connection with our getting a new House, there was a meeting of the Alumni Saturday morning, to set up a committee to work on the finances and the planning of the house. Chairman of the Committee was Alumnus Don McCormack of St. Louis. Don was also our very able Toastmaster at the Banquet.

We wish to show our appreciation to all of the Active members and Alumnus who helped us make this Anniversary a very successful one. We want to thank: Mrs. Sanders, Mrs. Cole, Mrs. Ellis and Mrs. McCaw for the hard work that they did Friday morning on the refreshments for Friday afternoon.

We wish to thank "Humble" Herb Lincoln and his committee for the decorations which got us tied for first place. We want to thank Con. Sanders for the tremendous amount of work that he has put in, contacting the Alumni and arranging their lodgings. We wish to include Bob Robbins, Phil Cornell, Reiner Haubold, and Duke Ellis in our thanks, for taking the pictures which will keep this party in our memories. They used a case of flashbulbs (128 bulbs), and 8 rolls of film with 20 pictures on each roll. We want to thank "John L" Vienne for arranging the banquet and Duke Ellis for the articles which he wrote for our Fraternity magazine. We want to especially thank Al Kent for the magnificent supervisory job.

(Continued on Page 4)

Seventeen Pledges Elected by Blue Key at Last Meeting

A special meeting of Blue Key Fraternity was held last Tuesday afternoon for the purpose of electing new members. It was decided that seventeen men should be chosen from the field of fifty or more eligible. The honored seventeen, who were chosen on a basis of their service to our campus, are: Bob Amundson, Alan Burgess, Bob Crosby, Bill Feldmiller, Tom Fuller, Gunther Helm, Bob Hoffman, Shay Huffman, Bernie Juskie, Herb Lincoln, Gerry Matcalf, Norm Niemeyer, Howard Roberson, Dick Stevens, Waldo Smid, Vern Volker, and Ray Williamson. Congratulations men, we hope that you will continue to be of service to your campus as members of Blue Key.

After a few weeks of pledging, these men will be initiated at a banquet to be held next month.

COLOR SLIDES PROVIDE ENTERTAINMENT FOR THE PETROLEUM CLUB

The members of the Petroleum Club were entertained on the evening of Oct. 29 by a show of color slides on Halliburton Oil Well Cementing Co. taken by Jerry Hughes during the past summer. Jerry Hughes drove a cementing truck and considered the job to be very educational.

Pres. Ruppert disclosed that the constitution had been lost "somewhere along the way" and quickly appointed a committee headed by Pat Patterson to correct this embarrassing situation. The Engineers Day project in retrospect seemed to be a success, especially in helping the guys recall the difference between a Marsh funnel and Marsh gas, etc.

Do you know that the oil companies have offered an average starting salary of over \$360 a month. Look at the bulletin board and see how the oil industry stacks up as a career—then come on over to our next meeting and join the Petroleum Club.

Kappa Sigs Complain Of Wild Bees in the House Over Weekend

by Donn and Willie

On Friday the doors of the Big White House were pushed open to receive the grads of M.S.M. Many a footstep crossed the threshold to enjoy a week-end of fun. There was activity of all kinds buzzing on the campus.

Not only this week-end brought the grads and undergrads together again but it turned out to be "Be Kind to Animals Week". Yes an agreement between two outstanding pets of the campus, the beaver and the mouse put a short halt to a long tradition. But on Monday night it was resumed with a greater than ever zeal.

On the sports side. Monday night the Kappa Sigs took to the handball court. Shay Huffman played outstandingly against one of the school's best only to lose by a small margin. Karl Miller and Bob Gordon won their game.

Last Monday along with handball our basketball squad was victorious over Sig Pi by a score 39-30. There was fine play by Dick Hirsch and Bob Schafer. Also some new faces showed as fine players; Carl Glaser, Dale Chapman, Frank Elles and also Skip Flack.

I thought there must have been a bee flying around the Kappa Sig house Friday and Saturday because Honey was being said all the time. We found it only to be a lover, and his girl. Don Kummer will be the captain of our bee club.

Alumni and Students Thoroughly Enjoy Homecoming Festivities

JOINT MEETING OF SAE AND ASME TO BE HELD NEXT WED. NOV. 14

In the last article written, there was an underestimation as to the number of men attending the SAE Convention in St. Louis. There were fifteen men who attended the meeting and all had a good as well as interesting time. Thursday morning, an alumnus of MSM, Mr. Ray McBrien presented a paper before the convention on "Practical Use of the Spectograph and Electron Microscope for Study of Diesel Engine Conditions." There were sessions held in the morning and afternoon of Thursday and Friday and on Thursday evening, there was a dinner sponsored by the St. Louis Section of SAE.

Last Wednesday, members of both SAE and ASME turned out by the throngs to take an inspection tour of the Ramco Plant at Sullivan, Mo. They left here at about 6:30, drove to Sullivan where the Plant Engineer lectured on the more modern developments in the piston ring. Then they were split into small groups and guided through the plant. Upon completion of the tour, they sat down to a buffet luncheon before returning to Rolla.

Next Wednesday, Nov. 14, there will be a joint SAE-ASME meeting in which there will be two seminar papers presented.

The SAE club of MSM ranks close to the top of the list in membership for SAE student chapters, with 55 members. Come on men, let's make it the biggest in the nation. There are many more interesting meetings and projects coming forth so you men who have missed out on some of our activities, you can still join and enjoy the ones in the future.

THETA KAPS CONDUCT PHYSICS EXPERIMENT IN CHAPTERROOM

Mid-semester has whizzed by and already smiles are broadening with thought of Thanksgiving holidays. It's been a busy week around the Theta Kap house, but Homecoming and mid-semester quizzes have finally passed and now just one problem remains to be solved... does a ball thrown directly upward come down with same velocity after rebounding from a flat overhead obstacle.

In the chapterroom lab. of Von Ludewig and Herr Godel this strange experience was performed. The net result showed that the plaster is hardest in the northeast corner of the chapterroom.

Sam Gulotta was last seen lying in Phelps County hospital minus one (and only) appendix. It's a tough break because Sam doesn't get to any homework and there's no one around except student nurses. This is tough? We wish Sam a quick recovery.

Congrats to Dick Farmer and Don Barszowski for their fine showing in the Homecoming cross-country run. Dick placed sixth and Don took a 14th good for a fifth place and 200 points. The basketball team has not as yet played but they're working hard and looking forward to that first game. The handball doubles team won its first match while the singles entry lost.

Brightening up the old head are three new sinks which have been added with the compliments of one of the alumni, Jim Murphy. Further brightening up proposals for the future include four new lamps for the chapter room.

This year's Homecoming was the largest and one of the most successful ever held at Missouri School of Mines and Metallurgy. Alumni begin arriving in Rolla as early as Thursday evening and by Saturday the crowd was estimated as the largest ever to return to M.S.M.

The weekends scheduled events moved in a smooth, uninterrupted flow. Friday night a "dutch treat" dinner was held in the Pine Room at the Greyhound Bus Depot. Saturday's many events reached a climax at the Annual Homecoming Dinner held in the College Inn of the Hotel Edwin Long. The only gloomy spot of the weekend came with the Miner's defeat by a strong Kirsksville eleven Saturday afternoon.

Saturday morning the displays built by the fraternities on the campus were judged. The results of the judging ended in a tie between Kappa Alpha and Sigma Nu for first place with Triangle placing second and Pi Kappa Alpha third.

Between activities the grads found time to gather in groups around the campus and reminisce about the "good old days" when they were students at M.S.M. For most of them this brief chance to relive by-gone days ended much too fast.

Lambda Chi Looks Back on Weekend as Quizzes Face Them

Now that Homecoming is over, everyone has settled down with their books and cramming for midsemester quizzes. But it doesn't seem easy as the thoughts of last week-end still ring through our minds. With a nice turnout of Alumni, one couldn't help but have a good time. We have one man who is still trying to evaluate the meaning of a good time and justify sleeping on a bush. The coming weekends are jammed pack with activities and everyone is wondering whether to push the books aside and hope for easy quizzes or push the women aside and hope for — well, easy quizzes.

The chapter wants to congratulate Pledge Bob Hazelwood on his fine exhibit of stamina and drive in running the cross-country at Homecoming. Nice going Bob and remember there is another one next year.

Brother Cauthorn is still running around the house wondering what happened in the last Presidential election. He just can't believe that the election judges turned honest over night and counted the ballots correctly. His other theory is that each Democrat didn't vote enough times.

Last Monday night, Pledges Gratz, Janesky, Straumann, Germer, Hazelwood and Kastler were formally pledged to the fraternity. Congratulations men and glad to have you with us.

What a lucky man Seales Anderson is, at least when his girl writes, she sends along stationery and a stamped-self addressed envelope. Tell us how you do it Andy.

With the Harvest Dance less than 2 weeks away, Pete Van Dusen is running around getting ideas on making this dance one of the best of the year.

THANKSGIVING HOLIDAY

Under the authority of its Constitution the Student Council has declared that Monday, December 1 will be a holiday.

The Thanksgiving holiday will therefore begin at 8:00 a.m. Thursday, November 27 and will end at 8:00 a.m. Tuesday, December 2.

William E. Patterson
President, Student Council

THE MISSOURI MINER

THE MISSOURI MINER is the official publication of the students of the Missouri School of Mines and Metallurgy. It is published at Rolla Mo., every Friday during the school year. Entered as second class matter February 8, 1945 at the Post Office at Rolla, Mo. under the Act of March 3, 1879.

Subscription Price \$1.00 per Semester. (Featuring Activities of Students and Faculty of M.S.M.)

Letters To The Editor

Nov. 10, 1952

Sir:

Now that Homecoming is history, I feel that it is my duty to comment on a few of the injustices rendered during this festival of gaiety welcoming our Alumni. I have occasion during the course of my long day to come in speaking contact with many of the student body and to receive their opinions on things of mutual interest to most Miners, to wit:

1st) The obvious superiority of the Triangle Fraternities decoration, including theme. To most students this display was superior to any on the campus.

2nd) The obvious vulgarity of the so-called Sigma Nu first place display, which obviously leads to only one conclusion.

That next year most displays will tend to be as vulgar as possible to gain a prize directly proportional to their indecency, vulgarity, and general immorality.

3rd) That the judges were peculiarly composed of personnel very readily inclined to show favoritism toward certain organizations. I know that a great deal of sentimentality should be rendered "50th anniversary" organizations. But when obvious inferiority is shown in their displays, inferiority in theme, construction, original, and other phases of the necessary showmanship required for award of prizes it should overthrow this sentimentality and favoritism for true judging, rather than who it is.

Name Withheld

The Old Rat Hole

The big Homecoming blast has finally died down, the alumni are all safely back on their cattle ranches in Texas, and the weary students have wound their drowsy way to a dozen or more odd classes. The time is about due for mid-semester to descend, like a 100-ton punch press, on the unresisting back of hundreds of hapless Miners. It's no wonder one begins to get that stomped-on feeling about this time of the year. Who says M.S.M. doesn't forge men of steel?

Have you ever stopped to think what would happen if a girls' school were built in Rolla? Or if MSM suddenly became a real 50-50 co-ed institution? Would it be disastrous? If so, to whom? Would it be a boon? These questions and others of a similar nature were put to a group of Miners representing a cross-section of the student body (We tried to get a real cross-section but soon gave that up as a bloody mess.) The answers obtained were nothing short of replies.

A senior, when asked what he thought of the idea, replied "I think I Would Like It. I remember I used to like to date girls back in high school." Another senior was overjoyed at the thought. "Boy! that would be more fun than taking interviews," he said. Most other seniors questioned seemed to be in favor of the proposal. One had this comment to make, "I think it would be a disaster to the

Maybe you've heard the yarn going the rounds at the end of the past football season. It alleges that a reporter boarding the train carrying the Notre Dame team to the Indiana University game. Thinking to get a new slant to a story, he asked for the student manager.

"I understand," he said, "that you carry a chaplain to pray for the team."

"Yes, that's right."

"Would you mind introducing me to him?"

"Be glad to. Which one do you want, the offensive chaplain or the defensive chaplain?"

EDWIN LONG COFFEE SHOP

Good Food at Popular Prices

Lines & Angles

The large number of acorns falling from the oak trees makes it a case of nuts falling on nuts. The difference between automobiles and some students is the time and place for using anti-freeze. The fire at State street and Eleventh, last week was enjoyed by the local fire and police departments as well as the students. With mid-terms coming up, those 2 credit hour courses begin to look under-credited. The arrival of the Stephens College girls, gave the Stephens College Auxiliary (MSM Chapter) a good workout. Full reports of many of

Sigma Pi Lays Claim To Title of Champion Party Boys of MSM

Homecoming here at the house on 12th Street was a real success this year with lots of party going throughout the week-end.

Among alumni who returned to their Alma Mater were Bill Bevan, Joe Coffman, Fred Eckert, Slave Eftimoff, Bob Franklin, Dick Jones (now 2nd Lieutenant, USAF, Ed Kwadas, and John Makay. Also present were Mr. and Mrs. Nichols. Mr. Nichols was a member of the Prospectors, which was the parent organization of Sigma Pi on the M.S.M. campus. All of the Alumni seemed to enjoy themselves, and we certainly enjoyed renewing acquaintances and reliving past experiences with them.

Lee Beverage and Fred Taylor are laying dubious claim to the title of Champion Party-Boys of M.S.M. They say they visited every house on the Campus early Sunday morning looking for a party, but everyone else had already "pooped out", so they were forced to return home and celebrate by themselves. It was amusing Sunday to see the number of guys just getting up out of bed at about 7 p.m. These party week-ends certainly are fun, aren't they!

Everyone here has really been gunning all this week—what with mid-semester grades due tomorrow, all the Profs seemed to discover that they hadn't enough marks to grade us poor Miners on, so they all had to catch up at once. Now we can all rest until Finals. No? Oh, well—pretty soon it'll be Thanksgiving.

Monday night we played Kappa Sig on the boards—the results weren't in our favor, but the game showed that with a little teamwork our cagers can go somewhere this year. Keep

HOUSTON HOUSE

Newburg, Missouri

"After three generations of service it is
again our pleasure to serve you this semester."

Opportunities at General Motors:

a real chance—
a real challenge!

OUR continuous talks with you engineering seniors in schools from coast to coast convince us of one thing:

Most of you hope to find a job in a company of sufficient stature in its industry to supply a real challenge to your brains and to your technical training.

A General Motors job in many ways gives you just such an opportunity. And here's why.

First—GM makes all kinds of products requiring all kinds of engineering talents—mechanical, electrical, metallurgical, chemical and industrial. These products range from automobiles, refrigerators, and fractional horsepower motors to Diesel engines.

And, as a leading defense contractor, GM runs the production gamut from shells, bombsights and range finders to tanks and jet and Turbo-Prop engines.

Second—all this huge variety of work is decentralized among GM's 34 manufacturing divisions, its 112 plants in 54 towns and cities throughout the country. And each division operates as an independent unit with its own engineering department. Yet each can draw

upon the resources of GM's central research and engineering laboratories.

Thus you have—at one and the same time—the friendly, personalized setup of a smaller company and the opportunities and facilities of a large successful organization—a leader in many major fields.

All of this naturally spells out a real chance and a real challenge for the man who has the get-up-and-go to make the most of what GM has to offer. Many engineering graduates now in top jobs at GM testify to that fact.

So why not check with your College Placement Office and arrange for an interview with our GM College Representative the next time he visits your campus or write direct to us.

GM POSITIONS NOW AVAILABLE IN THESE FIELDS:

Mechanical Engineering • Electrical Engineering
Metallurgical Engineering • Industrial Engineering
Chemical Engineering • Business Administration

BETA SIGS CONTENDING IN FABULOUS WEIGHT REDUCING CONTEST

After a fine Homecoming week-end, the men of Beta Sig are now settling down to the books once more. The house is finally in good shape after numerous parties. All the Alumni had a good time and the whole house was glad to have them aboard.

Congratulations to Paul Egan and Jim Sommerer in running the cross-country race. Paul came in fifth and Jim finished in eighth place giving Beta Sig second place team total.

The basketball team has been working out regularly and is in fair condition for their first game which is this week. The handball doubles team won their game Monday afternoon and also play again this week.

A fabulous weight reducing contest is going on in the house. The contestants are, "Pat Gut", and Keel "Chow Hound", Zoelick and "The Chest", Piehler. The winning contestant receives two quarts of beer from the other two.

Big game hunter Jack Weber brought his safari in from the wilds of the clay pits with one monstrous trophy. The safari party consisted of George Stourton, Don Haber, Leo Brockmann, Jack Weber, and Ralph Sundermeir. The trophy was one cottontail rabbit.

SIGMA NU

(Continued from Page 1)

and for acting as the Host at all the functions.

Well, now that all the formalities are over with, we can review all the odd things that happened over the week-end. All the Alumni seemed to be glad to be back and gave us a token of their appreciation which will be put into our fund for the new House. There was very little bird-dogging and switching of dates at this party. Someone mentioned that the "punch" at our "get-together" party Friday afternoon was a little strong. Said that the Alumni and fellows after the week-end had gotten together (under the table) quite well. The pledges complained less. Must be they didn't work too hard. Everyone seemed to be latching on to everyone else's "brew". Nothing so odd about that tho. We wish that someone would buy pledge "Slew-foot" Sam some shoes with cleats so that we will be able to have some dishes left to eat on.

There was a lady looking for her husband, Mr. Bob Peters. She opened the barbershop door and hollered it: "Bob Peters here?"

Barber (wearily): "No, we cut hair."

Meeting and Banquet Of St. Louis Section AIEE Held in Rolla

On Friday night October 31, 1952, the St. Louis Section of the AIEE held its annual joint meeting with the AIEE student branches located in the St. Louis Area.

The meeting and the banquet preceding it, were held at the Hotel Edwin Long in Rolla, Missouri, site of the host student branch from the Missouri School of Mines and Metallurgy, the other student branches attending were St. Louis University and Washington University from St. Louis and Missouri University from Columbia. The meeting is an annual event alternately held at the Missouri School of Mines and Metallurgy and at Missouri University.

The featured speaker of the evening was Mr. George J. Fiedler, Chief Instrumentation Engineer for Sverdrup and Parcel Inc. of St. Louis. Mr. Fiedler spoke on, "Instrumentation and Control of Guided Missiles", and illustrated his subject with the aid of slides. Within the limits of security regulations he described the application of optical, radar, radio dapper, telemetering, and computing equipments to the flight testing of missiles.

Other speakers at the meeting Prof. I. H. Lovett, Chairman of the Electrical Engineering Department of the Missouri School of Mines and Metallurgy, who gave the welcoming address; Mr. James S. Malsbary, Chairman of the St. Louis Section of the AIEE, who thanked the most branch for its work in holding the meeting, and Mr. R. C. Hase, Chairman of the Student Activities Committee of the St. Louis Section, who spoke on the student branches and their activities.

The total number attending the event was 110 persons. The host student branch had 45 attending while the traveling delegations include 18 from the St. Louis Section, 18 from Missouri U. 15 from St. Louis U. and 14 from Washington U. The computation of the distance traveled by those attending totaled 6,500 man miles with 65 persons each coming approximately 100 miles.

The next joint meeting will be held in the fall of 1953 at Columbia, Missouri with the University of Missouri Student Branch acting as the host.

TEKES FACE MID SEMESTER BRAVELY

By Joel Cooksey

The fraters over at the Tekes house, having recovered from the hard homecoming weekend were immediately faced with a series of mid semester exams, which many say was worse than the weekend. Truly though, everyone had a wonderful time over the weekend: meeting old friends; and all those beautiful young ladies running around all over the campus. While most of them had dates it was still a pleasure to admire them.

Of course everyone went around to all the fraternities to

Boy! That's what I call a real drink.

MR. H. G. POERTNER SPEAKS TO ASCE AT THEIR LAST MEETING

On this coming Wednesday, November 19, the Missouri School of Mines Student Chapter of the American Society of Civil Engineers will be privileged to hear Mr. William J. Hedley, Assistant Chief Engineer of the Washburn Railroad. Mr. Hedley is well known in engineering circles, but especially around the Greater St. Louis area, because of his very active participation in the Engineers Club of St. Louis of

admire their beautiful house decorations. Triangle seemed to have put in a lot of time on theirs and they should be complimented. Everyone surely got a good laugh from the Pikers achievement and the Sigma Nu theme. Honestly — we planned ours — we didn't just go out and throw some paint on a few boxes. For the sake of those of you who can't read, that was a bulldozer. As Tom Koederitz said, "we used to win first prize," but that was in years gone by.

The active chapter seemed very worried the first part of this week. They thought the Pledges were going to pull their skip night Wednesday, but much to their surprise everyone was there for dinner, and they seemed very relieved to say the least. Don't worry, the pledge class will have their skip night. But they'll never know! Some plans have been made: who knows? It might even be Monday.

Some one give us the low-down quick!! Is the active chapter trying to make an old married man's club out of the house. Two more activities have given up their pins to a member of the opposite sex (ah-that word). Congratulations to Jack Humphrey on his pinning of Sally from Stephens College, and to Bob Hoffman who pinned Mary Hausser, from Ill. State Normal. Those two fraters have been going in a daze ever since. Love must be. Think I had better close now before I fall from exhaustion. wonderful??

which organization he is a past president. Accordingly, his topic, "The Three E's in Engineering" should be extremely interesting, and undoubtedly, a little out of the ordinary. The program will begin with a short business meeting at 7:30 p.m. and will be held in Room 300, Harris Hall.

At the last meeting, Mr. H. G. Poertner, Structural Engineer of the Portland Cement Association spoke on the "Uses and Types of Concrete Construction in and around St. Louis." His talk was illustrated with slides and a movie on hyperbolic arches and thin shell construction. Mr.

U. of Toledo Starts Evening Classes

Toledo, O.—(I.P.)—All classes at the University of Toledo will be scheduled to meet on even hours beginning this fall, it was announced here jointly by Dean of Students Donald S. Parks and Dean Andrew J. Townsend of the College of Arts and Sciences.

This will make possible the reservation of the hour from 11:00 a.m. to 12:00 p.m. on Monday, Wednesday, and Friday for convocation and organization meetings. The change in schedule is being made to provide a common free hour in an effort to coordinate student activities and stimulate wider student participation.

According to the proposed

Poertner's talk was thoroughly enjoyed by the numerous members and guests attending, and left several openings for continuance of thought.

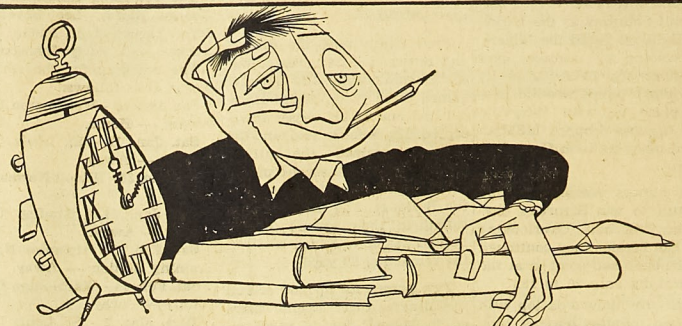

plan, convocations will be held every other Monday. The free time on the other two days will be available to organizations, band practice and the ROTC. These will be centrally scheduled to avoid time conflicts.

It was pointed out here that it has long been a policy for students to join as many activities as possible inasmuch as the number of memberships are stressed in qualifying for certain honorary recognition. While this results in active participation by a few, often a student finds himself affiliated with so many organizations that neither he nor the group benefits. A further complication is presented in securing faculty participation. A survey conducted last year revealed that twenty faculty members served as advisors to 47 of the 94 groups on campus. This free hour, it was stressed, should enable wider faculty participation to become a reality also.

STUDENTS!

Make \$25.00

Write a Lucky Strike jingle!

No box tops! NO ENTRY BLANKS! It's easy!

Just write a 4-line jingle based on the fact that

LUCKIES ARE MADE BETTER TO TASTE BETTER!

We heard the same in every class—
In history, psych, and ec—
For cleaner, fresher, smoother smokes,
it's Lucky Strike, by heck!

I like a better-tasting smoke
And mildness counts with me.
So when I buy I keep in mind
That L.S./M.F.T.!

HERE ARE THE INSTRUCTIONS

1. Write your Lucky Strike jingle on a plain piece of paper or post card and send it to Happy-Go-Lucky, P. O. Box 67, New York 46, N. Y. Be sure that your name, address, college and class are included—and that they are legible.
2. Base your jingle on any qualities of Luckies. "Luckies are made better to taste better," is only one. (See "Tips to money-makers.")
3. Every student of any college, university or post-graduate school may submit jingles.
4. You may submit as many jingles as you like. Remember, you are eligible to win more than one \$25 award.

*TIPS TO MONEY-MAKERS

To write a winning Lucky Strike jingle, you're not limited to "Luckies are made better to taste better." Use any other sales points on Lucky Strike such as the following:
L.S./M.F.T.
Lucky Strike Means Fine Tobacco
Luckies' cigarette-tearing demonstration
Luckies taste cleaner, fresher, smoother
Be Happy—Go Lucky
So round, so firm, so fully packed
So free and easy on the draw
Buy Luckies by the carton
Luckies give you deep-down smoking enjoyment
